The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 200 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $100,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary beach or sea sand, or such as is found in the placer lands of Arizona and California, put into the sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

Russian Warships Torpedoed, The Attack was Made in a Blinding Snowstorm At Port Arthur

Special to THE TIMES.

London, Feb. 17.—A despatch to the St. James Gazette, from Kobe, Japan, in reporting the Japanese naval attack on Port Arthur, February 14, says the Russian guardship in the harbor and another Russian warship lying outside the harbor were torpedoed, and that the Japanese retired without sustaining any injury.

Paris, Feb. 17.—An official despatch received here this morning from Tokio announces that one of the most important movements of Japanese troops yet made is occurring today. One of the main branches of the army, consisting of three divisions and including a division of guards, is now going on board transports. The previous landings of Japanese forces in Korea and elsewhere are said here to have been small compared with this simultaneous sailing of three divisions, aggregating approximately an army of 30,000 to 50,000 men. The Japanese authorities, it is added, had taken every precaution to prevent information from going out concerning the embarkation and the destination of this army.

It is believed, but this is not sure, that the destination of this force is a point near the mouth of the Yalu River, or a spot on the Liao Tung Peninsula, flanking Port Arthur.

Port Arthur, Feb 17.—The reports that the Japanese have concentrated about 60,000 troops at Wonson (on the coast of Korea) with the obobject of entering manchuria, are confirmed.

The Blow Is Irreparable

Pekin, Feb. 117—The universal opinion here is that Russia's position is almost hopeless. The events of the last ten days are regarded as having given Russian prestige a blow that is almost irreparable. It is believed that Russia will have to submit to the indignity of seeking a pacific issue from the present troubles. Japan seems to be mistress of the sea in every quarter which can be regarded as critical or important.

Tokio, Feb. 17—Admiral Togo is the popular idol of the hour. The people are delighted at his great victory and are parading the streets of Tokio and shouting his name with enthusiasm. The victor of Chemulpo also comes in for a share of the applause, but Admiral Togo is undoubtedly the first favorite. Up to today Japan successfully landed from 75,000 to 150,000 of her troops in various parts of Corea. Japan's victories have not unduly elated either the civil or military leaders. They have full confidence in the ultimate issue, but regard the work still in hand as serious beyond all power of exaggeration.

NEUTRAL SHIPS RELEASED AT LAST

Russian Authorities at Port Arthur Forced to Act

ARE SEIZING SUPPLIES

The War is Likely to Involve Other Nations

Yingkow, February 18. — The administrative authorities at Port Arthur have formally notified the American and British consuls of the release of the neutral ships which had been seized. Both consuls had asked for explanations. The civil administration at Port Arthur has intimated that Viceroy Alexieff will not recognise the consuls in matters relating to Port Arthur and Manchuria.

In answer to the demand of the British government for an explanation of why British ships were held up by the Russians at Port Arthur, Viceroy Alexieff replied that the vessels were detained because they had Japanese on board. The shots fired on the British steamer Fu Ping by the Russian guardship at Port Arthur as the Fu Ping was leaving that port last Tuesday were, the viceroy says, due to a misunderstanding on the part of the officers of the guardship.

The Russians are seizing supplies at New Chwang and the Chinese are alarmed and are closing their shops and placing their possessions under foreign protection. The Russian residents of New Chwang, fearing that the army will be unable to protect them and their property, are depositing their treasure under the jurisdiction of foreign flags. The Russians freely admit that their unpreparedness of the Japanese attack to have been a terrible blunder. Only half the ships were in line of battle and their officers were ashore celebrating the anniversary of Viceroy Alexieff's birthday. A stirring episode was the re-entrance into the harbor of the warships Czarevitch and Novik, after the fight. They came under their own steam, with bands playing and men cheering. Throughout the afternoon and night of Feb. 9 wounded men were being removed to the shore.

JAPS ILL-TREATED AT PORT ARTHUR

Brutal Conduct of Russians at Manchuria

MANY SEVERLY BEATEN

Women and Children Abused by Russian Officers and Mob

New Chwang, Feb. 18—About fifty Japanese men on their way to Tien-Tsin were arrested at Tai Hsh Chou on Feb. 12, with their women, and arrived here in custody. The American consul, Henry B. Miller, procured the release of the women, but Viceroy Alexieff ordered their re-arrest and transportation, together with all the Japanese in Manchuria, to Port Arthur. Mr. Miller based his action on assurances the Russians gave the Japanese consul that all Japanese subjects would be protected and permitted to leave when they desired. There are numerous Japanese complaints of Russian ill-treatment. It is said 400 Japanese refugees from Harbin, who arrived at Mukden, were arrested, and many of them were severely beaten and detained until they purchased their release. When they were liberated the Japanese were sent in open trucks, to Tai Hsh Chou, where they were again maltreated and sent on to Port Arthur. Some of their women were sent to New Chwang. Consul Miller took the women under his protection and sent them to Shan Hai Kwan. Mr. Miller protested to the civil administrator against the cruel treatment of the Japanese refugees by Russian soldiers and requests a census of all Japanese transported to Port Arthur.

The consul himself was menaced by a Cossack without provocation, and the officer commanding at New Chwang pressed his regrets and promised to severely punish the Cossack. The civil administrator promised to afford better protection to the refugees.

Independent officers say the Czarevitch, Retvizan, Pallada and Novik damaged in the first naval battle off Port Arthur, cannot be repaired in time to decide the command of the sea. They also say the Russian land forces are demoralised. They are trying to watch the entire coast. The constant telegraphic interruptions threaten to complete the isolation of the war zone, except by despatch boats. Admiral Alexeff has forbidden all ships to enter any of the ports of the Liao Tung peninsula. It is understood that his object is to carry out the defenses of the harbors which hitherto have been neglected. Foreigners are not permitted to move without military permits. The foreigners at Mukden, apprehending a Chinese outbreak, were sending missionaries with families away. There are about 2,000 Chinese now at New Chwang.

AROUND THE FIRE HALL.

Chief Rutherford Expresses Himself Some Good Suggestions

The Times spent a pleasant half hour with the genial chief of the town fire brigade yesterday, and during the conversation the latter expressed himself as favorable to an improvement of the present system. In regard to improved fire alarms and appliances, the chief claimed "what we want here is the Gamwell system." After a brief explanation he went on,—"We want a large bell striker and also about 15 boxes covering the whole corporation of the town of Peterborough. Every box should be connected with an electric gong on the large bell, and the result would be that every fireman would then know the exact location of any fire, as soon as the large bell rang.

"As regards the present fire station, it is too small to hold the requirements of a fire brigade for any town of this size. A new fire station should be built with accommodation for three teams, as the present premises are so small. No fault is to be found of course with our volunteer system, as it has proven itself to be one of the best in Canada, but these improvements must be made in the near future," concluded the Chief as we shook hands.

It pays to advertise in The Morning Times.

Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

ters from prominent people regarding the Bannie Mine

HN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully.

DENNIS A. BURKE, Mayor of Prescott, Ariz.

KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear property well and favorably spoken of by parties who have been on ground and whose opinion should carry considerable weight; and the that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

OHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. Bannie mine is considered by all mining men here to be one of the prospects for a big mine in this part of the country. The officers are men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

OHN BROS, Cincinnati, O. Prescott, Ariz. 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— • • • • • The nature of the ore is a heavy iron, and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

WILL THE WAR SPREAD? IS NOW BEING DEBATED

Dager in the Balkans Becoming More Acute Than Ever Before

INSURRECTION IN THE BALKANS NOW CERTAIN

This is Believed to be the Forerunner of a General World-Wide War Which Would Be Very Disastrous

Special to The Times.

Paris, Feb. 18. — The news from Macedonia is not at all assuring. It is an open secret that a rebellion of gigantic proportions is under way, in which Europe must take a hand.

The organ of the French foreign office views the outlook as most serious. It says;

"Now that one of the mandatories of the powers in adjusting the Balkan situation is incapacitated by having to attend to its own affairs, it is desirable that the collective powers recover their liberty of action and together use their own initiative."

It is admitted that should Russia sustain further reverse, Abdul Hamid would openly cast off all schemes directed at controlling his European provinces. The Macedonian committee has now ample funds. They have agents in London buying arms on a large scale. An Austrian firm has just secured a contract to carry 200 truck loads of guns, rifles and cartridges of French manufacture for the Bulgarian government, which has called out the reserves of three classes, giving as a reason the violence of the Turkish troops on the frontier.

Turkey has promptly made Russia's military necessities the occasion for repudiating the only operative port of the Russo-Austrian reform scheme for Macedonia. The Italian general Georgis, who was recently appointed to the command of the Turkish gendarmerie, has been practically superseded, the sultan making him only an inspector-general under Mustapha Pasha. As commander-in-chief of all three provinces in Macedonia, Mustapha is ready to assume the aggressive against Bulgaria the moment the annual sorties across the Macedonian frontier commence. The Bulgarians are not less eager to fight. They say that this is the best year within the memory of those living, to free their countrymen across the border. Since the failure of the rising last spring they have been collecting war funds and armaments. Support for their cause from disinterested friends of freedom is now more cordial, since the situation precludes Russia from playing a masterful hand in the near east.

WAR WILL SPREAD

This, of course, is based on the assumption that the war will be confined to Russia and Japan. The consensus of European opinion on this point is that Japanese success will tend to reduce the danger of a further spread of the war. It would be absurd for France to go to Russia's assistance if the latter is unable to withstand Japan's assaults, even if Japan should drive her opponent from Manchuria. In the latter event indeed, it would be most probable that the powers would endeavor to arrange peace.

On the other hand, the contingency of a swift Japanese success in the far east is beginning to give rise to some apprehensions. Even Japanese sympathizers do not see an unmixed blessing in the wholesale defeat of Muscovite power. It would mean Japanese supremacy in China in all but technical sovereignty and the rapid development of the latent military power of the Chinese. A revival of the apprehension of the domination of the yellow races would follow. Europe, on the whole, therefore, hardly desiring the overwhelming success of either belligerent.

MAY FORCE AN EARLY PEACE.

Already there is talk that Japan will follow up her present advantage at such a terrific pace that Russia will seize upon the outbreak of hostilities in the Balkans and impending domestic uprising as an excuse to make early peace, with the intention to renew the struggle when she is really prepared, which at the present moment she certainly is not. Political circles scout the idea, saying that it would involve the confession that Russia is now only a third-rate power, whose vast bulk is scarcely a greater element of strength than that of China. Diplomatists argue that Russia must retrieve her reputation as a fighting force at any expense of men and treasure.

It is necessary, to have a full understanding of the great importance of Secretary Hay's proposals to the powers, to make clear the whole purpose of the Russian war party, which deceived and forced the czar into hostilities. It was and still is their purpose to conduct the campaign with the sole object of gaining Pekin before it is ended. The policy will be, at some point during the war, to incite and manoeuver China into some action which can be construed into a violation of neutrality. Then the troops will march on to Pekin and depend upon Germany and France to co-operate against any diplomatic efforts to displace them.

This secret purpose is so well understood in diplomatic circles that Secretary Hay's note was warmly welcomed in all except pro-Russian quarters. Mr. Hay's note is recognised as the most effective method of offsetting that conspiracy, and is one which Russia herself will have the greatest difficulty in finding plausible grounds for opposing. The impression prevails, however, that it will be impossible to prevent both Corea and Manchuria from becoming virtually the prize of the victor. Prompt and definite action by the powers at the present moment, should, however, suffice to prevent any further dismemberment of China

FOR HUSBAND'S DEATH

Mrs. Cameron Hagersville Sues Mr. A. C. Douglas for $5,000 Damages

Hamilton, Feb. 18—Mrs. Mary Cameron, of Hagersville, has through Staunton & O'Heir, her solicitors, issued a writ against A. C. Douglas, a contractor, for $5,000 damages for the death of her husband. On Oct. 15 last John Cameron was working in an underground tunnel when a heavy piece of rock fell, injuring him so severely that he died on Oct. 25. His widow claims that his employer, Mr. Douglas, or his servants, were negligent, and for that reason is asking for heavy damages. The writ was issued here yesterday morning.

STORM ON LAKE BAIKAL

Transportation of Russian Troops Seriously Delayed

London, Feb. 18—A dispatch to the Daily Telegraph from St. Petersburg states that a message from Missovia says that one of the dreaded storms which are the terror of Lake Baikal, has broken out. This is most unfortunate, as the ice on the lake, over which the rails are being laid, is splitting. It has broken for several versts from Tanhoi, leaving open gaps several yards wide. These will have to be filled in with blocks of ice. The shortage of wood for sleepers delays the completion of the work.

CURE FOR APPENDICITIS

Patient Has But to Walk on All Fours Four Times Daily

Berlin, Feb. 17—The medical journals report some remarkable cures of mild cases of appendicitis are being made by a new method of treating the disease before the knife is needed. Certainly it is an original —almost an aboriginal—method.

It is nothing less than to require the patient to walk on all fours for twenty minutes four times a day. It is claimed that certain muscles around the vermiform appendix are brought into play and strengthened by this quadrupedal cure, which are unused when a biped walks erect. Others are relaxed, and the localized inflammation has opportunity to subside.

A well-known diplomat, celebrated for his haughtiness and punctiliousness, was cured of beginning appendicitis by this method lately. His associates and the fashionables are laughing in their sleeves when their imaginations conjure up his proud excellency's posture while undergoing treatment. The four-footed dose is recommended in dyspepsia, too, but, of course, it should be taken before meals.

RUSSIANS LASHED INTO A FURY

Populace Now Resembles a Wounded Bear

PATRIOTIC DEMONSTRATION

St. Petersburg Going Wild Over the War With Japan

St. Petersburg, Feb. 18—For the first time since the beginning of hostilities in the far east, the government last night gave the Russian newspapers permission to publish the accounts received abroad of the naval engagement off Chemulpo, in which the warships Variag and Korietz were destroyed. The war fever which has been aroused here, and apparently all over the Empire, or at least, all over European Russia, in a single week is truly remarkable. Such patriotic demonstrations as have been witnessed in St. Petersburg since hostilities began have been all the more astonishing, because of the public indifference during the period of negotiations, and almost up to the hour when Japan struck the first blow at Port Arthur. But now, like a flash, the whole empire seems to have been lashed into fury by defeat and, like a bear when it is wounded and angered, is prepared to fight to the bitter end. The dreamy Russian character has been stirred to depths of resentment which it will be difficult to understand abroad.

PATRIOTIC DEMONSTRATIONS

The patriotic demonstrations here have been also entirely spontaneous. Some of them were extraordinary in character. Yesterday the school boys and students of the city, numbering thousands, marched bareheaded for for hours up and down the Nevsky Prospect, bearing flags, shouting and singing patriotic airs. They were followed by an enormous crowd. Like previous processions, this one went first to the Anichkoff palace, where the dowager empress, who is very popular with the people, showed herself. Later the boys and students surrounded the Winter Palace, and in response to their enthusiastic cheers, the Czar and the Czarina made their appearance. When the Czarina blew kisses to to the boys, a vast shout went up which waked the echoes across the Neva.

At the French embassy, which was next visited by the procession Madam Bompard was compelled, in the absence of the ambassador, to appear at a balcony and acknowledge the cheers for Russia's ally. In front of the barracks the various regimental bands in the city played the National Anthem to the hurrahing of the crowds.

There were demonstrations at night outside the theaters, and the performances going on inside were stopped while the orchestras came out to the street to play the folksongs of the soldiers. The fact that the poorhouse porters pay their last cent for the extra editions of the newspapers, and that the cab drivers do not charge military men for carrying them around shows the deep feeling of the people.

Telegrams from almost every town in European Russia tell the same story of popular demonstrations. At Moscow there were great manifestations in front of the palace of Grand Duke Serge, and before the Iberian chapel, where stands the sacred image of Our Lady of Iberia, before which the Czar invokes blessings when he goes to Moscow. Thousands of persons knelt for hours in the snow in front of the chapel praying for victory.

FEARS A GENERAL WAR

DR. TOYOKICHI IYENAGA SAYS HAY'S PROPOSAL SHOULD BE ACCEPTED

Japan He Declares Is Not After the Capture of Port Arthur At Present

Chicago, Feb. 17—Prediction that a world-war, in which the United States would be involved, was an almost certain outgrowth of the conflict between Russia and Japan, was made yesterday by Dr. Toyokichi Iyenaga, formerly a secretary in the foreign department of the Japanese government, and at present a lecturer upon the political problems of the Orient. He said;

"I have always maintained that the United States and England should join with Japan in settling the eastern question in the interests of civilization. The United States has already taken a strong stand in the affair, and has done just what Japan wanted.

MAY FORCE TO ACTION.

"If the proposal which has been made by the United States is not accepted by Russia, it is probable that she—and in the end each of the great powers—will be forced to take up arms in the Orient.

"The real significance of Japan's naval campaign has not yet been pointed out in the press of this country. Japan has not been trying to capture Port Arthur, but only to bottle up the Russian fleet in the Port Arthur harbor, so that troops can be poured into Corea and Manchuria without molestation from Russian ships.

JAPANESE WELL POSTED.

"The Japanese generals and soldiers know every inch of the ground in these two countries and perfect maps of the district which is destined to be the theatre of war are in possession of the Japanese war department."

Toyokichi Iyenaga has just completed a series of lectures at the university of Chicago and will soon leave this city for Brooklyn, where he will lecture upon the eastern problem before the Institute of Arts and Sciences.

London, Feb. 18—A telegram received in London yesterday afternoon reports that the Russians bombarded the town of Fukuyama, at the southwestern extremity of the Island of Yezo. The vessels which did the bombarding are supposed to have been the cruisers that have been sunk by Japanese torpedoes in Tsurga straits.

The Straits of Tsurga are between the Island of Hokkaido, the northern of the three Japanese islands, and Nippon, the central island.

Died in the Hospital

Mr. M. D. Sullivan, of Emily township, took ill about a week ago, and was sent to Toronto Hospital, where his death took place. His remains arrived here on the 5.30 train Wednesday. He was a son of the late Andrew Sullivan, of Emily.

To Our Readers

We would ask our subscribers to bear with us during the cold snap, as we are greatly handicapped in getting out our paper, owing to insufficient power. We are ready for the press at 4 a.m., but, as our machines are operated by electric power, and this having been shut off for some days, we find it impossible to get our paper around as early as usual.

Should Women Smoke?

The London Chronicle is discussing the question, "Should women smoke," and we select the opinion of a prominent English physician on the subject;

Mr. William Henry, D.Sc., says that when smoking agrees, and is judiciously practised, it does a woman good, soothes her nerves, refreshes her brain, aids her digestion, allays her bodily fatigue, and acts as a useful aperient. But she should not inhale or drink alcohol, while she is smoking. At clubs, she often does both. Women, adds the writer, should eschew the pernicious cigaret, both for the sake of their eyes and their teeth, or use a "holder." Better still, they should smoke a long clay pipe. The old-fashioned "churchwarden" is the most healthy of all pipes. I suggest the founding of a "Woman's Churchwarden Club." A pretty woman emitting occasional graceful whiffs from such a pipe and in intervals daintily toying with its stem would present a charming sight.

Perhaps some of The Times readers would like to express themselves on this subject.

—Work on Roy's new studio is progressing satisfactorily, notwithstanding the cold weather.

—Ping pong! At half price! A consignment of fine sets has been purchased at reduced rates and they will go while they last at half price. At the Times Bookstore.

FOREST MINING CO.'S

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.60 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.90 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.66 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite), and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co., Fiscal Agents, Sumpter, Ore.,

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,800 feet.

In addition to the above there are four small shafts, with a combined depth of about 200 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air p into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.

FISCAL AGENTS)

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

PROSPFCTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000 80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
J[illegible] A THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B F BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM [illegible] CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is [illegible] feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 6.02 ozs.; Silver 92 40 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 4[illegible]; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the [illegible]perty in July, 1903, and found everything as above. We have had [illegible]perty surveyed, and are now working on the spur vein in the tun[illegible]g out high grade ore. We shall also continue the tunnel so as t[illegible] depth the above immensely rich vein as soon as possible.

The property is fully paid [illegible] fact, there is no indebtedness whatsoever. The ore is of such [illegible] that it does not need milling, as it is already concentrated.

[illegible]NESS OF ORE

The great rich[illegible] ore gave the property a name and fame second to no other mine in [illegible]er Colorado. The first class ore having a value of $800.00 per ton [illegible] it was assorted and sold. We believe a little money judiciously ex[illegible]ed upon the property will prove it to be as valuable as it was ever c[illegible]d to be, and possibly of very much greater value.

I[illegible] notorious fact that some of the largest producers in the San Juan [illegible]trict to-day (and most valuable mines) were abandoned about the sa[illegible]me work was discontinued upon this property and that they remain[illegible]o for years Notably the old "Hotchkiss" and the "Camp Bird" owned [illegible]y Thos. Walsh, recently sold for $5 500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn,, who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMP

Incorporated Under the Laws of the State o California.

La Zalualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain that the interest of each shareholder is protected as well as the interests of all others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placer in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

THINGS CHINESE.

Many Chinese temples have windows made from mother of pearl found in oyster shells. The material is transparent and looks like opal glass.

The best quality of Chinese tea is very expensive and so little of it is grown that there is never any of it to export. The Chinaman knows good tea and keeps it all for his own consumption.

The Chinese think they occupy the middle of the earth, and that all other nations are merely dwelling on the edges. Their most respectful term to designate a foreigner is "the ocean men."

Millions have been spent in civilized countries in futile efforts to preserve grapes. The Chinese have known the secret for many centuries, and millions more have been vainly used in the effort to drag from them the recipe.

In northern China hot-water peddlers go about with a whistling kettle—the whistle announcing that the water is at a boiling point. When they hear the whistle the people run with their teapots and buy enough hot water for their day's tea.

A celebrated Chinese dancing master, Hung Foo-Choo, announces in a Chinese paper that he is to hold a religious service, to which he invites everybody, in honor of the 1000th anniversary of the death of his ancestor, who was the first of the family to take up the profession.

A curious industry in some of the provinces in China is the manufacture of mock money for offering to the dead. The pieces are only half the size of the real coins, but the dead are supposed not to know the difference. The dummy coins are made out of tin, hammered to the thinness of paper, and stamped out to the size required.

BACHELOR'S REFLECTIONS.

No man loves his baby at first; he has to get used to it like a baseball finger.

It always makes a girl mad to be scared by a mouse when there aren't any men around.

Any man can get any woman to marry him if he only proposes to her in enough different ways.

It is generally easiest to kiss a woman right after you have begged her to forgive you for something.

After a man has argued a certain time with a woman he is either convinced or else he is willing to admit he is.

A man judges a woman's heart by her face; a woman judges a man's face by his heart.

A woman who loves too much sometimes loses, but a woman who loves too little never gains anything worth losing.

The women have got up a new story now about a girl that was so sensitive that it made her seriously ill to be kissed.

Every girl has an idea that when she is telling a man she loves him he will see her whole soul looking at him in her eyes.

Whenever a woman sees a picture in a book of a woman kneeling at a man's feet she feels that she ought to read it herself before she lets her daughter.

As soon as a woman falls in love her complexion gets better.

If modesty was the fool-killer most women would die of old age.

Anecdotal.

An old Scotchwoman when advised by her minister to take snuff to keep herself awake during the sermon, replied: "Why dinna ye put the snuff in the sermon, mon?"

A well known landscape painter was busy "dashing in" the colors of a sunset in the country. The tints were hurriedly conveyed from tube to palette, and from palette to canvas, for the artist was anxious to catch the effect. A rustic standing by observed the operation for a little while, and then remarked: "Ah, you be a-painting two pictures at once. That's clever." He paused a moment, and blurted out: "I like that picture best—the one you've got your thumb through!"

According to the "Scottish American," the following was overheard in a London railway refreshment room: An Aberdeen man, noting a woman eating an ice, said to the waiter: "Hi, man, gi'e me yin o' thae." Being supplied, he took a spoonful, and made a wry face. "I'm dootin' it's a bit frost-bitten, mister," said he. "Oh, no, sir," remarked the waiter. "It's an ice." "Gosh! Do they eat ice in London?" asked the wondering Aberdonian. "Man, we slide an' skate on't in Aberdeen!"

The quickness and felicity of Hon. William M. Evarts in the line of repartee is pleasantly illustrated anew by President Timothy Dwight in the following story from "Memories of Yale Life and Men:" On one occasion, writes President Dwight, at one of our Yale commencement dinners, I had the duty, as the presiding officer, of introducing the speakers. In performing this duty with reference to Mr. Evarts, I said, in allusion to the well-known length of his sentences in public address: "Mr. Evarts will now give us a single sentence." He rose and instantly replied: "It will be a life sentence."

An instructor at Cornell University who was one of Dr. Goldwin Smith's pupils when the latter was a professor there, says: "Dr. Smith was describing to us one morning the difficulty of making young men understand things quite unfamiliar to them. He said there was once a blind youth to whom he tried for a long time to explain the nature of light. He made this subject of light as clear as he could; it seemed to him that he had explained it perfectly, but at the end the young blind man said: 'Then I am to understand, sir, am I not, that light is composed of very much the same material as sugar?'"

"There is something," he said, "that I have wanted to tell you for a long time, but——"

"Oh, Bertie," she said, blushing sweetly, "not here in the car before all these people. Wait. Come this evening."

"It's merely that you have a streak of soot down the middle of your nose, but I couldn't for the life of me get a word in till just now."—Chicago Record-Herald.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,603 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a [illegible]

Like its sister Company is to day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR B. GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5?? feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5 500,000 (now claimed to be worth $15,000,000) About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMP

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

THINGS CHINESE.

Many Chinese temples have windows made from mother-of-pearl, found in oyster shells. The material is transparent and looks like opal glass.

The best quality of Chinese tea is very expensive and so little of it is grown that there is never any of it to export. The Chinaman knows good tea and keeps it all for his own consumption.

The Chinese think they occupy the middle of the earth, and that all other nations are merely dwelling on the edges. Their most respectful term to designate a foreigner is "the ocean men."

Millions have been spent in civilized countries in futile efforts to preserve grapes. The Chinese have known the secret for many centuries, and millions more have been vainly used in the effort to drag from them the recipe.

In northern China hot-water peddlers go about with a whistling kettle—the whistle announcing that the water is at a boiling point. When they hear the whistle the people run with their teapots and buy enough hot water for their day's tea.

A celebrated Chinese dancing master, Hung Foo-Choo, announces in a Chinese paper that he is to hold a religious service, to which he invites everybody, in honor of the 1000th anniversary of the death of his ancestor, who was the first of the family to take up the profession.

A curious industry in some of the provinces in China is the manufacture of mock money for offering to the dead. The pieces are only half the size of the real coins, but the dead are supposed not to know the difference. The dummy coins are made out of tin, hammered to the thinness of paper, and stamped out to the size required.

BACHELOR'S REFLECTIONS.

No man loves his baby at first; he has to get used to it like a baseball finger.

It always makes a girl mad to be scared by a mouse when there aren't any men around.

Any man can get any woman to marry him if he only proposes to her in enough different ways.

It is generally easiest to kiss a woman right after you have begged her to forgive you for something.

After a man has argued a certain time with a woman he is either convinced or else he is willing to admit he is.

A man judges a woman's heart by her face; a woman judges a man's face by his heart.

A woman who loves too much sometimes loses, but a woman who loves too little never gains anything worth losing.

The women have got up a new story now about a girl that was so sensitive that it made her seriously ill to be kissed.

Every girl has an idea that when she is telling a man she loves him he will see her whole soul looking at him in her eyes.

Whenever a woman sees a picture in a book of a woman kneeling at a man's feet she feels that she ought to read it herself before she lets her daughter.

As soon as a woman falls in love her complexion gets better.

If modesty was the fool-killer most women would die of old age.

Anecdotal.

An old Scotchwoman when advised by her minister to take snuff to keep herself awake during the sermon, replied: "Why dinna ye put the snuff in the sermon, mon?"

A well known landscape painter was busy "dashing in" the colors of a sunset in the country. The tints were hurriedly conveyed from tube to palette, and from palette to canvas, for the artist was anxious to catch the effect. A rustic standing by observed the operation for a little while, and then remarked: "Ah, you be a-painting two pictures at once. That's clever." He paused a moment, and blurted out: "I like that picture best—the one you've got your thumb through!"

According to the "Scottish American," the following was overheard in a London railway refreshment room: An Aberdeen man, noting a woman eating an ice, said to the waiter: "Hi, man, gi'e me yin o' thae." Being supplied, he took a spoonful, and made a wry face. "I'm dootin' it's a bit frost-bitten, mister," said he. "Oh, no, sir," remarked the waiter. "It's an ice." "Gosh! Do they eat ice in London?" asked the wondering Aberdonian. "Man, we slide an' skate on't in Aberdeen!"

The quickness and felicity of Hon. William M. Evarts in the line of repartee is pleasantly illustrated anew by President Timothy Dwight in the following story from "Memories of Yale Life and Men:" On one occasion, writes President Dwight, at one of our Yale commencement dinners, I had the duty, as the presiding officer, of introducing the speakers. In performing this duty with reference to Mr. Evarts, I said, in allusion to the well-known length of his sentences in public address: "Mr. Evarts will now give us a single sentence." He rose and instantly replied: "It will be a life sentence."

An instructor at Cornell University who was one of Dr. Goldwin Smith's pupils when the latter was a professor there, says: "Dr. Smith was describing to us one morning the difficulty of making young men understand things quite unfamiliar to them. He said there was once a blind youth to whom he tried for a long time to explain the nature of light. He made this subject of light as clear as he could; it seemed to him that he had explained it perfectly, but at the end the young blind man said: 'Then I am to understand, sir, am I not, that light is composed of very much the same material as sugar?'"

* * *

"There is something," he said, "that I have wanted to tell you for a long time, but——"

"Oh, Bertie," she said, blushing sweetly, "not here in the car before all these people. Wait. Come this evening."

"It's merely that you have a streak of soot down the middle of your nose, but I couldn't for the life of me get a word in till just now."—Chicago Record-Herald.

Tuberculosis of The Lungs Cured

The World's Greatest Physician Eulogize Catarrhozone, which kills all the Germs Heals the Membranes, Cures Thoroughly.

That consumption is due to the presence of germs in the air passages is now admitted by all physicians. Before the disease can be cured of course these germs must be killed. Liquid medicine taken into the stomach can't possibly reach the air cells of the lungs, and is therefore useless.

Catarrhozone never fails to kill the bacilli of consumption for the following reasons, which are plain to every thinking person;

First—Each breath of medicated air you draw through Catarrhozone inhaler is at once sent through every air cell and air passage in the throat, bronchial tubes and lungs; it is then sure to reach the nest of the consumption germs.

Being a powerful antiseptic Catarrhozone at once kills these germs and establishes such a healthy condition in the lungs that microbes can't live there. Once the cause of the disease is removed it is only a matter of time till you get well and strong again.

That Catarrhozone does permanently cure Tubercular Trouble can no longer be doubted. Ample evidence of its marvellous merit is witnessed every day. Thousands have been cured after all else has failed by this great germ destroyer, which is inhaled to the very source of the disease.

Mrs. G. P. McCluskly, writing from Salt Lake City, U.S., says; "My doctor ordered me to Colorado, where I first used Catarrhozone. I inhaled it probably twenty times a day. In one week it stopped my cough completely, and it was not very long in taking every bit of soreness and hoarseness out of my throat. The antiseptic vapor of Catarrhozone must certainly have killed all the germs of consumption in my lungs, for I came home in seven months a 'cure.' My doctor says Catarrhozone is a marvel. It is of the greatest assistance in lung trouble, and cured me permanently."

Not only consumption but every form of catarrh and throat trouble is easily cured by Catarrhozone. Two months treatment costs $1.00 At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont. For a quick and certain cure use only Catarrhozone.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Arrested for Theft

A man named Purcell was arrested near Port Hope the other day, on a charge of theft. P. C. Stewart left yesterday forenoon to bring the prisoner to Peterborough.

A New Arrival

Messrs. Capt. Angus Stalker, of Bowmanville, and Courtland Aggett, of Campbellcroft, purpose commencing business here in the near future. They will occupy the premises immediately west of the National Hotel, and will carry a complete stock of McCormick agricultural implements.

Fell from a Ladder

A man met with an accident at the O.G.E. Co.'s works, but only slight injuries were sustained. He was working on a ladder about ten feet from the ground when he suddenly missed his footing and fell heavily to the ground. Dr. McCulolgh was summoned, but on his arrival found the man was not seriously hurt.

Auctioneer Gardiner Speaks

Mr. J. H. Gardiner, the popular auctioneer of Fifth Ward, returned yesterday from Millbrook and Bethany. He states that the roads are terribly blocked and that business is practically at a standstill. One train at Campbellcroft, nine miles below Millbrook, is completely buried in a cut, the passengers having been transferred to other trains.

Severe Fall

The icy condition of the sidewalk has resulted in many accidents, to pedestrians, and the latest victim is our popular Chief of Police Roszel. While coming down street the other day he slipped and fell heavily to the ground near Edgcumbe's store. He is around and on duty, but still feels the result of the fall and is not anxious to repeat his experience.

Prof. Dorenwend Here

Owing to the irregularities in the railway time table, Prof. Dorenwend did not arrive in town as soon as he expected, and, all day yesterday he was kept more than usually busy catering to the tastes of many town customers. Owing to the condition of the roads many country people whom he expected to meet were unable to get there.

For the Hotelmen

At a meeting of the License Holders Protective Association held in Toronto on Wednesday evening, the proposal in the new assessment act of the Ontario Government to assess hotelmen at 50 per cent. of the value of their property as a business tax. The members of the association are by no means favorable to this move, as they consider they now pay more than their share of city and provincial taxes.

A member of the association speaking Wednesday night said; "It seems when the Government get hard up they bleed the hotelmen, as if they are necessarily making large fortunes. A few years ago only we paid $250 a year license and now we pay $450. At one time there were 125 licenses in the City of Ottawa, while now with a larger city the number is to be reduced by ten."

"Jack and Jill."

The many friends of Rev. J. J. Rae, of Oshawa, will be pleased to hear that Mark street Methodist church has secured him to deliver his popular lecture "Jack and Jill" next Monday evening. Mr. Rae is deservedly in great demand as a lecturer, possessing in a high degree the faculty both to entertain and edify.

Obituary

On Wednesday evening death visited the residence of Mr. Thos. Theobold, 12 Albert street, when the beloved wife passed away at the age of 72. Deceased had been ailing for some time, with pneumonia, which finally caused her death.

The funeral will take place from her late place of residence on Saturday morning at 8.30 o'clock, to St. Peter's cathedral, thence to the Roman Catholic cemetery for interment.

Snow Five Feet Deep

A letter received at our sanctum yesterday from Apsley, a village situated 40 miles north of Peterborough states that the snow is about five feet deep on the level, at that place. Lumbering operations are seriously hampered owing to the deep snow and the work of getting out timber has, in many cases, to be abandoned, being too expensive. For instance, if a tree is felled it is immediately buried out of sight in the snow, and a great deal of shoveling must be done before it can be sawn into logs, or chopped into firewood.

BEAUTIFUL SNOW

Work of Clearing the G.T.R. Progressing—Trains Still Behind Time

Yesterday was a busy one for the railroad companies, and the G.T.R. were hard at work all day, endeavoring to remedy matters along their line. Four live and two dead engines arrived per the Port Hope division, and the Toronto express which should have passed through at 8.25 a.m., did not reach Peterborough, till the afternoon, and when it did arrive three engines were attached to a baggage car, mail car, and one coach.

BEFORE HIS WORSHIP

Small List of Offenders in Yesterday's Police Court

He got drunk and disorderly on Wednesday night and yesterday he appeared in court with the usual "big" head and "small" pocket. "$2 and costs to be paid in 10 days," said His Worship, and the victim looked soberer than ever.

Several charges of not removing the snow from their sidewalks were laid against Peterborough citizens. The Magistrate warned them to keep within the bounds of the law, but expressed himself as unfavorable to the manner in which some parts of the George street walks are kept.

Wm. Kitely was up on a charge of vagrancy. He will spend ten months in gaol at hard labor.

THE TEACHER BLAMES BOY

Made Stand with Hands Behind Back—So Says Mr. Stevens

Yesterday the Times published an interview with Mr. George Stevens, Fifth Ward, which related some trouble between one of the school teachers and his little daughter. The Times, of course, sped through the Fifth Ward as usual yesterday morning, and before nine o'clock even the children had learned the latest news and were ready for their day's work at school. But, according to Mr. Stevens, one little boy, also named Stevens, had his work cut out for him, contrary to his expectations. In short, the little fellow was, according to Mr. Stevens, blamed by the teacher for furnishing the Times with the story mentioned. He was, in consequence compelled to stand most of the forenoon "with his hands behind his back. Of course, that was better than "out in the cold." We are informed that the matter has been placed in the hands of a solicitor, and we may expect further developments soon.

DIED

MOORE.—In Rochester, N.Y., on Monday, February 15th, 1904, Margaret King, relict of the late Richard R. Moore, aged 77 years.

The funeral will take place from the residence of her son, Mr. Archie R. Moore, No. 219 Charlotte street, on Friday, February 19th, at 2.30 o'clock, p.m., and proceed to the Little Lake cemetery for interment.

NEW SERMON

The Minister Preaches Against Health Destroying Articles

A Pennsylvania minister tells what coffee will do when persisted in. He says;

"For years I have been a heavy coffee drinker and found I was losing in appetite and vitality. I knew not what was the cause of my trouble but I knew that something serious was wrong.

"I could not walk very far without feeling very weak and my painful suffering often caused me to return from a trip of pastoral visiting before a single visit had been made. My wife suffered from the same trouble and it occurred to us to try leaving off coffee, and this we finally did, and tried Postum in its place. We had several failures until we learned to boil the Postum full 15 minutes and then it was delicious. Now I assure you we will not give it up.

"I immediately became better and today, three years afterwards, I am free from all the complaints I had at the time mentioned. I immediately began to preach Postum in the homes of my parishoners and my refusal to drink coffee led frequently to a dissertation on Postum and its merits and now to my satisfaction in a number of cases my people have adopted Postum entirely.

"My father while an abstainer from coffee was a devotee to the tea habit but I persuaded him to try Postum and the whole family now use it altogether and father has been relieved of a very annoying case of stomach trouble as the result." Name given by Postum Co., Battle Creek, Mich.

Tea like coffee is full of drugs the most prominent being caffeine, a strong alkaloidal poison that wrecks nerves, stomach, heart and kidneys, causing organic ails in many persons. Postum in place of tea or coffee means comfort happiness and health. There's a reason.

Look in each pkg. for the famous little book, "The Road to Wellville."

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—St. John's choir held its weekly practice last evening.

—Never before did we understand why The Good Old Summer Time was such a popular song.

—A local coal merchant delivered 200 bags of coal to 200 different customers yesterday.

—Express companies won't accept perishable goods, so there is no use trying to express an opinion of the weather.

—If the law of averages holds good we shall have a very dry summer in Peterborough, particularly if a prohibition act is passed.

—Tomorrow evening Mr. [illegible] Rogers will deliver a lecture in the Y. M.C.A. Hall on the "Canadian Pulp Industry."

—A man named John Williamson was removed from the C.P.R. hotel to the hospital yesterday. He is suffering from pneumonia.

—The lecture on "Pickwick" which was to have been held in the Opera House the other evening has been postponed till after Easter.

—Several Peterborough young folk intend taking in the annual Conversazione of the Whitby Ladies College this evening.

—The repairs to the Cereal Company's Works are going on steadily. It is expected that work will recommence soon.

—Mr. C. B. Routley, of Peterborough, has purchased a fine stock of groceries and crockery from Mr. C. M. Wilkinson, of Kingston, and will have a portion of it shipped here.

—The lost dog "Gamey" has at last been located and is again safely housed in his own stable at the Snowden House. This valuable dog was recently stolen from the hotel.

—This afternoon at 4.15 o'clock, Rev. A. J. Brace will deliver a lecture to boys in the Y.M.C.A. Hall, on the unique subject, "Paddle your own Canoe." All boys under 12 are invited.

—Mr. W. O'Brien, the genial clerk of Douro, and Capt. G. W. Bennett, the popular North Monaghan clerk, have been appointed to audit the County Treasurer's books and are now here examining them.

—It took the Warsaw stage four days to cover the distance between that place and Peterborough. At one stage of the journey it took three hours to go two miles.

—A lecture under the auspices of the Fortnightly Club will be delivered by Dr. McLennan, of Toronto, this evening. The subject will be "Radium," and all interested are invited.

—"A disorderly house," as a legal term, does not necessarily imply that the house referred to is a riotous one. Any place where gambling, or any other infraction of the law, is encouraged, is legally known as disorderly.

—Mr. J. O. Knapman, who supplied the poles for the replacement of those recently broken on Water street, in an interview with The Times, spoke of the great depth of snow in the woods. "No one need worry over heavy spring freshets," said Mr. Knapman. The dry fall and the scarcity of water in the swamps will result in the ground absorbing all the surplus moisture.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mayor Rogers is out of town on business.

—Mr. Wm. Cummings, of Monreal, is paying our town a short visit.

—Miss Etta Stinson, of Springville, is spending the week in town.

—The "Doc" of the local Fire Brigade is laid up with a slight attack of la grippe.

—At the Snowden; C. O. McKeown, Toronto; R. S. Bradley, Toronto; W. B. Irwin, Town; W. O'Connors, Toronto; A. Black, Orillia.

—Rev. A. W. Torrie, of Chatham, was in town yesterday, on his way back home, after spending the past few days at Lakefield.

—Miss Jean Higgins, Peterborough, was one of the graduating class which received medals and diplomas from the Western Hospital, Toronto, on Wednesday evening.

—Miss Annie McCullough, of Pontypool, who has been visiting friends in Port Hope, Cobourg, and Plainville, for the past three weeks, spent yesterday in town, the guest of Miss Chambers, Water street.

—At the National; D. N. Watson, Listowel; C. E. Henskell, Montreal; J. H. McClellan, Town; Chas. Fowlds, Hastings; C. Carl, St. Catharines; W. S. Pickard, Millbrook; Geo. A. Anderson, St. Thomas; W. Shaver, Dinchester; J. R. Dunders, Babaro.

—At the Oriental; D. Vine, Montreal; W. A. Ray, Toronto; W. H. Brophey, Montreal; J. V. Cleary, Montreal; W. Southworth, Toronto; J. Moir, Toronto; Chas. Ruse, Toronto; W. H. Hill, Toronto; Jas. Symond, Berlin; Prof. Dorenwend, R. Gondy, Sam Nesbitt, Horace Shaver, M. W. Gillivray, Toronto; A. Bernstein, Montreal; A. R. Gilmore, G. Thomas, M. P. Huffman, T. Walter, Toronto; E. R. Dunk, Port Kerry; W. E. Young, W. Hawkins, Toronto; W. S. Brown, Deter; H. G. Nicholls, J. Dodds, W. Spencer, Harley Davidson, Toronto.

$500 REWARD FOR WOMEN
WHO CANNOT BE CURED.

So uniformly successful has Dr. Pierce's Favorite Prescription proven in all forms of Female Weakness, Prolapsus, or Falling of Womb, and Leucorrhea, that, after over a third of a century's experience in curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels fully warranted in offering to pay $500 in cash for any case of these diseases which he cannot cure.

IT STANDS ALONE.—The "Favorite Prescription" stands alone, as the one and only remedy for these distressingly common forms of weakness, possessed of such positively specific curative properties as to warrant its makers in proposing, and binding themselves to forfeit, as we, the undersigned proprietors of that wonderful remedy hereby do, to pay the sum of $500 in legal money of the United States in any case of the above diseases in which after a fair and reasonable trial of our treatment, we fail to cure. No other medicine for the cure of woman's peculiar ailments is backed by such a remarkable guarantee; no other medicine for woman's ills is possessed of the unparalleled curative properties that would warrant its manufacturers in making such an offer; no other remedy has such a record of cures on which to base such a remarkable offer.

Therefore, insist on having Dr. Pierce's Favorite Prescription and turn your back on any unscrupulous dealer who would insult your intelligence by attempting to foist upon you some inferior substitute under the plea that "it is just as good." Insist on having the article which has a record of a third of a century of cures which is backed by those willing to forfeit $500 if they cannot cure you.

In cases attended by a leucorrheal drain a solution of Dr. Pierce's Lotion Tablets should be used conjointly with the use of the "Favorite Prescription." They are sold by all druggists, or sent post-paid to any address, on receipt of 25 cents in stamps. Send 50 cents in stamps for Dr. Pierce's Common Sense Medical Adviser. Address WORLD'S DISPENSARY, Buffalo, N. Y.

Weak and sick women are invited to consult Dr. Pierce, by letter, free. All correspondence is held as strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pellets cure biliousness.

PROSPECTUS

The PETERBOROUGH FUEL and CARTAGE CO. LIMITED

AUTHORIZED CAPITAL $40,000 In 1,600 Shares of $25.00 each

DIRECTORS

PRESIDENT, J. H. McCLELLAN, Coal Dealer.

MANAGING DIRECTOR, WM. BULLER, Carter.

SECRETARY-TREASURER, A. J. McCLELLAN.

F. D. KERR, (Barrister) A. PARKER, (Dye Works.

SOLICITORS

DENNISTOUN, PECK, KERR & STENENSON.

The Peterborough Fuel & Cartage Co. (Limited) have acquired the plant and goodwill of the *following companies*: The McClellan Co., The Stevenson Coal Co., The Wm. Buller Cartage Co., and propose to carry on a Coal, Wood, Sewer Pipe, Cement and Cartage Business, It is also proposed to erect a suitable building for the storage of Household Goods and Furniture. This has been a long felt want in Peterborough and its success is certain. At present there is no place where suitable and convenient storage can be obtained.

PROPERTIES

The Company control the most desirable site and sheds of the Stevenson Coal Co., situated on the Grand Trunk track and property adjoining, leased at a nominal rent from the Grand Trunk. This property makes a most desirable place for the business at nominal expense

ADVANTAGES

The cartage and coal business would work very advantageously together as the slack months in the coal business are the busy ones in the carting, and vice-versa.

ESTIMATE OF BUSINESS

In presenting an estimate of the business that could be done the directors have been very conservative in their figures.

3000 tons hard coal could be handled at a gross profit of $1.25 per ton	$3,750 00
(This has been the average profit for a number of years)	
200 tons of soft coal, gross profit 75 cents a ton	1,500 00
10 carters' wagons, handling freight, household furniture and coal; average gross earnings $3.50 a day for 300 days	10,500 00
Revenue, storage business, 1st year	500 00
	$16 250 00

THE ESTIMATED EXPENSE OF DOING THIS BUSINESS

Cost handling coal, 6000 tons at 30 cents a ton	$1,800 00
Wages, cartage business	4,000 00
Horse Feed	1,300 00
Incidental expenses, shoeing, repairs, etc	500 00
Office expenses, salaries, etc	2,400 00
Depreciation, wear and tear	1 250 00
	$11,250 00

Leaving net earnings of $5,000.00, or 25 per cent. on an investment of $20,000.00, which would be a sufficient sum to operate the business on the above basis.

CO-OPERATIVE PLAN

Besides being assured of a good dividend the stockholders are allowed a discount of 25 cents a ton off market price, *time of ordering their supply of hard coal.*

The shares have been placed at $25.00 and in submitting the above proposition it is confidently expected that this company with its large list of shareholders working for its interests, cheap rents and the advantage of starting off with a large business, should be a splendid opportunity for investment.

TERMS OF SUBSCRIPTION

A deposit of 25 per cent. is payable on acceptance of application and the balance in monthly *instalments of 25 per cent. each.* Subscribers may make payment in advance of due dates and will be entitled to dividend from the date of such payments. If no allotment is made deposit will be returned without reduction and if a partial allotment is made the surplus deposit will be applied toward the amount payable on allotment.

All cheques must be made payable to DENNISTOUN, PECK, KERR & STEVENSON, Acting Treasurers.

BRITAIN AND FRANCE MAY BE INVOLVED

Fear an Outbreak of an Anglo-French War within Three Months

London, Feb. 19.—Lloyd's is today asking a premium of 30 per cent. against an outbreak of an Anglo-French war within the next three months. The high rate is based on the fact that France has not given a formal declaration of an attitude of neutrality toward the Far Eastern belligerents beyond a vague statement by Foreign Minister Delcasse.

"In fact, the French Government, instead of giving such assurance, has allowed Russia to use Jibutil, which is in a French colony at the head of the Red Sea, as a base of rendezvous for her fleet. This is contrary to

Again, French ships and soldiers have been ordered to the East from Mediterranean ports, and this, taken in connection with the attitude of the Government, is thought in many quarters to be significant. It is known that Russia using her utmost endeavor to get France to stretch every point in her favor, and is anxious to have a strong French fleet in Asiatic waters as a menace against Japanese vessels, and to be of use in restoring the naval equilibrium in the Yellow Sea.

The British Foreign Office is uneasy regarding the outlook, while the Admiralty is getting ready for rapid mobilization in case certain eventualities develop.'

THE RUSSIANS ARE BEWILDERED

The Vast Forces of the Czar Set in Motion

WILL BE FIGHT TO A FINISH

Many Reasons Why Russia Cannot Afford to Sue for Peace

London, Feb. 20—The concensus of opinion is that Russia will fight to a finish. She cannot afford to seek peace, even if driven out of China, but will continue to struggle indefinitely.

Tokio, Feb. 20— Astonishment at the continued apathy of the Russians pervades the educated sections of Japanese society. The Muscovites enjoyed a reputation in Japan for great acuteness and flexibility of mind as well as for ready recourse in time of peril. It was expected that the opening act of war would be followed by measures of clear-sighted energy that would call for all the wit and strength the Japanese could command. The Mikado's spies, however, report a condition of bewilderment and torpor on the Russian side. However, the Japanese civil, military and naval leaders do not imagine this to mean that the Russians will not eventually break the spell that binds them. They anticipate that the vast forces of the Czar will shortly be set in motion, and that then the world will witness a struggle worthy of the most stirring annals of war.

It is reported that anchorage at Port Arthur for large ships is so congested that the Russian fleet is badly hampered in getting out. It is also said that the water supply is bad, a defect common to all ports on the north-east coast of China. The garrison faces grave inconveniences from this source. The semi-circle of hills two and a half miles from the dockyards is covered with permanent works, connected by entrenchments, and manned by several thousand troops. The strip of land connecting the Kwantung and Lio-Tung peninsulas, which is considered the key to the Kwantung Peninsula is being fortified by an additional series of batteries.

ELECTIONS OF OFFICERS

Royal Scarlet Chapter of West Peterborough Met Last Night

At a meeting of the Royal Scarlet Chapter of West Peterborough, the highest degree in the Orange Association, held last evening in the Orange Hall, Simcoe street, the following officers were elected for the ensuing year;

Sir W. H. G. Armstrong, W. C. in Command
Sir Geo. Bartley, Exct. Companion.
Sir Jos. Batten, Comp Chap.
Sir Jos. Garside, Comp Scribe.
Sir John H. Briggs, Comp Treasurer.
Sir T. C. Houlden, Sir H Kt. at Arms.
Sir Wm. E. Elliott, Inward Herald
Sir Wm. Maxwell, Outward Herald.

Cleveland's Baking Powder.

RUSSIA FEELS GRIP OF FAMINE

Citizens of Russia Robbed to Aid Army

SUPPLIES FALL TO JAPAN

Lack of Patriotism Becomes More Pronounced

Vienna, Feb. 20—The leading Polish conservative organ, the Czas of Cracow, publishes a St. Petersburg despatch concerning the Russian commissariat and the means of transport. It says that Russia, knowing the Siberian railroad could not convey the necessary supplies to Manchuria and Vladivostock, ordered before Christmas large quantities of provisions in America for delivery at San Francisco on Jan 28 and 29 and Feb. 7.

As the sea journey to Port Arthur and Vladivostock requires at least seventeen days, it is clear that the greater part of these provisions will not reach the Russian harbors, and may serve to support the Japanese navy.

FACES FAMINE AT HOME.

The question of supplies will be all-important in this war. Hence Russia sent a certain quantity of provisions and stores to the far East by railway, before forwarding their troops, but the operation showed incidentally that no district in the empire except Warsaw was properly provided for. Much indispensable material therefore had to be taken from Russia and sent to the Far East, all other provisions to come from America or Odessa by sea. Everything that left the Black Sea after New Year's day is unlikely to reach its destination. For this reason the provisioning of the army in the far East is causing great anxiety, as nothing can be obtained there in the winter, not even forage for the horses. Even were the railway in perfect order, it could not transport supplies sufficient to feed 150,000 or 180,000 men. However, as great irregularities have occurred in the construction and traffic management, and as the line now is obstructed by trains carrying rails, ties and building material, the anxiety is greater than otherwise it would be., The Russian soldiers bear hardship better than European troops and the Siberian forces are even hardier, but in St. Petersburg it is well known that the Siberian forces are far below the European armies in tactics, rapidity of movement and markmanship.

GERMAN SCORES JAPAN.

Berlin, Feb. 20—According to a St. Petersburg telegram, published in the Berlin papers, a large crowd made friendly demonstrations before the residence of the German consul in Moscow yesterday. The consul appeared at the window, and, addressing the crowd, declared the unexpected attack by Japan on the Russian ships at Port Arthur was a breach of international law.

PATRIOTISM IS LACKING.

Moscow, Feb. 20—The great mass of the czar's subjects are almost as uninterested and indifferent as though Japan were operating against China or landing troops in Honolulu. This is worth recording at a moment when the Russian chauvinist organs, assisted by certain toady foreign newspapers, is endeavoring to demonstrate that Russian millions are solid against the "upstart yellowskin." There is no widely popular feeling against Japan and no racial antagonism. Leaving out of consideration the military element, the Russian urban population's feeling is not for war. In Russian commercial circles there is no relish for way, which already is driving dozens into bankruptcy.

The importance of educated thought in a time of national crisis and the absence of the right to share in the government of the native land enjoyed by the inhabitants of constitutional countries never was brought home more directly to the Russians than today.

C. P. R. Fleet

Montreal, Feb. 20—Officials of the C.P.R. in this city have repeatedly denied the rumoured purchase by the Japanese Government of two of the company's steamers, Athenian and Tartar, which sale is again reported from London. A special cable gram from London says.

Officials here have no information regarding Japan's reported purchase of the Canadian Pacific steamers, Athenian and Tartar. London passengers are still being booked for both steamers. They include Major-General Nicholson, the British officer, who has been appointed to follow the movement of Japanese vessels.

SWEDISH PROFESSOR COMING

Visit will Have Direct Bearing on Swedish Immigration

London, Feb. 20—Professor Waldenstrom, the distinguished member of the Swedish Parliament, is about to make a tour of Canada similar to that made in the United States a few years ago. He will inspect the Swedish colonies in Canada. His utterances are carefully chronicled by all the Swedish papers, and the visit should greatly influence Swedish emigration.

CANADA VS. RUSSIA

The Canadian Fishery Claims Against Russia

Ottawa, Feb. 20—February the 25th is the date fixed for the meeting of the Commission in London to adjust the claims of the Canadian dealers against Russia for illegal seizure in the Pacific in the early nineties. There will be two commissioners on either side. Mr H. A. Little, of Woodstock, will represent Canada, and he will probably have a British associate.

LABOR UNIONS AND LAW

Judge Says They Evade Responsibility by No Incorporating

Springfield, Ill., Feb 20 —Judge Humphrey, in the United States District Court yesterday, said the fact that labor unions were not incorporated enabled them to escape responsibility for damages resulting from their actions. The case was that of Eugene Linxweiler, secretary treasurer of the Decatur Trades and Labor Assembly, who pleaded guilty to sending through the mails postal cards threatening to boycott business firms advertising in a newspaper which had differences with the Typographical Union. Linxweiler was fined $100 and costs.

ARE WITH THE JAPS

The Missionaries Are All in Favour of Japan

New York Feb. 20—"All the Protestant missionaries in the East are on the Japanese side," said the Rev. D. S. Spencer, who has just returned to New York from Japan. He has spent twenty-eight years in that country is missionary work.

"Victory for Russia would virtually close Manchuria and Corea to Protestantism. The Orthodox Greek Church would rule. The Japanese, on the other hand, welcome our missionaries. Absolute freedom of religion prevails wherever Japanese rule extends. Our missionaries are not in personal danger in any event.

"Japan is in deadly earnest. The war is to them a struggle for existence, and for that reason I sympathize with that nation."

MORE BRITISH WARSHIPS

Will Great Britain Buy Warships from Chili?

New York, February 20—A correspondent of the Herald telegraphs from Valparaiso, Chil;

La Union, a clerical paper, confirms rumors by saying negotiations are being carried on for the sale of more warships to England, adding that all is now a question of agreeing to the price.

The Minister of Foreign Affairs denies the rumor and one of the highest chiefs in the navy neither confirmed nor denied it. The interview gave the impression that negotiations are succeeding with a foreign power.

A GREAT FIRE

Baltimore Loss Now Placed at About $85,000,000.

Baltimore, Md., February 20—It was learned from an authoritative source today that the tax assessments on the realty in the burned districts were approximately between twenty and twenty-two million dollars and that the assessments on average stock of goods consumed in the fire were between fifty and fifty-five millions. At the time of the fire, however, the stocks carried by merchants were much heavier than the average. As the real estate was assessed at three-fourths of its value, these figures would indicate a total loss by reason of the fire of about $85,000,000, at the lowest figures.

BALKAN TROUBLE BEGINS

Dynamite Outrages Expected to Begin the Dreaded Insurrection

Vienna, Feb. 20—The "Volksblatt" this morning, prints an interview with a leader of the Macedonian movement, who states that a general arising is being organized in the Balkans. He stated that M. Sarafoff, who has been travelling through Europe for some weeks past, has brought back with him funds for the revolution amounting to a quarter of a million pounds sterling. The insurrection will be inaugurated with dynamite outrages in the larger towns. Bulgaria, continues the interviewer, is rapidly preparing to join the insurgents. The Schoentals works, of Brunn, are now delivering to Bulgaria an order for 30,000,000 cartridges, and several million steel shot.

EMIGRANTS COMING

Further Settlement of West From Great Britain

The first indication of the active campaign that the C.P.R. purposes inaugurating during the present year looking toward the further settlement of the West, is seen in the announcement that arrangements have already been made for the location of a large colony from the British Isles, in the Saskatchewan district. They will come out in three parties, two in May, and a third in June, and will doubtless number well up toward the thousand mark. Coming from all parts of the British Isles, they will form part of the colony already located at Lloydminster, of which the Rev. George E. Lloyd is the champion and head. The immigrants will go in either by way of Saskatoon or Edmonton.

DO NOT RELISH THE IDEA OF WAR

English People Unwilling to Become Engaged in Struggle

THE CONDITION OF POLITICS

Mr. Selby Says Fiscal Fight is Main Issue--Does Not Think Government Should Loss

Montreal, Feb. 20—"I don't think we will be drawn into it. It looks as though Little Japan will not need her chief ally, and I can tell you frankly that England does not relish the idea of any new war on her hands at the present time. Business is getting back again into its normal channels after the turmoil of the South African struggle and the dragging in of England would tend to upset trade conditions very considerably."

There were the words of Mr. Millin Selby, of Manchester, to a 'Times' representative yesterday. Mr. Selby reached New York a day or two ago on the Cunarder "Iverna" after a most terrific passage. The steamer was in touch by wireless telegraphy with various other steamships, en route and received almost daily news of the state of affairs in the Far East. Three Japanese officials were on board the Iverna, returning to Japan, and at the farewell dinner in the saloon the English and American passengers toasted and cheered the success of the Japanese navy.

"There is one thing that can be depended upon," continued Mr. Selby, "and that is the complete neutrality of Great Britain. That Wei-Hei-Wei story on the face of it was absurd, but the feeling in St. Petersburg notwithstanding the denial of Lord Lansdowne that Japan was being allowed to use that port as a base, shows how strongly the tide of war is running and the bitterness that is harbored against England in Russia. England is quite content to remain an onlooker in the deadly game now being played between the rival powers. Of course there may come a time when she will be forced to take a different stand in the event of a grouping of European powers in favor of Russia, but the whole effort of international diplomacy is undoubtedly being used in the direction of keeping the war exactly where it is today and thus prevent the flames from igniting the whole of Europe. That would indeed be a calamity."

IN ENGLISH POLITICS.

The attention of Mr. Selby was drawn to a cable from London in which Lord Rosebery is said to have forecasted the coming into power of the Liberals at the next general election.

"I do not think it would be in the best interests of the country to have a change of Government," he said, "under the present circumstances. This war has upset many calculations and unfortunately in the Liberal party today outside of a few men like John Morley, Lord Rosebery, Mr. Asquith, and possibly Sir William Harcourt, there are few men that could gain the confidence of the country; men into whose hands the country would put its destinies unreservedly and without question. The fiscal fight is, of course, the main issue in domestic politics, and although the Liberal party is almost a unit in opposing the policy of Mr. Chamberlain, they are hopelessly divided on other questions. The Home Rule question is not yet settled and there is practically no possibility of a coalition or rather a burial oft he hatchet between the Unionists."

Mr Selby is going through to Toronto and the West. His final remark was, "I never saw so much snow in my life, you know."

CAN THE JAPANESE PEOPLE AFFORD A LONG AND A VERY COSTLY WAR?

The Finances of the Country Now Said to be in a Very Satisfactory Condition.

London, Feb. 20—A great war is seldom other than a great disaster, even to the victors, and in this sense it may be said that no country can afford a war. Yet, all things considered, there is ample ground for maintaining that Japan can afford to go to war with Russia at the present time. And this is the point.

During the last few years the cry that Japan was trembling on the edge of bankruptcy. In the supreme crisis of her fortunes now upon her, the cry is being repeated with even more marked insistence. Some days ago one of the foremost journals in St. Petersburg observed that the certain result of war between Russia and Japan would be to precipitate the inevitable bankruptcy of the latter empire. But the cry that Japan is insolvent, or likely to be insolvent, is plainly an interested cry, for all the facts are the other way—or nearly all.

UNFOUNDED FEARS

Nearly all, for there is a feature of Japan's position which must be noticed in this connection. And the suddenness and unexpectedness of Japan's amazing leap into the family of great nations, induced, and still induces, the suspicion, that the revolution, which effected so startling a change in world-politics, was superficial and not likely are owned by corporations, the rest by the Government.

The truth is that the financial record of Japan shows not only stability but ever increasing expansion and prosperity.

JAPAN'S INDEBTEDNESS.

The amount of the national debt is today about £53,000,000, of which she owes rather less than £20,000,000 to the outside world. Ten million pounds of this indebtedness carries 4 per cent and the remainder 5 per cent. The interest charge she has to meet annually, therefore, is about £2,500,000 an easy matter in her circumstances.

Should Japan be forced by war to borrow, she is now in a favorable position to do so in her domestic money market, for the year just closed has been a good one, the rice and other crops have been abundant, and the country, generally speaking, is most prosperous. The balances in her banks are heavy—money is plentiful. Indeed there has never been a more favorable opportunity for borrowing than the present.

DR. JAMESON IS NAMED AS THE PREMIER OF CAPE COLONY

Will Lead the Government in Cape Colony Assembly

LOYAL TO BRITAIN

This is What Dr. Jameson's Promotion Means

DR. L. S. JAMESON,
Who Has Been Called to Be Premier of Cape Colony.

Cape Town, Feb. 20—Sir John Gordon Sprigg, the Premier of Cape Colony, who was defeated in the Parliamentary election recently held, in East London (which he had represented for nearly thirty years) has resigned the premiership.

Dr. Jameson, of raid fame, the leader of the Progressives, who defeated the Afrikander Bund party in the election, has been summoned to form a new Cabinet.

Dr. Leander Starr Jameson, the leader of the ill-fated Jameson Raid and now called to be Premier of Cape Colony, is a Scotchman by birth, but has spent most of the active years of his life in South Africa. He is the son of the late R. W. Jameson, and was born at Edinburgh in 1853. He was educated at London University, where he received the degree of M.D. in 1877. Dr. Jameson entered the employ of the British South Africa Company, and from 1891 to 1895, was administrator of Rhodesia. At the end of the latter year he led this raid into the Transvaal, and after fighting the battle of Krugersdorp on New Year's Day, surrendered to the Boers the day following. For his action in leading this Raid into a friendly country, he was tried in London in May, and sentenced to ten months' imprisonment, but owing to ill-health was released in December. Dr. Jameson was again active in the British army in South Africa during the Boer war, and on its conclusion was elected as a member of the Cape Colony Legislature for Kimberley. In the same year (1900) he was appointed a director of the De Beers Constitutional Company and in 1902 assumed a similar position in the British South Africa Company. In the elections which have just closed Dr. Jameson led the Progressive party, which defeated the Afrikander Bund, or the Boer party, and in virtue of this position is called upon to form a Cabinet, which will be pro-British in policy.

FOOD CURES

How Physician Can Cure Even Bright's Disease By Use of Right Food

A Manitoba trip taught two Michigan women something valuable through a wise physician of Brandon. One of them says;

"I had been so troubled for years with my stomach that I could not eat meat and fruit on the same day and suffered if I ate anything more than a little stale bread and butter and was so thin people thought I was going to die.

"I had often seen Grape-Nuts advertised but had never tried the food until last August my sister went out to Manitoba to visit another sister and learned that our sister's little boy, who is 7 years of age, had taken Bright's Disease of the kidneys and their family physician gave them no hopes of his recovery.

"His parents then took him to Brandon, 20 miles distant, and the physiciant here told them he would undertake to cure him if no food but Grape-Nuts were given him as no other food but Grape-Nuts would agree with his medicine or help to overcome the disease.

"The child has lived entirely on Grape-Nuts for one year and a half and is entirely well, a strong, sturdy boy. The visiting sister was in poor health when she went out to Manitoba, but the Grape-Nuts she learned to eat there sent her back home well and strong and when she came home she told me about them, and I got some.

"I learned that I could not only digest the Grape-Nuts perfectly but if I took a spoonful of Grape-Nuts in my mouth I could take a mouthful of potatoes and meat along with it and everything the Grape-Nuts mixed with in that way I could digest, but not otherwise, and the result was that I was soon like a girl of 20 years instead of an old woman. My face got plumper and I know now what joy there is in healthful living.

Name given by Postum Co. Battle Creek, Mich.

Physicians say Grape-Nuts is the most scientific food in the world. There's a reason.

Look in each pkg. for the famous little book, "The Road to Wellville."

THE RUSSIANS NOW STAY IN THE PORT

Will Not Again Venture to Meet Japanese in the Open

New York, Feb. 19.—The Russian warship Bayan, according to a cable to the World from Tokio, is reported to have been the vessel most damaged in the last torpedo attack on Port Arthur (Sunday, Feb. 14). The Japanese attacked with torpedoes at a distance of only 50 yards.

As the result of the attacks at Port Arthur 10 Russian warships are crippled. It is believed that no further naval engagements will take place in the open, as the Japanese torpedo boats can do destructive work most expeditiously and most cheaply.

St. Petersburg, Feb. 18.—It is officially denied that the Russian Government asked permission for the Black Sea fleet to pass through the aDrdanelles. It will remain at home.

Shanghai, Feb. 18. — The Russian gunboat Mandjui, of 1,221 tons, for which two Japanese troops have been lying in wait, has been ordered by the Chinese officials to leave. Being unarmed, the Mandjui will fall an easy victim, and her chances of escape are slender.

St. Petersburg, Feb. 18.—A despatch received here from Port Arthur, dated Feb. 17, says that in the action off that port of Feb 11. the Russian volunteer fleet steamer Kherson was struck by a 12-inch shell in her upper works. A slight fire broke out, which was quickly extinguished. There was no loss of life.

Sasebo, Japan, Feb. 18.—The opinion of Japanese naval officers, here is that a third fight has occurred Port Arthur, some of the Russian war vessels having been reported as leaving that place.

REV. W. ROGER INJURED

Brother of Mayor Roger Meets with a Serious Accident

A serious mishap at Salmon Arm, B.C., has resulted in the Rev. W. Roger, brother of the Mayor of Peterborough, receiving dangerous injuries, which will confine him to the hospital for some time. A recent issue of the Presbyterian speaks of the affair as follows;

"Rev. W. Roger, of Salmon Arm, met with a painful and what was almost a fatal accident at the Salmon Arm Station on the evening of the 22nd of January. Mr. Roger had been mailing a letter at the station and was on his way home, when a passing freight train, from which he though he stepped aside sufficiently for to avoid, struck him, and hurled him some thirty or forty feet, where he lay in the snow, in an unconscious condition, for almost an hour, before he was found and taken to his home. On examination it was found he was badly bruised about the head, and his left arm was broken. A telegram was sent to Kamloops, 65 miles distant, where the nearest doctor was to be had, and without loss of time Dr. Burris proceeded to Salmon Arm, and took the sufferer back with him to the hospital at Kamloops, where he is now undergoing treatment, and is making most satisfactory progress towards recovery. When he is able to undertake work again Mr. Roger will take charge of the Ashcroft field and Mr Duncan, now of the Presbytery of Edmonton, will take up the work at Salmon Arm."

FIVE-YEAR-OLD CHILD HURT

Son of Mr. Frank Wise Has His Collar-bone Broken

Yesterday morning the five-year-old son of Mr. Frank Wise, of the South Ward, sustained painful injuries from a fall on the icy sidewalk. He was playing near his father, who was cleaning off the walk, when he suddenly slipped and fell, breaking his collar-bone. He is now under the able care of Dr. Scott, and we trust his recovery may be speedy.

ATTEMPTED MURDER

The Italian's Case Up Again Yesterday—Two Youths Have a Row

He was a youth of pugilistic ideas, and "always looking for fight," so ran F. Clarke's description of Phil Revios' conduct at the corner of Aylmer and Hunter streets Thursday morning, and His Worship was called on to express his opinion. The complaining Phil evidently got the worst of the scrap, as he "didn't have to shut one eye to see out of the other." It was shut during the first encounter with defendant Clarke, and hasn't opened yet. His Worship considered both at fault and discharged the case, with a warning to Revios to forsake the vicinity of the fracas.

The vicious conduct of the "Tally," Panteleone de Paule, was the subject of debate at yesterday's session of the police court. Panteleone looked rather thin since his incarceration, and his face, as he sat in the box, bore signs of anxiety. Dr. McNulty, the attending physician, testified as to the condition in which he found the victim of the affray. Several wounds had been inflicted about the face and body, but only one, which penetrated the pleural cavity, was dangerous. The patient was in great danger of losing his life, but now his chances of recovery are considered good.

Guiseppi Crenlli, a good-natured looking son of Italy, came next. He was a witness of the assault, and in fairly good English described the row. "Panty" came home slightly under the influence, and was evidently looking for trouble. It is a common practice among Italians in this country for a number to room together, each sharing in the cost of "keeping the house." In this particular instance they had formed a partnership the two brothers and another. Each had a tin cup, but "Panty" owned the tea-pot. On coming home on the evening of the affray he made use of his brother's tin cup. This act of "Panty's" incensed his relative, and the former retaliated by saying "I won't let you drink from my tea-pot if you won't let me use your cup." A row ensued and although several present at the time tried to prevent anything serious from happening Panteleone seized a butcher knife and inflicted the injuries mentioned. The prisoner, through his counsel, elected to be tried by jury, and he was committed for trial.

The Russian fleet is said to be bottled up in the harbor of Port Arthur which supports the general belief that the Japs are corkers.

Local Sports

The St. Georges hockey team, of Toronto, will play the Peterborough seniors on Monday night.

The Wm. Hamilton Co. and Auburn will meet in a friendly game of hockey after the C.G.E. game tonight.

Secretary Rickey, of the Athletic Club, informs us that he ha s received a letter from "Hockey" Jones, who says he has had three bouts since his visit to Peterborough, one being at Hamilton, and two in the Queen City.

The C.G.E. Co. of Peterborough, and the C.G.E. of Toronto, will play a friendly hockey match at Brock street rink this evening. The following players will represent the home team; Whitcroft, of the seniors; Renton, Ford, and Lee, from the Peterborough II.; Crowley and McGrath, from the T.A.S.; and Fitzpatrick, in goal. A good lively evening's sport is expected.

The Junior Guild have accepted the challenge of the Senior Intermediates for a game of hockey, to be played as soon as is convenient for the latter.

In a late despatch from Rochester, Wiley, the wrestler, announces that he will reach Peterborough today, and will complete his training at the Oriental gymnasium, which Mr. Chris. Graham has generously placed at his disposal. The wrestler claims to be in fine condition for his contest with Kennedy. Four years ago he won the light, welter, and middle weight championship at a New York tournament, a feat never accomplished by any other amateur.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 20, 1904

THE ASSESSMENT BILL

Attorney-General Gibson in the Ontario Legislature in a two hours' speech explained the provisions of the municipal assessment bill in moving its second reading. His speech was in spite of its inevitable length, a model of lucidity and conciseness. The subject is not merely a wide one, but is made up of a mass of details. Then it has a history, and it has always been found useful, if not absolutely necessary, to deal with this complicated matter in an evolutionary rather than a revolutionary spirit. As a preliminary to his exposition of the measure, Mr. Gibson gave a brief account of the assessment legislation in this province from 1792 to the present time, and nothing could have better shown that Ontario is under confederation simply the old Province of Upper Canada, shorn of certain legislative jurisdiction and administrative functions. It was not, of course, till after the establishment of the municipal system in 1841 that our present scheme of local taxation could have taken shape, and this it began to do in 1850, the system being extended and modified until the consolidation of 1866, the last before Confederation.

Mr. Gibson explained that the present voluminous and radical measure is the outcome of persistent agitation, and an unmistakable public demand that the antiquated features of the system should be dropped and new features incorporated with it. Many attempts were made by private members to secure amendments, and finally it was deemed expedient to appoint a Royal Commission, which took a great amount of testimony and submitted a valuable report. Appended to the latter was a draft bill which was subsequently referred to a special committee of the House. After a number of sittings during the session and the recess this committee has found what seemed to be feasible solutions of some of the more difficult problems submitted to it, and these the Attorney-General explained to the House. On some very important points it had declined the suggestions of the Royal Commission, especially as to the business tax and the house tax, which they recommended in lieu of the personalty tax imposed by the present law.

One of the most important features of the measure is the provision made for collecting municipal revenues from railway, telephone and telegraph corporations. The commission recommended that this be done through a Provincial board of assessment, but a way has been found of avoiding this device, and, in Mr. Gibson's opinion, the method proposed by the committee was likely to prove more satisfactory. He expressed strongly his personal satisfaction at the absence of all party spirit from the long deliberations of the committee, and his appreciation of the value of the services rendered by members of the Opposition, mentioning more especially Mr. Whitney, Mr. Foy, Mr. Carscallen and M Hoyle.

RETRIBUTION

Another example of the retribution for her past crimes against civilization and humanity that is dogging the heels of Russia in her extremity is the activity against her of the Jewish race all over the world. This is far from impotent, because money is the great weapon of war, and the Jews yield to no one in command of this arm and skill in its use. There is not the least doubt that the rich Hebrew bankers of Europe have closed the loan market to Russia. Now we hear that Jewish merchants in various cities are quietly contributing to the funds being raised by patriotic Japanese to send to the home government. The Japanese merchants of New York have set out to raise a fund of $5,000,000, to be forwarded in monthly installments and increased if the war should be prolonged. We don't know how many Japanese merchants there are in New York, but we should suppose not more than are to be found in many foreign cities. If contributions in proportion to this are coming from all over the United States and Europe the Japanese will have no need to call on London for a loan.

WHERE CANADA MAY COME IN

Canada will be deeply concerned in this war. If Britain becomes involved in it as the ally of Japan, then the war will be brought to the very doors of Vancouver, says the World of that place. Troops may pass through here; the steamship line which is famous under the "Empress" name, may be in some danger from Russian cruisers. Of course that is only a contingency, but one we must be prepared to face. Canadian soldiers and volunteers will not be called upon to muster, much as many of them would like to, but British Columbia's sympathies will all along be with the Japanese as against the Russians.

This, from one point of view, seems strange—considering local opposition to Japanese immigration, but it is not to be wondered at when the far eastern situation is looked at broadly. Japan and Britain, are, by treaty bound to one another; therefore, when the former takes upon itself the duty of obstructing Russian aggression in the Orient—aggression inimical to the interests of the British Empire,—Canadians cannot but applaud the plucky action of Japan, which has rushed in where the Great Powers feared to tread.

EDITORIAL COMMENT

The Russian fleet is said to be bottled up in the harbor of Port Arthur which supports the general belief that the Japs are corkers.

APPLICATION TO PARLIAMENT

Notice is hereby given that in addition to the application of which notice has already been given an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario, at the present session thereof for legislation to authorize the Commissioners of the Peterborough Town Trust with the approval of the Council of the Town of Peterborough, and on such terms and conditions as the said Council may impose, to grant and convey for a nominal consideration to the Peterborough Lock Manufacturing Company, (Limited) Lots numbers Ten and Eleven north of Perry Street and Lot number Ten and the south half of Lot number Eleven south of Rink Street all west of George Street in the Town of Peterborough and to authorize the Council of the said Town by By-law passed without the assent of the electors, to fix the assessment of the said land, and the buildings, erections and machinery to be erected or placed thereon at the sum of $12,000 for a term of ten years on such terms and conditions as may be provided in said By-Law and to authorize the said Council by By-Law passed without the assent of the electors to fix the assessment of any real estate in the said Town on which an Academy of Music or Opera House may hereafter be erected together with such portion of the buildings and erections thereon as are and while used for such a purpose at the sum paid for the said real estate for a term of ten years upon such terms and conditions as may be provided in said By-Law.

Dated at Peterborough this 15th day of February, 1904.

NEW GOLD ZONE IN ALASKA

Miners Report Discoveries Extending Over 2,000 Miles

Tacoma, Wash., Feb 19—New gold discoveries prove the existence of a second gold zone traversing the British Yukno and Alaska and lying considerably southward of the first discovered zone, which crops out at Klondike, Kuyukuk and Name. The first strike in the new zone comprises the Tanana gold fields. Last summer new rich placers were found in the Alsek country, west of White Horse. Reports are now being received of placer creeks in hitherto barren country at the head of White river, west of Tanana.

Gold has been discovered in the Susitna and other streams of western Alaska, while still other placers are being worked on Bristol bay.

The second gold zone apparently extends from near White Horse, at the head of Yukon navigation, along the northern foot hills of McKinley ward to Cook inlet and Bristol bay, mountain range and thence west- a distance of 2,000 miles.

Lost Appetite Quickly Revived

A Fitful Appetite is generally associated with a general weakness of the system. Ferrozone the best tonic and appetizer should be taken after each meal and a rapid improvement is sure to follow

Distaste for food often follows La Grippe and fever, or is brought on by over excitement or worry. It is a dangerous condition, and paves the way for more sickness. On this account it should be at once corrected by the regular use of Ferrozone.

A new and wonderful medicine is Ferrozone. It instantly imparts a real zest for food, and gives power to the stomach to digest and assimilate all that is eaten. Dyspepsia and indigestion are quite unknown to those who use Ferrozone, simply because it digests food so quickly, that it has no time to ferment or sour on the stomach.

Ferrozone regulates the bowels, quickly remedies urinal disorders and causes all the organs of the body to perform their functions, with proper regularity. If the liver is torpid, or the kidneys not eliminating as they should, they are soon restored to normal action, and the poisons that might otherwise be retained in the body to cause disease and ill health, are carried off through natural channels.

The surest road to perfect health is Ferrozone. Young girls who have been accustomed to eat almost nothing at breakfast, soon get over the bad habit by using Ferrozone, and as a result grow into healthy vigorous womanhood. When people get up in years and loose the strength and vim of youth they need a good tonic and blood builder to enable them to resist the trials of our vigorous winter, and this is where Ferrozone can be used to great advantage.

Both the young and the old, the weak and the strong, male and female can derive untold benefit from Ferrozone. It is guaranteed to contain no opiates or injurious drugs, and will do just what is claimed for it.

Druggists recommend and sell it price 50c. per box or three boxes for $1.25. Sent to your address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred million in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

WRATHY RUSSIAN ENTERS PROTEST

Thinks That Canadian Press Treats his Country Unfairly

TWO SIDES TO QUESTION

But the Only Side Presented to the Public Here is That of Japan

Montreal, Feb. 19.—Mr. Charles W. Dudin, a Russian gentleman, who has been resident in this city for some time, is of the opinion that his native land is not receiving fair treatment at the hands of the Canadian press. There are, he says, two sides to the present difficulty between Japan and Russia, and that thus far only one side has been presented—that of the Japanese.

"A great deal," he remarked, "has been made of the absolute form of government which obtains in Russia, but in reality that is the only form of government which would be suitable to the millions of ignorant peasantry. For centuries they have been in the absolute control of the nobles and to give them any large degree of liberty at the present time would be disastrous.

"Born and educated in St. Petersburg, I occupied a government post for four years, at the end of which time I was threatened with exile to Siberia for too great liberty of thought and speech. I have come to Canada to work up trade with the Doukhobors.

"Everywhere I go I find the sympathies of the people are with Japan and only the other day one of the few Russian gentlemen in Canada ventured the opinion that all Russians who had been maltreated by the Government were anxious for the success of the Japanese arms. Personally I do not think that is the case. Reforms have undoubtedly to be worked along certain lines in Russia but they will not necessarily be more speedily effected by the humiliation of my native land. So that when any Russian says any considerable number of my fellow-countrymen, no matter how badly treated, are favorable to the cause of Japan he grossly misrepresents the true condition of affairs.

"I have nothing to say regarding the merits of the dispute which has now been submitted to the arbitrament of war. These may or may not be favorable to Russia. Possibly Russia should not have promised to evacuate Manchuria if she did not intend to do so. For my own part, I do not think that she ever had the slightest intention of getting out once she had got in. But these considerations have nothing to do with the war, now it has commenced, and all Russians, no matter where found, will take pride in the victory of Russian arms, which must ultimately come."

WAR TROPHIES ARRIVE IN JAPAN

Flag of the Variag will be Presented to Emperor

NEWS FROM VLADIVOSTOCK

Ten Torpedo Boats Frozen Up in Harbor—Fleet Probably in Port

Tokio, Feb. 19—The flag of the Russian cruiser Variag, recently sunk off the harbor of Chemulpo, which will be presented to the Emperor as the first trophy of the war, reached Sasebo yesterday on the cruiser Chiyoda, together with the anchor, a gun and other souvenirs of the destroyed warship. The captain of the cruiser Chiyoda has been summoned to Tokio to recount to the Emperor the story of the engagement. He will present the flag to the Emperor.

The German steamer Batavia has just reached Moji, from Vladivostock, with 1,000 Japanese refugees on board including the commercial agent of Japan at Vladivostock. The latter reports that ten Russian torpedo boats are frozen up at that port, unable to move. The commander of the garrison and the local authorities at Vladivostock called on the departing agent and complained that the Japanese had opened hostilities without having declared war.

When news of the opening of the war reached Vladivostock the squadron there was hastily painted and cleared for action, leaving port on the afternoon of February 9. He believed that it returned to Vladivostock after sinking the Nakonoura Maru.

There are no torpedoes nor mines sunk at Vladivostock and the place is totally unprepared to resist attack. Massing of troops on the right bank of the Yalu continues, the Russians evidently believing that the Japanese intend to make their main attack there with the object in view of forcing their way through the Russian lines and destroying the railway, thereby cutting off all communication with Port Arthur and Vladivostock.

The Japanese are again agitating the construction of the Fusan-Seoul Railway and great quantities of material used on the Russian-Seoul Railway are available. In the event of a prolonged war a railway between these points would be of immense advantage.

STILL NEED FOR LABOR

County Councils and Farmers' Institutes Ask for More Men

During the last visit of Hon. Clifford Sifton to Toronto, a labor deputation called upon him to urge that the policy of encouraging the immigration of farm laborers and mechanics be revised. They hold that there was no need in Canada for more labor, and that native Canadians were being discriminated against. That their contention is hardly justified by the facts, appears from the number of communications received by the Provincial Minister of Crown Lands from County Councils and Farmers' Institutes asking for farm laborers. So far representative bodies from the following counties have made such representations: Brant, North Oxford, Halton, Algoma, Norfolk, East Durham, Carleton, Parry Sound, Renfrew, Kent, Ontario and Frontenac.

THE NAVAL OUTLOOK.

BRITISH EXPERTS BELIEVE RUSSIA IS DOOMED

Japan Now Practical Master of the Sea—Secret Movements of Japan's Fleet

London, Feb. 19.—W. H. Wilson, the naval expert says: "The news from Hakodate that the Vladivostock squadron was seen entering the Tsugaru Straits on Friday shows that the squadron has been in that locality for three days, and this suggests that the Japanese now have had time to concentrate a sufficient force to deal with it in the naval battle stated to be imminent, on February 12. This is an indication that there is a Japanese squadron in these waters. Firing has since been heard. There are obvious reasons why the Japanese wish to destroy these four vessels or drive them back to port, because they may attempt to work toward the south and attack the transports now passing between Japan and some point unknown—possibly the Corean coast, possibly the Liao Tung Promontory. The absence of news concerning the whereabouts of the main Japanese fleet suggests some decided move, the results of which will be unknown for a few days although Admiral Togo may be cruising between Wei-Hai-Wei and Chemulpo, where he effectively blocks Port Arthur, or he may be at a temporary base at Blonde Islands, but he would hardly leave the Russian ships at Port Arthur unmolested, unless his services were required in some other quarter."

DR. PIERCE'S MEDICINES
PLEASANT PELLETS

PROGRESS.

Some time ago there was a notable automobile procession in the city of Buffalo, N.Y. It was notable for its size, and also for the fact that it was entirely composed of automobile wagons (like that in the cut above), built to distribute the advertising literature of the World's Dispensary Medical Association, proprietors and manufacturers of Dr. Pierce's medicines. In many a town and village Dr. Pierce's automobile has been the pioneer horseless vehicle. These wagons, sent to every important section of the country, are doing more than merely advertise Dr. Pierce's Remedies—they are pioneers of progress, heralds of the automobile age.

And this is in keeping with the record made by Dr. Pierce and his famous preparations, which have always kept in the front on their merits. Dr. Pierce's Golden Medical Discovery is still the leading medicine for disorders and diseases of the stomach and digestive and nutritive systems, for the purifying of the blood and healing of weak lungs.

Women place Dr. Pierce's Favorite Prescription in the front of all put-up medicines specially designed for women's use. The wide benefits this medicine has brought to women have been well summed up in the words "*It makes weak women strong and sick women well.*"

The reputation of Dr. Pierce's Pleasant Pellets as a safe and effective laxative for family use is international.

It may be asserted without fear of contradiction that no other firm or company engaged in the vending of put-up medicines can rank with the World's Dispensary Medical Association, either in the opinion of the medical profession or of the intelligent public. The Invalids' Hotel and Surgical Institute, which is connected with the "World's Dispensary," is alone sufficient to prove this supremacy. Here is a great modern hospital, always filled with patients, where every day successful operations are performed on men and women whose diseases demand the aid of surgery. No hospital in Buffalo is better equipped, with respect to its modern appliances, or the surgical ability of its staff. Dr. R. V. Pierce, the chief consulting physician of this great institution, has associated with himself nearly a score of physicians, each man being a picked man, chosen for his ability in the treatment and cure of some special form of disease.

The offer that Dr. Pierce makes to men and women suffering with chronic diseases of a *free consultation by letter*, is really without a parallel. It places without cost or charge the entire resources of a great medical institute at the service of the sick. Such an offer is not for one moment to be confounded with those offers of "free medical advice" which are made by people who are not physicians, cannot and do not practice medicine, and are only saved from prosecution by artfully wording their advertisements so that they give the impression that they are physicians without making the claim to be licensed.

Those who write to Dr. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., may do so with the assurance that they will receive not only the advice of a competent physician, but the advice of a physician whose wide experience in the treatment and cure of disease, and whose sympathy with human suffering leads him to take a deep, personal interest in all those who seek his help and that of his associate staff of specialists.

Dr. Pierce's Medical Adviser (in paper covers), 1008 pages, is sent *free* on receipt of 31 one-cent stamps, or 50 stamps for the cloth-bound volume, to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully.

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

FRANCE WILL FIGHT TO HELP SAVE RUSSIA.

Opinion in Favor of the Russian Growing Throughout France

Paris, Feb. 19—One of the most notable events of the first fortnight of the war has been the steady increase of sentiment here, favorably to giving Russia every possible moral and sympathetic support. At the outset the French officials and public generally maintained that the interests of France demanded that she keep clear of the possibility of any war entanglements growing out of the Franco-Russian alliance. This led some newspapers to assert that France was placing self-interest before duty, and deserting her best friend in the hour of greatest need. A gradual reaction has occurred until official and public opinion runs very very strongly in favor of strengthening Russia in every way short of actual participation in the war. It was thought that the large Dreyfus element would antagonize Russia, owing to the latter's attitude towards the Jews; but, on the contrary, Joseph Reinach, the friend and biographer of Dreyfus, has published a letter declaring the honor and interest of France command her to affirm her sympathy for Russia and to loyally hold up the alliance. However, French feeling, which is usually demonstrative, has not shown any wild enthusiasm on behalf of Russia. This is rather marked contrast with the uproarious manifestations at the time of the Czar's visit to Paris and other recent events. Two popular subscriptions have been opened for the wounded, one by the Russo-Chinese bank, and the other by the French newspapermen. The Russian ambassador, M. Nellidoff, heads the former with a subscription of $100. Many individuals are showing personal sympathy and are offering their services. The Russian embassy receives about one hundred offers daily.

Much interest is manifested here in the parts Prince Louis Napoleon and Prince Jaime de Burbon are taking in the military service of Russia. The reports that the former, who is an officer of high rank in the Russian cavalry, who was in France recently to attend the obsequies of Princess Mathilde, and who left hurriedly for St. Petersburg at the outbreak of the war, is to be given command of the entire cavalry force operating in Manchuria, is said to be well founded.

Prince Jaime, who is an officer of Russian volunteers, under the Governmenor-General of Russian Poland, wrote at the outbreak of the war requesting an assignment to the first detachment of volunteers to be sent to the theatre of operations, and he has since telegraphed an earnest request to be assigned to immediate duty at the front. Both men are of the Napoleonic type, which a large French element devotedly admires.

It is not intended by the French Government to issue a formal proclamation of neutrality similar to that of the United States and Great Britain. The officials here say that usage does not require that; the neutral course of the government has been sufficiently defined by the instructions sent to the French foreign, colonial and marine Ministry's representatives abroad. It is specifically asserted that the absence of a proclamation has not the slightest significance as indicating a desire to avoid exciting Russian susceptibilities. It is merely compliance with the French custom regarding the observance of neutrality.

A BARBOROUS ARMY

Outrages Committed by Russians on the March

London, Feb. 19—Unpleasant stories of Russian brutality come from several quarters, like the outrages upon Japanese women and the looting of Japanese property in Vladivostock, the massacre of unresisting Chinamen somewhere near Dalny, and the repeated reports of outrages upon Japanese refugees from other Russian cities. Ordinarily these might be taken as a part of the natural exaggeration of war, but in this case it cannot be forgotten that the Russians have a bad reputation. The outrages of Russian troops upon women and children in the march to Pekin made the blood of the more civilized allies run cold. It is not quite fair either to attribute this brutality to lack of civilization because the highly cultured German troops were little behind the Russians in slaughtering and torturing innocent non-combatants. The world knows little of the worst performances of the half savage Cossacks in 1900 when they choked the current of Manchurian streams with massacred villagers. This sort of thing generally brings its own retribution. We suspect that the "Boxers" who are gathering to break the Siberian railway and harass the rear of Russia in Manchuria have not forgotten the bloody dragonnade of 1900.

IMMIGRANTS HERE IN LARGE NUMBER

Hundreds are Staying in the City Until Arrival of Spring

MANY LOOKING FOR WORK

Rush of People to This Country Has Begun Very Early This Year

Montreal, Feb. 19—The cold snap is being felt severely among the newly arrived immigrants, many of whom are making Montreal their headquarters until the spring comes and they can either go West or go into the agricultural districts in Quebec. The employment bureaus are thronged every day with men, and occasionally work is supplied, but the supply is so much in excess of the demand that many have to be turned away without the work for which they look. A Times representative went into one of the bureaus yesterday and found a horde of men including Englishmen, Italians, Greeks, Scotchmen, in fact all races represented. There were some vacancies in the lumber camps on the Ottawa and northern districts, not many, for the season is advancing, and the men that could not crowd into the small office contented themselves by standing on the pavement and looking at the sign "Men wanted." A few of these newcomers have been able to get work around the city, but the life is precarious and the intense cold has told upon them, especially such as hail from the Southern lands, where winter is a thing unknown and perpetual sunshine reigns.

The head man of the employment office said that he had been deluged with men looking for work, but in many cases it had to be refused, and the men went away willing for the work that was not. He was of the opinion that more immigrants than ever had come to Canada this winter season and that the majority of these had found a resting place in Montreal for the time being. In recent years it had been the custom for the bulk of the immigrants to defer their arrival until the back of the winter was broken, so that they could go straight out west to Manitoba and Ontario. This year, however, the influx had come much earlier and as an old fashioned winter had Montreal as well as the rest of the Dominion in its grip, much hardship was being experienced by the newcomers.

There are many of these little employment bureaus scattered throughout the city. Some look after the Italian portion of the immigrant band. Others are more cosmopolitan and number among their callers men and sometimes women of all nations. But the fact remain that there is no work for those who seek it, and until the snow melts and the spring comes from the south, the lot of the immigrant will not be one of luxury and ease.

HAS ENGINE SIZE OF WATCH

Canadian Shows Minute Invention That Runs Big Saw

New York, Feb. 19—The national outoboat exposition will begin its second week tomorrow. The marvel of the exposition, it is said, is a new steam engine invented by a man named Weeks, from Canada. Mr. Weeks has a six-horse powersteam engine which is about the size of a dollar watch. It is made of old boiler tubing and is applied to a ten inch circular saw, which cuts through cypress or oak several inches thick. A fifty-horse power engine, if made of nickel steel, Mr. Weeks says, could be held in a boy's hand, or carried in the pocket of a sack coat.

FOREST MINING CO.'S

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Bunty McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $40 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite), and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore..

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. P. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore bod

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.s properties consist of three mines, know as the North Bonanza, Flowery and Kimbark. They are located in Six Mi Canon, less than four miles from Virginia City, Nevada, which is the railroad station.

Years ago, over three hundred thousand dollars of development work wa done upon the mines—so they are not mere "prospects" but actual mines. Thi work was done under the personal supervision of competent engineers, an was paid for by the owners of the mines themselves; thus giving double as surance that the work was well done and that the expenditure was jus tified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seve hundred feet. From this shaft, running along the vein matter, east and wes are four drifts, at different levels, having a combined length (including th Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined dep of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, up rises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and prac tical miners that there is developed an ore body of at least One Million Fiv Hundred Thousand Tons!

As a further evidence of the large amount of work done there is fro 75,000 to 100,000 tons of ore on the dumps at the different surface openings—or that, with modern cheapened processes, can be converted into gold bullio at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the Unite States government, while the title of the Kimbark is by location and posses sion.

The Equitable Company obtained the Flowery and North Bonanza mine both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the pro perties, and is now operating them. The sum of $2,000 was paid on the con tract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $106,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds no pay. The Com pany can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kim bark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoist ing and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR B. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs: Silver 92.40 ozs. Total value $99.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPA

corporated Under the Laws of the State o
California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for cultivation of rubber. It has been own for a great many years as a ry choice strip of rubber land and subsequent experience has shown that it is ual to all that has been claimed for . The affairs of the company are in hands of men of undoubted integrity high reputation as successful men business. To those seeking a safe inment which will secure a good ine for life, this proposition offers a vorable opportunity.

Shares in La Zacualpa Rubber Plantan are not capital stock of a corporan, and carry none of the responsilities and obligations, or liability to sessment of capital stock; but repret an undivided interest in the plantan itself.

The twelve thousand acres comprising plantation are divided into twelve housand shares, each share representg one acre of land, and the holders shares in La Zacualpa Rubber Planon are the actual owners of one unvided acre of land, for each share held, with a guarantee expressed upon the rtificate by La Zacualpa Rubber Plantation Company, under its official seal, plant two hundred or more rubber ees per acre for each share sold, and care for same for a period of five ears, and at the expiration of that time gather the first harvest and deliver e net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to a shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

RUSSIANS NOT UNITED

Government Bitterly Attacked and Czar Enthusiastically Supported

St. Petersburg, Feb 19—The demonstrations of patriotism have not been without manifestations against the government. There was one such yesterday at the funeral of Nokoui Michailovsk, the well-known historian of Russian literature. Many thousands of the most talented Russians, steeped in the literature of western Europe, thought and followers of Spencer and Darwin, made strong speeches against the government which has plunged the country into a war that will cost untold wealth and blood. As the crowd was very great, strong forces of police were unable to prevent these inflammatory speeches.

Great demonstrations of patriotism were made here yesterday. Huge crowds singing the national anthem, presented themselves at the palace of the czar and czarewitz and from there marched to the Anitchkoff palace. Afterward the enthusiastic body marched to the French embassy and sang national songs.

A number of additional battalions from each guard regiment have been entrained at Nicholas station on their way to the far east. As the soldiers marched to the station the passers-by poured out the contents of their purses into their hands. Ladies gave them jewels they were wearing and tradesmen swarmed out of their shops and showered tobacco and provisions upon them.

THE WAR NEWS FAKIR

Fantastic Tales of Battles Published in London Papers

New York, February 19 — The Tribune's London correspondent says —"Rumor mongers are still plying their trade and newspapers are filled with fantastic tales and contradictions. Messages from war correspondents are deferred until the information in them is stale, even when the harmlessness of the disclosures is apparent. Military writers are suspending critical articles on the progress of the war until official bulletins can supply trustworthy intelligence without the intervention of the censorship. The operations of the land campaign are screened from view, and the concentration of the Japanese army on the line of the Lower Yalu River, with a flanking column in the direction of Mukden, is a favorite theory of the armchair strategists. Seizure and condemnation by Japanese warships of cargoes of coal under neutral flags is sanctioned by the British Foreign Office, and the practice of including coal in the list of contraband of war whether connected with the belligerent fleet or not, seems likely to become a settled practice among maritime nations. Experts on international law assert that this practice will tend to shorten naval wars."

BRITAIN HELPS JAPAN

Japan Gets British Money as Well as Sympathy

London, Feb. 19—British sympathy for the Japanese has been manifested in a remarkable response to the appeal recently made on the soldiers and sailors widows and families fund. Japanese are accosted in all parts of London by persons desiring to contribute to the fund. At a cafe in Leicester square, a Japanese gentleman, while dining, was approached by a party of nine, who had occupied an adjoining table, and asked to forward ten pounds ten shillings to the fund as a token of real British regard.

A contribution of twenty-eight shillings, entirely in farthings, was received by an old woman, who handed it to a member of the legation. A little girl sent eight pence explaining it was a month's savings. She wished it to go to the poor little Japanese orphans. A poor working man brought a shilling, remarking, "You are our pals, Japs, and a good sort you are." In many strange ways money is pouring in.

A member of the Japanese legation expressing his great gratification, remarked that England was certainly practising a benevolent neutrality.

War Notes

St. Petersburg, Feb 18.—The accidental blowing up of the Boyarin in Port Arthur harbor has had a dramatic sequel. Infuriated at what he considered the culpable negligence of the lieutenant in charge, the admiral shot him dead by his own hand.

Kobe, Feb. 18.—On account of the darkness of the weather on Sunday, Feb. 14, the Japanese torpedo boats were alongside the Russian battleships before their presence was detected, and only then they launch their torpedoes. Japan is determined to cripple effectually the Russian fleet, and nothing will be allowed to prevent the carrying out of this purpose.

Eight Cents Per Share

For a short time only. Par value $1.00 Full paid, non-assessable. Buy now at the lowest price and join us on the ground floor in the Five Bears Mining Co. who own outright ten rich properties in Plumas County, California. IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,002 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company it is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 116 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

A NEW COMPANY FORMED.

THE PETERBOROUGH FUEL AND CARTAGE CO., LIMITED

Promises to Supply Long Felt Want—Capital of Company $40,000

In another column of this morning's issue of the Times, will be found the announcement of the Peterborough Fuel and Cartage Company, Limited, a concern which will supply a long felt want in this town. It is the intention of the company to run the Cartage business of Peterborough on a more systematic basis, and facilitate matters as much as possible, so far as the handling of general merchandise is concerned. The capital of the company is $40,000, and the following constitute the officers of the concern; President, J. H. McClellan, coal dealer; Managing Director, Wm. Buller, carter; Secretary-Treasurer, A. J. McClellan, Solicitors, Dennistoun, Peck, Kerr and Stevenson. The proposed number of shares is 1600, valued at $25 each.

The plants of the Stevenson Coal Co., the McClellan Coal Co., and the Buller Cartage Co., have been secured, and it is the intention of the company to carry on a coal, wood, sewer pipe, cement, and cartage business. Spacious buildings will be erected and the sheds of the Stevenson Coal Co. have also been acquired.

In estimating the probable earnings for one year, it was found that they would total $11,250, leaving a balance of $5,000 net earnings. This would be 25 per cent. on an investment of $20,000, which would be sufficient to ensure the prosperity of the business.

In addition to a dividend, all stockholders will be allowed a discount of 25 cents per ton off the market price of coal. A careful consideration of the proposal makes it one deserving of praise and should receive the support and encouragement of all Peterborough citizens. The offices of the company are being fitted up near Carton's grocery store on Charlotte street.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Death in Emily Township

Sad we are to have to chronicle the death of Mr. Isaiah Thornton at his late residence, lot 9, con. 3, Emily township. His remains will be interred in Emily cemetery this afternoon at 2 o'clock.

Funeral in Otonabee

The funeral of the late Elizabeth Dickson, eldest daughter of Mr. John Dickson, of Otonabee, took place yesterday afternoon. The remains were interred in Zion cemetery. Her many friends and acquaintances sincerely regret her sudden demise.

Fifth Ward Man Injured

As a result of coming into too close contact with a machine at the Canadian General Electric works on Thursday, Mr. Jos. Huard, of Ashburnham, is laid up with a sore hand. The wound is, however, not considered serious, and we trust he will soon be as well as ever.

Single Tax Lecture

On Wednesday evening, 24th inst., Prof. Lee Francis Lybarger will deliver a lecture on the subject, "Single Tax," at the Y.M.C.A. Hall. The professor comes highly recommended by American and Canadian papers as a most able lecturer, and an interesting discourse is expected.

Foresters' Carnival, Friday, March 4th

Court Peterborough, No. 29, C.O.F., have made final arrangements for a grand Fancy Dress Carnival to be held in the Brock street rink on Friday evening, March 4th. A handsome list of prizes have been secured, and will be on exhibition next week. Watch for further particulars. ld

The attendance at the
Peterboro' Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGLE,
Principal

Former Resident Dead

Mr. Thos. C. White, formerly a member of the Review staff, passed suddenly away at New Westminster, B.C., on Wednesday last. Deceased was in his forty-fourth year and was employed in the Crown Timber office. His uncle was at one time proprietor of the Peterborough Review. The late Thos. White was a brother of the late Hon. Thos. White.

An Interesting Experience

—Mr. A. W. Cressman, the popular George street merchant, relates an interesting experience arising from the recent railway blockade. A. W. was bound for Toronto, but was delayed at Myrtle, for over a day. This of course gave our genial citizen time for thought and plans for the future. We understand his latest idea is to introduce a Remedial Bill re irregularities in the railway time table, at the next session of the Peterborough (Mock) Parliament.

Trials of an Editor

—The "Offis Boy" has composed the following—

The editor sat in his easy chair, lighting his pipe by his dark brown hair; a halo shone over his face so fair, but his knees were out, and his feet were bare. He sang a song both sad and sweet, while the flies died all around his feet; for he had no grub in his shop to eat, and the ground was covered with snow and sleet. He had eaten the paste, and swallowed the glue, and while he stared his whiskers grew. And the band played on.

COMPLETION OF TRENT VALLEY CANAL

Toronto, Ont., Feb. 12, 1904

Secretary Board of Trade, Peterborough:—

Dear Sir,—It has come to my knowledge that the newspaper reports, to the effect that the Royal Commission on Transportation had decided that they would look into the question of the completion of the Trent Valley Canal was an erroneous statement. I immediately wrote the Dominion Government and was referred to the Chairman of the Royal Commission on Transportation, Mr. John Bertram, of Toronto, to whom I wrote, with regard to the general desire existing among the interested public of having the commission take up this question and examine into the advisability of completing this largely natural link in the transportation system of Canada, and if decided upon favorably, prompt action to be taken upon the decision. I wrote also intimating that general petitions would be forthcoming, if requisite, and suggesting that Peterborough would be the proper and most convenient place to all concerned to have the Commission sit.

I was honored with a reply as follows,—

"The subject of your letter in the matter of the Trent Valley Canal will be brought before the Transportation Commissioners at their next meeting, and receive their consideration of which you will be advised. As to any petitions coming from public bodies or copies of any resolutions bearing on the subject—that is for them to decide."

From this reply, I should judge that it would be advisable for public bodies in the district to forward memorials asking for a sitting of the Commission upon this important public work, and I therefore would ask you to call a meeting of the Peterborough Board of Trade, of which I have the honor to be a member, to discuss the matter.

While only suggesting Peterborough in my correspondence as the place for sitting I would suggest to the Board of Trade that they ask the Commissioners to take a trip over the possible routes of canal as by so doing I think it would act beneficially upon them for a favorable decision in the completion of this almost natural waterway.

Faithfully yours,
J. ALEXR CULVERWELL

EVERYBODY READS THE TIMES

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Mrs. H. P. Kennedy will take the gospel meeting on Tuesday at the Y.M.C.A. at 4.15.

—G. A. Henty's popular serial "A Soldier's Daughter," in the "Girl's Realm for 1903." A few left at the Times Bookstore for $1.20.

—If things are quiet about your home, drop in and look at our "Chatterboxes." We have them for 60 cents at the Times Bookstore.

—There will be an auction sale on the market square this morning at 11 o'clock, when Mr. John Haggart will sell a horse, harness, cutter and fur coat.

During the year ending Dec. 31st, 1903, there were registered with the Clerk of Norwood, 22 births, 14 marriages and 11 deaths. Compared with 1902 these returns show an increase of 3 births, 4 marriages and 3 deaths.

—Mr. R. B. Rogers, Superintending Engineer of the Trent Valley Canal, will deliver a lecture on the "Canadian Pulp Industry," at the Y.M.C.A. Hall this evening. Lantern slides will be introduced, and a general invitation is extended to the public to attend.

—The man who says he can do all the business he wants to without advertising would be wonderfully surprised if every other business man thought the same and the newspaper quit the field. Nobody is foolish enough to think that the men who spend thousands of dollars annually in advertising are doing this purely in a philanthropic regard for the poor editors. These parties are advertising to make money for themselves, and for no other purpose.

—At the corner of Hunter and George streets, at a late hour last night, a young man from the Fifth Ward became possessed, and to give vent to his feelings began to shout at the top of his voice. Policeman McGinty, thinking some maniac had escaped from an asylum, hurried towards the victim who fled. But his limbs became tangled, and he was forced to "give up the ghost." He was yelling for fun—McGinty sent him to the woods to express himself.

—One day last week while sad and dreary, as we wended weak and weary across the unswept floor, we heard at first, a gentle rapping, then it became an earnest rapping, at our sanctum door. "Come in!" we said; while yet we pondered, and in silence till we wondered what for us could be in store; then the door knob gently turning; in he walked—our cheek was burning, as we thought of crimson gore. "Are you the man who does the writing?" Then we thought there's signs of fighting, as we looked him o'er and o'er. "Sir, we are," we meekly told him, motioned for the boys to hold him if he tried to beat us sore. "Then you'll give me credit opposite that little debt of a dollar or more. I like The Times and will take it as long as you strive to make it as good as it has been before." We turned, he dodged! Thus we missed him, or we surely would have kissed him, no matter if the boys did roar. So seldom treated in this manner, we felt inclined to sing hosanna! Only this and nothing more.

A KEENE WEDDING

Miss Eliza M. McNeil and Mr. Thos. Eakins Married on Wednesday

One of the prettiest weddings in the history of Keene, was that of Miss Eliza, daughter of Mrs. P. McNeil, who was united in matrimonial bonds to Mr. Thomas Eakins, a prominent young man of Manvers, on Wednesday afternoon. The bride looked charming in a pretty dress of white silk, and the bridesmaid, Miss Maggie Sharpe, of Westwood, was also beautifully attired.

At the conclusion of the ceremony the happy couple received the congratulations and good wishes of their friends present, and then enjoyed a dainty repast in the tastefully decorated dining room. A large number of guests was present, and the wedding march was played by Miss Kate Skinner, a niece of the bride. The many friends present showed the high esteem in which the young lady was held in the community, by the costly and handsome gifts they presented.

—Mrs. and Mrs. Hon. J. R. Stratton arrived in town last night from Toronto.

—Mr. Alf. Smith, of the Review, is visiting friends in Toronto.

JUST IN TIME.

A motorman in Chicago ran his car onto the approach of an open bridge but stopped it with the fender actually overhanging the gulf below. He wouldn't want to repeat the experiment because the chances are that he'd never again have the same good fortune.

Once in a while some one who has traveled to the very edge of the danger line of stomach disease stops just in time to save his health. But the majority of people go across the line, and slight symptoms of indigestion grow to disease of the stomach, involving the other organs of digestion and nutrition.

Indigestion and other forms of stomach "trouble" are perfectly and permanently cured by the use of Dr. Pierce's Golden Medical Discovery. It strengthens the whole body by enabling the perfect digestion and assimilation of food.

$3,000 FORFEIT will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"I have been suffering for about eight years," writes Mrs. M. Pierce, of Millsprings, Ky. "Have had several doctors to treat me—some for female weakness and others for stomach trouble, but received no relief. When I wrote you for advice I was hardly able to work, and you advised me what to do. I took nine bottles, five of 'Golden Medical Discovery,' four of 'Favorite Prescription,' also two vials of the 'Pellets.' Dr. Pierce's medicines will do all that you claim for them. Believe I would have been in my grave, if I had not taken them."

Dr. Pierce's Medical Adviser is sent free on receipt of stamps to pay expense of customs and mailing only. Send 21 one-cent stamps for the book in paper covers, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

HAPPY AND HEALTHY.

A Beautiful Canadian Girl Saved From Catarrh of the Lungs by Pe-ru-na.

MISS FLORENCE KENAH.

Miss Florence E. Kenah, 434 Maria street, Ottawa, Ont., writes:

"A few months ago I caught a severe cold, which settled on my lungs and remained there so persistently that I became alarmed. I took medicine without benefit, until my digestive organs became upset, and my head and back began to ache severely and frequently.

"I was advised to try Peruna, and although I had little faith I felt so sick that I was ready to try anything. It brought me blessed relief at once, and I felt that I had the right medicine at last. Within three weeks I was completely restored and have enjoyed perfect health since.

"I now have the greatest faith in Peruna." F. E. KENAH.

WOMEN should beware of contracting catarrh. The cold wind and rain, slush and mud of winter are especially conducive to catarrhal derangements. Few women escape.

Upon the first symptoms of catching cold Peruna should be taken. It fortifies the system against colds and catarrh.

The following letter gives one young woman's experience with Peruna:

Miss Rose Gerbing is a popular society woman of Crown Point, Ind., and she writes the following:

"Recently I took a long drive in the country, and being too thinly clad I caught a bad cold which settled on my lungs, and which I could not seem to shake off. I had heard a great deal of Peruna for colds and catarrh and I bought a bottle to try. I am pleased that I did, for it brought speedy relief. It only took about two bottles, and I considered this money well spent.

"You have a firm friend in me, and I not only advise its use to my friends, but have purchased several bottles to give to those without the means to buy, and have noticed without exception that it has brought about a speedy cure wherever it has been used."—Miss Rose Gerbing.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

The PETERBOROUGH FUEL and CARTAGE CO.
LIMITED

AUTHORIZED CAPITAL $40,000 In 1,600 Shares of $25.00 each

DIRECTORS
PRESIDENT, J. H. McCLELLAN, Coal Dealer.
MANAGING DIRECTOR, WM. BULLER, Carter.
SECRETARY-TREASURER, A. J. McCLELLAN.
F. D. KERR, (Barrister) A. PARKER, (Dye Works.
SOLICITORS
DENNISTOUN, PECK, KERR & STENENSON.

The Peterborough Fuel & Cartage Co. (Limited) have acquired the plant and goodwill of the following companies: The McClellan Co., The Stevenson Coal Co., The Wm. Buller Cartage Co., and propose to carry on a Coal, Wood, Sewer Pipe, Cement and Cartage Business. It is also proposed to erect a suitable building for the storage of Household Goods and Furniture. This has been a long felt want in Peterborough and its success is certain. At present there is no place where suitable and convenient storage can be obtained.

PROPERTIES

The Company control the most desirable site and sheds of the Stevenson Coal Co., situated on the Grand Trunk track and property adjoining, leased at a nominal rent from the Grand Trunk. This property makes a most desirable place for the business at nominal expense

ADVANTAGES

The cartage and coal business would work very advantageously together as the slack months in the coal business are the busy ones in the carting, and vice-versa

ESTIMATE OF BUSINESS

In presenting an estimate of the business that could be done the directors have been very conservative in their figures

3000 tons hard coal could be handled at a gross profit of $1.25 per ton	$3,750 00
(This has been the average profit for a number of years)	
200 tons of soft coal, gross profit 75 cents a ton	1,500 00
10 carters' wagons, handling freight, household furniture and coal; average gross earnings $3.50 a day for 300 days.	10,500 00
Revenue, storage business, 1st year	500 00
	$16,250 00

THE ESTIMATED EXPENSE OF DOING THIS BUSINESS

Cost handling coal, 5000 tons at 30 cents a ton	$1,500 00
Wages, cartage business	4,000 00
Horse Feed	1,400 00
Incidental expenses, shoeing, repairs etc	800 00
Office expenses, salaries, etc	2,300 00
Depreciation, wear and tear	1,250 00
	$11,250 00

Leaving net earnings of $5,000.00, or 25 per cent. on an investment of $20,000.00, which would be a sufficient sum to operate the business on the above basis.

CO-OPERATIVE PLAN

Besides being assured of a good dividend the stockholders are allowed a discount of 25 cents a ton off market price, time of ordering their supply of hard coal.

The shares have been placed at $25.00 and in submitting the above proposition it is confidently expected that this company with its large list of shareholders working for its interests, cheap rents and the advantage of starting off with a large business should be a splendid opportunity for investment

TERMS OF SUBSCRIPTION

A deposit of 25 per cent. is payable on acceptance of application and the balance in monthly instalments of 25 per cent. each. Subscribers may make payment in advance of due dates and will be entitled to dividend from the date of such payments. If no allotment is made deposit will be returned without reduction and if a partial allotment is made the surplus deposit will be applied toward the amount payable on allotment.

All cheques must be made payable to DENNISTOUN, PECK, KERR & STEVENSON, Acting Treasurers.

THE BALKAN WAR BEGINS TURKS ARE BEATEN

Formidable Rebellion Breaks Out in the Balkan Peninsula

MACEDONIA NOW STRIKES FOR HER FREEDOM

The Rebels Kill Many Turkish Soldiers—Bulgaria Preparing For War With Turkey

London, Feb. 22.—Revolutionists in the Balkans have again taken up the sword and the torch to strike a fresh blow for freedom from the harshness of Turkish rule. Despatches received to-day from Salonica, Sofia, Constantinople and other points in the region of war show Turkish troops are being besieged, towns are being burned and that the situation threatens to engulf Europe in an enormous conflict.

Russia, cognizant of the fact that the revolutionists have defeated Turkish troops at great cost of life on both sides, and of the further fact that thousands of Bulgarians stand ready to join the ranks of the belligerent Albanians, has notified Bulgaria that any encouragement it gives the revolutionists will be interpreted as a cause for war on part of the Czar. In its note the St. Petersburg government announced that it would resent with force any Bulgarian attempt to foster a renewal of the Macedonian insurrection.

It is regarded in London as impossible that the Bulgarians can be restrained longer by their government. They have always sympathized with the Macedonians, who, it appears, are opposed to the reform scheme instituted by Russia. The czar's note to Bulgaria is likely to act as a firebrand. Macedonians and Bulgarians believe the Russians have enough to occupy all their attention in the orient, so the present is regarded as an opportune time to strike for the independence of Macedonia.

Defeat or Besiege Turkish Troops.

Salonica, Feb. 22.—Rebelling against the powers' reform scheme for the government of Macedonia and against obnoxious taxes imposed by the sultan, between 25,000 and 50,000 Albanians have taken up arms to strike for freedom from Turkey. Already the revolutionists have clashed with and routed or repulsed the Turkish troops in several bloody battles. At the present moment 20,000 drilled and well-armed Albanians are besieging Shemsi Pasha, who has 2,500 Turkish troops and three cannon, at Babajhoc between Diakova and Ipek. In sorties and attempts to break through the rebel lines Shemsi Pasha has lost 100 men. His surviving soldiers are said to be without food and water.

Shakir Pasha is hurrying to the relief of the besieged Turkish force with strong reinforcements. It is doubtful, however, whether he will arrive before Shemsi Pasha's men, disheartened by the prospect of starvation and weakened by the hot fire of the besiegers, are forced to surrender to the revolutionists.

Turks Admit Their Reverses.

Constantinople, Feb. 22.—Sixteen thousand Albanians are in revolt in the district of Diakova against the reform plans of the powers for Macedonia. In conflicts which have taken place between Albanians and Ottoman troops the latter were worsted. Large reinforcements have been despatched to Diakova.

The Albanians attacked the town of Diakova Feb. 13 and plundered and burned a number of houses. Turkish forces subsequently attacked the insurgents' main position at Babajhoc, but were repulsed with heavy loss.

Feverish activity continues among the Turkish authorities on the Bulgarian frontier in accumulating stores and repairing roads for the expected massing of troops.

Gives Russia's Note of Warning

Sofia, Feb. 22.—Russia has officially notified the Bulgarian government that any encouragement given by Bulgaria for the renewal of the insurrection in Macedonia will be regarded as an act of hostility which will be promptly and forcibly resented.

MAY FIGHT BRITAIN

Russia Prepares to Strike a Hard Blow

INDIA IS TO BE INVADED

Russia Will Not Allow Rival to Profit From Present War

St. Petersburg, Feb. 22.—It is becoming apparent that Russia is taking into account the possibility of war with Great Britain, arising from the attempts of the latter power to profit from Russia's present situation. It became known today that Lieutenant General Ivanoff, governor general and commander of the troops in Turkestan, had gone to Tashkend with General Sakharoff, chief of staff of the military district of Turkestan. In high military circles it is said that General Ivanoff has been instructed to prepare plans for the prompt invasion of India in the event of Great Britain adopting an attitude of open hostility to Russian interests or attempting to prejudice Russian interests in Persia or Thibet.

Has Big Army Available.

Russia has an immense army available for use in such an enterprise, and in addition could count on the active assistance of the nomadic peoples of Turkestan and Afghanistan, who within the last few years have come under Russian influence.

The anti-British feeling is growing among all classes and the opinion is everywhere expressed that England and not Japan is the real antagonist of Russia in the present war.

It is known that the Czar's government counts on the moral support of Germany in the war with Japan, and in the event of trouble with England it is believed here that the interests of the kaiser would lead him to offer something more substantial than sympathy.

Want Alexieff Removed.

Public opinion in Russia, even among military men is strongly opposed to Viceroy Alexieff, who is accused of incapacity. A movement is on foot in favor of the immediate appointment of General Kuropatkin, the war minister, to command the Russian land forces and to give Admiral [illegible] command on the sea.

A meeting of the council of the empire was held yesterday. It was attended by the heir presumptive, the Grand Duke Michael, and other grand dukes.

Vice Admiral Makaroff, the ice-breaker specialist of the Russian navy and until lately commander in chief at Cronstadt, has gone to the far east.

The spirit of patriotism at Moscow has resulted in the rough handling of a number of persons, who failed to take off their hats while the crowds were singing the national hymn. It is even reported that some of the offenders were killed, but this is not confirmed officially.

The Russian fleet is said to be bottled up in the harbor of Port Arthur which supports the general belief that the Japs are [illegible].

CHAMBERLAINITES ARE STILL CONFIDENT

An Interview with High Authority in Chamberlain's Councils

ATTITUDE OF GOVERNMENT

Preference Policy is Strongly Entrenched in Cabinet and Ministerial Ranks

London, February 22.—Mr. Chamberlain being absent, I submitted to the high authority, who is best qualified to speak Mr. Chamberlain's mind, yesterday's Canadian cablegrams indicating Canadian disappointment at the British Parliament's adoption of the Ministerial policy of retaliation, and their refusal of the Ministry at present to adopt the policy of preferential tariffs. This Chamberlain authority spoke as follows:—

AN AUTHORITATIVE STATEMENT.

"You may say authoritatively in Canada that the attitude of the Government is defined, not by the isolated utterances of this or that Minister. These express the strongest sympathy with the movement for a preference, and his expectation of its adoption when public opinion is enlightened on the question of food taxes. Since these declarations of the Prime Minister, objections to food taxes have been to a large extent met.

STRONGLY ENTRENCHED

"Indeed, you may tell Canadians emphatically that so strong a hold has the preferential policy secured within the cabinet, and in the Ministerial party generally, that if the Ministry for one moment contemplated the abandonment of Chamberlain's ideal, which of course they do not, the position of the Ministry would be instantly imperilled. For a large and influential body of Ministers and other leaders are bent on carrying the policy of Imperial reciprocity as quickly as possible.

CERTAIN OF SUCCESS

"My. Wyndham's name is mentioned in your Canadian cablegrams. He is one of the strongest supporters of the Imperial idea in the Cabinet. We are certain of success, for the cause appeals to nine out of every ten thinking Englishmen."

RUSSIANS ARREST A REPORTER

Refuse to Let War Correspondents Travel Out of New Chwang

Shan-Hai-Kwan, Feb. 22.—A correspondent who a few days ago attempted to leave New Chwang to cross the country in order to reach Liao-Yang, to join the Russian forces, under General Prastalinski, which are en route for the Yalu, was arrested by Cossacks, notwithstanding his properly made out pass, and obliged to return to New Chwang, the Russians forbidding him to travel.

In consequence of the reports of the projected Japanese landing hereabouts, the position has been closely examined. The shore is lined with drift ice and it would be impossible to land anywhere at present except at Chinwangtao, which is a neutral port. Russian officers are sending their families away by this route, as the Siberian railway line is closed both to civilians and the mails.

A LIVELIER MARKET

Prices High and Produce More Plentiful At the City Square

"Its the best market we've had since the bad roads," was the remark of a sturdy Springville farmer on Saturday morning, and perhaps he was not far astray. A better display of butter, eggs, poultry, beef and hay has not been on the market for some weeks. The hay was scarce and sold at $8 and $9, although one fine load brought $10. "There's plenty more like it in the barn," said the farmer, "but the roads are dreadfully bad," and several other citizens who desired the load had to be contented. An excellent consignment of butter from the Cavanville creamery, brought 23 cents. "There's as much difference between this butter and that of others, as there is between a tailor-made and a ready-made suit of clothes," said the Cavanville man, "and it is worth at least 2 cents per pound more." Eggs sold for 30 cents a dozen and a great many changed hands. Chickens brought 50 and 80 cents per pair, turkeys from $1.25 to $1.50, and the few geese offered averaged $1.25. "Bad roads," was the whole cry among the teamsters, and only one small load of straw was sold, the price received being $3.00. The display of vegetables was more varied than usual, and the prices were, for the most part, high. Potatoes brought 65 cents per bag, parsnips 15 cents per peck, cabbage 5 to 7 cents each, beets 15 cents per peck, turnips 35 cents per bag, carrots 50 cents per bag, and onions 40 cents per peck. Mutton sold at 7 and 8 cents a round beef at 5 1-2 and 6 1-2 cents and pork at 8 and 9 cents. Considerable honey was offered for sale, and Mr. Jas. Baptie had some especially fine samples. "It's astonishing the amount of honey that is sold around here," said a prominent Springville farmer. "I, myself, sold over three tons this season," he continued "and I cannot supply the demand."

C. E. E. VS. C. G. E.

Peterborough Works Won from Canadian General's Electric Co. Toronto's Head Office Team—Score 9-9

A large number of hockey enthusiasts witnessed the contest between the local C.G.E. team and that of the head office staff of Toronto on Saturday evening at the Brock street rink, and a most interesting exhibition was given. From the commencement it was quite clear to all that the Toronto boys lacked the strength of the Peterborough team, and the game was practically one-sided throughout. At the beginning of the match Referee Lynch had occasion to sound the bell many times, but the uncertain condition of the ice, no doubt, caused the many errors. After some creditable work on both sides the Toronto boys succeeded in scoring, and in a few minutes Whitcroft, of the local team, made a fine play, which resulted in a score for the Peterborough seven. McGrath was a winner and his determined rushes were remarked on all sides, while "Maggie" as the boys in the gallery termed the popular Fred was conspicuous throughout the game, and it was plainly seen that his company was not fast enough, while Crowley played a very brilliant game. Lee did some clever work, but he and the puck got mixed up frequently, and the boys in red mixed up with both, but gave the preference to the latter.

At one time during the first half excitement ran high, and as a result of fast work on both sides, the referee was knocked down, but immediately arose none the worst for his fall. Soon after the bell rang for half time, and the board marked 4 to 2 in favor of the home team.

The beginning of the second half was livelier than that of the first, half and the Torontos tried hard, but could not combat against the superior staying qualities of the town boys. Two goals were scored in quick succession by the town team, and the applause from the enthusiastic audience was redoubled. "Chalk her down another for Peterborough," was the common expression from the female section of the crowd, and Whitcroft and McGrath evidently liked to listen to such music, as they rapidly scored several times, making the final score 10 to 3.

The line up of the teams was as follows;

Peterborough		Toronto
	Goal	
Fitzpatrick		Regan
	Point	
Ford		Logan
	Cover Point	
Crowley		Edgar
	Centre	
Whitcroft		Kerrigan
	Right Wing	
McGrath		Macann
	Left Wing	
Renton		Franks
	Rover	
Lee		Harris

Referee
Geo. Lynch

The Toronto boys certainly received a surprise when they met the the local team on Saturday night. Although having played but eight games this season, four of which were in their favor, they, according to one of the player's opinion, thought they had an "easy mark." However, we understand they were considerably handicapped owing to the illness of Dennison, their crack "point."

Local Sports

Dave Belland and Jack Kelly will meet in a six-round bout at the opera house tomorrow evening, for the town championship.

The St. Georges, of Toronto, will play the Peterborough senior hockey team at Brock street rink tonight, and a lively time is expected. At the conclusion of this game the Young Men's Guilds from George and Charlotte street churches will come together in a friendly contest.

Tomorrow evening will be one of unusual excitement in sporting circles, the object of the interest being the wrestling contest between Max Wiley of Rochester, and Geo. Kennedy of Montreal, who will wrestle for the 135 lb. championship of America, at the local opera house. Wiley is in fine trim and will give the Montreal man a hard tussle. He is a modest young fellow of fine physique, and to quote his own words, he "manages himself." "I can handle meself," said Max to a Times reporter, "I have no manager." Kennedy will arrive in town today.

SERVICES FOR WAR HEROES

Japanese Bury the Men Killed in First Port Arthur Battle

Sasebo, Japan, Feb. 22.—Impressive funeral services were held here yesterday over the remains of three officers and two men of the Japanese battleship Fuji, who were killed by the Russian fire during the first attack on Port Arthur. The religious ceremonies were conducted by a Shinto priest and the funeral oration was delivered by Admiral Samew.

JAPS MAY WIN AT FIRST

Berlin Experts Expect Initial Victories for Mikado's Army

Berlin, Feb. 22.—Expert naval opinion in Berlin justified the Japanese in landing before the Russian fleet is destroyed, as to wait until that is accomplished might mean a delay in the land operations for ening of Russia's forces. The expe monbths, consequent on the strength tation expressed by a technical newspaper which reviews the situation is that Japan probably will in the beginning have considerable land successes through hard fighting. What may happen after the early period of the land operations no technical person ventures to predict in writing, though it is doubtful if the Siberian railroad will be at all adequate to reenforce and supply the Russian army.

NOT THE JUDGMENT OF GOD.

Toronto Man Condemns the Members of the Lord's Day Alliance re the recent [illegible] Case.

The Toronto 'Star' of Saturday, contains the following letter,

Editor of The Star, I notice in your report of the above case it is stated that a member of the Lord's Day Alliance was so bold as to refer to it as a "judgment of God," because, forsooth, by the judgment of a police magistrate, it was held that to make certain inspections and overhaulings on a Sunday is not an infraction of the Lord's Day Act. While I do not agree with the decision of the magistrate in his interpretation of the meaning of "works of necessity," I entirely dissent from the view of the gentleman above mentioned, as, I take it, all fanatics will likewise do. It appears that the Lord's Day Alliance had nothing to do with the recent prosecution in Peterborough, but I see that body is and has been for some months engaged in a prosecution of employes of the sugar factory at Berlin, the case having been enlarged time after time for many months. A sugar factory, as I understand, has to be run unceasingly, because to close it down once a week would involve such loss that it could not be run at all. Assuming that sugar is one of the necessaries of life, to manufacture it is a "work of necessity"; ergo, to work in a sugar factory on Sunday is not an infraction of the Act. But to say that, ordinarily, because by stopping a factory on a week day the employes to that extent may lose their wages, it is a "wrok of necessity" to do the overhauling on Sunday, is casuistry of the worst sort; still I am not sorry that the magistrate in the case of the Cereal Company prosecution thought fit to indulge in that kind of reasoning. The Lord's Day Alliance is composed of a number of highly respectable and probably well-meaning individuals; then, why under the sun will they not take a sensible view of the environments of modern civilization? No one pretends that the puritan sabbatarianism of a century ago would now be tolerated, nor do these good people seek to enforce such strict observance of the Lord's Day as used to prevail in Scotland. To supply the enormous demand for all sorts of utilities it has become necessary to erect very large plants of various descriptions; it is no easy manner to induce capitalists to risk their money in "industrials," and when they do they must be well assured that they will get a fair return for the risk. It is a well-known axiom in economics that the only way to get a fair return out of most manufacturing plants is to run them to their full capacity, so that in many instances to run for only five days in the week, closing down on a week day for overhauling, would be simply disastrous to the factory. What is to be done in this case? This is where the Legislature should step and, instead of making the Lord's Day Act stricter, its provisions should be so relaxed as to meet such cases as are here indicated, thus relieving our great industries from the petty tyrannies of a few over-zealous people, who might be reminded that even Saul of Tarsus was mistaken. Is there any member of our Legislative Assembly who has the courage to attack the question?

Pi.

WOULD SEIZE SPAIN'S PORTS IN CASE OF WAR

The French Government Has Confidentially Given Warning to the Spanish Cabinet of the Secret Plans of British Government

Spain Sending Troops to the Canary Islands

AND CLOSE TO THE STRAIT OF GIBRALTAR

Sweden and Denmark Are Also Preparing for War

St. Petersburg, Feb. 20.—With reference to the sensational stories of a disaster to Russian troops at Lake Baikal (one report saying that three regiments were drowned while attempting to cross the ice-covered lake), it is explained that the trans-Baikal line was blocked at the Baikal station during the night of Feb. 18 by an avalanche of snow which fell from a neighboring mountain. A train having troops on board dashed into the obstruction and the locomotive was derailed. One soldier was killed, five were severely injured, and fourteen were slightly hurt. Traffic was said to be resumed next day.

Further advices from Port Arthur today say that all the women and children and most of the male civilians have left that place, and that practically only the garrison remains.

The wave of patriotism sweeping over the empire seems to be swamping racial feeling, even the wild tribes of the Caucasus, the discontented Finns, and sullen Poles forgetting their grievances and coming forward to volunteer their services to the common fatherland.

WHY CAMPAIGN IS SO VERY SLOW

General Miles Speaks of the War in the East

JAPAN'S HEROIC EFFORTS

To Get the Russian Troops Cut Off at Port Arthur

Washington, Feb. 22.—General Nelson A. Miles, discussing the war situation says, "Many of the despatches purporting to come from the seat of war are now probably given out for the purpose of creating sympathy or prejudice by interested parties. Still the reading public must winnow the wheat from the chaff and those accustomed to the perusal of the newspapers of the daily journals are usually able to discern that which seems reliable and authentic from the most sensational. The persistent effort on the part of the Japanese to destroy or inflict serious injury upon the Russian fleet, taking advantage of the darkness of the night and the severity of the cold storms that frequent the northern coast, indicate a purpose to clear the waters dividing the Island Empire from the main land, if possible, before commencing any extensive operations against the Russian position. These tactics, if persistently continued, must result in serious damage to the Russian fleet or the destruction of the torpedo fleet of the Japanese. Either is liable to occur whenever they come together. There would be no excuse for the Russian gunners failing to destroy the torpedo boats if the attempts were made at a time when the Russian decks are free from the ice and the machine and rapid fire guns could be readily and effectively used. The destruction of the Japanese torpedo boats would be a serious loss to their navy. While the severity of the winter climate and the blinding storms may be of some advantage to the Japanese in their night attacks, they are at the same time of some advantage to the Russians in giving them protection and making the movements and efforts of their enemy most difficult and expensive. Since the terrible disaster to Napoleon's army, nearly a hundred years ago, it has been said that January, February and March are Russia's three best generals, so while it may be difficult for Russia to move the heavy reinforcements over the Siberian road, the winter has also made it very difficult for Japan to land a large army in Corea or Manchuria and sustain herself there, even if the waters behind her army were entirely free and under her own control. But to move an army across an extensive body of water, with the possibility of an enemy's battleship cutting off its retreat or source of supply, or war ships getting in among these transports and supply ships and creating destruction, is one of the most hazardous movements in military operations. Therefore, the delay of the Japanese in moving a most formidable army from her own territory to Corea or Manchuria, is no doubt caused by the impossibility, up to the present time of being able to cripple the Russian Navy, and the difficulty of sustaining an army in that cold climate at this season of the year. It is said that the Russians are suffering and will suffer much on account of the severity of the winter yet they are more accustomed to endure those hardships than are the Japanese."

LOYAL CANADA

There Is No Annexation Sentiment in Canada

Toronto, Feb. 22.—Mr. C. A. Birge, ex-president of the Canadian Manufactures' Association, repeated before the Empire Club the address which he gave recently to the Commercial Club of Providence, R.I., on the relations between Canada, the Mother Country and the United States. Mr. Birge repudiated Senator Hale's prophecy, that Canada would soon be annexed to the United States, declaring that there was no sentiment in Canada in favor or annexation. He also declared that the movement in the United States in favor of reciprocity failed utterly to find a response in Canada.

FACTS ABOUT THE DOUKHOBORS

Mr. Bryce Thinks They Have Not Made Good Settlers

SHOULD BRING IN NO MORE

They are an Alien Race Who do Not Assimilate Readily with Others

Montreal, Feb. 22.—A press representative had a chat in the rotunda of the Place Viger Hotel with Mr. James Bryce of Winnipeg. Mr. Bryce, who is on his way to England, recently visited Yorkton, Assa., and has some interesting facts to tell of the condition of what Mr. Bryce calls "Sifton's pets," viz, the Doukhobors. Mr Bryce is of the opinion that the Doukhobors will not for some years to come develop into the class of working settlers that Canada is so much in need of. The climatic conditions of Yorkton are not of the easiest and some time must elapse before the Doukhobors will emerge from their present condition of semi-helplessness and begin to make headway.

"The main question," said Mr Bryce "in settling up the vast West is not so much to run in a horde of people as it is to get the right class of people. Settlers are to a large extent born and not made, if I may use the term, and the Doukhobor as he is today in the neighborhood of Yorkton does not come up to the lowest qualification of a settler. He will not assimilate, he is hide bound by religious superstition and observance; he is at any time liable to start off on a long winter pilgrimage; in fact he is a man of many moods, incapable of looking after himself."

"Is there any likelihood of another pilgrimage this winter?" was asked.

"I do not think so," was Mr Bryce's reply. "The long continued cold of that northland winter has nipped any intention of that kind in the bud. The fact remains, however, that when it comes to settlers, these people are the greatest failure. They are like children that have to be watched carefully for fear they will get into some mischief. Canada wants settlers who will help to build up and develop the mighty resources of the Dominion and place her on a footing second to none among the nations. The Doukhobors will never aid in this work of nation building. They are an alien race with customs and manners far removed from those of other European sects. The Galician and Menonite are far ahead of the Doukhobor."

Several Soldiers Were Killed And Injured

A RUSSIAN TRAIN HIT AVALANCHE

Three Regiments Were Drowned in Lake

Special to THE TIMES.

St. Petersburg, Feb. 26.—An instance of devotion among the Czar's Hebrew subjects is afforded by the act of 45 Jewish doctors in throwing up their practices to go to the front. Before leaving they attended a service in a synagogue here. Rabbi Drabkin made a fervid address to a large congregation, which included Baron Ginsburg and other Jewish notables.

New York, Feb. 20.—A special cable from Berlin to the Herald says, according to a telegram from the Madrid correspondent of the Berlinger Tagblatt, the French Government has confidentially given warning to the Spanish Cabinet of the secret plans of the British Government to seize ports of Spanish territory in case of war.

This is the reason why Spain is sending troops to the Canary Islands Ceuta, Galicia, and the neighborhood of the Straits of Gibraltar. The French Government has also advised the strengthening of the fortifications on certain parts of the Spanish coast.

Baron Richthofen, the Minister of Foreign Affairs, says that in view of the outbreak of war, it is impossible for Germany to withdraw the 2,600 men she has in China and at Kafo Yebin. The troops in China are the backbone of the maintenance of order in China.

JAPANESE TORPEDO BOATS HARRASS PORT ARTHUR

Special to THE TIMES;

Port Arthur, Feb. 21.—Sounds of desultory firing are heard almost nightly, and this morning firing was again heard. This is doubtless due to the attempted approach of Japanese torpedo boats, but nothing serious has developed. The garrison is in excellent spirits, and is plainly convinced of the ultimate success of the Russian army.

The Novikrai prints a long article envoking historical pessimists to prove that the illegality of the Japanese declarations that coal and victuals will in cases be treated as contraband of war. The paper describes Japan's attitude as barefaced presumption, and urges the neutral powers to disregard and not refuse to supply belligerent ships with coal to carry them to their nearest home ports. It follows, therefore, the Novikrai says, that the British Government should allow Russian ships at Singapore to take on sufficient coal to enable them to reach Port Arthur.

Government Forces Defeat Insurgents

Special to THE TIMES;

Paris, Feb. 21.—A despatch from San Domingo says; United States cruiser Columbia and the training ship Hartford, have bombarded Duarte, which is occupied by the insurgents.

Washington, Feb. 21.—Late tonight the American State Department received a cablegram from United States Minister Powell, dated San Domingo, Feb. 16, saying: A decisive battle has been fought between Government forces and insurgents. It extended over two days, and resulted in victory for the Government forces. The siege has been raised, and the insurgents are in retreat.

NURSES FOR THE WAR

U. S. Nurses Volunteering for Services in Japan

So far as is known at the present time there are no Ontario nurses volunteering for service in Japan in connection with the Russo-Japanese war. At the Canadian Nurses' Association the statement was made that none were known to have applied to be sent to Japan.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, FEBRUARY 22, 1904

RUSSIA'S WILY SCHEMES OF CONQUEST

Toward the close of the Sixteenth century, Russia began that march across Asia to the Pacific, which she has ever since continued. Her first great Asiatic conquest, that of Siberia, was the work of a loyal soldier and adventurer. He humbly laid it at the feet of his sovereign Ivan the Terrible, who lives in history as an exaggerated copy of the English Henry VIII. At this time the Russian empire extended only 800 miles east of the present site of St. Petersburg. It now extends 5,000 miles in an unbroken line as the result of 350 years of conquest. These conquests have cost continuous hard fighting and frequent defeats and have been attended by incredible cruelty and suffering.

John Brisben Walker tells us in the February Cosmopolitan of the astute and cunning policy which Russia has pursued in her career of aggrandisement, of how her chosen times for action have been when the attention of the great nations have been diverted by wars or other serious calamities of her own. Then she has made her boldest moves and sought to realise her dreams of universal empire, her ambition to become mistress of the world.

In achieving what she believes to be her manifest destiny, Russia has appropriated vast portions of the earth's surface. Her trans-Siberian railway the longest in the world, crosses three rivers, each of as great or greater length than the Mississippi. From her Siberian mines whose development has scarce begun, she already takes $25,000,000 worth of gold a year. She has known how to snatch victory even from the jaws of defeat. When in 1896, a Chinese force captured her outposts and carried off all their inhabitants to Pekin, the captives made this city a vantage ground for intrigues in Russian interest.

In 1900, when France and England were exerting their utmost strength to put down a gigantic Chinese rebellion, Russia seized her opportunity to secure the region of the Amur. She also played a subtle part in the recent attack on the foreign legations at Pekin, by posing as the rescuer who to be within easy reach of the imperiled embassies was justified in occupying Manchuria. Mr Walker says that it was not until 1895 that the world at large had any real conception of the real meaning of the trans-Siberian railway. Japan from three centuries of watching Russia, well knew that her programme was eventually to absorb the Japanese empire. Others have suspected this programme to be gradual marches on Pekin, Canton, Nanking, India and Persia, and a final carrying back of Russian conquests into Europe by way of Constantinople.

It is thought, however, that in cherishing these colossal designs, Russia has over-reached herself; that Japan with a better equipped army and navy, with fewer natural disadvantages to overcome, and thrice armed because her quarrell is just, will be able to turn back Russia's triumphal march in Asia. The great trans-Siberian railway, from which Russia expects in time to reap so much advantage is yet imperfect in construction and poor in equipment. Time is needed to fit it for the transportation of great bodies of soldiers and army stores. While Russia is not ready for the war that has already begun, Japan is in the best state of preparation possible to her. It may be that this war-flame kindled in the Far East will envelop all Europe and become the greatest armed conflict of modern times.

CANADA AND THE TREATY-MAKING POWER

One result of the Alaska arbitration award, so far as this country is concerned, has been the continuous discussion for several months of the possibility of securing for the Dominion a larger share of the treaty-making power. Sir Wilfrid Laurier's public assertion that in negotiations involving primarily Canada's interest Canada can do better for herself than England can do for her was made immediately after the joint commission in London proclaimed its award.

A full statement of Sir Wilfrid's position is expected when he addresses parliament. Meantime it is understood that he does not presume to ask for an absolute power to make treaties, apart from the British Government, for that would be equivalent to demanding independence, inasmuch as behind treaties must stand, as the world is now organized, armies and navies, and Great Britain could not be expected to enforce the observance of treaties which she had no part in making. What Sir Wilfrid is understood to desire is that Canada have a free hand in conducting negotiations, with only a power of veto reserved to the king and his ministers.

A recent article in the Queen's Quarterly by Professor Shortt of Queen's University, argues strongly in favor of the proposal. Far from believing that the new power will tend to an estrangement between Canada and Great Britain, Professor Shortt believes that in the end "the unity of the empire will be placed in a much safer position by the concession of this right." The exercise of the power will give, he holds, "the education which comes to a people through the necessity of working out its own political salvation, however imperfectly for a time it may do so.

Among those opposed to the proposal is Goldwin Smith, who believes that Canada already possesses influence in treaties which concern her sufficient for her needs. The discussion has hardly yet, however, been brought down to close quarters. When it is, it will undoubtedly throw much fresh light on the tendencies making toward, or away from, a separation between England and her great American colony.

NURSES FOR THE WAR

U. S. Nurses Volunteering for Services in Japan

So far as is known at the present time there are no Ontario nurses volunteering for service in Japan in connection with the Russo-Japanese war. At the Canadian Nurses' Association the statement was made that none were known to have applied to be sent to Japan.

Some of the United States nurses who served in the Spanish-American war are volunteering to go to Japan. Dr. Anita Newcomb McGee, who was in charge of a corpse of nurses who volunteered to care for the soldiers in the Spanish-American war, is in New York making arrangements to proceed at once with a staff of nurses to Japan. While in Washington Dr. McGee was notified by Minister Takahira that the Emperor had accepted her offer to assist in nursing the soldiers in his army who were sent to the field hospital. Only those nurses who served in the United States army will be taken. Dr. McGee will endeavor to obtain those who were in the Philippine campaign and Tien Tsin. The Japanese Government will furnish all the supplies, but the expenses will be brone by a fund raised by the women of the United States.

The Russian fleet is said to be bottled up in the harbor of Port Arthur which supports the general belief that the Japs are corkers.

LIPTON'S TEAS

RUSSIANS ARREST A REPORTER

Refuse to Let War Correspondents Travel Out of New Chwang

Shan-Hai-Kwan, Feb. 22—A correspondent who a few days ago attempted to leave New Chwang to cross the country in order to reach Liao-Yang, to join the Russian forces, under General Prastalinski, which are en route for the Yalu, was arrested by Cossacks, notwithstanding his properly made out pass, and obliged to return to New Chwang, the Russians forbidding him to travel.

In consequence of the reports of the projected Japanese landing hereabouts, the position has been closely examined. The shore is lined with drift ice and it would be impossible to land anywhere at present except at Chinwangtao, which is a neutral port. Russian officers are sending their families away by this route, as the Siberian railway line is closed both to civilians and the mails.

FERROZONE

Furnishes in a convenient form, a Tonic-Laxative which cures Constipation and a host of other diseases more or less common

The entire length of the intestinal canal can be gently and thoroughly cleansed of all foul decaying matter, by taking Ferrozone after each meal.

Ferrozone helps the kidneys and liver to their work, and by preventing the pores of the skin from being clogged up, it clears and beautifies the complexion. Ferrozone relieves irritation and pressure on the tissues of the brain and nerve centres, and insures a healthy vigorous condition of mind and body.

The great merit of Ferrozone is that it instantly relieves constipation, and permanently cures it without interference with business or pleasure, and never causes inconvenience or distress. It keeps all the bodily functions regular, and is the only medicine for constipation that acts gently, acts quickly, acts surely, without grip or grippe.

Ferrozone will keep the entire family in perfect health. It regulates the bowels, cures headache and stomach troubles, and effectually cleanses the blood from all impurities. It builds up muscle and sinew, strengthens debilitated constitutions, and permanently remedies all manner of skin blemishes.

Ferrozone is especially efficacious in cases of over-work, headache, brain fag, torpid liver, weak memory, and melancholia. It relieves that "tired feeling," and puts elasticity into every movement. Ferrozone gives strength to the regenerative organs, and for the relief of nervous prostration, nervous debility, or decline of mental or physical power, is certainly superior to any curative agent the world has ever seen.

The range of adaptability of Ferrozone is simply wonderful. It is entirely vegetable in composition, and quite free from any possibility of injurious effect even under long continued use. It is prepared in the form of a chocolate coated tablet, and no uncertainty or mistake as to the proper quantity or dose can ever arise.

Ferrozone is recommended and sold by all druggists, price 50 cts. a box, or three boxes for $1.25. Remember the name and see that the genuine Ferrozone is supplied. Refuse a substitute. Sent safely by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

Out Into the World.

It was in Cairo that they first met, in a narrow street, amid a motley collection of Arabs and native Egyptians, Dervishes and Orientals. She and her mother found themselves straying one day from their hotel.

"May I assist you?" he observed; and, thankfully accepting his proffered aid, they had permitted him to escort them to a place of safety.

It could not have been long after this that they came across each other again in Rome. There is a little, straggling Roman street, or way, that leads off from the Coliseum.

It was there that their eyes met. His were large and dark and grave; hers blue and a trifle confused.

She inclined her head. He bowed, with a half-smile.

This incident, however, put him in a different mood for the rest of the day. He wondered at what hotel she was stopping. He wondered where she came from, whither she was going. He had started out on his travels months before, with a vague, undefined sense of loneliness, a desire for companionship.

New York, he thought, was the most lonesome place in the world. Perhaps he would run across someone, somewhere who would be a treasure of friendship, or love—who could tell?

And now that he had seen her, he felt somehow that she would fulfil these requirements. This girl, with the serene blue eyes that yet showed depths of humor and courage and that certain quality of innate refinement which reflects itself from some eyes, disturbed him greatly.

Who was she?

It was going down the Rhine that they met again.

He became conscious of a gaze—what is the subtle psychology of that look beaming upon us from the unknown? He had turned, and there indeed she was, with the golden sunset gleam lighting up her almost classic face—classic save for the rather large mouth which, when she smiled, gave to her features just the irregularity that was needed.

He bowed again, and in a few moments more found himself seated by the ladies' side, talking commonplace language, and thinking uncommonplace thoughts.

When they met again it was in Paris, if not by appointment, at least by the aid of a certain sort of understanding. She had remarked casually that they expected to be in Paris on a certain date, and he had replied that he was glad that this was so, for he expected to be there himself at that time, although only at that instant his determination to do this had defined itself.

In Cairo and Rome they were to each other merely travelers from the same land, bound together by the distant claims of patriotism. On the Rhine they were acquaintances. In Paris, they became friends, and then—

On the homeward voyage, when, one night, they stood by the rail and watched the moon come up over the waters, he held her hand in his, and said:

"Dearest, I knew that if I went out into the world I should find you; I knew it instinctively I must have known it. I was so lonesome living all those years in New York by myself—and now, to think I have found you, at last!"

And she replied:

"Do you know, I felt much the same way. I, too, was lonesome. No one in New York seemed to satisfy my longings. I sometimes wonder why we have never met before."

He smiled. "Do you want to know the reason?" he asked. "I can tell you for the other day your mother told me the street and the number where you lived."

"Indeed," she said, "what has that to do with it? What is the reason?"

"Because," he replied, with a smile, "all these years I have lived next door to you."—Tom Masson in "Smart Set."

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10, for $6.98, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

PROSPECTUS
OF THE
.S. Gold Mining and Milling Company
I corporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00
Officers:
J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer
Trustees
J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under laws of the State of Nevada with a capital of $200,000, divided 200,000 shares of the par value of $1 each, fully paid and forever non-assable.

Every safeguard to the stockholders which the most eminent legal at could suggest has been taken advantage of in the organization of this pany, so that the private property of the stockholders can never become ble for the debts of the corporation, and that every stockholder may feel ure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 res have been issued in part payment for the mines This left 120,000 res in the treasury, 37,000 of which have been sold, leaving 83,000 shares the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at o per share. The sale of this 50,000 shares will place in the treasury cient funds to finish the construction of a 50-ton plant and leave several sand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide t as soon as treasury will permit from the sale of the 500,00 shares of guaranteed stock.

When the above plant is finished, which we expect to accomplish before il 1st, 1904, and with ore now in sight sufficient to run our plant for many rs, the holders of our stock can rest assured that they will have an in-tment as safe as United States bonds with an income on their invest-nts that must necessarily be large on account of the high grade ores that now proven to exist in the mines.

The Guaranteed stock to the amount of 50,000 shares is protected by years non interest bearing bond of the "Granite Securities Company," of Angeles. California, with twenty interest coupons attached thereto for payment of the interest guaranteed by the U. S. GOLD MINING AND LLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and ge Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use new patent machine upon all the land it may own, acquire by , or operate, in Arizona. W invite special attention to the commercial value and profit of this machine, and what can accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has invented which will handle the dry placer gold gravel without r, and in large quantities. This machine will save 98 per cent the gold in the gravel, and will do it at a lower working cost by any existing process. It is operated by a small, compact ne, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, h could command large supplies of water, hence the immense of dry placer lands remote from water have never been hed.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in , of which fifteen hundred millions—or more than 76 per cent.— the product of its placers.

Ninety per cent. of the world's total gold supply has been tak- from placers by processes which have admittedly lost the bulk of values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and opera- that any intending investor can operate it instantly. He can a peck or more of sand, either ordinary house of sea sand, or as is found in the placer lands of Arizona and California, put this sand ten or a hundred pieces of gold as small as the point toothpick, and from that to the head of an ordinary pin, mix the and the gold thoroughly, turn them into the hopper or feed of machine, and in a few seconds the machine will separate the gold the gravel and recover from 98 to 100 per cent of the gold. It absolute, infallible, ocular demonstration of the merits of the hine. It has solved the problem of handling sand or gravel con-ing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be y moved by a few laborers.

The two greatest authorities in the world on the moving of ma- l are "Haswell" and "Trautwine." They say in their standard ications that a laborer can shovel horizontally, 12 feet, vertically t for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at y Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and w Mexico are handled quite as easily as those of Sandy k.

Ten laborers can easily supply one machine with 204 cubic yards gravel in 12 hours, working at the same speed as shown by Haswell, utwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic .

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock this time, because the company requires immediately sufficient to ld several machines to operate in the field.

Every machine at work will increase the intrinsic value of the k.

Twenty machines in the field will increase the price and value of stock more than double the present offering, and every additional chine means a further increase in price and value.

The Company intends to divide its net earnings every month, so t the stockholders may count absolutely on receiving monthly vidends in proportion to monthly earnings.

MEN AND WOMEN.
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous.
Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00 or 3 bottles $2.75.

DR. JAMESON IS NAMED AS THE PREMIER OF CAPE COLONY

Will Lead the Government in Cape Colony Assembly

LOYAL TO BRITAIN

This is What Dr. Jameson's Promotion Means

Cape Town, Feb. 20—Sir John Gordon Sprigg, the Premier of Cape Colony, who was defeated in the Parliamentary election recently held in East London (which he had represented for nearly thirty years) has resigned the premiership.

Dr. Jameson, of raid fame, the leader of the Progressives, who defeated the Afrikander Bund party in the election, has been summoned to form a new Cabinet.

Dr. Leander Starr Jameson, the leader of the ill-fated Jameson Raid and now called to be Premier of Cape Colony, is a Scotchman by birth, but has spent most of the active years of his life in South Africa. He is the son of the late R. W. Jameson, and was born at Edinburgh in 1853. He was educated at London University, where he received the degree of M.D in 1877. Dr. Jameson entered the employ of the British South Africa Company, and from 1891 to 1895, was administrator of Rhodesia. At the end of the latter year he led the raid into the Transvaal, and after fighting the battle of Krugersdorp on New Year's Day, surrendered to the Boers the day following. For his action in leading this Raid into a friendly country, he was tried in London in May, and sentenced to ten months' imprisonment, but owing to ill-health was released in December. Dr Jameson was again active in the British army in South Africa during the Boer war, and on its conclusion was elected as a member of the Cape Colony Legislature for Kimberley. In the same year (1900) he was appointed a director of the De Beers Constitutional Company and in 1902 assumed a similar position in the British South Africa Company. In the elections which have just closed Dr. Jameson led the Progressive party, which defeated the Africander Bund, or the Boer party, and in virtue of this position is called upon to form a Cabinet, which will be pro-British in policy.

DO NOT RELISH THE IDEA OF WAR

English People Unwilling to Become Engaged in Struggle

THE CONDITION OF POLITICS

Mr. Selby Says Fiscal Fight is Main Issue—Does Not Think Government Should Loss

Montreal, Feb. 20—"I don't think we will be drawn into it. It looks as though little Japan will not need her chief ally, and I can tell you frankly that England does not relish the idea of any new war on her hands at the present time. Business is getting back again into its normal channels after the turmoil of the South African struggle and the dragging in of England would tend to upset trade conditions very considerably."

These were the words of Mr. Milton Selby, of Manchester, to a Times representative yesterday. Mr. Selby reached New York a day or two ago on the Cunarder "Vetria" after a most terrific passage. The steamer was in touch by wireless telegraphy with various other steamships, en route and received almost daily news of the state of affairs in the Far East. Three Japanese officials were on board the Vetria, returning to Japan, and at the farewell dinner in the saloon the English and American passengers toasted and cheered the success of the Japanese navy.

"There is one thing that can be depended upon," continued Mr. Selby, "and that is the complete neutrality of Great Britain. That Wei-Hai-Wei story on the face of it was absurd, but the feeling in St. Petersburg notwithstanding the denial of Lord Lansdowne that Japan was being allowed to use that port as a base, shows how strongly the tide of war is running and the bitterness that is harbored against England in Russia. England is quite content to remain an onlooker in the deadly game now being played between the rival powers. Of course there may come a time when she will be forced to take a different stand in the event of a grouping of European powers in favor of Russia, but the whole effort of international diplomacy is undoubtedly being used in the direction of keeping the war exactly where it is today and thus prevent the flames from igniting the whole of Europe. That would indeed be a calamity."

IN ENGLISH POLITICS.

The attention of Mr. Selby was drawn to a cable from London in which Lord Rosebery is said to have forecasted the coming into power of the Liberals at the next general election.

"I do not think it would be in the best interests of the country to have a change of Government," he said, "under the present circumstances. This war has upset many calculations and unfortunately in the Liberal party today outside of a few men like John Morley, Lord Rosebery, Mr. Asquith, and possibly Sir William Harcourt, there are few men that could gain the confidence of the country; men into whose hands the country would put its destinies unreservedly and without question. The fiscal fight is, of course, the main issue in domestic politics, and although the Liberal party is almost a unit in opposing the policy of Mr. Chamberlain, they are hopelessly divided on other questions. The Home Rule question is not yet settled and there is practically no possibility of a coalition or rather a burial of the hatchet between the Unionists."

Mr. Selby is going through to Toronto and the West. His final remark was, "I never saw so much snow in my life, you know."

MORE BRITISH WARSHIPS

Will Great Britain Buy Warships From Chili?

New York, February 20—A correspondent of the Herald telegraphs from Valparaiso, Chili:

La Union, a clerical paper, confirms rumors by saying negotiations are being carried on for the sale of more warships to England, adding that all is now a question of agreeing to the price.

The Minister of Foreign Affairs denies the rumor and one of the highest chiefs in the navy neither confirmed nor denied it. The interview gave the impression that negotions are proceeding with a foreign power.

A GREAT FIRE

Baltimore Loss Now Placed at About $85,000,000.

Baltimore, Md., February 20—It was learned from an authoritative source today that the tax assessments on the realty in the burned districts were approximately between twenty and twenty-two million dollars and that the assessments on average stock of goods consumed in the fire were between fifty and fifty-five millions. At the time of the fire, however, the stocks carried by merchants were much heavier than the average. As the real estate was assessed at three-fourths of its value, these figures would indicate a total loss by reason of the fire of about $85,000,000, at the lowest figures.

BALKAN TROUBLE BEGINS

Dynamite Outrages Expected to Begin the Dreaded Insurrection

Vienna, Feb. 20—The "Volksblatt" this morning, prints an interview with a leader of the Macedonian movement, who states that a general arising is being organised in the Balkans. He stated that M. Sarafoff, who has been travelling through Europe for some weeks past, has brought back with him funds for the revolution amounting to a quarter of a million pounds sterling. The insurrection will be inaugurated with dynamite outrages in the larger towns. Bulgaria, continues the interviewer, is rapidly preparing to join the insurgents. The Schoentals works, of Brunau, are now delivering to Bulgaria an order for 30,000,000 cartridges, and several million steel shot.

ARE WITH THE JAPS

The Missionaries Are All in Favour of Japan

New York Feb. 20—"All the Protestant missionaries in the East are on the Japanese side," said the Rev. D. S. Spencer, who has just returned to New York from Japan. He has spent twenty-eight years in that country in missionary work.

"Victory for Russia would virtually close Manchuria and Corea to Protestantism. The Orthodox Greek Church would rule. The Japanese, on the other hand, welcome our missionaries. Absolute freedom of religion prevails wherever Japanese rule extends. Our missionaries are not in personal danger in any event.

"Japan is in deadly earnest. The war is to them a struggle for existence, and for that reason I sympathize with that nation."

[illegible] one pleasant encounter is narrated by General James Grant Wilson in the last issue of the "Criterion" of New York. The great Duke of Argyll was visiting his son, then Governor-General of Canada, and met Longfellow in the American poet's ancient colonial mansion at Cambridge, Mass. As they sat together on the verandah the Duke persistently asked the names of the various birds he saw and heard singing in the poet's trees, as well as of the flowers and bushes growing in his extensive and beautiful garden. Longfellow was neither botanist nor ornithologist, and did not know. "I was surprised to find your Longfellow such an ignorant person," said the Duke subsequently to an American acquaintance. "Indeed! Pray, on what subject?" "Why, he could not tell me the names of the birds and flowers to be heard and seen in his own garden." "May I ask how many languages you speak?" the American asked. "Certainly; but one." "Mr. Longfellow," was the answer, "speaks six and translates freely from almost all the languages of Europe."

Dr. Carl Peters, the explorer, who is soon to try to find King Solomon's mines in East Africa, has an interesting flat in London—a flat decorated with some forty or fifty poisoned darts, arrows and assegais—missiles that were shot at him in various African combats. On his last expedition Dr. Peters gave employment to a homeless black youth whom he took from the forest and trained in the duties of a valet. Thus his tent, where he kept his outlandish weapons, was always neat. One day the boy brought an assegai to Dr. Peters. "I found this, sir," he said, "outside. It belongs to you, doesn't it?" "It does," the explorer answered. He had remarked the interest that the boy took in his collection, and therefore he added: "You may keep that assegai, Jerome, for your honesty." The boy appeared properly grateful. A few days later, Dr. Peters lost a piece of gold. He knew he must have lost it in his tent. Therefore he waited confidently for Jerome to return it to him. But the boy made no sign. "Jerome," Dr. Peters finally said, "I lost a gold piece the other day. Did you find it?" "Yes, sir," Jerome answered. "Well, what did you do with it?" "I kept it for my honesty," said Jerome.

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank References.

VARICOCELE NERVOUS DEBILITY CURED.

No Names Used Without Written Consent.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 8 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.82 ore 8 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.82 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

W. D. WALRATH.

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

CAN THE JAPANESE PEOPLE AFFORD A LONG AND A VERY COSTLY WAR?

The Finances of the Country Now Said to be in a Very Satisfactory Condition.

London, Feb. 20—A great war is seldom other than a great disaster, even to the victors, and in this sense it may be said that no country can afford a war. Yet, all things considered, there is ample ground for maintaining that Japan can afford to go to war with Russia at the present time. And this is the point

During the last few years the cry that Japan was trembling on the edge of bankruptcy. In the supreme crisis of her fortunes now upon her, the cry is being repeated with even more marked insistence. Some days ago one of the foremost journals in St. Petersburg observed that the certain result of war between Russia and Japan would be to precipitate the inevitable bankruptcy of the latter empire. But the cry that Japan is insolvent, or likely to be insolvent, is plainly an interested cry. for all the facts are the other way—of nearly all.

UNFOUNDED FEARS.

Nearly all, for there is a feature of Japan's position which must be noticed in this connection. And the suddenness and unexpectedness of Japan's amazing leap into the family of great nations, indeed, and still induces the suspicion, that the revolution, which effected so startling a change in world-politics, was superficial and not likely are owned by corporations, the rest by the Government.

The truth is that the financial record of Japan shows not only stability but ever increasing expansion and prosperity.

JAPAN'S INDEBTEDNESS.

The amount of her national debt is today about £53,000,000, of which she owes rather less than £20,000,000 to the outside world. Ten million pounds of this indebtedness carries 4 per cent and the remainder 5 per cent. The interest charge she has to meet annually, therefore, is about £2,500,000 an easy matter in her circumstances.

Should Japan be forced by war to borrow, she is now in a favorable position to do so in her domestic money marker, for the year just closed has been a good one, the rice and other crops have been abundant, and the country, generally speaking, is most prosperous. The balances in her banks are heavy—money is plentiful. Indeed there has never been a more favorable opportunity for borrowing than the present.

BRITAIN AND FRANCE MAY BE INVOLVED

Fear an Outbreak of an Anglo-French War within Three Months

London, Feb. 19.—Lloyd's is today asking a premium of 30 per cent. against an outbreak of an Anglo-French war within the next three months. The high rate is based on the fact that France has not given a formal declaration of an attitude of neutrality toward the Far Eastern belligerents beyond a vague statement by Foreign Minister Delcasse.

"In fact, the French Government, instead of giving such assurance, has allowed Russia to use Jibutil, which is in a French colony at the head of the Red Sea, as a base of rendezvous for her fleet. This is contrary to

Again, French ships and soldiers have been ordered to the East from Mediterranean ports, and this, taken in connection with the attitude of the Government, is thought in many quarters to be significant. It is known that Russia is using her utmost endeavor to get France to stretch every point in her favor, and is anxious to have a strong French fleet in Asiatic waters as a menace against Japanese vessels, and to be of use in restoring the naval equilibrium in the Yellow Sea.

The British Foreign Office is uneasy regarding the outlook, while the Admiralty is getting ready for rapid mobilization in case certain eventualities develop.'

THE RUSSIANS NOW STAY IN THE PORT

Will Not Again Venture to Meet Japanese in the Open

New York, Feb. 19.—The Russian warship Bayan, according to a cable to the World from Tokio, is reported to have been the vessel most damaged in the last torpedo attack on Port Arthur (Sunday, Feb. 14). The Japanese attacked with torpedoes at a distance of only 50 yards.

As the result of the attacks at Port Arthur 10 Russian warships are crippled. It is believed that no further naval engagements will take place in the open, as the Japanese torpedo boats can do destructive work most expeditiously and most cheaply.

St. Petersburg, Feb 18.—It is officially denied that the Russian Government asked permission for the Black Sea fleet to pass through the aDrdanelles. It will remain at home.

Shanghai, Feb. 18 — The Russian gunboat Mandjur, of 1,224 tons, for which two Japanese troops have been lying in wait, has been ordered by the Chinese officals to leave. Being unarmed, the Mandjur will fall an easy victim, and her chances of escape are slender.

St. Petersburg, Feb 18.—A despatch received here from Port Arthur, dated Feb. 17, says that in the action off that port of Feb 14, the Russian volunteer fleet steamer Kherson was struck by a 12-inch shell in her upper works. A slight fire broke out, which was quickly extinguished. There was no loss of life.

Sasebo, Japan, Feb. 18.—The opinion of Japanese naval officers, here is that a third fight has occurred Port Arthur, some of the Russian war vessels having been reported as leaving that place.

RUSSIA FEELS GRIP OF FAMINE

Citizens of Russia Robbed to Aid Army

SUPPLIES FALL TO JAPAN

Lack of Patriotism Becomes More Pronounced

Vienna, Feb. 20—The leading Polish conservative organ, the Czas of Cracow, publishes a St. Petersburg despatch concerning the Russian commissariat aand the means of transport. It says that Russia, knowing the Siberian railroad could not convey the necessary supplies to Manchuria and Vladivostock, ordered before Christmas large quantities of provisions in America for delivery at San Francisco on Jan 23 and 28 and Feb. 7.

As the sea journey to Port Arthur and Vladivostock requires at least seventeen days, it is clear that the greater part of these provisions will not reach the Russian harbors, and may serve to support the Japanese navy.

FACES FAMINE AT HOME.

The question of supplies will be all-important in this war. Hence Russia sent a certain quantity of provisions and stores to the far East by railway, before forwarding their troops, but this operation showed incidentally that no district in the empire except Warsaw was properly provided for. Much indispensable material therefore had to be taken from Russia and sent to the Far East, all other provisions to come from America or Odessa by sea. Everything that left the Black Sea after New Year's day is unlikely to reach its destination. For this reason the provisioning of the army in the far East is causing great anxiety, as nothing can be obtained there in the winter, not even forage for the horses. Even were the railway in perfect order, it could not transport supplies sufficient to feed 150,000 or 180,000 men. However, as great irregularities have occurred in the construction and traffic management, and as the line now is obstructed by trains carrying rails, ties and building material, the anxiety is greater than otherwise it would be., The Russian soldiers bear hardship better than European troops and the Siberian forces are even hardier, but in St. Petersburg it is well known that the Siberian forces are far below the European armies in tactics, rapidity of movement and markmanship.

GERMAN SCORES JAPAN.

Berlin, Feb. 20—According to a St. Petersburg telegram, published in the Berlin papers, a large crowd made friendly demonstrations before the residence of the German consul in Moscow yesterday. The consul appeared at the window, and, addressing the crowd, declared the unexpected attack by Japan on the Russian ships at Port Arthur was a breach of international law.

PATRIOTISM IS LACKING.

Moscow, Feb. 20—The great mass of the czar's subjects are almost as uninterested and indifferent as though Japan were operating against China or landing troops in Honolulu. This is worth recording at a moment when the Russian chauvinist organs, assisted by certain toady foreign newspapers, is endeavoring to demonstrate that Russian millions are solid against the "upstart yellowskin" There is no widely popular feeling against Japan and no racial antagonism. Leaving out of consideration the military element, the Russian urban population's feeling is not for war. In Russian commercial circles there is no relish for way, which already is driving dozens into bankruptcy.

The importance of educated thought in a times of national crisis and the absence of the right to share in the government of the native land enjoyed by the inhabitants of constitutional countries never was brought home more directly to the Russians than today.

SWEDISH PROFESSOR COMING

Visit will Have Direct Bearing on Swedish Immigration

London, Feb. 20—Professor Waldemstrom, the distinguished member of the Swedish Parliament, is about to make a tour of Canada similar to that made in the United States a few years ago. He will inspect the Swedish colonies in Canada. His utterances are carefully chronicled by all the Swedish papers, and the visit should greatly influence Swedish emigration.

CANADA VS. RUSSIA

the Canadian Fishery Claims Against Russia

Ottawa, Feb. 20—February the 25th is the date fixed for the meeting of the Commission in London to adjust the claims of the Canadian dealers against Russia for illegal seizure in the Pacific in the early nineties. There will be two commissioners on either side. Mr H. A. Little, of Woodstock, will represent Canada, and he will probably have a British associate

THE RUSSIANS ARE BEWILDERED

The Vast Forces of the Czar Set in Motion

WILL BE FIGHT TO A FINISH

Many Reasons Why Russia Cannot Afford to Sue for Peace

London, Feb. 20—The concensus of opinion is that Russia will fight to a finish. She cannot afford to seek peace, even if driven out of China, but will continue to struggle indefinitely.

Tokio, Feb. 20— Astonishment at the continued apathy of the Russians pervades the educated sections of Japanese society. The Muscovites enjoyed a reputation in Japan for great acuteness and flexibility of mind as well as for ready recourse in time of peril. It was expected that the opening act of war would be followed by measures of clear-sighted energy that would call for all the wit and strength the Japanese could command. The Mikado's spies, however, report a condition of bewilderment and torpor on the Russian side. However, the Japanese civil, military and naval leaders do not imagine this to mean that the Russians will not eventually break the spell that binds them. They anticipate that the vast forces of the Czar will shortly be set in motion, and that then the world will witness a struggle worthy of the most stirring annals of war.

It is reported that anchorage at Port Arthur for large ships is so congested that the Russian fleet is badly hampered in getting out. It is also said that the water supply is bad, a defect common to all ports on the north-east coast of China. The garrison faces grave inconveniences from this source. The semi-circle of hills two and a half miles from the dockyards is covered with permanent works, connected by entrenchments, and manned by several thousand troops. The strip of land connecting the Kwantung and Lio-Tung peninsulas, which is considered the key to the Kwantung Peninsula is being fortified by an additional series of batteries.

LABOR UNIONS AND LAW

Judge Says They Evade Responsibility by Not Incorporating

Springfield, Ill., Feb 20 — Judge Humphrey, in the United States District Court yesterday, said the fact that labor unions were not incorporated enabled them to escape responsibility for damages resulting from their actions. The case was that of Eugene Linxweiler, secretary treasurer of the Decatur Trades and Labor Assembly, who pleaded guilty to sending through the mails postal cards threatening to boycott business firms advertising in a newspaper which had differences with the Typographical Union. Linxweiler was fined $100 and costs.

EMIGRANTS COMING

Further Settlement of West From Great Britain

The first indication of the active campaign that the C.P.R purposes inaugurating during the present year looking toward the further settlement of the West, is seen in the announcement that arrangements have already been made for the location of a large colony from the British Isles, in the Saskatchewan district. They will come out in three parties, two in May, and a third in June, and will doubtless number well up toward the thousand mark. Coming from all parts of the British Isles, they will form part of the colony already located at Lloydminister, of which the Rev. George E. Lloyd is the champion and head. The immigrants will go in either by way of Saskatoon or Edmonton.

The Russian fleet is said to be bottled up in the harbor of Port Arthur which supports the general belief that the Japs are corkers.

FOREST MINING CO.'S

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining mat ters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.60 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie an Golden Rule. There has been ve little work done upon these tw claims, there being one discover shaft ten feet deep, showing ore all sides of the shaft, and runni in value of from $4 upwards. It my opinion that with developme this, too, will prove valuable prope ty.

The work on the Storm King an Ozone consists of a tunnel near th point of discovery and is driven alo the vein for a distance of one hu dred and eighty feet, showing o all the way from the surface to t face of the tunnel, and averagi in width from six to eighteen inche Three assays give the following v ues, $12.50. This being a gene sample taken from the dump. T other two assays are $42.68 and $7 respectively, this being the assort ore for shipment. The course of th tunnel and vein are north, ten d grees west, and the vein cuts t trend of the formation oblique (which is granite) and by drivi this tunnel five or six hundred f further it would int sect a quartzite reef (which is ru ning north, twenty degrees ea which would make this a cont vein between granite and quartz and should produce a large body ore at the intersection of the co tact.

The only work done upon the Sha non Bell, the last claim of th group is the location work, and not enough to allow of a report ing made.

There is water for power purpo one mile from the property, and t ber on the ground, of a very f quality, sufficient to run the m for many years to come.

All the assays mentioned in t report were made by the assay of the Imperial mine at my reque and the ore was taken by me fr the properties mentioned.

I will state that I have been a p tical miner since 1870, and am n the manager and superintendent the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAU

Advance Mining Co. Fiscal Agents, Sumpter, Ore

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ont

Equitable Gold Mining C

R. C. LANE, President. G. F. NORTON, Secretary and Treasu

Over $300,000 of development work already done. Main shaft 9 x 16 feet, 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore

Destined to become large and continuous dividend pa

The Equitable Gold Mining Co.'s properties consist of three mines, as the North Bonanza, Flowery and Kimbark. They are located in Six Canon, less than four miles from Virginia City, Nevada, which is the railroad station.

Years ago, over three hundred thous and dollars of development work done upon the mines—so they are not mere "prospects" but actual mines work was done under the personal supervision of competent engineers, was paid for by the owners of the mines themselves; thus giving doub surance that the work was well done and that the expenditure was tified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down hundred feet. From this shaft, running along the vein matter, east and are four drifts, at different levels, having a combined length (includin Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cut rises, etc.

All told, there is 4,650 feet of underground work—the most of which is Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and tical miners that there is developed an ore body of at least One Million Hundred Thousand Tons!

As a further evidence of the large amount of work done there is 75,000 to 100,000 tons of ore on the dumps at the different surface opening that, with modern cheapened processes, can be converted into gold at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the States government, while the title of the Kimbark is by location and p sion.

The Equitable Company obtained the Flowery and North Bonanza both of which are patented, by purchase—the payments therefore to be out of a share of the net proceeds of the mines. The Company has written contract, duly recorded, for a deed and is in possession of the perties, and is now operating them. The sum of $2,000 was paid on the tract, September 30th, 1903, and partial payments have since been made. Company is entitled to $6.25 per ton as cost of mining and milling. One-h all over and above this $6.25 per ton goes to the former owners till they the total sum of $165,000, without interest. There is no stipulation as to of work to be done within any specified time—and no proceeds, no pay. The pany can therefore pay it in one year or it can pay it in ten years. this exception the Company is free from debt. Its policy is to pay as it In this way it has no fear of financial embarrassments. The title to the bark is by "location," under the mining laws of the United States. enough has already been done to entitle the Company to a patent. in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wire a distance of one mile for the transmission of electric power from the Tr River Electric Power Plant. By this means unlimited power for mining, ing and milling is obtained.

It has built a dwelling house for the manager, a large boarding hous the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnell; has purchase cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North zaza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 8o of ore—realizing therefrom about $10,000 worth of gold bullion. The out constantly increasing and all the Company needs is more mill capacity to its ore.

THE PETERBOROUGH BROKERAGE

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 6.02 ozs; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION CO.

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain that the interest of all others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies.'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause—there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital. They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 300,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000,000 francs at least, lives in a patched-up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable
At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a share
Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 116 ~~feet per month~~, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1150 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

Not Only Relief, but Lasting Cure

Is What You Get From Catarrhozone Which Eradicates Every Trace of Catarrh From the System.

Relief is a good thing, but people soon get tired of it and long for a remedy that will drive the seeds of catarrh right out of the system. It is only a waste of time to try to reach internal dosing. You must treat catarrh locally because it is a local disease.

The most sensible treatment is Catarrhozone which really does reach the diseased membranes in a most thorough way. Every case of catarrh can be cured if Catarrhozone is used. It unquestionably penetrates every air cell and air passage of the breathing organs. It completely destroys the catarrh germs and heals all the inflamed surfaces.

Every requirement of an ideal catarrh cure is embodied in Catarrhozone. Other treatments may have failed to even bring relief but one trial is sufficient to prove merit in Catarrhozone not found in the ordinary snuff or wash that unscrupulous people sometimes recommend for catarrh.

If you are subject to colds, catarrh or throat trouble you will find quick relief and lasting cure in fragrant, healing Catarrhozone. Mrs. E. P. Fairbanks, of Durham, was cured of chronic catarrh by this remedy and endorses it in the following letter, which speaks for itself.

"I suffered continually from catarrh which affected my throat. My nostrils were usually inflamed and I was greatly bothered with droppings in the throat which made me sick at my stomach. I had a bad taste in my mouth and felt a ringing in my ears. I read of Catarrhozone and commenced to use it. In a few days it helped me more than I ever expected. I used it four times daily and in two weeks most of the disagreeable symptoms disappeared. I continued the Catarrhozone treatment for six weeks and was perfectly cured. The catarrh has never returned."

Every complete outfit of Catarrhozone sufficient for two months' use is guaranteed to permanently cure, trial size 25c. Sold by druggists, or by mail from N. C. Polson & Co. Hartford, Conn., U.S.A., or Kingston, Ont.

Obituary

We regret to have to announce the death of Mrs. Doran, relict of the late Daniel Doran, which occurred on Saturday morning at her home, corner of Driscoll terrace and Douro street. The funeral will take place today to the Little Lake cemetery.

To the Asylum

A man named Carr, who has been confined in the gaol for the past two or three years, will be taken to Orillia Asylum today. The prisoner became unruly at home and was placed in the local gaol. Deputy Sheriff Hall will have charge of the prisoner on his journey to Orillia.

Mr Kendry Resigns

In a recent despatch to the management of the Auburn Woollen Mills it is mentioned that,—Mr. James Kendry, M.P., states in reference to the report that he had resigned the position of manager of the Canada Woollen Mill that his resignation was tendered to the company some time ago and that his successor is Mr. S. J. Moore of Montreal, who assumes his duties today. Mr. Kendry will devote his whole attention to the Auburn Mills at Peterborough, of which he is President and Managing Director.

An Interesting Lecture

A very interesting lecture was delivered by Mr. R. B. Rogers at the Y.M.C.A. Hall on Saturday evening on the subject, "The Canadian Pulp Industry," which was well attended. Mr. Rogers gave a vivid description of this important branch of industry, and by his remarks showed a thorough acquaintance with his subject. The pulp industry is in Western Ontario more especially one of great importance, and is a most interesting study, and those who failed to hear this lecture, missed a decided treat.

"Quaker Oats" Won

An exciting "tug of war" contest took place at the Armouries on Saturday evening, between the Wm. Hamilton and the Cereal Co.'s teams, which resulted in favor of the latter. Three "pulls" were taken, the first being won by the "Quakers," and the second by the Hamiltonians. The third was a keen contest, and excitement ran high. After a hard pull and almost an even drop the "Cereals" were given the decision thereby winning the Cup so far as the first of the series is concerned. The Cordage Company were formerly the champions, and the "Quaker Oats" men won from them. There will be two more contests between the Hamilton Co. and the Cereal Co., it being the rule that there must be three "tugs" to determine who is the victor.

REID VS. MIDDLETON

The following is an item of interest to Peterboroughites:

Reid vs. Middleton.—This was an action brought by Arthur Reid, of Peterborough, against Jas. Middleton, of Smith, for infringement by the latter of the patent fence known as "The Wartman Square Braced Fence Post," of the patent right of which the former claimed to hold an assignment for the Township of Smith. The case was tried before Judge Ketchum (acting during the illness of Judge Weller), at Peterborough in June, 1902, and judgment was given in the following April in favor of the defendant, the Judge holding that Reid's title to the patent was insufficient. From this finding Reid appealed to the Divisional Court at Toronto, where the case was heard Friday, and the appeal dismissed.

ACCIDENT AT LINDSAY

Hotelman Badly Burned Friday Morning Gasoline Became Ignited

Mr. Joe. McConnell, of the Royal hotel, was the victim of a very painful accident on Friday morning last about 10 o'clock. While filling the holder of the bar hot water heater with gasolene he neglected or forgot to turn out one of the lights, the result being that the the gasoline in the gallon measure from which he was pouring became ignited. The flames shot almost as high as the roof, and flared out in every direction but Joe, fearing the house would be destroyed if he threw the measure on the floor near the liquors, retained his hold and ran for the west door, but before he could open it the pain became unbearable and he threw the blazing mass on the floor of the porch, where it did little harm.

By this time his hands and wrists were badly burned and his shirt and waistcoat were on fire. Those present lent their aid in tearing off the burning garments, after which Dr. Gillespie was called in to dress the burns, which are severe and very painful.

—The old town clock lost its bearings last night. It struck,——one, instead of twelve. It evidently belongs to the "cold weather union."

DOCTOR EXPLAINS

His Article in the Medical Magazine About offee

One of the most famous medical publications in the United States is the "Alkaloidal Clinic," in a recent number of which an entertaining article on coffee by a progressive physician and surgeon is published in explaining his position in the matter this physician recently said.

In the article in question I really touched but lightly upon the merits of Postum Food Coffee. I have had several cases of heart trouble, indigestion and nervousness where a permanent cure was affected by merely using Postum in place of coffee without any other treatment.

"In my own family I have used Postum for three years and my children actually cry for it and will not be satisfied with any other beverage. Indeed they refuse to eat until they have had the customary cup of Postum and as it is a rebuilder and does nothing but good I am only too glad to let them have it.

"To get the best results we boil the Postum at least 20 minutes and it is then settled by adding a little cold water, then the addition of fresh cream makes a beverage I now prefer to the very best coffee." Name given by Postum Co., Battle Creek, Mich.

Authorities are agreed that Postum is a wonderfully quick and sure rebuilder. Ten days trial in place of coffee proves it.

Look in each package for the famous little book, "The Road to Wellville."

MIRACULOUS ESCAPE

Three-Year-Old Son of Mr. Cranfield Struck by Sleigh

One of the most miraculous escapes in the history of Peterborough was that of Master Haden Cranfield, of 129 Rubidge street, who came within an ace of being crushed under a sleigh load of coal at the corner of Dalhousie and Rubidge streets on Saturday. His mother had sent the three-year-old lad out to play on the sidewalk and a neighbor's child and he began to enjoy themselves with a handsleigh. His companion drew him on the sleigh, but, on coming to a slight grade at the corner of Dalhousie street, loosed the rope and allowed the boy to speed on by himself. A sleigh loaded with coal and driven by an employe of Wills and Goad coal merchants, suddenly drove around the corner and before the driver could bring his horses to a halt, the boy had run into them. He was struck by the sleigh and badly bruised, although not seriously hurt. No blame is attached to the driver, who tenderly lifted the child and carried him to his home.

THE LADIES OBJECT

"Fifth Ward, Don't Sound Right" Say the Ladies

The Times in an interview with one of the "Fifth Ward" ladies on Saturday, learned that this style of addressing that portion of the town formerly known as Ashburnham, is decidedly objectionable, owing to the fact that this particular section of Peterborough was formerly a separate community, it has become customary to refer to it in the above manner. However, we agree with the ladies across the river, that this portion of the town should not be so conspicuously styled the "Fifth Ward," when the other portions of the town are not referred to as divisions. "Why not use the names of our streets when speaking of this section of the town," the lady remarked, and we consider the suggestion one worthy of consideration by all our local writers.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—The Town Council will hold its monthly meeting this evening.

—Drains are being dug along the leading thoroughfares in order to be in readiness for the spring thaw.

—A meeting of the Central Charity Board will be held this evening commencing at 7.45 o'clock.

—We require a good, smart boy at The Times bindery, to learn bookbinding.

—Rev. C. H. Brooks, of Gratton, will conduct the usual Wednesday evening Lenten service at St. John's church this week.

—Dr. Bingham, Medical Health Officer, informed The Times on Saturday that there was practically no infectious diseases in town.

—The annual meeting of the Peterborough Cheese Board will be held in the Council Chamber, here, on Saturday, Feb. 27th, at 2.30 p.m.

—Professor Deveraux has been requested to sing at the morning service at St. Paul's Mission next Sunday.

—Magistrate Dumble had a "day off" on Saturday, as also had all the other police officials. No cases were on hand at the police court.

—The complaints of leaky roofs will cause many a landlord to frown, if the mild weather of yesterday continues.

—Men were busily engaged clearing the snow and ice from the manholes on George street last night, to guard against a flood from the threatened thaw.

—One of our little boiler plate contemporaries publishes the following conundrum the other day amongst its news items- "If eight tons of hard coal produce ten tons of ashes, where does the heat come from? The g.f.j. might venture to suggest that in most cases it comes from the stove.

WEATHER NOTES

Mild and showery.

EVERYBODY READS THE TIMES.

"I have no more nervous headaches and rest very well at night."

When a woman suffers from female weakness and irregularity or other forms of womanly disease, the effect is certain to be marked in her nervous system, the general effect being, as in Mrs. Woodin's case, "nervous headaches, restlessness at night" and a run-down condition. It is simply common sense then which says if you cure the female weakness, irregularity, etc., you will cure the nervousness, sleeplessness and other consequences of womanly disease.

Dr. Pierce's Favorite Prescription cures the womanly diseases which undermine the general health. It establishes regularity, dries enfeebling drains, heals inflammation and ulceration, and cures female weakness. It cures headache, nervousness, sleeplessness, etc., by curing the womanly diseases which cause these ailments.

Sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

"I feel more than grateful to you for the benefit I have received from Dr. Pierce's Favorite Prescription and Golden Medical Discovery," writes Mrs. Ervie E. Woodin, of Millerton, Dutchess Co., N. Y., care of Box No. 1. "For a number of years I had been troubled with female weakness, nervous headache, irregularity, restlessness at night, and, in fact was all run-down but after taking three bottles of 'Favorite Prescription' and one of 'Golden Medical Discovery' feel that I am entirely cured. I have no more nervous headaches and rest very well at night; in fact, feel like a different person thanks to your kind advice and wonderful medicine. I earnestly advise all who suffer from any similar troubles to write to Dr. Pierce at once. They will not regret it."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

JAPAN WILL MAKE NO IMMEDIATE NAVAL ATTACKS--WILL TAKE PLENTY OF TIME PREPARING FOR HUGE LAND OPERATIONS

Finds Russia So Unprepared They May Take Plenty of Time to be Completely Ready

WILL NOT INNADE MANCHURIA FOR TWO OR THREE MONTHS

Baron Hayashi Does Not Credit That 2,5000 Russians Have Bee n Killed in a Battle

ondon, Feb. 22—The latest advices of Baron Hayashi, the Japanese Minister to Great Britain, lead him to believe that the Japanese troops may not wait possibly two or three months before undertaking aggressive operations in Manchuria. He said;

We have found that Russia is so unexpectedly unprepared that I should not be surprised if the Japanese land forces, contenting themselves with establishing a thorough organization and advancing as the construction of the railroad towards the Yalu River progresses. Russia appears to be less prepared than was China in 1895.

I believe that only three trains a day can be run through Manchuria. Supposing these are equally divided between the troops and supplies, as would be necessary, Russia could not perceptibly strengthen her land forces before April. Japan's naval coup has been so unexpectedly successful that I rather think our troops will take their time.

New York, Feb. 22—A despatch from New Chwang to the World says it is reported that the Russian and Japanese outposts on the Yalu have been enaged, and that the Russians suffered considerable loss—about 2,500. No details are obtainable.

BOARD OF EDUCATION

ew Scale of Salaries Proposed — Local Teachers Resign

The Board of Education met in spe- al session last night in the secre- ry's office, with the following mem- rs present; Mr. J. J. Hartely, airman; and Messrs. J. Stevenson, J. Jameson, H. P. Kennedy, W. Hill, H. Morgan, P. Hamilton, V. astwood, W. Pringle, R. B. Rogers, . Ferguson, J. J. McBain, R. Fair, d John Crane.

COMMITTEE OF WHOLE.

Chairmen and members of the Board Education;

Gentlemen; Your committee of Whole beg leave to report that plans submitted by the Property mmittee for a new Collegiate Insti- te be referred back to the commit- e for further consideration. That Council be asked to secure the cessary legislation, and that a com- ittee be appointed to wait on the uncil and make the necessary ar- ngements.

All of which is respectfully sub- itted.

J. J. McBAIN,
Chairman.

The report was adopted.

PROPERTY COMMITTEE.

Chairman and members of the Board Education,

Gentlemen; Your Property com- ittee beg leave to report having rchased the necessary green hard- ood for next season, with the ex- eption of Ashburnham's require- ents, arrangements for which are der way. Five dollars was paid for he long wood, and five dollars and ifty cents for the two foot maple.

All of which is respectfully sub- itted.

The adoption of the report was moved by Mr. V. Eastwood, seconded by Mr. J. Crane, and carried.

SUPERVISION COMMITTEE.

The chairman and members of the Board of Education,

Gentlemen, The Supervision committee beg leave to report and recommend that the note for $37.50 by the Ashburnham School Board, and now held by the Ontario Bank be paid,—Carried.

SCHEDULE OF SALARIES.

Trustee H. P. Kennedy submitted the following notice of motion;

The chairman and members of Board of Education,

Gentlemen; I beg to move, as per notice of motion at our regular February meeting, that the following schedule be adopted to govern the salaries of our Public School teachers.

Lady teachers Minimum salary, $350 per annum; maximum salary for those holding second class certificates, $400 per annum; maximum salary for those holding first class professional certificates, $450 per annum.

Male teachers.—Head masters of ward schools and assistant male minimum, $600 per annum, and for those holding second class certificates maximum, $700 per annum; and for those holding first class professional certificates maximum, $750 per annum.

For the purpose of this schedule the Inspector shall three times a year, in December, April and June, furnish the Board with an official report on each teacher's efficiency, both in discipline and teaching ability, and in the June report the teacher shall be placed in one or other of the following grades;

I., Excellent; II., Good, III., Fair for the direction of the Board in allotting the proper increase in salary which will be as follows;

Lady teachers.—Grade I., $33 1-3 per annum; Grade II. $20 per annum.

Male teachers.—Grade I., $50 per annum; Grade II., 30 per annum.

Grade III.—Any teacher, male or female, placed in this grade to receive no increase and will leave him or herself liable not to be reengaged by the Board.

This schedule is to take effect Sept. 1st, 1904, and to govern any new teacher that may be appointed by the Board from date of the adoption of this report. In event of vacancies occurring on the staff teachers holding first class professional certificates to receive the preference, but in no case will any lower certificate be accepted than a second class professional. Any members of the staff holding second class certificates taking out non-professional firsts at any time to be entitled to obtain the maximum governing first class teachers.

Signed, H. P. KENNEDY.
Seconded, W. G. FERGUSON.

The above notice of motion was carried.

Continued in Tomorrow's issue.

When you stop to think that tea biscuit made at home with

cost but five cents per dozen, is there any reason for buying at the bakers?

DRIVEN FROM HOME

Death of Former Peterborough Man Reveals Sad Story

A despatch from Detroit says;—"The body of John Wilson, who died at the Red Cross Hospital, has been sent to Peterboro, Ont., his birthplace for burial. It is said Wilson was ordered away from his home about seven years ago, and that after that incident he became a wanderer, careless of himself or his future. Even when he learned of the death of his father and mother and of the fact that he had fallen heir to ten thousand dollars, he did not return nor did he claim his heritage. He was finally sent from Allen's Mission to the county house, where one of his relatives found him a few weeks ago."

—We require a good, smart boy at The Times bindery, to learn bookbinding.

EFFECTS OF JAPENESE VICTORIES.

London, Feb. 23—It was confidently anticipated that Japanese victories would make a profound impression upon all Oriental peoples, who for one or two centuries past have found white men invincible in war. The anticipation is already realized. Despatches to the London Times show that in India as well as in China the Japanese successes thus far are causing great delight and are appealing powerfully to the native imagination. English papers in India even betray some uneasiness over the outlook in the peninsula, if Russia should go down to defeat. British Imperialists nowhere wish to have the natives become 'cocky' and try to share the white man's burden. Some of them are beginning to think that, after all, it would be better if Japan did not win too much of a triumph.

UNITED STATES FAVORS JAPAN

Could Not Afford to Let Russia Win

WOULD PREFER TO FIGHT

Britain and the American Republic are Shoulder to Shoulder

Washington, Feb. 23—The United States cannot afford to stand idly by and witness Japan's humiliation. Yesterday The Times representative had an interview with a prominent Senator, who stands close to the Cabinet, when the Senator expressed the opinion that the United States will remain neutral as long as Japan is more than holding her own, but should reverses come, this country and Great Britain would be obliged to maintain the integrity of the little empire. It is no exaggeration, whatever to say that Russia is fighting for more territory, with Corea in reaching distance, with Japan a sort of stepping stone and with an insatiable appetite. After the fight will come the spoils. Concerning their distribution the great powers will have something to say, just as Russia and France and Germany interposed when the Japanese had brought the drowsy leviathan to its knees. Meanwhile, it is worth bearing in mind that Japanese policy long ago ceased to be one of exclusion. It is identical with that of England. It is also on all fours with that of the United States. Ingoring history, which recalls the name of Perry, and overlooking sentiment altogether—the sentiment which goes to the little instead of the big in times of conflict—Japan is fighting for what this country wants, and will have if it can get it. And though by neither word nor deed is this country under any sort of obligation to afford encouragement to one side or the other, it is quite advisable that the people of the United States should realize that they have interests at stake, and that these interests will hardly be subserved should the arbitrament of war ordain that Manchuria and Corea become an integral part of the dominions of the Czar and that Japan should be at his mercy. There would be but one sphere fo influence in China after that.

Tug of War Team

A tug of war team was organized at the T.A.S. recently. Mr. D. J. Devine is president, Mr. W. Crowley, manager, and Mr. R. J. Begley secretary. They will be heard from later.

REPRESENTED IN FOREIGN CITIES

Canadian Manufacturers' Association Will Enlarge Its Work

WANT COMMERCIAL CHAIN

Care Required to Select Exactly Right Man in Each Case

Montreal, Feb. 23—The Canadian Manufacturers' Association are now completing arrangements whereby suitable trade representatives will be appointed to all foreign cities where a Canadian export business is likely to be done.

Canadian manufacturers have found themselves much hampered by not being suitably represented in the many foreign cities which are likely to prove trade centres for the Dominion. In the United States the Consular service, extending, of course, to all foreign countries, look after such matters, and thus the American manufacturer has long enjoyed an advantage which Canada and even England does not receive, for the British consular representative is still a diplomat, and not a business man, such as the United States is accustomed to send out.

The consequence of all this is that the Canadian manufacturers now find it absolutely necessary to cover this field thoroughly, a work which many think should be done by the Department of Trade and Commerce, considering that the Dominion has no official representatives in the different foreign cities aside from the British diplomats.

Up to the present time the Canadian Manufacturers Association have appointed business agents, or representatives, in a number of foreign centres, some fourteen or sixteen in all, and the work of filling in wherever necessary is now progressing.

At the present time many of the British centres, both in The Mother Country and in the Colonies, have capable representatives, and this may also be said of Berlin, Antwerp, and one or two other cities on the continent.

There are still many breaks in this commercial chain, however, and these the Canadian Manufacturers' Association are now endeavoring to repair. The banking houses in foreign centres are being communicated with and proper people looked up. This is a matter which is not so easy as it might appear at first sight, for the reason that in order to get the various lines of manufacturing ably and satisfactorily represented it is necessary to pick upon men who are disinterested, and who have no purpose to serve other than that in accord with the members of the Association.

As the Canadian manufacturers are not yet in the financial position of being able to call upon men to give their entire time to this work, they must necessarily depend upon business men in the several localities which it is desired to cover, and thus in many instances it is difficult to pick upon just the proper person.

Members of the Canadian Manufacturers' Association express themselves as not altogether satisfied with the manner in which British consular representatives are likely to deal with business matters, and they are of the opinion that some of these days the British manufacturers will awake to the fact that one of the chief reasons for American supremacy in many foreign centres is the realization that the United States consular service, to a very large degree, is composed of business men who look upon their offices from a purely business standpoint, and who have no other thought than the furthering of their country's business interests.

It is expected that the business agents appointed by the Canadian Manufacturers' Association will report to the home office once each month and these reports will be published in the trade journal which the association prints, thus giving the Canadian manufacturers the latest possible information.

FRUITS OF KISHINEFF MASSACRE

London, Feb. 23—The Kishineff massacre continues to bear fruit of a character probably little expected by the Russian Government when its officials connived at the outrage and refused to punish its perpetrators as they deserved. First we hear of it as an insuperable obstacle in the way of the negotiation of a Russian loan from the Rothschilds. Now it inspires a movement among the Jews of America for the purchase a first-class battleship to be presented to Japan. If this plan should be carried out, and the ship so presented should bear a decisive part in some great naval engagement to the discomfiture of Russia perhaps that power may realize that there is 'something in' the Scriptural denunciations of those who persecute the "chosen people."

YELLOW PERIL WHAT IT MEANS

Why Germany Favors Russia in War

RUSSIA'S LATEST BOGEY

Fear of Japan and China Greatly Exaggerated

London, Feb. 23—Our Berlin despatches report that the sentiment in the ruling class in Germany is one of dread at what is called the "Yellow Peril," and the cause of Russia is favored in the belief that Russia can and will repress the aggression of the Asiatics under the lead of Japan.

For powerful and highly educated people, those of the ruling class of Germany who reason in this way seem strangely nervous, timid and shortsighted. It is, of course, quite impossible to know in advance exactly what would be the consequence of a complete triumph of Japan in the pending contest. It would not be strange—considering the teaching and the example of nearly all the 'civilized' governments of the Occident—if a certain number of the leaders in Japan should aim at controlling the policy of China in the interest of their own country and to the detriment and even exclusion of other people. It is even conceivable that some of the Japanese nurse the dream of an invincible Oriental military force, made up of the easily disciplined and courageous Chinese millions, trained and led by the capable Japanese. Such a dream would be entirely consistent with the ill-concealed plans formed for their own advancement by Russians, and with others, less pronounced, discussed by Germans. It would be quite in the spirit of that partition of China which has in part already been accomplished by Europe and which is very freely advocated by European statesmen. *But there is* nothing in the past action or present avowed plans of Japan to justify the expectation of any such purpose on the part of her government, or any sentiment impelling to it on the part of her people.

The one effective check on and obstacle to such a scheme of aggrandizement and monopoly is free commerce, and for the utmost freedom of commerce Japan has stood openly, consistently.

Postponed

The hockey match which was to have been played last evening between the St. Georges of Toronto, and the Peterborough Seniors was postponed owing to the illness of four of the Toronto players.

Japanese Have Seized Four Russian Torpedo Boats

SPECIAL TO THE TIMES

London, Feb. 23—The Nagasaki correspondent of the Daily Telegraph, under date of Feb. 22, reports that the Japanese squadron has captured four Russian torpedo boats at Port Arthur by means of using Russian signals. This despatch appears to confirm reports from various quarters of a fresh attack on Port Arthur by the Japanese.

St. Peterburg, Feb. 23.—Heavy snow and blizzard over the Siberian Railroad, especially east of Baikal, is largely increasing the difficulties of transporting troops, besides enabling Chinese Brigands to operate Japanese agents are reported north of Vladivostock, inciting the Brigands to action.

Tien Tsin, Feb. 22.—Yu Au Shikai, the Commander-in-Chief of the Chinese forces, has sent an officer to Port Arthur as Chinese military attache with the Russian forces. It is said that the reason no Imperial troops started for the border is that Russia refuses to guarantee that the Leau River regions will be regarded as a neutral zone in the event of hostilities in that vicinity.

Yin Kow, Feb. 22.—Viceroy Alexieff and his full staff have just arrived at Harbin, where headquarters have been established.

LOCK WORKS VOTED A FREE GRANT OF LAND

By the Town Council in Special Session Last Night--Their Assessment Also Fixed at $12,000

The question of granting fixed assessment to the Peterborough Lock Manufacturing Co. again came up before the City Fathers last night, when, after a lengthy debate, the following resolution was adopted.

Moved by Ald. Morrison, seconded by Ald. Rush, That the lot applied for by the Peterborough Lock Mfg. Co. be conveyed to them and that their assessment be fixed at $12,000 for ten years, on condition that they carry out the extension mentioned in their application, and upon conditions similar to those imposed on the Cordage Co.

Ald. Morrison, in support of his resolution, remarked that their company during their nineteen years' operation in town had paid out about $1,000,000 in wages, and a large amount in school taxes and he thought it but fair that they should be encouraged in their contemplated enlargement of premises and extension of business, which means the employment of some forty or fifty additional hands, to whom good wages will be paid. The fixed assessment of $12,000 will bring in to the Town a revenue from the property in question of $[illegible] more than at present derived. He believed in encouraging large establishments to stay in town, as well as offering inducements to new ones to locate in our midst.

Ald. Best could not see the matter with Ald. Morrison's eyes. That company, he said, had been enjoying assessment privileges for 19 years, and now it is proposed to give them a lot valued at some $4,000 besides granting them a fixed assessment. He would adhere to his amendment at last meeting, that they buy the land at a valuation, and their building be assessed on the same basis as those of such concerns as the Wm and Peter Hamilton Mfg. Companies. The assessment bill before the government will relieve all machinery.

The Geo. Matthews Co., he went on to point out, had purchased about 3-4 of an acre of land for extension purposes, at a valuation of $6,000, but they had not asked for any concessions from the Town. He considered this firm, which paid out last year to farmers between a half million and a million dollars of as much, if not more, benefit to the Town than the Lock Co.

Ald. Rush, in support of Ald. Morrison thought the Lock Co entitled to all they were asking. He pointed out that in erecting new premises, their old buildings would undoubtedly shortly be occupied by a new industry. He would give the same inducements to Mr. J. J. Turner, the Geo. Matthews Co., or any other concern under like conditions.

Ald. Best here questioned the payment of a million dollars in wages by the Lock Co. in 19 years.

Ald. Adams replied that their wage bill is at present $40,000 a year.

Ald. Johnston thought it would sound better were the Town to sell the land for say $2,500 and fix the assessment at $[illegible]. He valued the land in question at about $3,500.

Ald. McWilliams said he did not agree with either proposition before the Council. The views he had urged upon the Committee, and which he still held were that we should consider how much the Town is to be profited by the proposition before them. Any establishment putting up additional buildings, thereby extending their business and increasing the number of hands employed, should be treated with respect to their enlargements on the same basis as a new industry. He considered the lot in question to be worth $4,000. He would support Ald. Morrison's motion, although he thought the Council were treating the Peterborough Lock Mfg. Co very liberally, for the reason that he wanted to see this concern in a position with any other similar institutions.

Ald. Best—"Not one of our manufacturers are paying today more than 25 or 30 per cent on the value of their property."

The motion was here put to the vote and carried.

Ald. Best and Johnston voted nay, and Ald. Adams did not vote either way.

SURVEY OF RIVER FRONT.

Ald. Best submitted a petition to the Crown Lands' Department, asking for authority to have a survey made of the river front, west side, from Wolfe street to Hunter street, said frontage being the Town's property. The petition was adopted.

TO BORROW $5,000.

A bylaw to authorize the borrowing $5,000 to pay for extensions made to the water works system during the year 1903, passed its several readings.

J. J. TURNER.

Ex.-Ald. J. J. Turner here addressed the Council on the matter of his request of some time ago for fixed assessment on the value of the land on which his new and commodious factory is erected. He had not appealed to the Court of Revision, as he understood the City Fathers contemplated fixing the assessment of certain manufactories, and he thought his firm worthy of similar consideration. He here pointed out that his building is assessed at its full value, $9,000, which he protested to at the time the assessment was made. We are, he continued, doing a big wholesale trade the same as other manufacturies enjoying exemption. We paid $2,500 for our lot, and the whole lot, of which ours is but a small portion, is only assessed for $1,800; just as soon as we excavated our cellar we were assessed $3,000. Mr. Turner could not see the justice of this, and urged that the Council make some effort to reduce his assessment in encouragement of enterprise and extension of business.

Ald. Adams thought that there are some manifestly unfair assessments in town. It seems that as soon as a man buys a lot, its assessment goes up alarmingly.

Ald. Morrison thought there was some justice in Mr. Turner's claim. When he erected his factory the cost of building and material was very much higher than a few years previously. The building which cost him $8,000 to erect then might have been put up four or five years ago at a cost of perhaps $5,000. He suggested that the matter be referred to the Legal committee.

Ald. McWilliams replied all the Legal committee could do would be to give a rebate on Mr. Turner's assessment made last year.

His Worship thought it a question for the Court of Revision to act on.

Ald. Johnston remarked that Ald. Turner's assessment of $9,000 was of unfair proportion, as compared with other factories.

The matter was finally referred to the Court of Revision and Committee of the Whole, jointly.

TO ADVERTISE THE TOWN.

Ald. Morrison moved, seconded by Ald. Rush,—That the Manufacturers' committee be authorized to have printed a small pamphlet to advertise the Town, and also to purchase a few small maps of the Town.—Carried.

TO REMOVE A TREE.

Ald. Morrison moved, seconded by Alderman Batten,—That the owner of the adjoining lot be authorized to remove a dead tree in front of his premises at the corner of Reid and Simcoe streets.—Carried.

NEW ROAD TO TOWN.

His Worship here informed his colleagues that the Township of Cavan contemplated opening up a new road from Mt. Pleasant to Peterborough, and would probably ask for some financial assistance from the Town for this purpose. The Government had given them an appropriation of $3,000, and the United Counties of Northumberland and Durham are contributing $600, although they will not be benefited by the scheme. The work it is understood will be in conjunction with the draining of the Cavan swamp into the creek which flows from Lilly Lake through the town, making the present swamp land arable and using the surplus clay taken therefrom on the construction of the proposed road.

This question was referred to the Town Solicitor and the Engineer to report thereon.

Council then adjourned.

The reports of the Board of Works and Committee of the Whole will be published tomorrow.

The City Fathers met in special session last night, when there were present Mayor G. M. Roger and Aldermen Johnston, Edgcumbe, Morrison, Mason, Scott Adams Batten, McWilliams, Rush and Best.

The minutes of the preceding meeting were confirmed as typewritten and distributed.

COMMUNICATIONS.

From R. A. Kent, Clerk Standing Committee, Legislative Assembly, Toronto, saying that the town's petition praying for certain legislation respecting the Commissioners of the Town Trust and other matters, was examined by the Standing Orders Committee. Mr. Kent here pointed out that on account of certain differences between the notice and the petition, the committee recommend that the posters setting out what legislation is sought should be posted in conspicuous places in the town.—Legal Committee.

From J. R. Stratton, Provincial Secretary referring to the same question and adding that the Standing Orders Committee are more particular with a bill coming from a constituency represented by a Minister than they are in regard to others—they want such constituencies to set a good example. The hon. gentleman further added that the bill had, however, gone through, been presented to the House, and is now under way to the Private Bills Committee, but in the meantime the town will have to show by declaration that the conditions laid down by the committee have been carried out, before the bill will be taken up by the Private Bills Committee.—Referred to the Legal Committee.

From J. E. Farewell, Secretary Western Good Roads Association, drawing attention to the fact that the next convention of this association will be held in Toronto on February 24th and 25th, instead of in March as previously arranged. Delegates will meet in the County Chambers in the Court House, Toronto on the evening of February 23rd, at seven o'clock, to arrange a programme of matters for discussion at the convention. Many county council delegates will interview the Government on the morning of the 24th, regarding certain proposed amendments to the law they have under consideration before the Legislature and the meeting of the Good Roads Association will be held in the said Council Chamber on the afternoon and evening of that day, and on the 25th February.—Received.

From Clerk of Port William, enclosing a printed copy that corporations reply to a recent attack on their management of municipal franchises, which appeared in the press recently. The municipal officials of Port William urged that the above reply be brought before Peterborough's Town Council, and thus help to bring before the people of our country the state of affairs as they really exist.—Received.

Mr. A. B. Cunningham asked that some steps be taken to have the sidewalk on west side of Reid street, between Sherbrooke and Dalhousie, put in

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 23, 1904

BRITISH COTTON-GROWING

This "new imperial sentiment" in Great Britain may be defined as a general desire of the British people to produce with the empire the principle articles they consume and the raw material that enters into their manufactured products.

As the chief manufactured export of the United Kingdom is cotton goods, the problem of cotton-growing in British possessions is one of the most important of the many that the government is attempting to solve. The necessity for its success and quick solution was emphasized by the calamity which befell the British textile industry as a result of the American "corner" in cotton.

According to United States Consul James Boyle, at Liverpool, which is the largest foreign market for American cotton, the trade has been disorganized, serious failures in business resulted, many mills shut down, others reduced working time one-half and the distress among the factory operatives was so great that public soup kitchens had to be established. Although British manufacturers are bitter toward American cotton speculators, they realize the fact that the consumption has overtaken the supply, and this will give a new stimulus to the British cotton-growing industry, now in an early stage of development. They realize also that the consumption of cotton in the United States is increasing rapidly, and some of them share the optimistic opinion of American manufacturers that within a short time the bulk of the American crop will be consumed at home.

That Great Britain has forseen the danger which threatened her textile industries through entire dependence upon American cotton is shown by the extent of the experiments that have been made already and others that have been planned in cotton-growing in British colonies. Geographically they embrace in Africa the west coast, eastern and central possessions, Nigeria, Lagos, Sierra Leone, Gambia, the Gold Coast and Rhodesia; in this hemisphere they include the British West Indies, Guiana and Honduras. In addition to what has been done and planned in the countries named, unusual effort is to be made to increase production in India, Egypt, and British Soudan.

In West Africa and Nigeria, where a "medium staple" grade of cotton is now grown, the cotton-growing area is said to equal the entire cotton area of the southern states of America. In Egypt, where immense areas have been brought under cultivation by the splendid irrigation system established by the British on the Nile, the development of cotton-growing is shown by the estimate that this year's crop will exceed last year's by 98,000,000 pounds.

When the large areas in which successful experiments have been conducted are added to those already producing the movement is shown to be one of enormous magnitude and one which is no longer considered altogether problematical. It is, in fact, the most important of all recent movements by Great Britain to revive her trade interests and strengthen her manufacturing enterprises.

It is not expected that British grown cotton will supplant the American product, but that it will supply any shortage in the American crop, and make cotton "corners," which are so demoralizing to industry, an impossibility.

HOW TO LIVE LONG

Does anyone want to live 100 years? Dr. Roger S. Tracy tells in a current magazine how to do it. He declares that the limit of life should be one hundred years, while some physiologists think that man should live to be one hundred and twenty years of age. There should be comfort in the article for the tens of thousands of business men and others who, at the age of 45, are facing what they believe to be failing health, for if the physician's premises are well taken all such may find relief by changing their habits and accommodating themselves to changed physical conditions. He says that when the average man who has eaten three big meals a day reaches the age of forty-five he encounters a rebellious stomach. He begins to feel depressed and does not know why. He continues to eat as before, however, when his fitful appetite craves food, but he takes less exercise. The result is an accumulation of waste material in the system. This is disposed of spasmodically, but little relief is obtained. Then the sufferer begins to dose himself. One of two things follows. Either he goes into a decline, or he meets the changed conditions imperceptibly regulating the amount of food and its quality to the capacity of his digestive apparatus. Within about three years, if he be lucky, he emerges from the period of depression, with a readjusted diet, and then he is good for about twenty years of active life if he is careful. Between sixty and seventy comes another period of depression, necessitating another readjustment of the habits. Then there is a gradual decline until extreme old age is reached and death comes naturally. Dr. Tracey holds that if all persons would meet these changes when they come and not wait until physical failure gives the warning there would be no such thing as old age until at least a century of life had been passed. Old age, he declares, is the direct result of hardening of the arteries, which restrict the circulation of the blood and interferes with the processes of the body. This hardening of the arteries is due to the clogging of the tissues with the waste products of food which are not eliminated properly. His conclusion is, therefore, that attention to the diet is the first essential of good health. There must be plenty of sleep also, and it should be obtained at the beginning of the night, rather than in the morning, but with good digestion, he says, sleep will come unbidden.

BURNING A WOMAN

Lynch law was carried to its most horrible and repulsive extreme in the State of Mississippi a few days ago when a mob burned a woman to death at the stake. The only 'crime' alleged against the victim of this unspeakable outrage against humanity, and justice was that she had accompanied and aided her husband in his fight and shooting a white planter in a quarrel. The lynching was not done in the heat of passion for the couple were only captured after a long chase of a hundred miles, brought back to the scene of the shooting, and there burned together with vindictive deliberation. We may talk of Russian oppression on ancient Persian despotism, but it would be hard for the most degraded savages to do anything worse than this. There is not the slightest trace of the 'extenuating circumstances,' always claimed by apologists for lynching.

The Chicago Federation of Labor pretends to great indignation over the case of John Turner, that theoratical anarchist who has been excluded from the United States, but if the federal authorities want to make the Chicago blood tubs howl let them exclude a practical anarchist some day.

A Polite Prisoner.

The lady who was visiting the jail had been much impressed with the appearance and behavior of the prisoners, and she took occasion to express her approval to the warden.

"They seem as courteous as anybody," she said, enthusiastically, "even if they don't say anything."

"Yes, they're polite enough," assented the jailer. "But I'm a little suspicious of too fine manners."

"I don't see how you can be!" exclaimed the lady.

"Well, I am," declared the warden, "and I have been ever since one of the smoothest of them broke out of jail and left a note for me in which he wrote, 'I hope you will pardon me for the liberty of taking.'"

ANGRY AT U. S.

Russians Amazed at the Attitude of United States

Chicago, Feb. 20.—Russia will look on the present attitude of the United States towards her as a visitation of divine justice, because she did not heed the appeals of the Boers for help during their struggle against Great Britain, said Baron Eugene de Fersen, cousin of Baron A. A. Schlippenbach, Russian consul at Chicago, who is here on a visit.

"Time and again," continued the baron, "did President Kruger appeal to Russia for sympathy and help against England, and as often did the Russian Government refuse to aid the Boers.

"In the conquest of the Philippines by the United States no note of protest was heard from Russia. But when Russia peacefully occupied Manchuria, pouring in millions of roubles into the development of the country and its great resources, does the United States hold aloof from our affairs?

"It is most incomprehensible to us Russians why the United States whom we have always looked upon as our friend, should so turn upon us."

Pale Weak Women Take New Hope

There is a remedy for all your troubles Thousands have been Cured. Why not get back your Strength and Vigor by Using the Food-Tonic Ferrozone?

has borne more than her share of suffering. Secret troubles undermine her strength, yet she seldom complains. But because she has suffered in the past is no reason why she

Ever since the world began woman should be forever dragged down misery and sleeplessness.

There is no girl or woman who can lift that awful burden and remove the ills from which women suffer. The name of this remedy is Ferrozone which to-day is a household word throughout the length and breadth of the American continent. New hope has been brought into the life of many a downcast woman, a new era of health has dawned for thousands who have tried and proved the merit of Ferrozone.

There is no girl of woman who can afford to miss the benefit that is sure to come from the regular use of this grand remedy. It acts directly on all the organs and insures functional activity upon which health so largely depends. Your days of weakness and headache, your hours of nervousness and despondency will all depart. Life will hold for you many new joys as it does for everyone that uses Ferrozone regularly.

Your whole body will feel the quickening influence of Ferrozone. The blood will be purified and enriched. You will no longer suffer from suppression and interference with the menstrual functions. Ferrozone cures all such ailments and prevent their return.

Mrs. Mary E. Cowan, of Hillsboro, writes, "If half the ailing women in this world would only use Ferrozone regularly they would save a great deal of sickness. Before using Ferrozone I was fatigued and tired out with the least exertion. I spent half my time in bed and was forever bothered with some trouble or other. After using a few boxes of Ferrozone I became more robust, my strength and the irregularities I formerly had have disappeared. Ferrozone is a grand medicine for women."

This is the experience of thousands. You really ought to use Ferrozone,—it will do you so much good. Don't listen to the druggist who urges something just as good. No substitute compares with Ferrozone which does all that is claimed of it. Price 50c. per box or six boxes for $2.50, at druggists or by mail from The Ferrozone Company, Kingston, Ont.

Out Into the World.

It was in Cairo that they first met, in a narrow street, amid a motley collection of Arabs and native Egyptians, Dervishes and Orientals. She and her mother found themselves straying one day from their hotel.

"May I assist you?" he observed, and, thankfully accepting his proffered aid, they had permitted him to escort them to a place of safety.

It could not have been long after this that they came across each other again in Rome. There is a little, straggling Roman street, or way, that leads off from the Coliseum.

It was there that their eyes met. His were large and dark and grave; hers blue and a trifle confused.

She inclined her head. He bowed, with a half-smile.

This incident, however, put him in a different mood for the rest of the day. He wondered at what hotel she was stopping. He wondered where she came from, whither she was going. He had started out on his travels months before with a vague, undefined sense of loneliness, a desire for companionship.

New York, he thought, was the most lonesome place in the world. Perhaps he would run across someone, somewhere who would be a treasure of friendship, or love—who could tell?

And now that he had seen her, he felt somehow that she would fulfil these requirements. This girl, with the serene blue eyes that yet showed depths of humor and courage and that certain quality of innate refinement which reflects itself from some eyes, disturbed him greatly.

Who was she?

It was going down the Rhine that they met again.

He became conscious of a gaze—what is the subtle psychology of that look beaming upon us from the unknown? He had turned, and there indeed she was, with the golden sunset gleam lighting up her almost classic face—classic save for the rather large mouth which, when she smiled, gave to her features just the irregularity that was needed.

He bowed again, and in a few moments more found himself seated by the ladies' side, talking commonplace language, and thinking uncommonplace thoughts.

When they met again it was in Paris, if not by appointment, at least by the aid of a certain sort of understanding. She had remarked casually that they expected to be in Paris on a certain date, and he had replied that he was glad that this was so, for he expected to be there himself at that time, although only at that instant his determination to do this had defined itself.

In Cairo and Rome they were to each other merely travelers from the same land, bound together by the distant claims of patriotism. On the Rhine, they were acquaintances. In Paris, they became friends, and then——

On the homeward voyage, when, one night, they stood by the rail and watched the moon come up over the waters, he held her hand in his, and said:

"Dearest, I knew that if I went out into the world I should find you; I knew it instinctively—I must have known it. I was so lonesome living all those years in New York by myself—and now, to think I have found you, at last!"

And she replied:

"Do you know, I felt much the same way. I, too, was lonesome. No one in New York seemed to satisfy my longings. I sometimes wonder why we have never met before."

He smiled. "Do you want to know the reason?" he asked. "I can tell you for the other day your mother told me the street and the number where you lived."

"Indeed," she said, "what has that to do with it? What is the reason?"

"Because," he replied, with a smile, "all these years I have lived next door to you."—Tom Masson in "Smart Set."

It pays to advertise in The Morning Times.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

Spain Sending Troops To the Canary Islands

AND CLOSE TO THE STRAIT OF GIBRALTAR

Sweden and Denmark Are Also Preparing for War

St. Petersburg, Feb 20. With reference to the sensational story of a disaster to Russian troops at Lake Baikal (one report saying that three regiments were drowned while attempting to cross the ice-covered lake), it is explained that the trans-Baikal line was blocked at the Baikal station during the night of Feb. 18 by an avalanche of snow which fell from a neighboring mountain. A train having troops on board dashed into the obstruction and the locomotive was derailed. One soldier was killed, five were severely injured and fourteen were slightly hurt. Traffic was said to be resumed next day.

Further advices from Port Arthur today say that all the women and children and most of the male civilians have left that place, and that practically only the garrison remains.

The wave of patriotism sweeping over the empire seems to be swamping racial feeling, even the wild tribes of the Caucasus, the discontented Finns, and sullen Poles forgetting their grievances and coming forward to volunteer their services to the common fatherland.

FACTS ABOUT THE DOUKHOBORS

Mr. Bryce Thinks They Have Not Made Good Settlers

SHOULD BRING IN NO MORE

They are an Alien Race Who do Not Assimilate Readily with Others

Montreal, Feb. 22—A press representative had a chat in the rotunda of the Place Viger Hotel with Mr. James Bryce of Winnipeg. Mr Bryce, who is on his way to England, recently visited Yorkton, Assa., and has some interesting facts to tell of the condition of what Mr. Bryce calls "Sifton's pets," viz, the Doukhobors. Mr. Bryce is of the opinion that the Doukhobors will not for some years to come develop into the class of working settlers that Canada is so much in need of. The climatic conditions of Yorkton are not of the easiest and some time must elapse before the Doukhobors will emerge from their present condition of semi-helplessness and begin to make headway.

"The main question," said Mr Bryce "in settling up the vast West is not so much to run in a horde of people as it is to get the right class of people. Settlers are to a large extent born and not made, if I may use the term, and the Doukhobor as he is today in the neighborhood of Yorkton does not come up to the lowest qualification of a settler. He will not assimilate, he is hide bound by religious superstition and observance; he is at any time liable to start off on a long winter pilgrimage; in fact he is a man of many moods, incapable of looking after himself."

"Is there any likelihood of another pilgrimage this winter?" was asked.

"I do not think so," was Mr Bryce's reply. "The long continued cold of that northland winter has nipped any intention of that kind in the bud. The fact remains, however, that when it comes to settlers, these people are the greatest failure. They are like children that have to be watched carefully for fear they will get into some mischief. Canada wants settlers who will help to build up and develop the mighty resources of the Dominion and place her on a footing second to none among the nations. The Doukhobors will never aid in this work of nation building. They are an alien race with customs and manners far removed from those of other European sects. The Galician and Menonite are far ahead of the Doukhobor."

JAPS MAY WIN AT FIRST

Berlin Experts Expect Initial Victories for Mikado's Army

Berlin, Feb. 22—Expert naval opinion in Berlin justified the Japanese in landing before the Russian fleet is destroyed, as to wait until that is accomplished might mean a delay in the land operations for ening of Russia's forces. The expemonhths, consequent on the strength tation expressed by a technical newspaper which reviews the situation is that Japan probably will in the beginning have considerable land successes through hard fighting. What may happen after the early period of the land operations no technical person ventures to predict in writing, though it is doubtful if the Siberian railroad will be at all adequate to reenforce and supply the Russian army.

Several Soldiers Were Killed And Injured

A RUSSIAN TRAIN HIT AVALANCHE

Three Regiments Were Drowned in Lake

Special to THE TIMES.

St. Petersburg, Feb. 2[illegible]—An instance of devotion among the Czar's Hebrew subjects is afforded by the act of 15 Jewish doctors in throwing up their practices to go to the front. Before leaving they attended a service in a synagogue here. Rabbi Drabkin made a fervid address to a large congregation which included Baron Ginsburg and other Jewish notables.

New York, Feb. 20—A special cable from Berlin to the Herald says, according to a telegram from the Madrid correspondent of the Berlinger Tageblatt, the French Government has confidentially given warning to the Spanish Cabinet of the secret plan of the British Government to seize parts of Spanish territory in case of war.

This is the reason why Spain is sending troops to the Canary Islands, Ceuta, Galicia, and the neighborhood of the Straits of Gibraltar. The French Government has also advised the strengthening of the fortifications on certain parts of the Spanish coast.

Baron Richthofen, the Minister of Foreigh Affairs, says that in view of the outbreak of war, it is impossible for Germany to withdraw the 2600 men she has in China and at Kafo Yehon. The troops in China are the backbone of the maintenance of order in China.

NURSES FOR THE WAR

U. S. Nurses Volunteering for Services in Japan

So far as is known at the present time there are no Ontario nurses volunteering for service in Japan in connection with the Russo-Japanese war. At the Canadian Nurses' Association the statement was made that none were known to have applied to be sent to Japan.

LOYAL CANADA

There is No Annexation Sentiment in Canada

Toronto, Feb. 22—Mr. C. A. Birge, ex-president of the Canadian Manufactures' Association repeated before the Empire Club the address which he gave recently to the Commercial Club of Providence, R. I., on the relations between Canada, the Mother Country and the United States. Mr. Birge repudiated Senator Hale's prophecy, that Canada would soon be annexed to the United States, declaring that there was no sentiment in Canada in favor of annexation. He also declared that the movement in the United States in favor of reciprocity failed utterly to find a response in Canada.

[illegible] had little to do with [illegible] at one pleasant encounter is narrated by General James Grant Wilson in the last issue of the "Criterion" of New York. The great Duke of Argyll was visiting his son, then Governor-General of Canada, and met Longfellow in the American poet's ancient colonial mansion at Cambridge, Mass. As they sat together on the verandah the Duke persistently asked the names of the various birds he saw and heard singing in the poet's trees, as well as of the flowers and bushes growing in his extensive and beautiful garden. Longfellow was neither botanist nor ornithologist, and did not know. "I was surprised to find your Longfellow such an ignorant person," said the Duke subsequently to an American acquaintance. "Indeed! Pray, on what subject?" "Why, he could not tell me the names of the birds and flowers to be heard and seen in his own garden." "May I ask how many languages you speak?" the American asked. "Certainly but one." "Mr. Longfellow," was the answer, "speaks six and translates freely from almost all the languages of Europe."

Dr. Carl Peters, the explorer, who is soon to try to find King Solomon's mines in East Africa, has an interesting flat in London, a flat decorated with some forty or fifty poisoned darts, arrows and assegais, missiles that were shot at him in various African combats. On his last expedition Dr. Peters gave employment to a homeless black youth whom he took from the forest and trained in the duties of a valet. Thus his tent, where he kept his outlandish weapons, was always neat. One day the boy brought an assegai to Dr. Peters. "I found this, sir," he said, "outside. It belongs to you, doesn't it?" "It does," the explorer answered. He had remarked the interest that the boy took in his collection, and therefore he added: "You may keep that assegai, Jerome, for your honesty." The boy appeared properly grateful. A few days later, Dr. Peters lost a piece of gold. He knew he must have lost it in his tent. Therefore he waited confidently for Jerome to return it to him. But the boy made no sign. "Jerome," Dr. Peters finally said, "I lost a gold piece the other day. Did you find it?" "Yes, sir," Jerome answered. "Well, what did you do with it?" "I kept it for my honesty," said Jerome.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1 00

Officers:
J. R. CHAPTON, - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - Secretary
ALEX J. CHAPTON, - - - - - - Treasurer

Trustees
J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non-interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

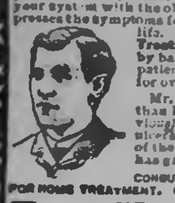
BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.



Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

CONSULTATION FREE. BOOKS FREE. WRITE FOR QUESTION BLANK FOR HOME TREATMENT. CURES GUARANTEED OR NO PAY. 25 YEARS IN DETROIT.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.83 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz. 7-28-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

Government Forces Defeat Insurgents

Special to THE TIMES.

Paris, Feb. 21—A despatch from San Domingo says: United States cruiser Columbia and the training ship Hartford, have bombarded Duarte, which is occupied by the insurgents.

Washington, Feb. 21—Late tonight the American State Department received a cablegram from United States Minister Powell, dated San Domingo Feb. 16, saying: A decisive battle has been fought between Government forces and insurgents. It extended over two days, and resulted in victory for the Government forces. The siege has been raised, and the insurgents are in retreat.

THE BALKAN WAR BEGINS TURKS ARE BEATEN

Formidable Rebellion Breaks Out in the Balkan Peninsula

MACEDONIA NOW STRIKES FOR HER FREEDOM

The Rebels Kill Many Turkish Soldiers—Bulgaria Preparing For War With Turkey

London, Feb. 22—Revolutionists in the Balkans have again taken up the sword and the torch to strike a fresh blow for freedom from the harshness of Turkish rule. Dispatches received today from Salonica, Sofia, Constantinople and other points in the region of war, show Turkish troops are being besieged, towns are being burned and that the situation threatens to engulf Europe in an enormous conflict.

Russia, cognizant of the fact that the revolutionists have defeated Turkish troops at great cost of life on both sides, and of the further fact that thousands of Bulgarians stand ready to join the ranks of the belligerent Albanians, has notified Bulgaria that any encouragement it gives the revolutionists will be interpreted as a cause for war on part of the Czar. In its note the St. Petersburg government announced that it would resent with force any Bulgarian attempt to foster a renewal of the Macedonian insurrection.

It is regarded in London as impossible that the Bulgarians can be restrained longer by their government. They have always sympathized with the Macedonians, who, it appears, are opposed to the reform scheme instituted by Russia. The czar's note to Bulgaria is likely to act as a firebrand. Macedonians and Bulgarians believe the Russians have enough to occupy all their attention in the orient, so the present is regarded as an opportune time to strike for the independence of Macedonia.

Defeat or Besiege Turkish Troops.

Salonica, Feb. 22.—Rebelling against the powers' reform scheme for the government of Macedonia and against obnoxious taxes imposed by the sultan, between 25,000 and 50,000 Albanians have taken up arms to strike for freedom from Turkey. Already the revolutionists have clashed with and routed or repulsed the Turkish troops in several bloody battles. At the present moment 20,000 drilled and well-armed Albanians are besieging Shemsi Pasha, who has 2,000 Turkish troops and three cannon, at Babajlos, between Diakova and Ipek. In sorties and attempts to break through the rebel lines Shemsi Pasha has lost 100 men. His surviving soldiers are said to be without food and water.

Shakir Pasha is hurrying to the relief of the besieged Turkish force with strong reinforcements. It is doubtful, however, whether he will arrive before Shemsi Pasha's men, disheartened by the prospect of starvation and weakened by the hot fire of the besiegers, are forced to surrender to the revolutionists.

Turks Admit Their Reverses.

Constantinople, Feb. 22.—Sixteen thousand Albanians are in revolt in the district of Diakova against the reform plans of the powers for Macedonia. In conflicts which have taken place between Albanians and Ottoman troops the latter were worsted. Large reinforcements have been despatched to Diakova.

The Albanians attacked the town of Diakova Feb. 13 and plundered and burned a number of houses. Turkish forces subsequently attacked the insurgents' main position at Babajlosi, but were repulsed with heavy loss.

Feverish activity continues among the Turkish authorities on the Bulgarian frontier in accumulating stores and repairing roads for the expected massing of troops.

Gives Russia's Note of Warning.

Sofia, Feb. 22—Russia has officially notified the Bulgarian government that any encouragement given by Bulgaria for the renewal of the insurrection in Macedonia will be regarded as an act of hostility which will be promptly and forcibly resented.

CHAMBERLAINITES ARE STILL CONFIDENT

An Interview with High Authority in Chamberlain's Councils

ATTITUD GOVERNMENT

Preference Policy is Strongly Entrenched in Cabinet and Ministerial Ranks

London, February 22—Mr. Chamberlain being absent, I submitted to the high authority, who is best qualified to speak Mr. Chamberlain's mind, yesterday's Canadian cablegrams indicating Canadian disappointment at the British Parliament's adoption of the Ministerial policy of retaliation, and their refusal of the Ministry at present to adopt the policy of preferential tariffs. This Chamberlain authority spoke as follows:—

AN AUTHORITATIVE STATEMENT.

"You may say authoritatively in Canada that the attitude of the Government is defined, not by the isolated utterances of this or that Minister. These express the strongest sympathy with the movement for a preference, and his expectation of its adoption when public opinion is enlightened on the question of food taxes. Since these declarations of the Prime Minister, objections to food taxes have been to a large extent met.

STRONGLY ENTRENCHED

"Indeed, you may tell Canadians emphatically that so strong a hold has the preferential policy secured within the cabinet, and in the Ministerial party generally, that if the Ministry for one moment contemplated the abandonment of Chamberlain's ideal, which of course they do not, the position of the Ministry would be instantly imperilled. For a large and influential body of Ministers and other leaders are bent on carrying the policy of Imperial reciprocity as quickly as possible.

CERTAIN OF SUCCESS

"My. Wyndham's name is mentioned in your Canadian cablegrams. He is one of the strongest supporters of the Imperial idea in the Cabinet. We are certain of success, for the cause appeals to nine out of every ten thinking Englishmen."

EVERYBODY READS THE TIMES

RUSSIANS ARREST A REPORTER

Refuse to Let War Correspondents Travel Out of New Chwang

Shan-Hai-Kwan, Feb. 22—A correspondent who a few days ago attempted to leave New Chwang to cross the country in order to reach Liao-Yang, to join the Russian forces, under General Prastalinski, which are en route for the Yalu, was arrested by Cossacks, notwithstanding his properly made out pass, and obliged to return to New Chwang, the Russians forbidding him to travel.

SERVICES FOR WAR HEROES

Japanese Bury the Men Killed in First Port Arthur Battle

Sasebo, Japan, Feb. 22—Impressive funeral services were held here yesterday over the remains of three officers and two men of the Japanese battleship Fuji, who were killed by the Russian fire during the first attack on Port Arthur. The religious ceremonies were conducted by a Shinto priest, and the funeral oration was delivered by Admiral Samewa.

WHY CAMPAIGN IS SO VERY SLOW

General Miles Speaks of the War in the East

JAPAN'S HEROIC EFFORTS

To Get the Russian Troops Cut Off at Port Arthur

Washington, Feb. 22—General Nelson A. Miles, discussing the war situation says, "Many of the despatches purporting to come from the seat of war are now probably given out for the purpose of creating sympathy or prejudice by interested parties. Still the reading public must winnow the wheat from the chaff and those accustomed to the perusal of the news pages of the daily journals are usually able to discern that which seems reliable and authentic from the most sensational. The persistent effort on the part of the Japanese to destroy or inflict serious injury upon the Russian fleet, taking advantage of the darkness of the night and the severity of the cold storms that frequent the northern coast, indicate a purpose to clear the waters dividing the Island Empire from the main land, if possible, before commencing any extensive operations against the Russian position. These tactics, if persistently continued, must result in serious damage to the Russian fleet or the destruction of the torpedo fleet of the Japanese. Either is liable to occur whenever they come together. There would be no excuse for the Russian gunners failing to destroy the torpedo boats if the attempts were made at a time when the Russian decks are free from the ice and the machine and rapid fire guns could be readily and effectively used. The destruction of the Japanese torpedo boats would be a serious loss to their navy. While the severity of the winter climate and the blinding storms may be of some advantage to the Japanese in their night attacks, they are at the same time of some advantage to the Russians in giving them protection and making the movements and efforts of their enemy most difficult and expensive. Since the terrible disaster to Napoleon's army, nearly a hundred years ago, it has been said that January, February and March are Russia's three best generals, so while it may be difficult for Russia to move the heavy reinforcements over the Siberian road, the winter has also made it very difficult for Japan to land a large army in Corea or Manchuria and sustain herself there, even if the waters behind her army were entirely free and under her own control. But to move an army across an extensive body of water, with the possibility of an enemy's battleship cutting off its retreat or source of supply, or war ships getting in among these transports and supply ships and creating destruction, is one of the most hazardous movements in military operations. Therefore, the delay of the Japanese in moving a most formidable army from her own territory to Corea or Manchuria, is no doubt caused by the impossibility, up to the present time of being able to cripple the Russian Navy, and the difficulty of sustaining an army in that cold climate at this season of the year. It is said that the Russians are suffering and will suffer much on account of the severity of the winter, yet they are more accustomed to endure those hardships than are the Japanese."

MAY FIGHT BRITAIN

Russia Prepares to Strike a Hard Blow

INDIA IS TO BE INVADED

Russia Will Not Allow Rival to Profit From Present War

St. Petersburg, Feb. 22—It is becoming apparent that Russia is taking into account the possibility of war with Great Britain, arising from the attempts of the latter power to profit from Russia's present situation. It became known today that Lieutenant General Ivanoff, governor general and commander of the troops in Turkestan, had gone to Tashkent with General Sakharoff, chief of staff of the military district of Turkestan. In high military circles it is said that General Ivanoff has been instructed to prepare plans for the prompt invasion of India in the event of Great Britain adopting an attitude of open hostility to Russian interests or attempting to prejudice [illegible] interests in Persia or the [illegible].

Has Big Army Available.

Russia has an immense army available for [illegible] an enterprise, and in addition could count on the active assistance of the nomadic peoples of Turkestan and Afghanistan, who within the last few years have come under Russian influence.

The anti-British feeling is growing among all classes and the opinion is everywhere expressed that England and not Japan is the real antagonist of Russia in the present war.

It is known that the Czar's government counts on the moral support of Germany in the war with Japan, and in the event of trouble with England it is believed here that the interests of the kaiser would lead him to offer something more substantial than sympathy.

Want Alexieff Removed.

Public opinion in Russia, even among military men is strongly opposed to Viceroy Alexieff, who is accused of incapacity. A movement is on foot in favor of the immediate appointment of General Kuropatkin, the war minister, to command the Russian land forces and to give Admiral Skrydloff command on the sea.

A meeting of the council of the empire was held yesterday. It was attended by the heir presumptive, the Grand Duke Michael, and other grand dukes.

Vice Admiral Makaroff, the icebreaker specialist of the Russian navy and until lately commander in chief at Cronstadt, has gone to the far east.

The spirit of patriotism at Moscow has resulted in the rough handling of a number of persons, who failed to take off their hats while the crowds were singing the national hymn. It is even reported that some of the offenders were killed, but this is not confirmed officially.

Death in Emily Township

Sad we are to have to chronicle the death of Mr. Isaiah Thornton at his late residence, lot 9, con. 3, Emily township. His remains will be interred in Emily cemetery this afternoon at 2 o'clock.

FOREST MINING CO.'
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Dell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $5.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $62.68 and $39.08 respectively, thus being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite), and by driving this tunnel five or six hundred feet on the present course it will meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Dell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunnels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,550 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes, in this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS;

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000 80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM C. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92 43 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 43; Gold, $6 82; Silver, $254 31. Total, $267 53

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5 500,000 (now claimed to be worth $15,000,000) About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 11, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable oppportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

The Science of Flowers.

It is to be feared that among the embellishments of life, writes Sir Edwin Arnold in The London Telegraph, flowers too often afford an example of how people will turn pleasures into toils. I noticed lately a tender little wail which arose from a lady who found herself overburdened with the too frequent task of arranging buds and blossoms for the passages and apartments of her London house. A lover of flowers, as everybody of good taste must be, she confessed to feeling something not unlike what the prisoner experiences when his day's allowance of oakum to be picked has just been served out, to see her butler climb the staircase, holding at arm's length on a vast tray the confused heap of blooms and foliage; behind him at the same time would come the parlormaid, staggering under a load of glasses and vases and what not, destined to hold the costly plunder of the morning. At first a delightful labor and always a graceful and sweet scented one, it had come, said the fair complainant, to be a heavy and time-consuming task, growing more and more burdensome as the fashion of floral display extended, and the country every morning sent up to town such tempting wealth of roses and lilies and the rest.

It is not the fault of the flowers, of course, except because, being so fragrant, so delicate, and so beautiful, they make slaves of all who serve them. On the contrary, it would decidedly tend to shock the mind of many a fair arranger of flowers if science went to the unkind pains of explaining to her how entirely free from any wish or intention to give pleasure are those exquisite roses and all those dainty blossoms. If there were, indeed, a language of flowers, and the products of the parterre could speak, they would say, "Madam (or Miss), do not flatter yourself that one petal of us has been tinted, one bud expanded, one green leaf spread to the sunshine, or one single calyx among us has opened its wonderful apparatus of stamen and pistil to nestle in your silken tresses or to repose in not unequal rivalry above your rosy cheeks or upon your lily-white necks and bosoms. Not for you, however much the poets have lied to you, were we created, and never for you have we grown up to the glory and the grace for which we have become to-day your unwilling victims. We were made so lovely, so delicate and variously tinted, perfumed so divinely, and loaded with little chalices of nectar distilled from earth and sky by such chemistry as your Royal Society never knew, wholly and solely to please a beetle, to attract a bee, to woo into our secret service the painted butterfly or fluttering moth.

"Your great and learned Mr. Darwin, if you will only read him, can show you why we wear these colors and display these stains and patches and lines of scarlet and gold, of purple and amber. They are simply traps and baits to lure the wandering insects, who thus become the marriage-makers of almost all our families, because the law stands that it is best for plants and trees to wed abroad instead of to wed at home."

The Japanese are perhaps the only people on the earth who have understood all this, and who do not allow the flowers to embarrass or overwhelm them. Sensitive in every nerve to the glory of line and splendor of color in nature, they economize their admiration and confine it to a profound enjoyment of a few, instead of the wholesale collections indulged in by western people. They would no more regard one of our vast bouquets or bowpots as a proper mode of arranging flowers than we should call the motley crowd of spectators in the pit of a theatre an evening party. Their leading idea, entirely opposed to ours, is to get the full delight of shape and outline of natural balance and contrast from one or two floral specimens, and by no means to mass and thereby confuse them, so that even the truest eye and most subtle nostrils become bewildered in the tumult of beauty, like the ass of Buridanus between his equal bundles of hay.

Ruskin has somewhere expressed the opinion that flowers ought never to be plucked from their stalk, but left to grow, because their chief charm is their life, which is forfeited when the blossom is broken off. But, although a flower is never so charming as where it is seen alive and fulfilling its floral purpose, that would sadly limit popular enjoyment of it. Perhaps this enjoyment is keenest among those who least comprehend the magic and the mystery of their being, and I am half afraid that the country girl who puts a flower in her hair, or the little ones who fill their small fingers with bluebells and May blossoms, have a pleasure in that glory of theirs which our Lord declared to be greater than Solomon's, untasted by mighty Darwin, when counting the seeds in a single capsule of an orchid, and showing how, but for a preventive law, that single plant in four generations could cover the whole globe with orchis maculata.

Benefit of Spraying Apple Orchards.

The experimental spraying operations carried on during the spring and summer by the Fruit Division, Ottawa, in the Woodstock and Ingersoll districts have been satisfactory beyond expectations. Mr. W. A. MacKinnon, chief of the Fruit Division, says that they furnish the best illustration of the necessity of spraying that he has ever seen. Aside from the opportunities for comparison between sprayed and unsprayed orchards, chance has provided some remarkable proofs of the value of the operations. In every case where a single tree, or part of a tree, in one of the sprayed orchards was neglected the fruit on such tree or part of tree is to-day hardly worth the trouble of picking, while on all sprayed portions scab is hardly to be found.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 400 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a [illegible]

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

Air Carries Healing Medicine

THAT CURES COLDS, CATARRH AND DISEASES OF THE THROAT LUNGS AND BRONCHIAL TUBES

About the healing power of the air of the pine woods everybody knows, but to supply it in the form of medicine seemed almost beyond realization. After many years of careful study a scientific remedy now known as Catarrhozone has been produced, which enables the sufferer to breathe into his lungs all the healing properties of the balsamic pine woods air. This marvellous remedy has conquered catarrh. It unquestionably does cure it permanently.

You cannot fail to be cured by Catarrhozone, because it reaches and destroys the cause of the disease. You simply inhale the antiseptic vapor. It instantly spreads to every part of the breathing organs. The micro-organisms infecting the diseased tissues of your nose, throat and lungs die instantly. There is nothing left to cause inflammation. Any spots that are raw and sore are quickly healed by Catarrhozone and you are soon completely cured.

It is impossible to breathe through a Catarrhozone inhaler without at once feeling better. Your head is cleared of mucous discharge, your nostrils are cleansed of all putrid matter, the phlegm is removed from your throat. Every trace of catarrh is searched out of the system by Catarrhozone, which thoroughly disinfects and purifies every organ of the body.

Catarrhozone is the only natural remedy for catarrh. It cures by cleansing and purifying all diseased tissues, not by deadening the stomach by drugs. It is a clean, simple and satisfactory remedy that is endorsed by the clergy, and universally prescribed by the medical profession because it is scientific and absolutely certain to effect lasting cures.

Don't be misled into accepting a substitute for Catarrhozone, which alone can cure thoroughly. It is so powerfully healing that colds disappear in an hour, coughs in two hours and even chronic catarrh in a comparatively short time. Two months' treatment $1, sample size 25c. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

"Single Tax."

Tomorrow evening in the Y.M.C.A. Hall, Prof. Lee Francis Lybarger will lecture on the subject "Single Tax." The professor comes with the best recommendations and an instructive lecture is expected. Mayor Roger will occupy the chair.

Dear Swearing

Swearing on the public streets in a loud voice is at times rather costly. A Campbell swore that he swore too loudly the other day and His Worship asked for $5. The charge of destroying property against E. Vescoo was dismissed, the defendant agreeing to pay the costs, amounting to $3.80

Obituary

The death of one of Otonabee's oldest residents occurred on Sunday evening about 11 o'clock, when Mrs Foley passed away at the ripe age of 7?. The remains will be removed from her late residence, Lot 13, Con. 4, to-morrow morning and will be interred in the Roman Catholic cemetery here. Deceased has several relatives residing in town.

A Peterborough Artist

The Port Perry Standard in referring to the band concert held there last Wednesday evening says, "The artist of the evening was Mrs. Morrow, of Peterborough, who enraptured her vast audience and held them spellbound during her selections. Again and again the audience called her back. Her piano solo also met with the greatest applause. Her appearance on the concert stage at Port Perry at a future date, would be a sufficient guarantee of a crowded house."

BIRTHS

MINOCCOLO.—In Peterborough, on Sunday, Feb. 21, 1904, to Mr. and Mrs. E. Minoccolo, twin daughters.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

To Wear Scarlet

W. H. Taylor, member of the Legislature for North Middlesex, has given notice of a bill to amend the game laws. This was prompted by the very large number of fatal shooting accidents during the deer hunting season. The bill will make it compulsory for every hunter to wear a bright red or scarlet coat in order that men may not be taken for "game" and ruthlessly "dropped."

Died at the Hospital

The death of little Marjorie Montcrief, daughter of Mr. and Mrs. George Montcrief, Sherbrooke street, which occurred at St. Joseph's Hospital, on Sunday night, was a very sad occurrence. The deceased, who was only nine years old, was taken to St. Joseph's hospital on Sunday and within three hours died. She was a very bright and promising daughter and her parents are grief stricken at the sudden loss. The funeral will take place this afternoon to the Roman Catholic cemetery.

Scarcity of Water

The greatest difficulty that many farmers are contending with just now is the water supply for their horses and cattle as the wells that heretofore flowed freely are almost dry, and stale springs that have been alive for more than a quarter of a century are about dry. A thaw is anxiously looked for, particularly by those whose live stock have been put on half their usual allowance and who have to drive them a long distance to watering places. The past month the difficulty has been greatly increased owing to the deep snow.

"Christy's Old Organ."

A most interesting and instructive lecture was given in St. John's school house last evening, by Rev. Canon Dixon, on the subject, "Christy's Old Organ" or "Home Sweet Home." The reverend gentleman gave a vivid description of London life, with all its pleasant and unpleasant associations, and pathetic stories were told that would soften the hardest heart. The speaker has a most impressive style, and the large audience was most appreciative. The limelight views shown were excellent and assisted in making the picture of London life all the more realistic.

TURF CLUB MEETS

Officers Elected for Ensuing Year—P. J. Clunan Elected President

A meeting of the Turf Club was held yesterday evening in the George street club rooms, and the following officers were elected, President, P. Clunan; Vice-President, J. Clancy; Secretary, J. O'Shea; Treasurer, R. H. Jackson, and the following were appointed directors H. Neal, A. Elliott, J. Clancy, M. Connors, J. O'Shea, H. Jackson, R. D. Dunn, S. Holland, P. Clunan.

Another meeting will be held in the near future.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Hay has returned from a pleasant visit with Toronto friends.

—Mrs. Kennedy, of Douro, is the guest of Miss Sheehan, Bethune street.

—Mr. S. D. Hall is on a business trip to New York and other American cities.

—Mr. Leo Clancy, of Hunter street, is very ill with an attack of la grippe.

—Mr. Thomas Robson, Fenelon Falls, was in town yesterday and gave The Times a call.

—Miss Preston, who formerly resided here, is the guest of Miss Stewart, Stewart street.

—Mr. Chas. Cameron has been taken to the hospital, but we trust his recovery will be speedy.

—Mr. W. Atkinson, of the St. Catharines Journal, is the guest of Mrs. Montgomery, Louis street.

—We are glad to report the recovery of Mr. W. C. Kirk from his recent attack of pneumonia.

—Mr. James Fitzgerald, of Peterborough, has passed his final examinations before the Board of Ontario Land Surveyors.

—Miss Conroy, Elizabeth street, has returned from a visit to her brother, Dr. Conroy, of Battle Creek, Mich.

—We regret to hear of the illness of Mr. Geo. Graham, of the Oriental, who is confined to his bed through an attack of la grippe. We trust his recovery may be speedy.

—On Tuesday of last week Mr. Jeremiah Flaherty, of Peterborough, was married in Toronto to Miss Mary Piri, of that city. They will take up their abode in the Queen City.

—The many friends and acquaintances of Mrs. A. Killen-Keough will be pleased to learn that she has be pleased to learn that she has been successful in obtaining a position as soloist in the Metropolitan church, Toronto.

—Mrs. Dawson was presented with a handsome drinking cup by the young ladies of the Y.W.C.A. boarding house, of which she has charge. Mrs. Dawson left on Saturday for Louisiana, where she intends making her home with her son

—Miss Bella Lillico, of West Monaghan, leaves today for Cleveland, Ohio, where she will accept a position on the nursing staff of Lakeside hospital. Last evening a number of friends and acquaintances presented the young lady with a handsome gold watch and chain

—Guests at the Snowden House—Mrs. H. Christie, Lindsay; R. B. Gray, Montreal; R. R. Maathur, Toronto; Herb. Daley, Napanee; M. W. Clayter and Frank Stanley, Toronto.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—A spring poet has appeared in Peterborough and is still at large.

—Rev. J. J. Rae, of Oshawa, will lecture on the subject, "Jack and Jill," at Mark street Methodist church next Monday night.

—This would be a much better world than it is if the Frost King would keep Lent and retire.

—Mr. R. M. Dennistoun will address a meeting of the St. John's Young Men's Guild next Monday evening.

—Will the young gentleman who skated alone at Brock street rink the other evening see that in future they look after the girls! Ladies first, please.

—Coal is reported very scarce in Toronto and the price runs as high as $9 per ton. One Cobourg dealer shipped a car load to the Queen City last week, in order to accommodate some former residents.

—Owing to the slippery condition of the sidewalks, pedestrians have been making use of the centre of the street, but many of those who are not "slipshod" have received nasty falls.

FIRE AT LAKEFIELD

Northey's Grocery Store Destroyed $15,000 Damage Done

Early yesterday morning fire destroyed Northey's grocery store, bake shop and also an adjoining shed. The origin of the blaze is a mystery as no one was in the building at the time the fire commenced. Mr Northey's residence was also considerably damaged and the total loss was in the neighborhood of $1,500, only part of which is covered by insurance. The local brigade did excellent work and were instrumental in preventing still greater damage being done.

MRS. NEWALL DEAD

Passed Away on Monday Afternoon After a Lingering Illness

Sad we are to have to chronicle the death of Mrs. John Newall, 73 Smith street, which occurred yesterday morning after an illness of three months. Deceased was the daughter of Vernon Parker, an old resident of Peterborough County. She was only forty-nine years of age and leaves a husband, son, and three daughters to mourn her loss. Her daughters are Misses Bella and Lottie, and Mrs. A. Fletcher, and the son, is Mr John Newall, all of this place. The funeral will take place tomorrow afternoon at 2 o'clock, to Lakefield cemetery.

The Town Council.

(Concluded from page 1)

a passable condition.—Referred to the Board of Works.

From Wm. Taylor, offering $40, $100, 120 and 140 respectively, for buildings numbered A, B, C and D on the Hilliard estate recently purchased by the town. These prices are for the buildings as they now stand. Mr Taylor offers to remove them at his own expense, but would like to hear regarding this matter as early as possible, as should his offer not be accepted he will require to put new buildings.—Referred to the Property Committee.

From W. G. Morrow, Secretary of the School Board, enclosing estimates for the year 1904, and giving the total amount required to be raised for current expenditures of the Collegiate Institute and Public Schools as $30,600.—Referred to the Finance Committee.

(This amount is 15,600 more than last year.)

From Dennistoun Peck & Stevenson as follows

Gentlemen,—We have received instructions from the Colonial Ink Company to notify the council that their factory has been shut down for one week owing to the water pipes being frozen, and thus preventing the company from obtaining water to fill their boilers. The freezing of these pipes was not due to climatic conditions over which the company had no control, but was due to the fact that a drain for surface water was last fall placed under the street outside the factory in such proximity to the water pipes as to cause the latter to freeze. It is confidently expected that the pipe will continue to freeze up with every cold snap until action is taken to put it in its former condition. Our client claims 1200 damages.—Referred to the Legal Committee.

From A. Stevenson, Secretary Peterborough Town Trust Commissioners, notifying the mayor that the commissioners are prepared to deal with the town property between Rink, Perry, Stewart and Bethune streets in such a manner as the Town Council shall carefully provide, provided that the Commissioners are protected by legislation from all responsibility in the matter

Mrs J. S. Togue, asking for permission of taxes on No. 202 Dublin street for the year 1903

Local Sports

Campbellford will play the T.A.S. hockey team here tomorrow evening.

The T.A.S. had an excellent workout with the Peterborough Seniors last night.

Campbellford and Warkworth came together in a lively game of hockey last night, the former winning by four goals. The score board read 9 to 5 at the finish.

Eugene Tremblay, of Montreal, and J. Haslip, of Buffalo, will challenge the winner of to-morrow night's wrestling match between Kennedy and Wiley. This promises to be one of the best sporting events ever seen in Peterborough.

On Thursday evening John Davidson and sister, Miss Fannie Davidson, will give an exhibition of fancy skating at the Brock street rink. The reputation of these artists is more than continental, and they should attract a full house. Mr. Davidson is also a speed skater of note, and is a brother of the famous Harley Davidson, ex-champion bicycle rider and speed skater.

So the "Sand Rats" are out after the Times. They certainly are "behind the Times," as the latter challenged the "rats" over a month ago. Perhaps they have been waiting for milder weather before "coming out."

The following letter has been received by Secretary Rickey of the P. A. C.:

"I thought that I would write you a few lines. I will wrestle the winner of the Wiley and Kennedy match, which takes place on Tuesday night in Peterborough, for from one hundred to five hundred a side. Now if you can get the winner to wrestle me I will go there and wrestle him. I am Johnnie Hazlip, the champion light-weight of the world. The lightweight limit is 135 pounds. Now if you can get the winner to meet me you will be doing me a great favour. Please answer this letter.

"JOHNNIE HAZLIP,
"803 Clinton street,
"Buffalo, N.Y."

The wrestling contest this evening bids fair to be one of unusual interest. Both contestants were in town yesterday, and each was confident of victory. Kennedy is a likely-looking young fellow, the essence of politeness and very liberal in his remarks concerning his opponent. Both appear to be A.1. fellows, and the bout promises to be most interesting.

GRAND TRUNK PACIFIC

Two Notices Affecting the Scheme in the Canada Gazette

Ottawa, February 23—Two notices affecting the Grand Trunk Pacific Railway Company appear in the Canada Gazette today. One of them emanates from the directorate of the Grand Trunk and intimates that at the ordinary half yearly meeting of the company to be held in London on March 8, the agreement made July 29 last between the Government and Sir Charles Rivers-Wilson, Mr. Hays and others, together with a supplementary agreement, will be submitted for approval. At the same time a resolution will be presented to authorise the directors to give effect to the agreements so far as they relate to the Grand Trunk Railway Company of Canada and for that purpose to provide the necessary deposit, and give the guarantee required pursuant to the agreements in question.

The second notice declares that at the coming session of Parliament the G.T. Pacific Company will apply for amendments to the act of incorporation having reference to the powers of the directors to issue paid up stock defining the powers of the provisional directors and confirming the action of provisional directors in entering into an agreement with the company

Are Your Lungs Weak?

Dr. Pierce's Golden Medical Discovery CURES Weak Lungs.

$3,000 FORFEIT

Will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N.Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"When I commenced taking your medicines, eighteen months ago, my health was completely broken down," writes Mrs. Cora L. Sunderland, of Chaneyville, Calvert Co., Md. "At times I could not even walk across the room without pains in my chest. *The doctor who attended me said I had lung trouble, and that I would never be well again.* At last I concluded to try Dr. Pierce's medicines. I bought a bottle of 'Golden Medical Discovery,' took it, and soon commenced to feel a little better, then you directed me to take both the 'Golden Medical Discovery' and the 'Favorite Prescription,' which I did. Altogether I have taken eighteen bottles of 'Golden Medical Discovery,' twelve of the 'Favorite Prescription,' and five vials of 'Pellets.' I am now almost entirely well, and do all my work without any pain whatever, and can run with more ease than I could formerly *walk*."

Dr. Pierce's Pleasant Pellets cleanse and regulate the bowels.

LONG AND BLOODY WAR IS NOW PREDICTED

Russia is Making All Her Plans on a Stupendous Scale

MANY HOSPITALS ARE TO BE LOCATED BY THEM

The Work of the Red Cross Society is Being Pushed Forward with Great Vigor

St. Petersburg, Feb. 24—The work of the Russian Red Cross society is being pushed with great vigor. The donations already exceed $5,000,000. Two or three Red Cross trains will be despatched to the Far East each week. M. Alexanderovsky, who starts next Monday to take charge of the Red Cross field work, probably will establish his headquarters at Harbin. The general plan is to locate general hospitals along the Amur at Kharbarovsk, Blagovestchensk, etc and transport the sick and wounded back to these points by the Sungari and Ussuri rivers and their tributaries, thus avoiding interference with the military traffic on the railroads

One feature of the Red Cross operations which has never before been introduced during a war will be the organization of small detachments to accompany the regiments into action. Each detachment will consist of two surgeons, four students, and four body carriers. First aid to the wounded will be applied on the battlefield.

Preparing for Long War.

Baron Korf, who was secretary to the St. Louis exposition commission, is now devoting his entire time to Red Cross work as chief of the personnel division. When explaining recently the extensive preparations of the society, Baron Korf said; "We are preparing for a long, hard war."

Almost all the private concerns here and at Moscow and other large cities which interdict sending exhibits to the St. Louis exposition have decided not to do so and are donating the moneys they would have expended in this work to the Red Cross society and other war purposes. Commissioner Alexanderovsky talked with the Czar on the subject of Russia's abandonment of her proposed participation in the exposition and his majesty agreed with the view of the commissioner that this be done.

M. Alexanderovsky smiled when he was informed of a printed report that Japan had applied for Russia's space at the exposition.

"Let them have it; we will compete with Japan elsewhere," he said.

Will Act on the Defensive.

The government's frank statement in its communique of this morning of Russia's unpreparedness owing to Japan's sudden precipitation of hostilities and warning the Russian public not to expect immediate victories, confirms the opinion which has existed here that Russia will act on the defensive until her army is fully mobilized and the equipment of the commissariat is in perfect working order. There are already 300,- men in the field, but this number will be largely augmented. About 50,000 men are required to guard the railroad.

No Confirmation of Battle Report.

No official announcement has yet been made regarding the report from Tokio of a second Japanese torpedo attack at Port Arthur. There are reports here, but they lack official confirmation, that an attack made on Port Arthur Feb. 16 was repulsed after heavy firing on both sides. According to the story this attack was intended as a feint to cover a landing at Talien-Wan bay, but it failed because the Russian guns were placed with great foresight to command that shore. A Russian expert says the Japanese evidently hoped the adjacent group of Eliot isles would cover this movement, as they did the same thing during the Chino-Japanese war, landing simultaneously at Talien-Wan and Kin-Chou, thus cutting off Port Arthur from each side of the Liao-Tung peninsula.

Ambassador McCormick has presented to the authorities here the case of the American ship Pleiades, reported detained at Port Arthur, but they do not know the circumstances of the occurrence and have referred the matter to Viceroy Alexieff.

BOARD OF WORKS REPORT

Street Watering this Year to be Paid for by a Special Rate on Real Property Benefited.

At Monday night's Council meeting Ald. Best submitted the following;

BOARD OF WORKS.

Gentlemen—Your Board of Works beg leave to report and recommend as follows—

1. That the Chairman be authorized to make arrangements with the Water Commissioners to have ten or fifteen additional stand pipes put in for street watering, the stand pipes to be placed under the direction of the Chairman and the Town Engineer. Also that the Chairman and Engineer be authorized to purchase two watering carts.

2. That the Council adopt the policy of paying for street watering this year by a special rate upon the real property benefitted thereby at a uniform rate as nearly as possible approaching the real cost,a and not a exceeding three-quarters of a mill on the dollar, this provision to apply to all streets watered last year, and that the Board of Works have power to add any additional parts of streets properly petitioned for before April first.

3. That the amount of $52.50 held back from S. Kennedy for inequalities in the sidewalk on the south side of Dublin street be paid to his assigns, the Peterborough Hardware Co., on that Company giving, in addition to the release from property holders already handed in, a bond to protect the Town in the matter to the extent of that amount.

This report was adopted as read.

COM. OF THE WHOLE.

Ald. Adams submitted the following;—

Gentlemen.—Your committee of the follows.—
Whole Council beg leave to report as

1. Your Committee recommend that the lot applied for by the Peterborough Lock Mnfg. Co. be sold to them at the price of $2,000 and that their assessment on this land be fixed at $10,000 for the period of ten years, on condition that they carry out the extension mentioned in their application and upon conditions similar to those imposed on the Cordage Co., to be fixed in detail by the Manufacturers' Committee.

2. Your Committee appointed a sub-committee, consisting of the Mayor, and Ald. Adams, McWilliams, and Johnston, to take into consideration the matter of hospital accommodation for infectious diseases and report.

3 Your Committee recommend that this Council contribute $48.00 to a fund being raised by the Union of Canadian Municipalities to carry on the work of the Union in protecting Municipalities from injurious legislation, and that the sum be paid to the Union when satisfactory assurance has been given that the cities of Montreal. Toronto. Hamilton, Ottawa and Winnipeg have agreed to make contributions to the fund in proportion to population, and the said sum to cover the membership fee of this Town in the Union, and that $15.00 be now remitted on account thereof. Also that $5.00 be paid to the Ontario Municipal Association for the membership fee of Peterborough in the Association.

4. That the Mayor, and Aldermen Adams and Best, be authorized to engage Mr. G. L. Hatch to audit the accounts of the Town and Ashburnham, provided they can make satisfactory arrangements with him.

5. Your Committee authorized the Solicitor to publish such notice as may be necessary to empower the Town to grant the application of the Peterborough Lock Mfg. Co.; such notice to be without prejudice to any action the Council may subsequently decide to take with regard to this matter.

All of which is respectfully submitted.

Ald. Adams said he did not agree with the first clause of the above report re the Peterborough Lock Manufacturing Co.'s assessment, and moved, seconded by Ald. McWilliams, that the report, excepting clause one, be adopted.

This was carried, and the report, as amended by striking out clause one, was then adopted

Subsequently the Lock. Mnfg. Co's question was again taken up, with the result as reported in yesterday's paper, that this Company will receive from the Town the free site of land asked for, and a fixed assessment of $12,000 for two years on conditions already made known

BRITAIN'S ARMY CHANGES

Lord Cromer Takes Exception to Lord Wolseley's View

London, Feb. 23—Lord Cromer takes exception to Lord Wolseley's condemnation of the practice of appointing a man who is not a soldier and who is entirely ignorant of war to be Secretary of State for War. This in itself is not of so much interest as the explanation which Lord Cromer gives in connection with his utterances about the matter concerning the manner in which he, acting in Egypt in place of the Secretary of War, managed to get along so well with Lord Kitchener during the latter's operations in the Soudan. Lord Cromer says, "I abstained from mischievious activity and I acted as a check on the interference of others. I had confidence in the abilities of the commander who I had myself chosen and except when he asked for my assistance, I left him alone." Lord Cromer, who for more than a quarter of a century ago was a soldier and staff officer, but has ever since done purely civilian work, declares that a civilian is preferable as Secretary of State for War, though he declines to go so far as to urge that soldiers should be ineligible for office.

War's Sacrifice

Consternation reigned in Fort Umptidumski.

One more shell hurled into the midst of the Japanese advance would save the post from capture.

But there was no more wadding for the cannon. All the paper in the fort had been fired away.

"Our situation is desperate" said the officers.

"We are lost," said the men.

"Never!" cried General Ichthwosau-usoskiummelovitch. "Here. Use one of my calling [illegible]

Marvelling at his so great sacrifice, they loaded the cannon and fired. The day was saved

EVERYBODY READS THE TIMES

REFUGEES FROM VLADIVOSTOK

Chinese Terror Stricken in the Russian City

Nagasaki, February 24—Two thousand refugees from Vladivostock arrived here on the steamer Stolberg, which also brought the crew of the Japanese steamer Nakoura Maru, which was sunk by the Russian cruisers near Hakodate, February 11. Two passengers were drowned. The fares of the crew were paid by the Russian Government. The men say that they were well treated at Vladivostock. Provisions in that city, they say, are scarce, and foreigners have been requested to leave. The Chinese in Vladivostock are terror stricken and are leaving in thousands.

INTERNAL TROUBLES

Polish Students Hold Anti-Russian Demonstrations

Special to The Times.

Berlin, February 24—Reports from Warsaw state that the Poles there believe that Germany cherishes designs on Russian Poland. It is stated in responsible Polish quarters that the German yoke would be welcomed Polish sentiment, as regards Russia, is divided between natural antagonism to the Government and a belief that victory over Japan would result in a reduction of the oppressive burdens of taxation.

Manufacturers deplore the war, which they expect to result in a long period of industrial and financial paralysis. The Russian population in the Warsaw district is mostly military and intensely enthusiastic. The school boys on parade cheer passing officers. There are frequent demonstrations in front of the French consulate. Anti-Japanese demonstrations at the British consulate have been frustrated by the police. The Polish students, however, have succeeded in holding several rousing anti-Russian demonstrations there.

JAPS MAY BE TRAPPED

Russia May be Planning a Surprise for Japs

Pekin, February 24—Advices from New Chwang, where a number of Admiral Alexieff's principal officers are quartered, represent the Russians as ridiculing the idea that the menace of the Japanese army is so great that the Czar's troops must fall back to Harbin to avoid a disastrous enveloping movement. It is said that the Russians are preparing to contest every foot of ground against any Japanese attempt to occupy Manchuria and that in due time they will drive the Mikado's soldiers out of Corea. It has been hinted that when Corea has been cleared the Russians will take fitting measures against those of the Corean officials who are now smoothing the way for the Japanese advance. Russia, according to the New Chwang coterie, is not yet vanished at sea, a fact events in the near future are likely to demonstrate. This intimation is regarded as indicating that the Russians are planning to lull the Japanese into a false sense of security and then to make a sudden attack on their transports.

From Seoul comes the report that the Mikado's infantry is in strong force in the mountains south of the Yalu and that the army in that section is daily augmented from adjacent landing points on the west coast of the Peninsula. It is said that the Japanese campaign in Manchuria awaits such disposition of the Mikado's forces south of the Yalu as will render Corea safe from Russian invasion

Vast Japanese flanking movements are expected to define themselves in Manchuria within the next few days.

TO CALL MEETING IN CITY SHORTLY

So Says Mr. S. De Zwirek of the Russian Revolutionary Bund

WILL DISCUSS THE WAR

States That a Good Defeat Would Greatly Benefit Russia and Stop Oppression

Montreal, Feb. 24—Mr. S. De Zwirek representing the Russian Revolutionary Bund, said in conversation with the press yesterday that he saw it frequently stated that the feeling against Russia was very bitter.

"Although I am an enemy of the Russian Government," he said, "the people are not to blame. They have no say in the matter. They are ignorant and when the soldiers are told to fight they do not half of them know who the Japs are, and why they are to be fought. I would like to see the defeat of my country because it would be to the advantage to Russia to be defeated in this conflict. If she wins, oppression will be stronger than ever. After the defeat of the Russians by the English in the Crimean war, Nicholas I. abolished slavery because he saw that the people were cowed and had no energy or pluck. They could never make themselves equal to the other civilized nations while they were so oppressed. But when Russia won the war with the Turks, oppression became stronger. The people are a good people, but they are ignorant, and the Ministers and those in authority stir them up to deeds of violence.

"I intend very shortly to call a large meeting in one of the biggest halls in the city to discuss the war, and show the public the good it will do the people of my country if they are defeated in the war with the Japanese."

EVERYBODY READS THE TIMES

JAPAN IS RUSHING AN ARMY INTO PING-YANG--TO GUARD AGAINST A SUDDEN RUSSIAN DESCENT

Japanese Follow the System Employed by the British in South South Africa--Original Scheme was to Land at Masampho But Recent Sncceses Enables Landing at Chemulpo

RUSSIA'S NAVAL ARM IS AMPUTATED.

New York, February 24—The correspondent of the New York Tribune in London cables;—"There are fresh rumors of a renewal of the assault on the Russian fleet at Port Arthur, but no authentic details are provided and such despatches as are printed from special correspondents are belated several days. The Japanese Admiral can complete the destruction of the main fleet at his leisure by means of his torpedo flotilla and can concentrate his forces against the Vladivostock squadron before the Russian reserve fleet can arrive. Russia's naval arm is already amputated and the ships lost cannot be replaced during the war nor the naval supremacy be regained. Naval experts assert that her fatal lack of readiness doomed Russia's defeat from the moment of the first surprise. Conditions of naval warfare have been revolutionized in the last ten days, and the torpedo arm has become the most formidable brance of the service, and supremacy in sea power depends on its efficiency rather than on the speed of armored or unarmored cruisers, or the tonnage armor and concentrated gun firing of battleships. Naval defence is impracticable. Initiative is everything, and a naval war is won or lost during the first week of the campaign. This is the frank confession of Admiralty officers whose construction of programme will be speedily altered and an enormous development of the torpedo service be provided for without any delay. A remarkable proof of the readiness of Japan has been the successful employment of the largest and most destructive torpedo charges with which experiments are now being conducted at torpedo stations in the English Channel and the land operations can only be vaguely conjectured from the special despatches of the London press, but correspondents agree that the morale of the Japanese army is perfect and the Russians are discouraged and the transportation service completely broken down.

A Despatch From Tokio Reports Another Battle

At Port Arthur, Which Says that Government Has Not Given Details

Special to THE TIMES.

Berlin, Feb. 23.—The Lokal Anzeiger today, in a despatch from Tokio, says;

"A fresh engagement took place at Port Arthur last night.

"The details have not been announced by the Government."

A PRESENTATION

Miss Lillico Receives a Watch and Chain—She Has Left for Cleveland

On Monday night the residence of Mr. James Lillico, North Monaghan, was a scene of a pleasing event, being a gathering of young people, the object being to present the popular young lady with a handsome watch and chain. Miss Lillico left yesterday for Cleveland. The following address was read on behalf of the young people, by Mr. Bert Sanderson;

Dear Miss Lillico,—It is with deep regret that we have learned that you are about to leave us, but while it is a cause for regret to us, it is also a cause of great satisfaction to know that you have chosen for yourself a noble and self-sacrificing profession. During the past your life has been a busy one indeed, in addition to the multitudinous home duties you always found time to take part in the various church activities in the community. Of your work as a Sunday school teacher we cannot speak too highly. For some time you have acted as superintendent of Elmdale Sunday school with marked success. Your many friends throughout the district esteem very highly your labor of love, and as you are now about to enter into a larger sphere of usefulness, for which you are eminently qualified, you will take with you the good wishes of all for your success in life. In token of the appreciation of your work and as an expression of gratitude for past services they ask you to accept this watch. That you may be spared to wear it, that you may be spared to a life of Christian usefulness, and that God's richest blessings may rest upon you is the sincere wish of your many friends. Signed on their behalf

BERT SANDERSON,
ORMOND ANDREWS,
JAS. B FOWLER

The Times, joins in sincerest wishes for Miss Lillico's future success.

THE TRENT VALLEY CANAL

Transportation Commission to Meet in Peterborough to Consider Question

Toronto Star; Mr. J. Alexr. Culverwell, who has been agitating for a meeting of the Transportation Commission at Peterborough to consider the Trent Valley Canal, has been notified that the commission will sit at Peterborough in about ten days, and go into the question which is of so much interest and importance to the people of that city and district.

LENTEN REGULATIONS

Rules to be Observed by the Faithful in Peterborough Diocese

On the Sunday preceding Ash Wednesday a circular was read by direction of his Lordship Bishop O-Connor, of Peterborough, in all the Roman Catholic churches in the diocese, directing the attention of the faithful to the following regulations for the Lenten season.

1—All days in Lent, Sundays excepted, are fasting days, on which only one full meal is allowed, with a morsel in the morning, and a collation or slight repast in the evening.

2—Those exempted from fasting are; All persons under 21, and those over 60 years of age; likewise the sick and infirm; women carrying or nursing infants, and all who are engaged in hard labor. They may take their usual number of meals every day in Lent.

3—The law of abstinence from flesh meat, which forms part of the penitential discipline of Lent, obliges all who are over seven years of age.

4—By virtue of powers granted us by Apostolic Indult, we permit the use of flesh meat at each meal on Sundays, and once a day on Mondays, Tuesdays, Thursdays and Saturdays, except the Saturday after the first Sunday of Lent and Holy Saturday.

5—Fish and flesh are not allowed at the same meal

6—The use of milk, butter, cheese and eggs is allowed on all days.

7—The use of dripping or lard is allowed in the preparation of food on all days except Good Friday.

8—All who are exempt from fasting should at least observe the abstinence from meat on the days prescribed, be more constant in prayer, give alms more abundantly, and attend to their religious duties with greater exactness, so as to live up for the spirit of penance and self denial that should mark the holy season of Lent.

Should any further relaxation of the fast or abstinence be required by particular persons, they may obtain it from their respective pastors, who are hereby authorized to grant it, provided true and sufficient cause be assigned.

Local Sports

The Young Men's Guild of Charlotte street church played a friendly match with the George street Guild's team on Monday evening, which resulted in a victory for the former, the score being 8 to 2.

E O Moffatt, of Cobourg Junior O.H.A. team, has been suspended by the association for playing under an assumed name in the Trent Valley League.

OVER SIX HUNDRED RUSSIAN SCOUTS ADVANCE.

Have Reached Sunchin and Others are Marching towards Gensan --Russian Delay

Tokio, Feb. 23.—A general advance along the Pekin road to Ping-Yang is expected shortly. The disembarkation methods of the Japanese excite great admiration. British officers state that they are an improvement on anything in their experience, and believe they demonstrate an organization superior to that of any European power, while the original base is close.

The correspondent says that the Japanese follow the system employed by the British in South Africa, giving receipts for supplies purchased by the army, and granting immediate payment. The troops are being billeted in Seoul. The purchase of all the available supplies is resulting in a great influx of money. This, combined with the admirable behaviour of the the troops is causing the disappearance of the animosity among the Coreans, who are not expected to interfere with the Japanese plans.

The original scheme was to land at Masampho and march north through Corea, but their naval success has enabled the Japanese to begin operations at Chemulpo. In spite of a complete change of plan and venue at two days' notice, the movements have been conducted with perfect precision, which is instructive.

St. Petersburg, Feb. 23.—The Novoe Vreyma says that it will be a long time before military operations on a large scale can be undertaken by Russia, on account of the extreme difficulty and enforced delays in concentrating troops, stores, etc., in the immense area, within which the army has not only to guard against attack, but also fight against a rigorous climate.

Cressman's "Counter Hoppers" accept the challenge of Grafton's "High Grades" to a game of hockey, the challengers to arrange for the rink.

The St. George's Senior O.H.A. team will play the Senior Peterboroughs tomorrow night. This will no doubt be a most interesting game

In the Stanley Cup match at Ottawa last night the Marlboros were defeated by a score of 6—3

In the first of the home and home games of the semi-finals at Cobourg, between Napanee and Cobourg, in the T.V.L., Napanee won by a score of 6—5.

PETERBOROUGH BONSPIEL

First of the Series Played Yesterday—Some Exciting Plays

The long-talked-of Peterborough Bonspiel began at the curling rink yesterday morning, and some of the events were unusually interesting. The following towns were represented; Uxbridge, Keene, Lindsay, Norwood, Campbellford, Bobcaygeon, Oshawa, Beaverton, Orillia, and, of course, Peterborough.

In the forenoon Peterborough Thistles beat Campbellford by a score of 17—11, Norwood lost to Granites by 14—15, Uxbridge won from Oshawa by 11—10, the Granites lost to Bobcaygeon by 14—18, Lindsay beat Norwood 16—15, and Granites beat Thistles by 14—7. The game between Uxbridge and Oshawa was one of unusual interest and caused great excitement.

WEDDING BELLS

Miss Nellie Tutty and Mr. Francis E. Deck United in Marriage

At nine o'clock last evening an exceedingly pretty wedding was celebrated at the residence of Mr. Albert Deck, 108 Victoria avenue, when Miss Nellie Tutty and Mr. Francis E. Deck were wedded, the ceremony being performed by Rev. Dr Torrance, who was ably assisted by Rev. J. A. Wilson, B.A. Mr. Wm. Elliott, of Dummer, assisted the groom, and Miss Clara Cunningham, town, was bridesmaid. Two sweet little nieces of the bride acted as flower girl and ring bearer, and the bride was given away by her uncle, Mr. G. A. Sweeney. The house was beautifully and elaborately decorated with roses and evergreens, and the dainty wedding breakfast was all that could be desired, the tables being liberally supplied with all the choicest viands of the season.

The bride received many costly and handsome presents, and the hearty congratulations she received from her friends and relatives is ample proof of the esteem in which she is held by them all. The happy couple will still remain among the best of Peterborough citizens, and will reside at 108 Victoria avenue.

WILEY THE CHAMPION

Wins in Wrestling Bout with Kennedy Last Night—Several Local Contests

Last night was an exciting one in sporting circles, and judging from the immense crowd that attended the boxing and wrestling contest at the opera house there are many athletic enthusiasts in Peterborough. Halpany's orchestra supplied excellent music throughout the evening, and Mr. J. Halpany's humorous recitations were loudly encored.

The first athletic event on the program was a wrestling contest between Jeffreys and Wallace, two city men, the best two out of three in six minute rounds declaring the victor. The first to fall was Wallace, but in 2 1-2 minutes he had Jeffreys on his back on the carpet. The next was a draw, and the decision was given to Jeffreys after a hard tussle.

Then came a fine exhibition of boxing between Jack Mason of Montreal, and "Hockey" Jones, of Hamilton, who was billed to box 12 rounds of 3 minutes each for the 133-lb. championship of Canada, and a purse of $100. The first round showed Mason very lively on his feet but "Hockey" played the defensive This course was continued all through, and "Hockey's" quick action in the third resulted in his opponent's showing signs of exhaustion. In the fifth round a heavy blow from "Hockey" landed Mason on the floor, and by the time referee Carter had counted the alloted 10, he was still unable to rise, his trainer having to escort him from the ring.

Belland and Wallace then engaged in a four round bout of two minutes each. The sympathy of the audience was against the event, as they were anxious to see Kelly perform as was advertised. No decision was given in this event.

The last and most interesting event was the wrestling bout between G. Kennedy, of Montreal, and Max Wiley, of Rochester, for the 135-lb championship of the world. Kennedy remained on the defensive from the start, and Max found considerable difficulty in turning him down, although from the first it was evident that he was a winner. The Montreal man was thrown twice, and referee Geo. Gauthier declared Wiley the champion. Max will accept the challenges of Hazlip, of Montreal, and Eugene Trombley, also of Montreal. He also challenged Referee Gauthier, agreeing to throw him three times in one hour. It is likely that Gauthier will accept.

An audience of about 500 people witnessed the various events, and the receipts, according to Secretary Rickey, will clear all expenses.

The Secretary of the P.A.C received the following communication from Eugene Trombley, of Montreal;

Montreal, February 20, 1904.

Mr. Rickey;

Dear Sir,—Please challenge the winner of the Wiley-Kennedy match for me.

Yours truly,
EUGENE TROMBLEY.

Local Option

A writer in the Toronto Junction Leader and Recorder says,—

"In less than three months the local option by-law will be in force in Toronto Junction, and the eyes of the Province will be on the great western town to see whether it will be enforced or permitted to become a mere dead letter. Every effort will be made by its enemies to render the by-law inoperative or ineffective, because it is recognized that if it be successfully enforced a wave of local option will be set in motion that will spread over the entire Province. It will thus be seen, as stated in these columns some time ago, that the real battle between local optionists and anti-local optionists is yet to be fought out to a finish. Both sides are preparing for the fray and nerving themselves for action. It has been stated—with what proof I know not—that the first move on the chess board will be the closing of the hotels and stables to the general public. Unless provision is made to meet this possible contingency, the antis will score heavily in the very first round. Local optionists, of course, are not likely to overlook this possibility, and the probability is that they will not be caught napping. One good house of accommodation, with driving rooms in connection therewith, will answer all purposes. This hotel—minus the usual bar-room supplies and appliances—should be a clean, cosy, comfortable place, where the traveller or citizen could get a good meal and a clean bed if desired. It should be an up-to-date building in every respect—homelike and inviting. Started on these lines, it would pay from the start.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBOROUGH, FEBRUARY 24, 1904

DEPRECATO PUBLICITY

Enlightened self-interest is a powerful force making for commercial morality and it is this force which is likely to compel publicity upon the part of trusts and other extensive corporations without the enactment of mandatory laws bearing upon the matter. That is to say, the corporations which can afford to invite scrutiny of their business will take the public into their confidence as the surest way of attracting investors and inspiring confidence. Corporations which refuse to accord such opportunities for investigation, will inevitably be set down as having unfavorable conditions to conceal. In the end there will be, as there has been, a sifting out of the unsound concerns. Those that remain will be as free and explicit with their financial statements as the United States treasury department is.

The events of the last three years have taught the public a lesson and they have likewise taught promoters a lesson. The investor no longer takes anyone's word that a proposition is a "good thing." The fact that and man or any set of men is back of a flotation no longer sets all doubts at rest. The burned child has acquired wisdom at the cost of burned fingers. The investor nowadays demands verified figures and he insists upon extended statements of operation, income and expenses at stated intervals. He wants to know what is going on and it is safe to assert that the "gutting" of the ship-building corporation would today be impossible because stockholders are keeping closer watch upon properties in which they are interested. They will go into the courts before a steal can be consummated instead of applying for relief after the mischief has been done.

Promoters are coming to realize the changed situation and it is noticeable that bids for public support are now made through detailed tabulations of assets and resources rather than be exaggerated estimates of profits. It is understood that the man with money to invest not only desires reasonable interest, but he also insists that his principal shall be secured by something tangible—something beyond "good will and "earning capacity." Moreover, he demands that the condition of his security be made known to him whenever he demands the information. His wishes are being complied with.

It is true that there are here and there men controlling great enterprises who still deny that the small stockholder has any right to information and who maintain that it is none of the public's business what a corporation is doing. Such men insist that corporations should not be required to do that which is not required of partnerships or individuals.

There is an obvious answer to such a contention. A corporation owes certain duties to the public because it holds its charter from the state. If the men composing a corporation desire to maintain secrecy respecting their transactions their plain and easy recourse is to surrender their charter and conduct business as individuals. They cannot enjoy the privileges of incorporation without assuming its responsibilities likewise.

It is significant, however, that the men who now maintain the right and the wisdom of corporate secrecy are few in number. The really big men in control of corporations frankly admit that the time has gone by when such organizations could afford to keep their affairs entirely to themselves. The president of one of the great railroad systems undoubtedly speaks for the majority of corporation managers when he declares that corporations which look to the public for support must come out into the open and take the public into their confidence. They must be prepared to explain frankly and satisfactorily all points in which actual or prospective investors are interested. "The corporation," he declares, "is bound to act honestly, fairly, and lawfully toward the public from which its privileges were secured."

With such opinions being more and more generally held among the directors of great enterprises no legislation compelling corporate publicity is likely to be required. Such enterprises will either deal openly and fairly with the public or they will fall of their own weight and weakness.

EDITORIAL COMMENT

Japan is going to take the space that has been reserved for Russia at the St. Louis World's fair. It looks as if the Japs were inclined to add insult to injury.

The complaint of the Russians that Japan violated international etiquette by fighting without a formal declaration of war, reminds one of the Englishman who saw a man drowning without going to his help, and when he was reproached for it said; "I was never introduced to the man."

The American Paper and Pulp Association, representing 800 mills, have decided not to employ any man who goes on a strike until the termination of the trouble and will in future require of new employes certificates from former employers. They have refused a request of the American Federation of Labor that the union label be used.

Much has been said about the great value of the torpedo-boat for harbor defence, but it is a singular fact that in the only two cases in which it has been successfully used it was used aggressively and for invasion. In both cases it was used by the Japanese in the Yellow Sea in attacks on Port Arthur. In both cases, too, the navy that was on the defence had torpedo boats, but for unknown reasons made no successful use of them.

TEACHER'S SALARIES

New Schedule of Salaries Proposed by H. P. Kennedy in a Notice of Motion on Monday Night

At the special meeting of the Board of Education, held in the Secretary's office, Monday night, Mr. H. P. Kennedy submitted the following notice of motion, which was carried,—

The chairman and members of Board of Education;

Gentlemen; I beg to move, as per notice of motion at our regular February meeting, that the following schedule be adopted to govern the salaries of our Public School teachers.

Lady teachers.—Minimum salary, $300 per annum; maximum salary for those holding second class certificates, $400 per annum, maximum salary for those holding first class professional certificates, $450 per annum.

Male teachers.—Head masters of ward schools and assistant male minimum, $600 per annum; and for those holding second class certificates maximum, $700 per annum; and for those holding first class professional certificates maximum, $750 per annum.

For the purpose of this schedule the Inspector shall three times a year, in December, April and June, furnish the Board with an official report on each teacher's efficiency, both in discipline and teaching ability, and in the June report the teacher shall be placed in one or other of the following grades;

I., Excellent; II., Good; III., Fair: for the direction of the Board in allotting the proper increase in salary which will be as follows;

Lady teachers.—Grade I., $33 1-3 per annum; Grade II. $20 per annum.

Male teachers.—Grade I, $50 per annum; Grade II., 30 per annum.

Grade III.—Any teacher, male or female, placed in this grade to receive no increase and will leave him or herself liable not to be re-engaged by the Board.

This schedule is to take effect Sept. 1st, 1904, and to govern any new teacher that may be appointed by the Board from date of the adoption of this report. In event of vacancies occurring on the staff teachers holding first class professional certificates to receive the preference, but in no case will any lower certificate be accepted than a second class professional. Any members of the staff holding second class certificates taking out non-professional firsts at any time to be entitled to obtain the maximum governing first class teachers.

Signed, H. P. KENNEDY.
Seconded, W. G. FERGUSON.

In support of of this motion Mr. Kennedy remarked; "I might say that I believe it is a step in the right direction. As a Board we represent the citizens of a city which stands seventh in the Province in population and while our Council have not seen fit to allow us to be incorporated, notwithstanding we have a population nearly 25 per cent. larger than Windsor; 40 per cent. larger than either Guelph, Stratford, St. Thomas or Belleville, and nearly 50 per cent. larger than either Chatham, St. Catharines or Woodstock, let the Board of Education not be held back as far as the progress of our schools is concerned to a level below many of our small towns which we find is the case at present, e.g.,—Methods of teaching and qualifications for teachers have changed considerably in the last quarter of a century and are in fact changing year by year. This is an age of progress and in order to keep pace with the times it is necessary to be on the alert and keep our teaching staff up to the highest possible standard. The great majority of our pupils take no higher education than is to be obtained in our public schools, hence the great necessity of having teachers for our public schools with the most modern training. Our teachers have been doing good work but have not been and are not receiving sufficient salaries for their services; then our city is rapidly gorwing and every year additional teachers are needed for our staff, for instance the staff is 25 per cent. larger than when the present schedule was adopted 10 years ago. It is essential therefore that we keep our standard high, and our schedule of salaries not only so that our teachers will have a mere living, but one in keeping with their profession and at the same time sufficient inducement for advancement. In conclusion I feel that as a Board we should be unanimous in adopting this motion and by so doing show we are anxious to treat our staff in a fair manner and give them every encouragement possible. A suggestion of one of our members, Mr. Hill, at a previous meeting, to have an extra teacher for supply work, so as to enable each member of the staff during the year to spend a few days in visiting other schools, thereby gaining new ideas etc., is certainly a good one and should be adopted by the Board at an early date."

Mr. Ferguson moved, seconded by Mr. McBain that the Board request that the Principal of the Collegiate Institute report on all assistants three times a year, and that arrangements be made for spare time for him to visit the different departments and report on the work done. —Carried.

The Board then adjourned.

This Weather Breeds Fever and Pneumonia

Thousands of Sick People are Seeking Admittance to Overcrowded Hospitals Take Warning and Keep Up Your Strength.

A tour of the hospitals in the large Canadian cities shows a surprising number suffering from different complaints brought on by the present unhealthy weather.

The winds are full of searching dampness and loaded with myriads of germs just waiting for a favorable opportunity to fly down your throat. If your vitality is low these germs are sure to break out in some malignant disease.

To avoid sickness you must keep up your strength. Increase your appetite. Get as much nourishment into the blood as possible. Store up a reserve of vigor.

How can it be done? Very easily with Ferrozone which revitalizes all the functions of the body, stimulates the formation of pure, rich blood, invigorates digestion and renews the endurance of the whole system.

You can ward of sickness and fight disease with Ferrozone because it is a food tonic that supplies building material for exhausted tissues. This assures firm, hard flesh, strong sinew and muscle—in short Ferrozone builds up your system to such a vigorous healthy state that sickness is almost impossible.

If you feel the need of a bracing tonic, something that will awaken your dormant energies and send a stream of strong healthy blood dancing through your veins. Try Ferrozone and see how quickly you will improve and gain in weight, health and spirits.

Mrs. P. C. Spencer, of Beverly, P. O., writes; "About a year ago I was greatly run down. I suffered from severe headaches and felt so completely worn out and distressed that I thought I must have walking typhoid. My appetite was poor and my color was pallid, indicating that my blood was too thin. I found Ferrozone just what I needed. It increased my appetite and made me stronger. The feeling of languidness disappeared. After using Ferrozone a few weeks I felt like a new woman. It made me as strong and healthy. No medicine did me so much good as Ferrozone."

Far better to take Ferrozone than let your health run down. Get it today. Look out for substitutes and insist on having nothing but Ferrozone. Price 50c per box or six boxes for $2.50, at all druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law,—the stock can't be moved or kept for another season.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. The company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.32 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

W. D. WALRATH.

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Japanese Have Seized Four Russian Torpedo Boats

SPECIAL TO THE TIMES

London, Feb. 23—The Nagasaki correspondent of the Daily Telegraph, under date of Feb. 22, reports that the Japanese squadron has captured four Russian torpedo boats at Port Arthur by means of using Russian signals. This despatch appears to confirm reports from various quarters of a fresh attack on Port Arthur by the Japanese.

St. Peterburg, Feb. 23—Heavy snow and blizzard over the Siberian Railroad, especially east of Baikal, is largely increasing the difficulties of transporting troops, besides enabling Chinese Brigands to operate Japanese agents are reported north of Vladivostok, inciting the Brigands to action.

Tien Tsin, Feb. 22—Yu Au Shika, the Commander-in-Chief of the Chinese forces, has sent an officer to Port Arthur as Chinese military attache with the Russian forces. It is said that the reason no Imperial troops started for the border is that Russia refuses to guarantee that the Leau River regions will be regarded as a neutral zone in the event of hostilities in that vicinity.

Yin Kow, Feb. 22—Viceroy Alexieff and his full staff have just arrived at Harbin, where headquarters have been established.

REPRESENTED IN FOREIGN CITIES

Canadian Manufacturers' Association Will Enlarge Its Work

WANT COMMERCIAL CHAIN

Care Required to Select Exactly Right Man in Each Case

Montreal, Feb. 23—The Canadian Manufacturers' Association are now completing arrangements whereby suitable trade representatives will be appointed to all foreign cities where a Canadian export business is likely to be done.

Canadian manufacturers have found themselves much hampered by not being suitably represented in the many foreign cities which are likely to prove trade centres for the Dominion. In the United States the Consular service, extending of course, to all foreign countries, look after such matters, and thus the American manufacturer has long enjoyed an advantage which Canada and even England does not receive, for the British consular representative is still a diplomat, and not a business man, such as the United States is accustomed to send out.

The consequence of all this is that the Canadian manufacturers now find it absolutely necessary to cover this field thoroughly, a work which many think should be done by the Department of Trade and Commerce, considering that the Dominion has no official representatives in the different foreign cities aside from the British diplomats.

Up to the present time the Canadian Manufacturers' Association have appointed [illegible] agents, or representatives, in a number of foreign centres, some fourteen or sixteen in all, and the work of filling in wherever necessary is now progressing.

At the present time many of the British centres, both in the Mother Country and in the Colonies, have capable representatives, and this may also be said of Berlin, Antwerp, and one or two other cities on the continent.

There are still many breaks in this commercial chain, however, and these the Canadian Manufacturers' Association are now endeavoring to repair. The banking houses in foreign centres are being communicated with and proper people looked up. This is a matter which is not so easy as it might appear at first sight, for the reason that in order to get the various lines of manufacturing ably and satisfactorily represented it is necessary to pick upon men who are disinterested, and who have no purpose to serve other than that in accord with the members of the Association.

As the Canadian manufacturers are not yet in the financial position of being able to call upon men to give their entire time to this work, they must necessarily depend upon business men in the several localities which it is desired to cover, and thus in many instances it is difficult to pick upon just the proper person.

Members of the Canadian Manufacturers' Association express themselves as not altogether satisfied with the manner in which British consular representatives are likely to deal with business matters, and they are of the opinion that some of these days the British manufacturers will awake to the fact that one of the chief reasons for American supremacy in many foreign centres is the realization that the United States consular service, to a very large degree is composed of business men who look upon their offices from a purely business standpoint, and who have no other thought than the furthering of their country's business interests.

It is expected that the business agents appointed by the Canadian Manufacturers' Association will report to the home office once each month, and these reports will be published in the trade journal, which the association prints, thus giving the Canadian manufacturers the latest possible information.

GRAND TRUNK PACIFIC

Two Notices Affecting the Scheme in the Canada Gazette

Ottawa, February 23—Two notices affecting the Grand Trunk Pacific Railway Company appear in the Canada Gazette today. One of them emanates from the directorate of the Grand Trunk and intimates that at the ordinary half yearly meeting of the company to be held in London on March 8, the agreement made July 29 last between the Government and Sir Charles Rivers-Wilson, Mr. Hays and others, together with a supplementary agreement, will be submitted for approval. At the same time a resolution will be presented to authorise the directors to give effect to the agreements so far as they relate to the Grand Trunk Railway Company of Canada and for that purpose to provide the necessary deposit, and give the guarantee required pursuant to the agreements in question.

The second notice declares that at the coming session of Parliament the G.T. Pacific Company will apply for amendments to the act of incorporation having reference to the powers of the directors to issue paid up stock defining the powers of the provisional directors and confirming the action of provisional directors in entering into an agreement with the company.

FRUITS OF KISHINEFF MASSACRE

London, Feb. 23—The Kishineff massacre continues to bear fruit of a character probably little expected by the Russian Government when its officials connived at the outrage and refused to punish its perpetrators as they deserved. First we hear of it as an insuperable obstacle in the way of the negotiation of a Russian loan from the Rothschilds. Now it inspires a movement among the Jews of America for the purchase a first-class battleship to be presented to Japan. If this plan should be carried out, and the ship so presented should bear a decisive part in some great naval engagement to the discomfiture of Russia perhaps that power may realize that there is "something in the Scriptural denunciations of those who persecute the "chosen people."

UNITED STATES FAVORS JAPAN

Could Not Afford to Let Russia Win

WOULD PREFER TO FIGHT

Britain and the American Republic are Shoulder to Shoulder

Washington, Feb. 23—The United States cannot afford to stand idly by and witness Japan's humiliation. Yesterday The Times representative had an interview with a prominent Senator, who stands close to the Cabinet, when the Senator expressed the opinion that the United States will remain neutral as long as Japan is more than holding her own. But should reverses come, this country and Great Britain would be obliged to maintain the integrity of the little empire. It is no exaggeration, whatever to say that Russia is fighting for more territory, with Corea in listening distance, with Japan a sort of stepping stone and with an insatiable appetite. After the fight will come the spoils. Concerning their distribution the great powers will have something to say, just as Russia and France and Germany interposed when the Japanese had brought the drowsy leviathan to its knees. Meanwhile, it is worth bearing in mind that Japanese policy long ago ceased to be one of exclusion. It is identical with that of England. It is also on all fours with that of the United States. Ignoring history, which recalls the name of Perry, and overlooking sentiment altogether—the sentiment which goes to the little instead of the big in times of conflict—Japan is fighting for what this country wants, and will have it if it can get it. And though by neither word nor deed is this country under any sort of obligation to afford encouragement to one side or the other, it is quite advisable that the people of the United States should realize that they have interests at stake, and that these interests will hardly be subserved should the Arbitrament of war ordain that Manchuria and Corea become an integral part of the dominions of the Czar and that Japan should be at his mercy. There would be but one sphere fo influence in China after that.

RUSSIA TALKS OF WAR

Declares Japan Violated International Law by Beginning Attacks Before Declaration

St. Petersburg, Feb. 21.—A Russian account of the events immediately preceding the rupture with Japan is published in the Official Messenger today, with the "object of rectifying certain statements from Japanese sources."

In this account it is stated that on receipt of the last Japanese proposals, Jan. 16, the Government immediately proceeded to examine the Japanese demands, and on Jan. 25 M. Kurino, the Japanese Minister, was informed, in reply to his inquiry, that the Czar had entrusted the proposals to a special conference, the members of which would meet Jan. 28, and that his Majesty's decision would probably not be given before Feb. 3.

On the last named date Emperor Nicholas ordered the preparation of a draft of definite instructions to Baron de Rosen, the Russian Minister to Japan, based on the deliberations of this conference. On Feb 3 identical telegrams were sent to Viceroy Alexieff and Baron de Rosen, containing the text of the draft of a proposed Russian agreement, with a full statement of reasons which prompted Russia to modify the Japanese proposals, and general instructions to Baron de Rosen concerning the presentation of the reply to the Japanese Government. Forty-eight hours before the receipt of the news of the rupture Foreign Minister Lamsdorf notified M. Kurino of the despatch of the Russian reply.

On Feb. 5 Viceroy Alexieff notified the Foreign Office of Baron de Rosen's receipt of the reply. On Feb. 6, at 4 p.m., M. Kurino quite unexpectedly handed to Count Lamsdorf two notes, notifying him of the rupture of negotiations and of the diplomatic relations, and stating that he, M. Kurino, and his staff would leave St. Petersburg Feb. 10.

These notes were accompanied by a private letter from M. Kurino to Count Lamsdorf, expressing the hope that the rupture of relations would be confined to the shortest possible time.

On the same day Viceroy Alexieff, Baron de Rosen, and all the Russian representatives at Pekin, Tokio, and the capitals of the great powers, were informed by urgent telegrams of the rupture of relations and of the issue of an Imperial order withdrawing the Russian Legation from Tokio, and laying on Japan the responsibility for all consequences ensuing.

The communication concludes; "Although the breaking off of diplomatic relations by no means implied the opening of hostilities, the Japanese Government as early as the night of Feb. 8 and during Feb 9 and Feb 10 committeed a whole series of revolting attacks on Russian warships and merchantmen, attended by violations of international law. The decree of the Emperor of Japan declaring war was not issued until Feb. 11."

YELLOW PERIL WHAT IT MEANS

Why Germany Favors Russi in War

RUSSIA'S LATEST BOGEY

Fear of Japan and China Greatly Exaggerated

London, Feb. 23.—Our Berlin despatches report that the sentiment in the ruling class in Germany is one of dread at what is called the "Yellow Peril," and the cause of Russia is favored in the belief that Russia can and will repress the aggression of the Asiatics under the lead of Japan.

For powerful and highly educated people, those of the ruling class of Germany who reason in this way seem strangely nervous, timid and short-sighted. It is, of course, quite impossible to know in advance exactly what would be the consequence of a complete triumph of Japan in the pending contest. It would not be strange, considering the teaching and the example of nearly all the civilized governments of the Occident—if a certain number of the leaders in Japan should aim at controlling the policy of China in the interest of their own country and to the detriment and even exclusion of other people. It is even conceivable that some of the Japanese nurse the dream of an invincible Oriental military force, made up of the easily disciplined and courageous Chinese millions, trained and led by the capable Japanese. Such a dream would be entirely consistent with the ill-concealed plans formed for their own advancement by Russians, and with others, less pronounced, discussed by Germans. It would be quite in the spirit of that partition of China which has in part already been accomplished by Europe and which is very freely advocated by European statesmen. But there is nothing in the past action or present avowed plans of Japan to justify the expectation of any such purpose on the part of her government, or any sentiment impelling to it on the part of her people.

The one effective check on and obstacle to such a scheme of aggrandizement and monopoly is free commerce, and for the utmost freedom of commerce Japan has stood openly, consistently.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.64 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50, This being a general sample taken from the dump. The other two assays are $62.64 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite, and by driving this tunnel five or six hundred feet ~~farther~~ it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,950 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air p into the 3rd—tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS;

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

REGARDED AS OMINOUS BY GREAT BRITAIN

Russia's Offer to France to Fight England is Bearing Fruit

THE BRITISH NATION ASTOUNDED AT RUSSIA

Open Sympathy for Japan is Now Being Shown--It May Mean a Big War

Special to The Times.

London Feb 23—The British nation is aroused over the disclosures made in Paris to the effect that Russia had asked France to join her in a war against England, at the time the Fashoda crisis was at its height. The publication of this at this junction is accounted as a reminder to France that what Russia offered to do then France would be willing to do now; but if the British navy is competent, as all Englishmen believe, to gain the sea mastery over a combination of France and Russia, and one other great Power, what can France hope to effect against Great Britain and Japan together with only the half of the shattered Russian navy to help her. France's intervention, bringing, as it must, England into the quarrel, would indeed place Russia in the gravest peril. England is prepared to fight now as she never was before. There remains Germany. Who knows what selfishness may lead her to do? Such a situation would open up grave possibilities even were a strong and united Ministry in command of British affairs.

Looking back over the week Englishmen find two events in the far East which are most ominous. One is the astounding proclamation from St. Petersburg, written to nobody in particular, addressed to everybody in general, which is meaningless unless it is designed to prepare the Russian public for a withdrawal from Manchuria. The next is, indeed, expected to be the retirement of the main army, leaving a garrison of 25,000 men at Port Arthur to take its chances of a Japanese investment, awaiting the time when Russia shall be prepared from the north to strike. In the words of the manifesto, "a blow worthy of her dignity and might."

It would be ungracious perhaps to turn the cold light of analysis upon the brief address of the Czar in reply to a deputation from the Council of the Empire presented to him on Friday. Yet when the ruler of this great empire says that he hopes 'Russia will, as heretofore in her history, emerge from her grievous trial with honor, and strengthened both at home and abroad,' his words give warrant for some enquiry into the ground of the hopes he entertains. A complete victory over Japan might strengthen the Government of the Czar at home and abroad in the sense that such a demonstration of power would command a heightened respect for the fighting resources of the empire. But morally and in respect to the esteem and confidence with which Russia is regarded by other Powers it would be strengthened only if the victory was won in a just cause.

It happend that the great civilized powers of the world are practically unanimous in the opinion that in this war right and justice are upon the side of Japan; that Russia is the real aggressor, that her policy in the Far East is one of selfishness and is pursued in disregard of the interestso f other nations in general and of the sensibilities and the safety of Japan in particular. For that reason it is quite impossible to imagine how Russia, whatever fortune may attend her armed venture, can emerge from this struggle strengthened abroad as well as at home. A nation that has given offense to other friendly nations by trenching upon their privileges certainly does not stand better with them.

JAPAN WILL MAKE NO IMMEDIATE NAVAL ATTACK

Finds Rnssia So Unprepared They May Take Plenty of Time to be Completely Ready

WILL NOT INNADE MANCHURIA FORTWO CR THREE MONTHS

Baron Hayashi Does Not Credit That 2,5000 Russians Have Been Killed in a Battle

London, Feb. 22—The latest advices of Baron Hayasia, the Japanese Minister to Great Britain, lead him to believe that the Japanese troops may not wait possibly two or three months before undertaking aggressive operations in Manchuria. He said;

"We have found that Russia is so unexpectedly unprepared that I should not be surprised if the Japanese land forces, contenting themselves with establishing a thorough organization and advancing as the construction of the railroad towards the Yalu River progresses. Russia appears to be less prepared than was China in 1895.

"I believe that only three trains a day can be run through Manchuria. Supposing these are equally divided between the troops and supplies, as would be necessary, Russia could not perceptibly strengthen her land forces before April. Japan's naval coup has been so unexpectedly successful that I rather think our troops will take their time.

New York, Feb. 22—A despatch from New Chwang to the World says it is reported that the Russian and Japanese outposts on the Yalu have been enaged, and that the Russians suffered considerable loss—about 2,500. No details are obtainable.

EFFECTS OF JAPENESE VICTORIES.

London, Feb. 23—It was confidently anticipated that Japanese victories would make a profound impression upon all Oriental peoples, who for one or two centuries past have found white men invincible in war. The anticipation is already realized. Despatches to the London Times show that in India as well as in China the Japanese successes thus far are causing great delight and are appealing powerfully to the native imagination. English papers in India even betray some uneasiness over the outlook in the peninsula, if Russia should go down to defeat. British imperialists nowhere wish to have the natives become 'cocky' and try to share the white man's burden. Some of them are beginning to think that, after all, it would be better if Japan did not win too much of a triumph.

EVERYBODY READS THE TIMES.

True Love.

An American lady has risen to defend the national dignity by asserting that her countrywomen do not marry European noblemen for their titles alone. It seems that the European is more skilled in the art of making love, and the title become only one of the many attractions that endear him to the wealthy heiress. There is probably a good deal to be said in favor of this point. In a land where a man's social status is almost entirely governed by his bank account, the universal grab for dollars occupies all the available leisure of the average Yankee, and he hasn't the time to waste on a mere girl who may refuse him after two or three months' courting, and a sacrifice of precious moments that might have been used in beating a brother man out of a quarter's salary.

Can it Be?

The two Russian belles are discussing their mutual friends.

"And there is Roslekoff Dimitriskewatchiskeboolikevitch," says the first girl. "I think she is such a sweet thing! And don't you think her name is beautiful?"

"Oh, yes," concedes the second. "But I have heard—now don't you whisper this to a soul—I have heard that her name isn't all her own."

"Mercy! What do you mean?"

"It is hinted that she wears an artificial skevitch."

Kind fates preserve us! If the ladies in other parts of the world begin amplifying their names as they do their hair we never shall know whether a lady is really possessed of the aristocratic cognomen engraved upon her cards or [illegible]

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non-interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure the gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a sack or more of sand, either ordinary boxes of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trantwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trantwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering; and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A THOMPSON, Investment Securities, New York City, 1st Vice President
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining expert claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000) About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 11, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPANY

corporated Under the Laws of the State o California.

Zacualpa Rubber Plantation is sit- ... in the best location in Mexico for cultivation of rubber. It has been ...wn for a great many years as a ...y choice strip of rubber land and ... experience has shown that it is ... to all that has been claimed for The affairs of the company are in hands of men of undoubted integrity high reputation as successful men ... To those seeking a safe in-...ment which will secure a good in-...e for life, this proposition offers a ...able opportunity

...ares in La Zacualpa Rubber Planta-... are not capital stock of a corpora-..., and carry none of the responsi-...ities and obligations, or liability to ...ment of capital stock; but repre-... an undivided interest in the planta-... itself.

...he twelve thousand acres comprising plantation are divided into twelve ...sand shares, each share represent-... one acre of land, and the holders ...shares in La Zacualpa Rubber Plan-... are the actual owners of one un-...ided acre of land, for each share held, ... a guarantee expressed upon the ...ificate by La Zacualpa Rubber Plan-... Company, under its official seal, ...plant two hundred or more rubber ... per acre for each share sold, and ...care for same for a period of five ..., and at the expiration of that time ...gather the first harvest and deliver ... net proceeds thereof to the share-...

... other words, La Zacualpa Rubber ... Company sells to each share-... one undivided acre of land in La ...ualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
13 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies.'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause—there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 250,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000,000 francs at least, lives in a patched-up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a [illegible]

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

CATARRH

RUINS HEALTH AND BEAUTY CAUSES THE WEAK TO DIE Y UNG INVARIABLY LEADS TO CONSUMPTION.

Thousands Annualy Cured by Catarrhozone

MR ARCHIBALD BASS, of New Harbor, writes: "Catarrhozone proved itself a remarkable remedy in my case. I suffered terribly from catarrh in the throat and my nose was so stuffed up every morning I could hardly draw my breath. The mucous dropped back into my stomach, upset my digestion and kept me sick all the time. Catarrhozone relieved in a short time and cured perfectly."

MRS. W F. BREACH, of Chapman, writes: "I have used a great many catarrh remedies but none of them ever helped like Catarrhozone. It cleared out my nose and throat and stopped a ringing noise in my ears. Catarrhozone is very pleasant and simple to use and many times better than any other catarrh remedy."

MR. LAWRENCE KENNEDY, of New West Annan, says: "For three years I tried doctors but my catarrh grew worse and worse. I got no relief till I used Catarrhozone. It was not very long in curing me so perfectly that the disease has never returned."

MR. JOSEPH De ROCHE, one of the most prominent and highly respected citizens of Loggieville, N.B, says: "I used Catarrhozone for a sore throat, cold in the head and head ache. I always felt relief immediately. It cured the discharge from my nose and restored my sense of smell lost through the effects of catarrh."

Catarrhozone is simple, convenient and pleasant. It is warranted to instantly relieve and permanently cure.

Complete outfit consists of a beautiful polished hard rubber inhaler and sufficient liquid for recharging to last two months. Costs $1.00 or sample size 25c. Sold by all druggists, or sent by mail to any address if price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford Conn., U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Cottage Wanted

Summer cottage, at Chemong Park, for rental for season. Would purchase, if satisfied, after occupancy. J. Alexr. Culverwell, Branch Office, 9 Toronto street, Toronto.

Ladies' Literary Association

Tomorrow evening the Ladies' Literary Association of St. Peter's T.A. S. will meet, and Miss Susie Kelly will read a paper on "Peace restored to the Church."

Fancy Skaters

Miss Fanny and Mr. John Davidson, two most popular fancy skaters, will appear at Brock street rink tomorrow night where they will give an exhibition. They come highly recommended, and it is expected a large audience will witness the event.

Lumber Camps Shut Down

The Rathbun Company's four camps in Haliburton County closed down last week, owing to the excessive depth of snow and very cold weather, which greatly retarded the work of cutting and hauling the logs. Two of the camps were located in Gooderham vicinity and two north of Wilberforce. As a result of the suspension of operations nearly a month earlier than usual, the cut will be much smaller than last year. Most of the men whose homes are at a distance came out Friday and Saturday. The horses have been left at the camps, where they can be fed more cheaply, than elsewhere, until they are needed for the drives in the spring.

—Prof. Lee Francis Lyburger, of the Neff College of Oratory, Philadelphia, will deliver his famous lecture on "Single Tax" in the Y.M.C. A. Hall, this evening.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE, Principal.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—A few more sets of ping-pong left. Will go at half price while they last. At the Times Bookstore

—Peterborough Cheese Board will hold its annual meeting on Saturday, 27th, at 2.30 p.m., in the Council chamber.

—Owing to the heavy fall of snow yesterday the snow brigade was again busily engaged clearing the walks.

—A Toronto paper is offering a silver mug to all babies born on Feb. 29. Wonder how many will be received in Peterborough.

—A grand carnival will be held in Peterborough on March 4th, under the auspices of the local lodge, C.O. F.

—On Monday evening Mr. J. J. Rae, of Oshawa, delivered a most interesting lecture, the subject being "Jack and Jill." Mr. Rae is an excellent speaker, and his talk was much appreciated by the large audience.

—The other morning the McClellan Coal Co., inserted an ad. in the popular Morning Times, and Mr. J. H. McClellan informs us that as a result of the advertisement, one man was kept busily engaged all day answering the telephone. It pays to advertise in The Times.

—In some communities we have noticed that boys and girls, and even young men and young women, congregate in public places, such as stores, post-office, etc., and become so boisterous and unruly that those in charge are frequently at their wits' end to know how to deal with them. No manly boy or womanly girl will be guilty of such unseemly conduct, and we regret the practice of so many young folks of this town, who seem to take special pleasure in lounging around the post-office corner. Although not to say noisy they might be termed a public nuisance, and steps should be taken to compel the mto "move on."

—Law ought to be straight, but it is about the crookedest thing on earth. A snake fence isn't a circumstance to it. It is so complicated that the men who make it the study of their lives are frequently in as bad a tangle as an ordinary layman would be. The interpretation of one legal gentleman will conflict with that of another, and even the judges themselves differ widely on many points. One case will result disastrously for one defendant but an exactly similar case will result in victory for another defendant. The learned judge will stretch the law one way before dinner, and the stretch it in the opposite direction after he has placed himself outside of a square meal. If the law were a perfectly simple and straight thing it would not be necessary to pay out big money to an eminent lawyer to make guilt look like innocence, as is so often done now. A good, honest, common-sense, ordinary lawyer would be all that would be required.

CENTRAL SCHOOL CLOSED

Owing to a Defective Boiler the Scholars Received a Holiday Yesterday

A defective boiler in the Central school resulted in the school being closed yesterday, and as a result about 400 scholars were allowed to go home. A new boiler will be purchased and in the meantime stoves will be placed in the building. This will require considerable time, and in the interim the boys and girls may enjoy themselves.

George Street League

The Social committee had charge of the meeting of the George street Epworth League on Monday evening, and great credit is due the energetic committee, to whom the success of the evening's entertainment was due. Miss Hazel Dentland's elocution was much appreciated, and Mr. James Brown's vocal selections were, as usual, well received. Misses Chasty and Ida Sanderson also ably performed. Refreshments were served at the conclusion of an exceedingly pleasant evening.

—The Carnival committee met last evening in Foresters' Hall and made final arrangements for the carnival to be held in the Brock street rink on Friday evening, March 4th.

SURPRISE YOU?

Paralysis Caused by Coffee Alone

Coffee alone frequently causes paralysis as a young woman of Mt. Vernon, Ill., proves:

A few years ago my mother suffered a severe attack of paralysis on the left side. She was for several weeks helpless and almost speechless. We did not know at that time exactly what caused the attack but we did know that she had always been a coffee drinker and, that after the attack, leaving off coffee entirely and using Postum instead she rapidly gained in flesh and general healthfulness and it was not long before all traces of paralysis passed away and she is again strong and healthy.

"There appears to be no doubt that this was a case of 'coffee paralysis,' cured by leaving off coffee and using Postum in its place.

"I was also a coffee drinker subject to headache and a general tired, worn out feeling most of the time until Postum came to my notice. Quitting the coffee and drinking Postum banished the troubles in a short time and now unless I return to coffee I never suffer the headaches and me general health is excellent.

"At first we didn't like Postum because we did not make it right, but now I make it just according to directions, boiling it full 15 minutes, and in this way it gives satisfaction always and is praised by everyone who tries it." Name given by Postum Co., Battle Creek, Mich.

Paralysis sometimes comes from deficient blood and lack of nervous force. Coffee directly attacks the heart and nerves. Taking away the cause (coffee) and putting the rebuilder (Postum) at work effects the cure.

Ten days trial of Postum in place of coffee works wonders in some cases and helps all.

Look in each pkg. for the famous little book, "The Road to Wellville."

OUR LETTER-BOX

NOTE—The Times does not hold itself in any way responsible for the opinions expressed by its correspondents.—Ed Times.

NIGHT DUTIES OF OUR POLICE.

Editor Morning Times:—

Dear Sir,—If there is one thing for which we ought to be more thankful than any other, it is the protection afforded us by our police men on night duty and the security we feel in consequence, whether asleep in our beds, or having occasion to be out late. This winter has been the severest ever known, and the necessary hardship of night duty has been correspondingly increased. It would be a graceful act on the part of our Council to voluntarily make a small additional grant to those who have been on night duty, owing to the unusual rigors of our climate. I am sure it would be appreciated by our faithful guardians and would meet with the approval of every respectable citizen.

Yours, &c,

EQUITY.

LOCK WORKS GRANT

Editor Morning Times:—

Dear Sir,—Don't you think our Town Council is travelling too fast when it votes a free grant of land, to the Lock Works, valued at $4,000, and reduces their taxation to a nominal sum for ten years to come? To be consistent, they will have to treat all those big concerns alike. In that event where will we find ourselves? Our assessment and taxation are already abnormally high as we know when the collector comes around but what will the burden be when all these drains are made upon us? The money comes out of the pockets of the private individual, and these big concerns get the benefit. Even our normal expenditure is to be increased. I see the school estimates this year are increased to $30,000, besides those of the separate school. With taxes and rent in the ascendant, it has become a problem with the poor man as to how he shall have an existence. The Council had better pause, and ask whither are we drifting.

TAXPAYER

Feb. 23, 1904.

SURVEY OF RIVER FRONT

Editor Morning Times:—

Dear Sir,—I see by this morning's issue of The Times that in your account of the special session of the Town Council last night, "Ald. Best submitted a petition to the Crown Lands Department, asking for authority to have a survey made of the river front, West side, from Wolfe street to Hunter street, said frontage being the Town's property. The petition was adopted."

I would like to ask Ald. Best and the other Aldermen who favored the project why they should stop at Wolfe street. Why not proceed further south with the survey along the bank of the river to its confluence with the creek at George street, where precisely the same conditions exist? Why should they discriminate in the interest of certain parties and to the detriment of others? What warrant have they for ignoring equal rights?

Yours &c.

JUSTICE.

World's Fair Arrangements

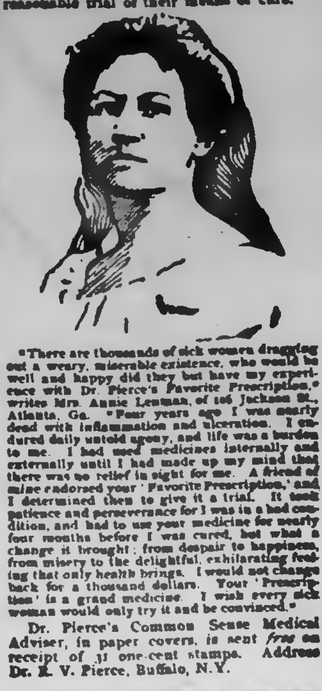
Mr. G. T. Bell, of the Grand Trunk Railway System, has returned from the American General Passenger and Ticket Agents' Special Convention at St. Louis, at which World's Fair arrangements and excursions were considered by the transportation lines of the country in a preliminary way, in conjunction with the St. Louis terminal railroads, and the Executive of the Exposition. This consultation will aid materially the various passenger traffic associations in dealing with the subject definitely and more in detail. It was recognized at St. Louis that the conditions would require each group of lines to act separately, and for this purpose the New England, Trunk Lines and Central Passenger Associations are meeting in New York this week.

At the Banquet tendered by the Business Men's League of St. Louis to the Visiting Officials, Mr. Bell spoke in behalf of the Canadian lines which were complimented by the World's Fair officials for the comparatively large amount of publicity already given, with the object of promoting the success of the Fair, upon which there has already been spent by the Exposition Company fifteen million dollars, aside from the millions being spent by each State and Territory, foreign countries, individual exhibitors and concessionnaires, which will bring the total up to fifty millions. Mr Bell's announcement that the Grand Trunk would operate during the Fair a double daily service between Canada's metropolis, Montreal, and St. Louis, passing through the leading cities of the Dominion, including Toronto, Hamilton, London, etc., was greeted with much satisfaction by the business men and officers of the Fair present at the banquet.

$500 REWARD FOR WOMEN

WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.



"There are thousands of sick women dragging out a weary, miserable existence, who would be well and happy did they but have my experience with Dr. Pierce's Favorite Prescription," writes Mrs. Annie Lenman, of 106 Jackson St., Atlanta, Ga. "Four years ago I was nearly dead with inflammation and ulceration. I endured daily untold agony, and life was a burden to me. I had used medicines internally and externally until I had made up my mind that there was no relief in sight for me. A friend of mine endorsed your 'Favorite Prescription,' and I determined then to give it a trial. It took patience and perseverance for I was in a bad condition, and had to use your medicine for nearly four months before I was cured, but what a change it brought: from despair to happiness, from misery to the delightful, exhilarating feeling that only health brings. I would not change back for a thousand dollars. Your 'Prescription' is a grand medicine. I wish every sick woman would only try it and be convinced."

Dr. Pierce's Common Sense Medical Adviser, in paper covers, is sent *free* on receipt of 31 one-cent stamps. Address Dr. R. V. Pierce, Buffalo, N.Y.

A BAD RAP FOR THE JAPANESE FLEET?

ater Despatches to the Morning Times From St. Petersburg Gives Additional News to the Effect That The Japense Met with Another Loss While Attempting to Reach Shore at Pigeon Bay--Two Cruisers and Two Transports were Sunk by the Russians in the Engagement--Heavy Firing Heard Near Port Arthur

THE JAPANESE DISASTER AT PIGEON GULF

Special to The Times.

Cheefoo, Feb. 24—The steamer Governeur Jaoschi, while passing Port Artur at 3 o'clock this morning, heard heavy firing in that direction. There is a persistent rumor abroad that several Japanese warships have been disabled, but so far it is unconfirmed. Another steamer passing Dalny about 3 a.m. reports that she heard no firing. Thirteen Japanese warships are said to have passed Wei-Hai-Wei today, heading east. There were sixteen ships in the original fleet.

Special to The Times.

St Petersburg, Feb. 24, 1 20 a.m.—The wildest rumors have been afloat here regarding the reported Japanese repulse at Port Arthur, but up to midnight nothing official could be learned. An official bulletin, however, is expected soon. It is reported unofficially that the Japanese, while attempting to land at Pigeon Bay, lost two cruisers and two transports.

ussians Cover Themselves with Glory--An Official Report Says Six Japanese Ships Have Been Sunk at Pt. Arthur

PANESE ALSO ATTEMPT TO LAND FORCES AT PIGEON BAY

h the Result That Two Cruisers and Two Transports were Lost--Fleet Seems To Gone Away East After They Were Driven Back By Russians

ial to THE TIMES.

Petersburg, Feb. 24—It is officially announced from Port Arthur that four Japanese battleships and two Japanese transports have been sunk in a fresh attack on Port Arthur. The attack was repulsed.

RUSSIANS COVERED WITH GLORY.

ial to THE TIMES.

, Feb. 24—A despatch to the Havas Agency from Port Arthur says that four Japanese cruisers and two Japanese transports have been sunk in a fresh attack on Port Arthur. The despatch adds that the attack was repulsed, and that the Russian battleship Retvizan covered herself with glory.

BEATEN FLEET RETIRES.

al to THE TIMES.

on, Feb. 24—The fleet which passed Wei-Hai-Wei today is supposed to have been Admiral Togo's fleet leaving Port Arthur.

JAPANESE DISCREDIT THE REPORT.

al to THE TIMES.

ington, Feb. 24—The Japanese Legation here discredit the reports of the sinking of four Japanese warships and two transports at Port Arthur. It is pointed out that both of the reports emanate from Russian sources, and should be accepted wiht caution. The Retvizan is understood to be unfit for battle for months, while the presence of transports at Port Arthur cannot be explained.

TELEGRAM TO THE CZAR FROM VICEROY ALEXIEFF

al to The Times.

etersburg, Feb. 25, 2 a.m.—A telegram from Viceroy Alexieff to the ar says; At about 2.45 a.m., Feb. 24, numerous Japanese torpedo ats attempted to attack the battleship Retvizan, and sink large eamers loaded with inflammables. The Retvizan was the first to serve the torpedo boats and opened a strong fire on them. She stroyed two steamers near the entrance of the harbor. They were ming directly toward her. One of them went on the rocks near the light house on Tiger Peninsula, and the other sank under Gold- Hill. The Retvizan observed the steamers in a sinking condition, and eight torpedo boats departing slowly to join the waiting Japanese warships. A portion of the crews of the Japanese vessels were owned. The grounded steamer was still burning. The enemy is served in the offing of Port Arthur in two lines.

al to The Times.

etersburg, Feb. 24.—Reports of a Russian victory at Port Arthur were current here yesterday, and about midnight they seemed to ave been definitely confirmed, but in the absence of an official announcement the stories of the dimensions of the victories were most nflicting.

.A.S. VS. CAMPBELLFORD

mer Won the First Game of the -Finals by a Score of 11 to 4

t 500 people saw the game Brock street rink last night, a r of these being Campbellford ters, who were augmented (in heers) by the Bobcaygeon curl- town for the bonspiel.

game will not be considered d when it is known that the ellford players were only , probably averaging 17 years, ar of the Campbellford team "Jack" Garvey, who is only rs old. The score at half time —0 in favor of the T.A.S., but second half the Campbellford gingered up and scored four ir opponents' six, making the at full time 11—4.

For the T.A.S. every man played an excellent game, and their forwards were too fast and their defence too strong for the visitors. It would be impossible to pick out any player for special mention, as all played their best. George, Lynch, McGrath, Parnell and Crowley did the scoring for the T.A.S., Crowley making some good rushes, and the T.A.S., judging from appearance last night, will be on top when the last game of the League is played.

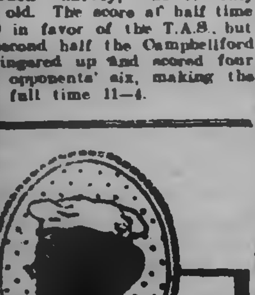
Campbellford, considering what they were up against, more than held their own, and the result of the game at Campbellford in the near future is doubtful, if Clute, who is the star of that team, but was handicapped by a sprained ankle as a result of the game with Stirling, has gotten into shape again. All the visitors played well, and a feature was the game scored by Tait on a lift from center. Clute scored the remaining three for Campbellford. In the second half Garvey was injured and McGrath went off with him for about five minutes until he had recovered.

The game was remarkably free from roughness, and both teams are to be complimented on this. The referee was strictly impartial, and kept the players well in hand.

The following was the line up:

Campbellford		T.A.S
	Goal	
Shaw		McCoy
	Point.	
Lowery		Meagher
	Cover Point	
Tait		Crowley
	Forwards	
Clute		Lynch
Garvey		Parnel
Patterson		George
Shannon		McGrath
	Goal Umpires	
R. Coll		F. Hurtubuise

Referee—McIntyre, Bobcaygeon.



The housewife who udges her baking powder by the food that omes from the oven, vill always use Cleveland's.
It never fails.

A Warning

Mariposa has a law suit on its hands in consequence of drifted roads. Messrs. Stewart and O'Connor, of Lindsay, acting for the widow of Joseph Found, of Mariposa, who was killed a couple of weeks ago by a load of grain upsetting, has entered an action for damages, the contention being that the pathmaster had neglected the road and that it was in a dangerous condition. The roads of the country are in bad shape, and frequently difficulties are allowed to accumulate through neglect. The season has been a most severe one, and Township authorities can hardly be held responsible for the incontrollable vagaries of the elements. It is however necessary that township authorities and pathmasters make all reasonable efforts to have the roads passable, and if such efforts are not made, then the question of neglect will enter, and when neglect can be proven, the consequences are serious.

THE PETERBOROUGH BONSPIEL

Some Exciting Games Played in the Final Yesterday

The Charlotte street curling rink was the scene of a lively gathering of curlers and on-lookers yesterday morning and afternoon, when the program for the second day of the great Bonspiel was carried out. The enthusiasm at times was marked and only an observer, who understood the game, could enjoy the excitement. A number of ladies were present in the evening and seemed to enjoy the different events as well as if they were among the players. The games were very close, and there were a number of ties. In the Primary from 1 to 4 o'clock Rutherford of the Peterborough Thistles won from Reid of Bobcaygeon by 1, the score being 12 to 11, and Flavelle of Lindsay defeated Walters of the same place by a score of 13 to 9. From 4 to 7 o'clock Walters of Lindsay played Reid of Bobcaygeon in the Consolation, the result being a score of 13 to 12 in favor of Lindsay. Commencing at 7.30 o'clock three more exciting games were played. In the final of the Primary Rutherford of the Thistles occupied the ice with Flavelle of Lindsay, and the score read 25 to 9 in favor of the latter. On Ice No. 1 in the Consolation, Ray of the Thistles played Walters of Lindsay, the score being 13 to 6 in favor of the latter. Another Consolation game was witnessed on Ice No. 2, between Giroux and Thompson of the local Granites, Giroux winning by a score of 14—11.

THIS MORNING'S GAMES.

The winner of the Giroux-Thompson game will play McMillan of Beaverton, on Ice No. 1 this morning, and Ray and Dr. Walters will play the winner of the above two events, in the final Consolation this morning.

Local Sports

Four rinks from Orillia will play in Peterborough, and four from the latter city will play in Orillia on Tuesday next, for the Neil-Sheppard Cup.

CHALLENGE.

February 24th, 1904.

Mr. Thos. Rutherford, Peterborough.

Dear Sir,—We, the undersigned young old men, challenge you to a game of curling, to be played at Peterborough rink, Saturday, 27th February.

Jas. Bogue, age 60, 1st stone.
Chas. Stapleton, age 65, 2nd stone.

Wm. Snowden, age 81, skip.

The St. Georges, of Toronto, will play the Peterborough Seniors this evening at the Brock street rink. It is quite probable that this will be the final senior game this season. The former team was to have played here a few nights ago, but some of their best players could not get away, but tonight their very best stick-handlers will be here. The local boys are confident of success, and there is every likelihood of their winning.

EVERYBODY READS THE TIMES

UNITED STATES TO SEND ARMY

President Roosevelt Eager to Take Part in War

SIX LARGE TRANSPORTS

Held at San Francisco Under Sailing Orders--Will Probably go in Numbers to Startle Europe

Washington, Feb. 25—The war preparations of the United States government are going forward so briskly that it is becoming obvious that the president expects to send both both troops and battleships to China on short notice. The six transports in San Francisco which have been held under sailing orders for nearly two months are ready to take on board men and munitions.

The transcontinental railroad systems have completed arrangements to transport a brigade across the continent in a week. They have the cars and locomotives all ready for this service. There have been extraordinary activity on all the navy yards. Very recently when two guns on the Iowa were ruined by explosions and the ship ordered to the Brooklyn navy yard for repairs the first purpose of the department was to replace the ruined guns with new ones.

Will Hurry Battle-Ship East

Orders were sent to Washington to construct new guns, but these were promptly countermanded and the commandant of the navy yard was commanded to take two guns from the battleship Indiana, which is laid up there, and place them on board the Iowa. When this has been done the Iowa will probably sail for China either by way of Suez or Cape Horn.

Admiral Evans, commander of the Asiatic squadron, who is under orders to take a fleet of fast cruisers into Chinese waters, is betraying his personal anxiety to become mixed up in Chinese affairs by sending dispatches to the department containing news of outbreaks of the native population at different points in China. He evidently expects to be ordered to land marines, but in this expectation will be disappointed. The policy of the administration will be to send regular troops to China and leave the marines to do duty on the Isthmus of Panama.

Troops Ready to go to China.

At the present time there are so many marines scattered along the line of the isthmian railway and encamped at Panama and Colon that there are scarcely enough left in active service to police battle-ships and cruisers. The president has no intention of reducing the force on the isthmus for several years—certainly not until he has received satisfactory assurances that Columbia does not contemplate an invasion of the isthmus. To take the marines away from the isthmus would involve sending troops there, and that, according to the president's view of the matter, is not to be thought of.

The troops will go to China, however, and probably in such numbers as will startle Europe. Just how soon they will start will depend upon circumstances, but in view of the continued uprisings of the Chinese against Europeans in different parts of the empire the sailing orders will not long be delayed.

May Recall Two Ambassadors.

A persistent rumor to the effect that Russia intends to recall Count Cassini, her ambassador at Washington, and that England will recall Sir Henry Mortimer Durand, her ambassador, is beginning to receive serious attention. It is said of Count Cassini that his recall will be due to the failure of his political friends in Russia to obtain the czar's favor. This is probably true in part only. The count failed very recently to acquaint himself with the details of Secretary Hay's purpose to ask the powers to join with the United States in guaranteeing the administrative entity of China, and to localize the war operations of Japan and Russia. Such omissions are regarded as serious by governments and not infrequently ministers and ambassadors who are guilty of them have to yield up their places.

BRITISH ARMY ON SEA

Fifteen Thousand Men Said to Be Crossing Atlantic

Hamilton, Ont., Feb. 25—A prominent Hamilton broker that represents Japan and India teahouses has received a private message from London to the effect that fourteen foot regiments and sixty batteries of artillery from the British army are now on the sea, bound for Canada. These are to be sent across the continent on the Canadian Pacific railway as soon as they arrive and will be placed at strategic points on the Pacific coast, particularly at Esquimalt.

In view of the fact that it was announced some time ago by the war office that the Esquimalt harbor was to be further garrisoned it is altogether likely that the information, in part at least, is true. Fourteen regiments and sixty batteries will mean 15,000 soldiers, and it seems impossible that this army could be sent off on transports without the press correspondents learning of the facts. However, it will soon be known if the report be true, as the transports should arrive at St. John's, the winter port, in less than three weeks.

ANOTHER RACE HORROR

Burned at Stake in His Father's Yard

Little Rock, Ark., Feb. 25—Glencoe Bays, a negro, hunted down by a mob was burned at the stake yesterday, near Crossett. He was charged with the murder of J. D. Stephens, of Ashley County. Bloodhounds readily took the scent, and traced the murderer to his father's house, where the negro was found hiding in a well. The murderer made a full confession. With hands and feet tied he was bound to a stake in his father's yard. Brush was piled around him and the torch applied, and the man slowly burned to death.

WIDOW OF A RUSSIAN PRINCE DIES IN POVERTY

Won Great Fame in Opera as Madame Petrelli

Chicago, February 24—The Inter-Ocean says today; —Mme. Eleonora, Petrelli, once a world-renowned opera singer, and widow of Prince Von Petroff, of Russia, died in an obscure hotel in Chicago, alone and in want, save for the charity of strangers. Daughter and heiress of one of the wealthiest counts of Scandinavia, this wonderful woman lived to see two great fortunes melt away and to have her title taken from her. Driven by necessity to sing for a livelihood, in the royal opera companies on the continent, the singer won her way upward in her profession until, at the Russian Court, in St. Petersburg, she became the wife of Prince Ivan Petroff, a royal nobleman.

Then began the series of misfortunes which eventually left her adrift as a poor teacher of music in Chicago at the age of 87 years. The singer had won fame under the name of Mme. Petrelli in three royal opera companies. Her father was the Count Wiegant of Sweden. Her mother was the Countess Von Schwerin. She was descended in a direct line from the Grand Duke Mecklenburg and the Rev. Dr. Count Von Schwerin, at one time the most noted man in Scandinavia.

THE KOOTENAY COUNTRY

C. P. R. Issues Booklet on the Kootenay Country

An important brochure has juts been issued by The Canadian Pacific Railway dealing with the Kootenay and Boundary Districts of British Columbia, a great deal of valuable information being imparted through this medium. Some of the well-authenticated instances of success achieved by those already settled read like romances. But the letters of the settlers themselves are given in full, the originals being kept at the head office of the company. No district of the West is better served by rail and water than this is, ample means for shipping produce being thus afforded. The general description of the district given in this booklet, together with the cases of success to which allusion has already been made, amply attest the fact that the Kootenay and Boundary districts afford splendid openings for mixed farming.

There are many openings throughout the whole of British Columbia for the establishment of new industries, and the rapid development of the country now taking place makes it certain that capital so invested will pay good returns. Among the openings which may specially be referred to are—Saw mills, box factories, meat packing plants, pulp mills, jam and pickle factories, woollen mills, fruit evaporating factories, tanning works, brick making plants, marble, lime and stone quarries and many others. In both the Kootenay and Boundary districts many magnificent water-power sites are available which have as yet not been utilized. There in strong inducements for capitalists to develop these powers and supply power to existing and future industries.

—About twelve o'clock last night the fire brigade was called out to extinguish a blaze at a house near Smith town hill.

SHIPPING WHEAT BACK TO KEWATIN

Milling Company Finds This Better Than Buying

SOME PECULIAR SITUATIONS

They Have Been Produced by Sudden and Abnormal Rise in Prices

Montreal, Feb. 25—The abnormally high price to which wheat has climbed within the past few days has produced come peculiar and interesting situations in the business world.

For instance, it was announced on the floor of the Board of Trade yesterday that the Lake of the Wood Milling Company were at present shipping wheat from Fort William back to their mills at Keewatin, there to be ground into flour and shipped on to its destination, either to the East or West, as required.

At the office of the Lake of the Woods Milling Company it was admitted that they were shipping back to Keewatin, from Fort William, a distance of five hundred miles, a considerable quantity of wheat for the use of their mills.

This wheat, it was explained, was purchased at Fort William at the close of navigation at prices, of course much lower than those now ruling. Very naturally therefore it is a good business investment to reship this wheat over the intervening five hundred miles rather than buy at anything like present prices.

The officials of the Lake of the Woods Milling Company stated that they were at present holding their wheat stored in the interior elevators, for the purpose of shipping it later on to the terminal elevators at Keewatin and Portage La Prairie.

This morning Manitoba wheat was quoted at $1.08 for May delivery.

VLADIVOSTOK IS NOW THREATENED

Russian City in Fear of Japan's Navy

THE FOOD IS VERY SCARCE

Russian Stronghold in a Bad Way, and May Suffer Seige

St. Petersburg, Feb. 25—Non-combatants who are reaching Harbin from Vladivostock report that the fortress town is under martial law. Food is scarce and high; business is suspended and the civilian element is leaving the city. Everybody fears a sudden attack by the Japanese. The fugitives states that the Vladivostock cruiser squadron returned to that port recently after a terrible experience in a snowstorm and gale. It is doubtful if it will venture to sea again until the weather has permanently improved.

Major-General Voronetz, the Commandant of Cladivostock, is said to be a tireless, magnetic man, who commands the full confidence of the fighting force at his disposal. Strong detachments of troops are reported to have left Vladivostock presumably in the direction of the Yuman River. A blinding snowstorm raged all last week both on sea and land.

Further evidence is at hand that the Chinese National or Pan-Mongolian party is organizing a formidable campaign against the Russians, dependent mainly in the expected defeat of the Muscovites in the coming military struggle.

The Khunhuz, the daring organized robber bands from Mongolia, are daily harassing and often attacking and beating the Cossack Railway guards. The marauders, it is alleged, are equipped with arms which prove their indebtedness to the Japanese. The Russian authorities are in fear of and are preparing to cope with a possible uprising of the Manchurian population, due to the stimulus of the Khunhuz.

At home the authorities are equally troubled. The expectation that the war would at least temporarily arrest the revolutionary movement, has been disappointed, thanks chiefly to Von Plehve's confirmed tendency to despotism. His order abolishing the Provincial Council and sending executives to the provinces from St. Petersburg is considered as flagrant abuse of power. Both the nobility and the people of the provinces are displaying the most disquieting symptoms of a determination to hold the Government strictly to account for its sins against the nation, regardless of the threatening disaster in the Far East.

TURKS MAY HAVE DIFFICULT TASK

Nations May Stand By and See Big War

BULGARIA AND TURKEY

Russia, Austria and Germany Have Agreed Not to Interfere

Berlin, Feb. 24—According to information received by a correspondent yesterday from an excellently informed quarter, Russia, Austria and Germany have agreed on a policy of non-interference should Turkey attack Bulgaria. They have further agreed not to consider such hostilities as war, but a justifiable suppression of rebellion on the part of Turkey, as Bulgaria's suzerain.

It is understood that Turkey will not be allowed to seize any Bulgarian territories, but after the Bulgarians have been punished, Austria will be intrusted with the policing of Macedonia in the same manner as the Berlin Congress gave it administrative power over Bosnia and Herzegovina.

Emperor William is quoted as saying on a recent occasion, "Why does not Turkey wade in and give the Bulgarians a sound thrashing." This statement, which supposes that Turkey has the right to chastise its rebellious vassals, nearly represents the official complacency with which Russia, Austria and Germany await hostilities in the Balkans.

—Peterborough newspaper men are planning a dinner for Friday evening, March 4th, and propose the formation of a Press Association. It's a good idea, boys,—hope you'll include Lindsay.—Lindsay Post.

WILL WAR REACH CANADA'S COAST?

British Government Has Sent Some Big Guns

DUNDONALD STAYS HERE

So That He May Be on Hand in the Event of Trouble on the Pacific

Ottawa, Feb. 25—According to an official report received here, the fortifications at Esquimalt, B.C., have been greatly strengthened. Large 9.2 guns, weighing with their equipment 30 tons each, arrived lately from England, and were placed in position at top of Signal Hill, which commands the whole harbor. These guns are said to throw a 380-pound projectile 5 miles, and with an elevation of 15 feet they have a range which exceeds seven miles. The guns are said to have cost $25,000 each. The muzzle velocity is 2,347 feet per second, and 18 inches of wrought iron at a range of 3,000 yards can be penetrated.

Another work to improve the Esquimalt defences is now approaching completion. It is the installation of a battery of quick-firing guns at the navy yard, and covering the entrance to Esquimalt Harbor, where extensive mines have been laid. It is reported that the work of constructing the fort on the high bluff overlooking "Royal Roads," (as the approach to the harbor is called), which was planned some years ago by the Royal Engineers, is soon to be commenced. Recently additional ground was purchased by the Imperial authorities, and plans have been prepared for large and modern magazines in a sheltered and concealed location, separate from the other buildings.

It is understood that the reason Lord Dundonald will not leave for England at present is because he desires to be on hand in the event of Great Britain becoming involved in the hostilities in the Far East. In such an event naturally Canada would have to be in a state of preparedness, especially on the Pacific coast.

WEIGHS 600 POUNDS

King Edward's Biggest Subject Has Passed Away

London, Feb. 25—The heaviest man in the British Empire died yesterday at Dover, from cancer. This was Thomas Longley, a giant who had earned the reputation of being His Majesty's biggest subject. Longley weighed over 600 pounds, was six feet one inch in height and had a chest measurement of seventy inches.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free —Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realises that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, FEBRUARY 25, 1904

WILL THE WAR SPREAD

There may be no real occasion to fear the fulfillment of the prophecy so often made that a war between Russia and Japan would involve other great powers and eventuate in a general European war, but the most recent news from several European capitals is of a disquieting nature. In the lulls of the conflict can be heard the menacing growls of other dogs of war, now held in restraint by the chains of neutrality.

Despite her declaration of neutrality, Great Britain is taking advantage of Russia's present predicament to display her true feelings toward Russia, which are far from friendly. British sentiment is dictated by British interests and the interests of Great Britain in Asia are wholly antagonistic to further Russian aggression in that quarter. The ultimate victory of Russia over Japan in the present war would be an absolute disaster to British influence and British trade in China, hence it is not surprising that the British government is taking measures to forestall this probability even at the risk of abandoning a strictly neutral position.

The parliamentary paper in which Lord Lansdowne, the foreign minister, refers to Russia's broken pledge to evacuate Manchuria and declares that England is looking for some concrete evidence of Russia's intention to fulfill her promises is calculated to strain the tension between the two countries to the danger point. Such a paper was the natural sequence of the United States' note to the powers in behalf of the neutralization of China, without which it might have been difficult for Great Britain to raise the question at this time and not appear arbitrary.

Whatever may be the result, Lord Lansdowne's plain intimation to Russia that she is not to be allowed to retain Manchuria is, of course, for the future to determine, but that they are calculated to harass Russia and weaken her prestige is plainly evident. The tenor of all the dispatches from European capitals indicate that Russia has no real friends in Europe. No European nation is bound to her by ties of race, religion or self-interests, not even her anomalous ally, France. That mesalliance between a republic and a despotic autocracy, directed though it was presumably against Germany and as a result of conditions largely imaginary on the part of France, always has been obnoxious to the French people and has been regarded with levity by the Russians.

The traditions, instincts and history of the French people are hostile to every idea represented by the Russian government, and although the socialists have taken the lead in demanding that the government shall sever the so-called alliance, it does not lessen the fact that the sentiment is a popular one with a large element of the French people, who no longer expect or hope for another conflict with Germany.

While it would be rash to predict the outcome of these manifestations of unfriendliness to Russia, the news from foreign capitals is not reassuring as to the peace of Europe.

TURKEY AND BULGARIA

The Bulgarian sobranje in secret session recently passed an extraordinary military budget of 25,000,000 francs by a unanimous vote of both ministerialists and opposition. The premier is said to have assured his hearers that war was clearly in sight and, indeed, it seems certain, considering the thorough-going hatred of the two political parties for each other, that no lesser argument would have produced unanimity. We now learn that Turkey has addressed a note to the European powers making complaints against Bulgaria of such a character that it is regarded as a practical notification of an intention to make war upon Bulgaria in the immediate future.

Unfortunately, there is only too much reason to fear that Turkey actually means to take the aggressive. Abdul Hamid has shown clearly that his policy was to balk the Austro-Russian reform policy for Macedonia at every point, and now he probably thinks that it is to his best interest to start a war while Russia is occupied in the Far East, in the hope that all the European powers will fly at each others' throats before it is over and that through their enmities and jealousies he can secure personal profit.

Last year Bulgarian sympathies were strong for the Macedonians, and Bulgaria was to all appearances eching for a chance to fight in their cause, despite the fact that her own army was woefully deficient in clothing and ammunition. Now, however, Bulgaria has 200,000 men ready to take up arms, and she has done everything in her power to provide the proper equipment for them. In the opinion of military experts 60,000 Bulgarians would be fully enough to hold the mountain passes successfully against the Turks and prevent an invasion. A Bulgarian army of three times that number of men can hardly be regarded otherwise than as an evidence that Bulgaria means to take the offensive in the event of war and give Turkey a full measure of fighting.

It will take most vigorous co-operation on the part of the great powers of Europe to prevent a war in the Balkans, for even if Bulgaria and Turkey can be induced to keep the peace the Macedonian committee, which has proclaimed a renewal of its uprising for this spring, must still be reckoned with.

Important Time in Every Girl's Life

Is Between Fifteen and Eighteen Years of Age—How to Avoid the Dangers that Arise During this Period.

The mental activity of school life coupled with the terrible strain that must come during these years, taxes the vitality of even the strongest. A girl at this age often does not understand the physical change she is undergoing. She will in all probability be nervous and puzzled. She should have the benefit of good motherly advice and a long treatment of Ferrozone, which will supply new energy to bear her safely past the critical event. Ferrozone is the best remedy to take in early womanhood, because it contains so much nerve and blood nourishment. It corrects all derangements, cures bearing-down pains, nervousness, and prevents headaches. Ferrozone revitalizes young girls, gives them vim bouyancy, strong nerves and healthy body. Every girl should use Ferrozone, and wise mothers will see that their daughters have the benefit of this health-giving tonic.

Mrs. W. E. Michel, of Richmond, writes:—"I can strongly recommend Ferrozone as a good tonic for young ladies. My daughter has been taking Ferrozone for the past six months and it has worked wonders for her. Before using Ferrozone she was anaemic and nervous and had no strength. But Ferrozone has built up her whole constitution and given her strength and vitality. Of all the tonics I ever used I don't think one of them compares with Ferrozone. It certainly brings health and strength to young girls more quickly."

There is no remedy half so effective as Ferrozone. A trial soon demonstrates its merit. Get Ferrozone from your druggist to-day and let it build you up. Beware of fraudulent substitutes and insist on having only Ferrozone. Price 50 cents a box, or six boxes for $2.50. by mail from the Ferrozone Company, Kingston, Ont.

World's Fair Arrangements

Mr. G. T. Bell, of the Grand Trunk Railway System, has returned from the American General Passenger and Ticket Agents' Special Convention at St. Louis, at which World's Fair arrangements and excursions were considered by the transportation lines of the country in a preliminary way, in conjunction with the St. Louis terminal railroads, and the Executive of the Exposition. This consultation will aid materially the various passenger traffic associations in dealing with the subject definitely and more in detail. It was recognized at St. Louis that the conditions would require each group of lines to act separately, and for this purpose the New England, Trunk Line are meeting in New York this week.

At the Banquet tendered by the Business Men's League of St. Louis to the Visiting Officials, Mr. Bell spoke in behalf of the Canadian lines which were complimented by the and Central Passenger Associations World's Fair officials for the comparatively large amount of publicity already given, with the object of promoting the success of the Fair, upon which there has already been spent by the Exposition Company fifteen million dollars, aside from the millions being spent by each State and Territory, foreign countries, individual exhibitors and concessionnires, which will bring the total up to fifty millions. Mr. Bell's announcement that the Grand Trunk would operate during the Fair a double daily service between Canada's metropolis, Montreal, and St. Louis, passing through the leading cities of the Dominion, including Toronto, Hamilton, London, etc., was greeted with much satisfaction by the business men and officers of the Fair present at the banquet.

THE MUSKOKA BOY CALLS IT MURDER

A HUNTER HIMSELF HE PROTESTS AGAINST STILL HUNTING OF DEER

Woodstock, Feb. 23 — The Express has the following letter from "The Muskoka Boy":

Dear Sir,—If you would permit me I would like to say a few words through your paper to those who profess to be deer hunters. When I say hunters I don't include game hogs, but true lovers of sport who hunt for sport and not for profit. In my opinion still hunting, whether of deer or birds, falls little short of murder. Thousands of deer are wounded by still hunting and linger for days or weeks until death ends their misery. Deer should be put on the alert as we put up birds. You would scorn to prowl through the woods and shoot a grouse on a limb or a woodcock on the ground. You want your pointer to give those feathered friends a chance for life, and to find for you those you wound or kill.

I am opposed to the killing of does at any time or by any method. No man enjoys hunting better than I do. The last deer I killed I still-hunted. I found him after a long and tedious stalk quietly feeding on the margin of a stream. There he stood without a suspicion of danger, and without a chance for his life. Even as I fired, I was ashamed of myself, and when his brief struggle was over, I would have given my rifle to bring the poor animal back to life. I vowed I would never kill another in the same way. That was two years ago. I have kept my word since then, although I have shot some ahead of my dog. What is the difference between that kind of murder and killing a deer at a salt lick? What is the difference whether the deer is feeding on salt or on lily buds? You will say that salt is put out to entice deer to a certain spot. I grant it, but how about the man who knows where the lily pads are, and when the deer are likely to feed on them? Wherein is he better than the man who kills deer at a salt lick? The man goes where he is likely to find deer, and the deer goes where he is likely to find food. Between them, still hunting become the easiest and most certain method of deer killing.

HAVE LONGER SEASONS.

I know whereof I speak. I have lived the most part of my life in the wilds of Ontario. There are deer on my place; I frequently see them in my field. I often hunt them in my own woods in the open season. My plan to maintain the supply of deer in Muskoka would be to forbid the killing of does at any time. Make the open season on bucks September 1st, and permit hunting with dogs. If the season was long, there would be only a few hunters at a time in the woods, thus giving the deer more chance to escape. Some hunters will ask, "How can we know whether we are shooting at a buck or a doe when we can only see a small part of the animal through the bush?" How can these men know whether they are shooting a fawn or even a man? Cases of accidents were rare in hounding days; now they are common. If a man cannot see a deer plainly enough to distinguish whether it has horns or not he has no right to shoot. Stop all this pot hunting—I mean stop watching at salt licks, and crust hunting. Then give the hunter his dogs, and a chance to kill a buck and get it. Now nearly every man and boy in the community is a still hunter and guide. Anyone can learn a small section of the forest, build a bark camp, buy a cheap rifle and boat, and call himself a guide. All manage to kill a deer, and all use every device known to the Indian and the pot hunter. Unless a change is made, especially in the line of protection of does, the deer of Muskoka will within the next ten years follow the buffalo game of the western plains.

PULLING UP STAKES IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10, for $6.98, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law,—the stock can't be moved or kept for another season.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30.33 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.33 to $13,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

ROBERT HARRISON
Manager,

LONG AND BLOODY WAR IS NOW PREDICTED

Russia is Making All Her Plans on a Stupendous Scale

MANY HOSPITALS ARE TO BE LOCATED BY THEM

The Work of the Red Cross Society is Being Pushed Forward with Great Vigor

St. Petersburg, Feb. 24—The work of the Russian Red Cross society is being pushed with great vigor. The donations already exceed $5,000,000. Two or three Red Cross trains will be despatched to the Far East each week. M. Alexanderovsky, who starts next Monday to take charge of the Red Cross field work, probably will establish his headquarters at Harbin. The general plan is to locate general hospitals along the Amur at Kharbarovsk, Blagovestchensk, etc and transport the sick and wounded back to these points by the Sungari and Ussuri rivers and their tributaries, thus avoiding interference with the military traffic on the railroads.

One feature of the Red Cross operations which has never before been introduced during a war will be the organization of small detachments to accompany the regiments into action. Each detachment will consist of two surgeons, four students, and four body carriers. First aid to the wounded will be applied on the battlefield.

Preparing for Long War!

Baron Korf, who was secretary to the St. Louis exposition commission, is now devoting his entire time to Red Cross work as chief of the personnel division. When explaining recently the extensive preparations of the society, Baron Korf said: "We are preparing for a long, hard war."

Almost all the private concerns here and at Moscow and other large cities which intended sending exhibits to the St. Louis exposition have decided not to do so and are donating the moneys they would have expended in this work to the Red Cross society and other war purposes. Commissioner Alexanderovsky talked with the Czar on the subject of Russia's abandonment of her proposed participation in the exposition and his majesty agreed with the view of the commissioner that this be done.

M. Alexanderovsky smiled when he was informed of a printed report that Japan had applied for Russia's space at the exposition.

"Let them have it, we will compete with Japan elsewhere," he said.

Will Act on the Defensive.

The government's frank statement in its communique of this morning of Russia's unpreparedness owing to Japan's sudden precipitation of hostilities and warning the Russian public not to expect immediate victories, confirms the opinion which has existed here that Russia will act on the defensive until her army is fully mobilized and the equipment of the commissariat is in perfect working order. There are already 300,- men in the field, but this number will be largely augmented. About 50,000 men are required to guard the railroad.

No Confirmation of Battle Report.

No official announcement has yet been made regarding the report from Tokio of a second Japanese torpedo attack at Port Arthur. There are reports here, but they lack official confirmation, that an attack made on Port Arthur Feb 16 was repulsed after heavy firing on both sides. According to the story this attack was intended as a feint to cover a landing at Talien-Wan bay, but it failed because the Russian guns were placed with great foresight to command that shore. A Russian expert says the Japanese evidently hoped the adjacent group of Elliot isles would cover this movement, as they did the same thing during the Chino-Japanese war, landing simultaneously at Talien-Wan and Kin-Chou, thus cutting off Port Arthur from each side of the Liao-Tung peninsula.

Ambassador McCormick has presented to the authorities here the case of the American ship Pleiades, reported detained at Port Arthur, but they do not know the circumstances of the occurrence and have referred the matter to Viceroy Alexieff

LIPTON'S

"Known quality" and "known economy" are the reasons for their popularity. No other teas in the world have such a sale as

LIPTON'S TEAS

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

The Oregon Mining & Smelting Co.,

JAPS MAY BE TRAPPED

Russia May be Planning a Surprise for Japs

Pekin, February 24—Advices from New Chwang, where a number of Admiral Alexieff's principal officers are quartered, represent the Russians as ridiculing the idea that the menace of the Japanese army is so great that the Czar's troops must fall back to Harbin to avoid a disastrous enveloping movement. It is said that the Russians are preparing to contest every foot of ground against any Japanese attempt to occupy Manchuria and that in due time they will drive the Mikado's soldiers out of Corea. It has been hinted that when Corea has been cleared the Russians will take fitting measures against those of the Corean officials who are now smoothing the way for the Japanese advance. Russia, according to the New Chwang coterie, is not yet vanished at sea, a fact events in the near future are likely to demonstrate. This intimation is regarded as indicating that the Russians are planning to lull the Japanese into a false sense of security and then to make a sudden attack on their transports.

From Seoul comes the report that the Mikado's infantry is in strong force in the mountains south of the Yalu and that the army in that section is daily augmented from adjacent landing points on the west coast of the Peninsula. It is said that the Japanese campaign in Manchuria awaits such disposition of the Mikado's forces south of the Yalu as will render Corea safe from Russian invasion.

Vast Japanese flanking movements are expected to define themselves in Manchuria within the next few days.

TO CALL MEETING IN CITY SHORTLY

So Says Mr. S. De Zwirck of the Russian Revolutionary Bund

WILL DISCUSS THE WAR

States That a Good Defeat Would Greatly Benefit Russia and Stop Oppression

Montreal, Feb. 24—Mr. S. De Zwirek representing the Russian Revolutionary Bund, said in conversation with the press yesterday that he saw it frequently stated that the feeling against Russia was very bitter.

"Although I am an enemy of the Russian Government," he said, "the people are not to blame. They have no say in the matter. They are ignorant and when the soldiers are told to fight they do not half of them know who the Japs are, and why they are to be fought. I would like to see the defeat of my country because it would be to the advantage to Russia to be defeated in this conflict. If she wins, oppression will be stronger than ever. After the defeat of the Russians by the English in the Crimean war, Nicholas I. abolished slavery because he saw that the people were cowed and had no energy or pluck. They could never make themselves equal to the other civilised nations while they were so oppressed. But when Russia won the war with the Turks, oppression became stronger. The people are a good people, but they are ignorant, and the Ministers and those in authority stir them up to deeds of violence.

"I intend very shortly to call a large meeting in one of the biggest halls in the city to discuss the war, and show the public the good it will do the people of my country if they are defeated in the war with the Japanese."

The Unpopularity of Whiskers

Commenting on the fact that Governor Alexander Monroe Dockery has just divested his countenance of a celebrated and almost immortal set of whiskers, the New York "Sun" says: "The twentieth century is beginning somewhat as the nineteenth century began, though, of course, not so strictly and universally smooth, but it is doubtful if it will run parallel through all its quarters with its predecessor. There were no mustaches, no beards, when the nineteenth century dawned. Side whiskers began to curl and sprout before it had run far in its course, and they grew bolder after a time and encircled the throat and chin, leaving bare the upper lip. The lip was submerged about 1860, and in the later years of destruction was last to yield to the assaults of the barber. The human countenance began to exhibit itself again not long after the war, and from that time down to the very recent past the unsupported mustache was the prevailing mode. Now fashion is changing again, so that the young men are commonly completely shaved, and their fathers have covered lips. The youth of to-day have the weight of civilized precedent with them. An examination of the family albums of the last four centuries will demonstrate that the unwhiskered have had by far the better of it. For nearly two hundred years of that time the beard was not permitted to sprout. A great deal of encouragement for the shaven but ambitious young man may be found in the Presidency of the United States. From the beginning with Washington down to Lincoln's time whiskers found lodgment in the White House only three times, and in every case they were of the remote variety known as sideboards, which offered no considerable obstruction to the observation of the faces to which they were linked. John Quincy Adams presented a stubborn pair, Martin Van Buren's were amiable in their moods, and Zachary Taylor's were evidently the unobtrusive expression of a fancy for trimmings. Lincoln inaugurated the bearded era, which was carried on by Grant, Hayes, Garfield, Arthur (with Dundrearys), and Harrison, though Harrison yielded not a little of his expanse before he retired from office. Cleveland was the first mustached President and Roosevelt the second, while McKinley preserved the tradition of the smooth face.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.06 and $70.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite), and by driving this tunnel five or six hundred feet further it will cross the formation to intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co., Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 565 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-(tunnel); has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

A Despatch From Tokio Reports Another Battle

At Port Arthur, Which Says that Government Has Not Given Details

Special to THE TIMES.

Berlin, Feb. 23.—The Lokal Anzeiger today, in a despatch from Tokio, says;

"A fresh engagement took place at Port Arthur last night.

"The details have not been announced by the Government."

RUSSIA'S NAVAL ARMIS AMPUTATED.

New York, February 24—The correspondent of the New York Tribune in London cables;—"There are fresh rumors of a renewal of the assault on the Russian fleet at Port Arthur, but no authentic details are provided and such despatches as are printed from special correspondents are belated several days. The Japanese Admiral can complete the destruction of the main fleet at his leisure by means of his torpedo flotilla and can concentrate his forces against the Vladivostock squadron before the Russian reserve fleet can arrive. Russia's naval arm is already amputated and the ships lost cannot be replaced during the war nor the naval supremacy be regained. Naval experts assert that her fatal lack of readiness doomed Russia's defeat from the moment of the first surprise. Conditions of naval warfare have been revolutionized in the last ten days, and the torpedo arm has become the most formidable branch of the service, and supremacy in sea power depends on its efficiency rather than on the speed of armored or unarmored cruisers, or the tonnage armor and concentrated gun firing of battleships. Naval defence is impracticable. Initiative is everything, and a naval war is won or lost during the first week of the campaign. This is the frank confession of Admiralty officers whose construction of programme will be speedily altered and an enormous development of the torpedo service be provided for without any delay. A remarkable proof of the readiness of Japan has been the successful employment of the largest and most destructive torpedo charges with which experiments are now being conducted at torpedo stations in the English Channel and the land operations can only be vaguely conjectured from the special despatches of the London press, but correspondents agree that the morale of the Japanese army is perfect and the Russians are discouraged and the transportation service completely broken down.

JAPAN IS RUSHING AN ARMY INTO PING-YANG

OVER SIX HUNDRED RUSSIAN SCOUTS ADVANCE.

Have Reached Sunchin and Others are Marching towards Gensan --Russian Delay

Tokio, Feb. 23.—A general advance along the Pekin road to Ping-Yang is expected shortly. The administration methods of the Japanese excite great admiration. British officers state that they are an improvement on anything in their experience, and believe they demonstrate an organization superior to that of any European power, while the original base is close.

The correspondent says that the Japanese follow the system employed by the British in South Africa, giving receipts for supplies purchased by the army, and granting immediate payment. The troops are being billeted in Seoul. The purchase of all the available supplies is resulting in a great influx of money. This, combined with the admirable behaviour of the the troops is causing the disappearance of the animosity among the Coreans, who are not expected to interfere with the Japanese plans.

The original scheme was to land at Masampho and march north through Corea, but their naval success has enabled the Japanese to begin operations at Chemulpo. In spite of a complete change of plan and venue at two days notice, the movements have been conducted with perfect precision, which is instructive.

St. Petersburg, Feb. 23—The Novoe Vreyma says that it will be a long time before military operations on a large scale can be undertaken by Russia, on account of the extreme difficulty and enforced delays in concentrating troops, stores, etc., in the immense area, within which the army has not only to guard against attack, but also fight against a rigorous climate.

BRITAIN'S ARMY CHANGES

Lord Cromer Takes Exception to Lord Wolseley's View

London, Feb. 23—Lord Cromer takes exception to Lord Wolseley's condemnation of the practice of appointing a man who is not a soldier and who is entirely ignorant of war to be Secretary of State for War. This in itself is not of so much interest as the explanation which Lord Cromer gives in connection with his utterances about the matter concerning the manner in which he, acting in Egypt in place of the Secretary of War, managed to get along so well with Lord Kitchener during the latter's operations in the Soudan. Lord Cromer says, "I abstained from mischevious activity and I acted as a check on the interference of others. I had confidence in the abilities of the commander who I had myself chosen and except when he asked for my assistance, I left him alone." Lord Cromer, who for more than a quarter of a century ago was a soldier and staff officer, but has ever since done purely civilian work, declares that a civilian is preferable as Secretary of State for War, though he declines to go so far as to urge that soldiers should be ineligible for office.

REFUGEES FROM VLADIVOSTOK

Chinese Terror Stricken In the Russian City

Nagasaki, February 24—Two thousand refugees from Vladivostock arrived here on the steamer Stolberg, which also brought the crew of the Japanese steamer Nakoura Maru, which was sunk by the Russian cruisers near Hakodate, February 11. Two passengers were drowned. The fares of the crew were paid by the Russian Government. The men say that they were well treated at Vladivostock. Provisions in that city, they say, are scarce, and foreigners have been requested to leave. The Chinese in Vladivostok are terror stricken and are leaving in thousands.

INTERNAL TROUBLES

Polish Students Hold Anti-Russian Demonstrations

Special to The Times.

Berlin, February 24—Reports from Warsaw state that the Poles there believe that Germany cherishes designs on Russian Poland. It is stated in responsible Polish quarters that the German yoke would be welcomed. Polish sentiment, as regards Russia, is divided between natural antagonism to the Government and a belief that victory over Japan would result in a reduction of the oppressive burdens of taxation.

Manufacturers deplore the war, which they expect to result in a long period of industrial and financial paralysis. The Russian population in the Warsaw district is mostly military and intensely enthusiastic. The school boys on parade cheer passing officers. There are frequent demonstrations in front of the French consulate. Anti-Japanese demonstrations at the British consulate have been frustrated by the police. The Polish students, however, have succeeded in holding several rousing anti-Russian demonstrations there.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:
J. R. CHAPTON, - - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer

Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever nonassessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000) About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.
or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been shown for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

Mostly Men.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking-parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous enough I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty-three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty-nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $60 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 26 bushels. Take an average price of 50 cents per bushel, and you have a gross return of $13 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $50 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen—u—ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the houk! houk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen and as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do,
Yet, though I beggared go beyond relief,
Oh heart, the glad, mad spendthrift hours we knew!

Par value $1 00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

Catarrh Cannot be Cured by Dosing

IT IS A LOCAL DISEASE AND IF CURED MUST BE LOCALLY TREATED.

Seven people out of ten suffer from catarrh. There is no lack of medicines, and if dosing would cure, very few cases of catarrh would be found.

You probably have it yourself. How much benefit have you obtained so far from medicine-taking? A little relief is all that you have derived. You have spent lots of money and yet the catarrh is growing worse all the time.

Has it ever occurred to you how desirable and how successful a treatment would be that you could breathe to where the disease existed. Perhaps you have thought about this form of cure but you have been unable to find a remedy that could be pleasantly and safely used.

Try Catarrhozone, it can be broken up by the air and carried in small drops to every part of the breathing organism. It touches the catarrh with healing, that is why it cures.

This healing, balsamic, vegetable substance is so volatile that the air greedily takes up from the inhaler, so antiseptic that it instantly destroys the microbes which produce disease of the breathing organs, and so soothing that it relieves congestion subdues inflammation, and stops mucous discharge.

Plainly Catarrhozone is an ideal remedy for diseases of the throat, lungs and nasal passages. If you have catarrh, bronchitis or asthma, all are equally curable by Catarrhozone. You have been told why this is so. These diseases are all modifications of an inflammatory condition of the lining membranes of the throat and nasal passages.

Now, bear in mind, you breathe Catarrhozone. Do you not think this is a rational treatment—a certain way of reaching the diseased surfaces which lie so far in the cavity of the body or in the head that they can be reached in no other way.

You cannot possibly fail to obtain quick cure from any of these maladies if you use Catarrhozone.

All dealers in medicine sell Catarrhozone. Trial, 25c, complete outfit, $1.00, which will last two months, and is guaranteed to cure permanently. Sent postpaid to any address by N. C. Polson & Co., Kingston, Ont, and Hartford, Conn., U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

K. O. T. M. Entertainment

Peterborough K.O.T.M., No. 69, held an interesting social event last evening. About forty members and their friends were present, and an excellent program was provided. Three boxing bouts by local athletes aroused considerable interest, and Mr. W. Grose, with his gramophone, added to the pleasure of the evening.

A Small Blaze

About six o'clock last evening the fire alarm rang, and in a few minutes the rattle of the fire brigade was heard on George street. The report first came that Halpin's grocery store in the South Ward was on fire. There was only a slight blaze, however, and no great damage was done.

To Petition Parliament

The Lord's Day Alliance is sending out thousands of circulars in the form of petitions to the churches, religious associations and fraternal societies throughout Canada. These petitions are for presentation to the Governor-General-in-Council and the members of the Senate and House of Commons of Canada, praying that a Dominion statute be passed which will guarantee the proper preservation of the Sabbath as a day of rest, when only necessary work shall be done. The secretaries of the various associations and lodges are requested to send the petitions, when filled in, to the local member of Parliament at Ottawa. At the head of the petition as officers of the Alliance, are such well known men as R. L. Borden, M.P., Ralph Smith, M.P., John Charlton, M.P., and Rev. Dr John Potts.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

An Interesting Lecture

In St. John's church, last evening, Rev. C. H. Brooks delivered one of his interesting lectures, on the subject, "Call to Rest and Refreshment." The speaker's varied experience in touring Turkey and other eastern countries has provided him with many most interesting stories, which he tells most ably. His force and energy are most noticeable, and his plain, but educating lecture was much appreciated.

Death of Mr. Lumsden

On Tuesday afternoon death claimed another aged Peterborough citizen in the person of Mr. F. T. Lumsden, of 22 Denison street, who passed quietly away at the advanced age of 78. Deceased leaves a widow and eight children, six daughters and two sons; Mrs. A. S. McGuire and Mrs. B. F. Ackerman, of Peterborough; Mrs D. A. Hutchinson, Port Huron; Miss Lizzie and John, of Peterborough; Miss Hettie, of Jersey City; Mrs. D. A. Rose, of Souris, Man; George, of Carville, Assa. The remains will be interred in Warsaw cemetery at 12.30 today.

Wedding Bells

On Tuesday afternoon, at her father's residence, 33 Louis street, Miss Mabel Montgomery was united in the bonds of matrimony to Mr. W. Atkinson, of St. Catharines. Only a few immediate friends and relatives were present, and the ceremony was conducted by Rev. J. P. Wilson. The bride was dressed in her neat travelling suit of navy blue.

After the ceremony had been performed the wedding party enjoyed a dainty wedding dinner. The happy couple left shortly after for Toronto and other western points.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—A Times want "ad" will bring good results.

—There were no cases at yesterday morning's police court.

—The Ladies' Auxiliary of the Y. M.C.A. will meet this afternoon in the Y.M.C.A. parlors.

—The County Auditors, Messrs. O'Brien and Bennett, are making good progress in auditing the county accounts.

—Mark Hanna, the great American statesman, left an estate valued at $3,000,000. Surely politics must pay sometimes.

—We still notice that many of our local contemporaries make a mistake in spelling the name of our city. "Peterborough," not "Peterboro," is correct. We want all we can get.

—The fancy skaters, Mr. John Davidson and Miss Fanny Davidson who will appear at the rink this evening, performed at Port Hope last night.

—Cloth bound books in floral design by some of the best authors of the day, regular twenty-five cent line on bargain at fifteen cents. Times Bookstore.

—The Mayor of Peterborough has been notified to appoint the date and provide a place of meeting for the Royal Transportation Commission, who will meet here at an early date.

—A young London woman, who had married in secret, was refused permission to see her dying husband. The young man died last Sunday without his wife having seen him.

—On Tuesday death visited the home of Dr. J. N. Johnston, when his beloved wife passed away after a short illness. The funeral will be held today to the Lakefield cemetery.

—On Saturday, the 27th, we will sell while they last dolls at following reduced prices, 50 cent line for 35; thirty-five cent line for 25; twenty-five cent line for 20 cents; Other lines also reduced. Times Bookstore.

—Mr. Roland Johnson, Lakefield's hustling dry goods merchant, has opened up a grocery department in connection with his dry goods and clothing house. His many Peterborough friends wish him every success.

On Tuesday evening the young people of Charlotte street Methodist Sunday school enjoyed a sleighing party around town. Nine bus loads of happy youths and maidens were in the party and judging from the merry laughter and lusty shouting all thoroughly enjoyed themselves.

—In answer to a rambling letter in yesterday's Review re the engagement of singers for St. Andrew's church, the writer compares the "tenor, alto, and the bass singers," as religious fiddles. A reader has suggested that he be answered in one word, "Fiddlesticks."

—A young lady, in company with a young citizen of Port Hope is reported to have been roughly "treated" recently, by an employe at the Port Hope rink. The young man says, "If it had been himself he would have thought nothing of it." It seems unreasonable that the accused employe should have given vent to his wrath on a lady. Perhaps the young man was a "big fellow."

TIMELY CALLING

How the Pastor Saved a Life

A man near Fort Gay, W. Va., made an entire failure in getting strength from the kind of food he ate and not knowing that the trouble was with the food kept on losing health until the doctors gave him up to die.

It was supposed to be consumption because he was wasting away steadily and slowly dying. His minister called from time to time and one day brought along a package of Grape-Nuts thinking from what he knew of the famous food that perhaps it might help him. The sick man took it at once and from that day began to get well. In writing he says;

"I walked to town today 3 miles. Have gained over 40 pounds in about 2 months and my neighbors don't know what to say. I frequently am told it was as if I am raised from the dead. Everybody here knows about my case, you can tell people to write to the Postmaster or Rev. L. D. Bryan. I will make a sworn statement that Grape-Nuts saved my life." Name given by Postum Co., Battle Creek, Mich.

This is another illustration that where all other food fails one can be brought back to health and strength on Grape-Nuts. "There's a reason."

Look in each pkg. for the famous little book, "The Road to Wellville."

OUR LETTER-BOX

NOTE—The Times does not hold itself in any way responsible for the opinions expressed by its correspondents.—Ed. Times

STREET WATERING

Editor Morning Times;

Dear Sir,—I am surprised that the Board of Works should recommend that the street watering be paid by special rate upon the real property benefitted thereby. The fact is that the benefit is conferred upon every person who walks our streets and is in the interest of all alike. Then why such picayunish legislation? Such a policy would tend to restrict the watered area, instead of increasing it to the detriment of all. From a sanitary point of view there is nothing so desirable as watered streets.

Yours, &c.,
SANITAS.

THE SOURCE OF OUR CREEK

Editor Morning Times

Dear Sir,—I see by the report of our Council proceedings that there is a move on foot to drain the Cavan swamp, of which our creek in the outlet. When that is accomplished it will be a matter of serious consideration for our Council. In its present state the swamp, with its fallen timber, rotten logs, underbrush and other debris and impediments, acts as a reservoir for the retention of the water, thus gradually letting it off in the time of the spring freshets. But just as soon as these various impediments are removed, and an unobstructed course is formed, we may look for destructive inundations every spring, and a dried up creek during the dry seasons. Such is the experience of other places under similar conditions. Our Engineer ought to take time by the forelock, and make a report as to how best to minimize the danger.

Yours etc.,
PRECAUTION

GRANT TO A CAVAN SWAMP

Editor Morning Times;

Sir,—At last night's meeting of the Town Council, the question of making a grant to the Township of Cavan for draining one of its swamps was referred to the Town Solicitor and the Engineer to report thereon. It is ultra vires and bad enough for the Council to spend our money in the County, but when they go to another County to get rid of some of their surplus cash, it is still worse. It is misleading to say that it will open up a new road from Mt. Pleasant to Peterborough. It will merely open up part of a concession line, wholly in Cavan. Mt Pleasant already has two summer roads and three winter roads leading to Peterborough. Even if the road be built, I defy anyone to point out one person who would be thereby induced to come to our town, that does not already do so. If the Council has money to burn, I can point out several things that need it at home, and where it would not be ultra vires to make the expenditure.

CONSISTENCY.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Edna B. Waters, of Norwood, spent yesterday in town.

—Mr. G. L. Black, of Ottawa, is in town examining the books of Peterborough and Ashburnham.

—The Times had a pleasant call yesterday from Rev. Mr Armitage, of Picton.

—Mr. W. C. King, of Peterborough, spent Monday visiting Lindsay friends.

—Mr. A. W. Cressman, accompanied by Mr. Oles, are in Montreal on a buying trip.

—Mr. William McIndoo, of Pontypool, accompanied by his son Joseph, of Buffalo, was in town yesterday.

—Mr. J. J. Wilde, B.A., Toronto, representative of The Times, was in town yesterday on business.

—Miss M. Cook is visiting her sister, Mrs. Herbert Hall, Toronto.

—Mr. John Cuthbert, of Lindsay, is visiting in the city.

—Messrs. E. Finlay, W. Pakenham, J. Cummings, J. Anderson, G. Moffatt and Rev. McClelland, of Norwood, are in the city attending the Peterborough Bonspiel.

—At the Snowden House; L. Ross, Toronto; G. L. Blatch, Ottawa; J. Jackson, Ottawa; H. E. Vanderburg, Toronto; Thos. J. Wilkins, Stratford; B. M. Brown, W. J. Wills, W. J. Helliwell and J. Cooper, Toronto.

AN ELOQUENT SPEAKER

Prof. Lee Lybarger Delivers an Interesting Lecture on "Single Tax."

An interesting lecture on the "Single Tax" question was delivered by Prof. Lee Frances Lybarger in the Y.M.C.A. Hall last night. The professor was carefully listened to by a large and appreciative audience, and proved himself to be one of the cleverest speakers who has ever appeared before a Peterborough audience. His speech was characterized by sound reasoning, clearness of expression, and vivid descriptions of the political and industrial conditions of the present day. His power and penetration and his wonderful voice sustained his audience's interest throughout, and all will eagerly look forward to the professor's next visit to Peterborough.

OLD COUNTRY WANDERERS

English Football Players Met Last Night and Elected Officers

A few of the Peterborough young Englishmen met under the name of "The old Country Wanderers Club" at the Crown Hotel last evening for the purpose of electing a secretary and arranging for the season's business. The secretary having left town, a new one was elected, in the person of Mr. Littledale, the Examiner's reporter. Mr. S. Smiles was elected to fill the vacancy on the Executive committee, caused by Mr. McPherson's leaving town. The rule that all players must be old countrymen, was unanimously rescinded. It was carried that all players must be either direct from the old land, or born of old country parents. Hon. J. R. and Mrs. Stratton and Mr. and Mrs. R. R. Hall were unanimously elected patrons and patronesses of the Club. The following officers were elected; Hon. President, E. G. Patterson; Hon. Vice-President, Jas. Kendry; President, Wm. Hamilton, Vice-President, A. L. Sykes; Chaplain, Rev. J. C. Davidson. Mr. Davidson was present and addressed the meeting.

Narrow Chests.

The old theory that consumption was inherited is utterly discredited by modern medical science. The germs of consumption must be received from without. These germs are every where. They are constantly being received and cast out by the healthy system. It is the narrow chested whose inheritance is weakness who fall a prey to consumption because they are too weak of lung to resist and throw off disease.

Doctor Pierce's Golden Medical Discovery makes weak lungs strong. It cures obstinate deep-seated coughs, bleeding lungs, weakness, emaciation and other conditions which if neglected or unskilfully treated find a fatal termination in consumption.

$3,000 FORFEIT will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"In the spring of 1902 I was taken with hemorrhage of the lungs, and became very weak and short of breath, lost flesh and had no appetite," writes Mr. E. L. Robinett, of Xenia, Texas. "I was persuaded to try Dr. Pierce's Golden Medical Discovery. The first few bottles seemed to do me but little good. Thought I would soon be a victim of that dreaded disease, consumption. Had almost given up in despair when my friends persuaded me to give your 'Golden Medical Discovery' a fair trial. I commenced its use. I weigh 160 pounds now, and when I commenced I only weighed 140 pounds. If any one doubts this statement I will be pleased to answer any inquiry."

Accept no substitute for "Golden Medical Discovery." Nothing is "just as good."

Dr. Pierce's Pleasant Pellets cleanse the clogged system from impurities.

Tenders for Indian Supplies.

SEALED TENDERS addressed to the undersigned, and endorsed "Tenders for Indian Supplies," will be received at this office up to noon on Thursday, 31st March, 1904, for the delivery of Indian supplies during the fiscal year ending 30th June, 1905, at various points in Manitoba and the North-west Territories.

Forms of tender containing full particulars may be had by applying to the undersigned, or to the Indian Commissioner at Winnipeg. The lowest or any tender not necessarily accepted.

J. D. McLEAN,
Secretary

Department of Indian Affairs,
Ottawa, 18th February, 1904.

N.B.—Newspapers inserting this advertisement without authority of the Department will not be paid.

FLOUR IS ADVANCING

Has Gone Up Fifty Cents Per Barrel Within Present Month

When the new barrel of flour is purchased the householder must be prepared to dig down deep, for not only is it higher than for a number of years, but there appears to be a very fair prospect of it making another substantial advance.

Today the millers, that is the big millers of Canada, are asking $5.40 and $5.10 for the staple brands of flour such as are used in the ordinary households, whereas in August last these same flours were quoted at $4.40 and $4.20, an advance of 90 cents per barrel.

The range of prices in these two grades of flour within the past few months have been as follows;—

August 1903,	$4.50,	$4.20.
September, 1903,	$4.80,	$4.50.
January, 1904,	$4.75,	$4.45.
February 1, 1904,	$4.90,	$4.60.
February 22, 1904,	$5.40,	$5.10.

From the above figures it will be seen that the price of flour since the first of the months has advanced a round fifty cents per barrel, and this just about coincides with the advance in wheat during the same period of time.

It is understood that the large Canadian millers such as the Lake of the Woods Milling Company and the Ogilvie Milling Company have on hand a copious supply of wheat bought at last autumn's prices, but numerous small millers with less capital or credit as the case may be, are now short of wheat for immediate use and are obliged to buy at the present prices which are the highest in a number of years.

Cottage Wanted

THE MANCHURIANS MAKE A BOLD MOVE

e Chinese in Manchuria are Attacking the Russians--No Lack of Ammunition

N THOUSAND MANCHURIANS AVE ALREADY VOLUNTEERED

e Thousand Russian Troops Have Been Moved from Mukden to Sunnintung.

al to THE TIMES.

, Feb. 26.—The Corean Government has decided to order the Corean roops to join the Japanese troops in the field. The Port of Wiju vas open to foreign trade last night; the limitation to be placed on rade and other matters will be passed later, as the action necessiates. The harbor Wingampho has been decided upon.

al to THE TIMES.

Petersburg, Feb. 26.—A despatch received here from Port Arthur, lated Feb. 26, says; At one o'clock this morning several Japanese ents were cited from here with their sail set for the purpose of lisguising their character. The battleship Retvizan and shore bat- eries opened fire on them and continued firing until daybreak, with- ut any visible results. After daybreak a Japanese squadron, ap- arently transports, were cited at 11.15. This squadron came nearer nd an engagement which lasted 40 minutes ensued. There was no amage done. Few shells fell in Port Arthur. It is expected here hat the Japanese will attempt a landing soon, and inspection of he Japanese ship sent in this harbor, Feb. 24, shows they were load- d with coal and kerosine, and that electrical infernal machines had een placed in the midst of the cargo.

al to THE TIMES.

n, Feb. 26.—If the report from Yinkow of a Japanese landing near Vladivostock, which at present is based on missionary and native statements, should prove correct, a most important and new devel- pment has been revealed, as it points, according to British views, to n attack on Vladivostock.

al to THE TIMES.

York, Feb. 25.—According to a cable from Chefoo to The World, Manchuria is rising against the Russians. Five thousand Russian roops have been moved from Mukden to Sunnintung, because in the illages along the west side of Liaotung peninsula the natives are aking active preparations to cut off small bodies of Russian troops here.

thousand Manchurians have already been enrolled in the movement which is spreading. Volunteers are plenty; there is no lack of am- munition or money, for the patriotic rich are subscribing.

LIONS LOST IN BIG FIRE IN ROCHESTER

LAGRATION IN HEART OF SINESS DISTRICT WIPES OUT BIG INSTITUTIONS

to THE TIMES.

ster, N. Y., Feb. 26. — The conflagration in the history chester broke out a few min- efore 5 o'clock this morning basement of the Rochester oods Company's store at 156- ain street east. The fire, ac- to the nightwatchman, in ore, was discovered soon after rted, but it spread with such y that by the time an alarm urned in the entire front of ore was a mass of flames.

in an hour after being dis- the fire had spread to the anite building occupied by the f Sibley, Lindsay & Curr, and ndreds of business and profes- men. Flames also spread to ildings in the rear of the Gran- ilding.

extreme cold made fire fight- ifficult and hazardous, as the s were coated with ice.

loss is estimated at between nd five million dollars, most of will fall on Sibley, Lindsay & Co., the Badl? & Shelbourne Co., chester Dry Goods Co., and the wer Shoe Co. The loss to the ss offices in the Granite build- nnot be estimated this .

Primary Union

most successful meeting of the ary Teachers Union was held in Y.M.C.A. Hall last night. A large er took advantage of the meet- which was addressed by Mr. Wm. ns. The Question Drawer was cted by Rev. J. G. Potter. The rs of the organization ought to ghly gratified with the continued ss of the work, and much credit e to Miss A. Williamson, the fatigable President, and Miss er, the Secretary.

Considering how little you spend in a year for baking powder, why not have the best?

Cleveland's is a pure, cream of tartar powder that never fails, and the best that is made.

A MATCHED RACE

Between Mr. Harry Le Brun and Mr. George Graham

The Times was informed yesterday that a skating race had been arranged to take place at the Brock street rink on Saturday evening next, between Mr. Harry LeBrun, the well known clothing merchant, and Mr. George Graham, of the Oriental Hotel. The loser is to put up an oyster supper for twenty of the friends of the contestants. The race will be a mile dash.

The event will doubtless attract a large crowd. It is said that each of the contestants has a mark somewhere in the neighborhood of four miles an hour to his credit. The sporting editor of this g.f.j. is prepared to bet nickels to doughnuts that Harry will win, provided his wind holds out.

BIBLE SOCIETY MEETING

Final Arrangements for Centenary Service Yesterday

The Executive of the Peterborough Branch Bible Society met in the Y.M.C.A. parlor. Sheriff Hall, President, occupied the chair. It was decided to unite with all the Branches throughout the world in the celebration of the Centenary of the British and Foreign Bible Society, which takes place on Sunday, March 6th, and Monday, March 7th. Special sermons will be given in the various churches in town on Sunday, and on the Monday following a mass meeting will be held in the Murray street Baptist church at 8 o'clock.

The Rev. Mr. Bastow was appointed to arrange for special music.

The Secretary was instructed to invite all the Young People's Societies to co-operate in making the event a great success and blessing.

Representatives of the ministers in town were appointed to give brief addresses, which ought to be of an inspiring character.

The Executive unanimously agreed to nominate the retiring officers for re-election, viz.;

President—Sheriff Hall.
Vice-Presidents—Ministers of town.
Secretary—Rev. J. G. Potter.
Treasurer—John Crane, Ontario Bank.

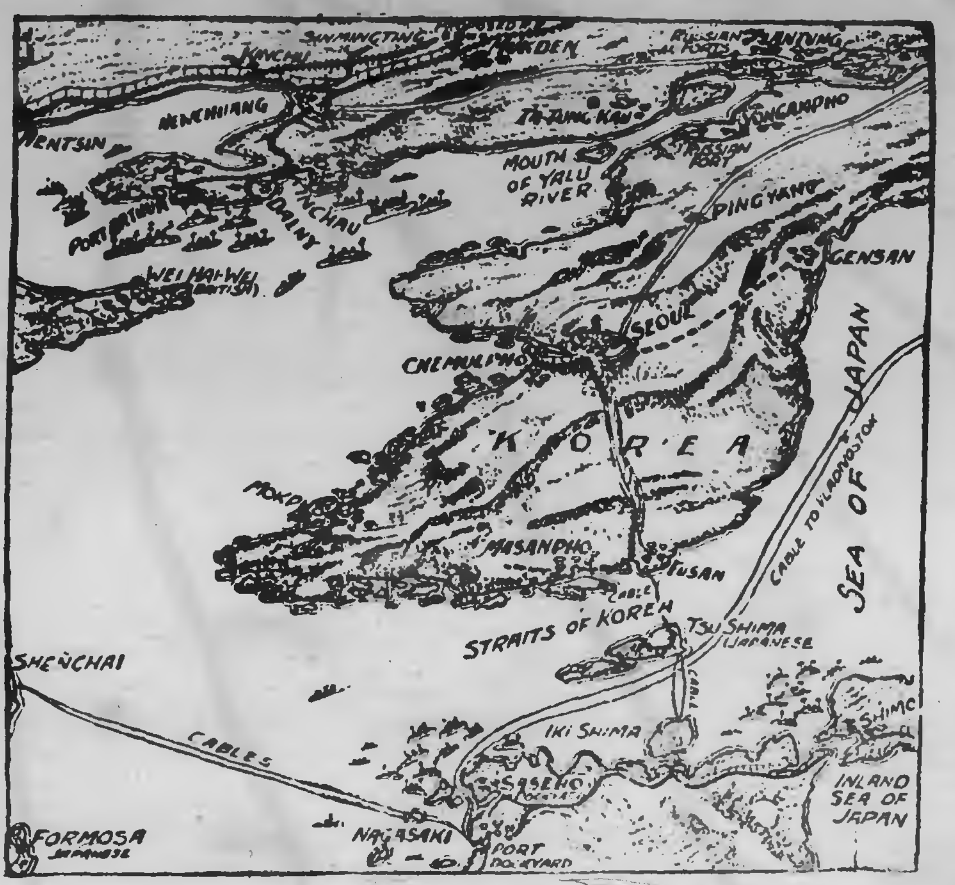
The thanks of the Executive were extended to the Collectors for the very efficient work done this year as the large sum of $300.00 was raised for the work.

It will be interesting to our readers to review the names of men who have been Presidents since 1819: Hon. Thos. Stewart, Dr. Hay, Robt. Dennistoun, James Hall, E. W. Coxon, Col. Haultain, A. H. Campbell, Robt. Kingan, Dr. Fife, Dr. R. W. Bell, Jas. Stratton, John Carnegie, and Sheriff J. A. Hall, who has been President for the last thirteen years.

CHINESE SNUB RUSSIA

Open Defiance of Czar in Spite of Declaration for Neutrality

Tokio, Feb. 27—Advices to the Japanese government from Pekin say that while at Moukden Viceroy Alexieff asked the Chinese troops to aid in guarding the railway so as to prevent the interruption of traffic. The Chinese refused the request and asked for instructions from Pekin. The Chinese government told them to inform Alexieff that as Russia had insisted that the Chinese were unable to guard the railway in time of peace surely Russia could not expect them to guard it in time of war.



Scene of the Great Struggle for Supremacy

IS CANADA PREPARING FOR WAR?

Color Given to This by Reported Army Movements

BRITAIN MAY BE INVOLVED

Militia Authorities Affect to Disbelieve the Rumors, Indications That War May Come

Special from our own Correspondent.

Ottawa, Ont., Feb. 27—War is all the talk just now and the French-Canadian papers add to the excitement by giving reasons why England and France might become involved in the struggle.

La Presse, on the strength of a dispatch from Europe, via New York, stating that in Germany it was feared France and England might become involved, gives no less than seven reasons why such a thing might happen. Here they are;—First, the sympathetic Franco-Russian alliance; second, the Anglo-Japanese commercial union; third, the Wei-hai-Wei incident and the denunciation against England on the part of the Russian press; fourth, the sympathies of the British and French ships for the parties at war; fifth, the Turko-Bulgarian events; sixth, the preparations of the British and French squadrons; seventh, the mutual hatred between the Russians and the English.

In addition to these come the rumors that Great Britain intends sending seven more regiments of regulars to Canada, so as to have them hands in case they may be needed in the east. The dispatches, which were not quite official, said that two of these regiments were to be stationed in Halifax, two at Esquimalt and one each at Montreal, Quebec and Toronto.

[illegible] are Credited.

These are supposed to be moved, as a matter of course, by means of the Canadian Pacific railway, and although the militia authorities here laugh at the rumors there are many prominent politicians and others who think that there is something in them.

The reason why the militia authorities do not believe the news is that at the time of the intercolonial conference the Canadian representatives offered to garrison both Halifax and Esquimalt in addition to developing Canada's own defenses and that nothing more has been heard of it since.

There is a great anxiety on the part of militia officers to be attached to either of the bellicose armies, as military attaches from Canada, and it is understood that the government has received any number of applications.

The principal activy on the part of the government in connection with the war is shown in its desire to protect the Canadian missionaries in Corea. There are supposed to be about a score of these, and it is considered that their position is not the most comfortable just now.

British Officers' Mission.

It is considered rather a coincidence that simultaneously with the announcement that the Canadian officials have no reason to believe that England will be drawn into the eastern conflict a new British remount officer has made his appearance here. His name is Colonel Lawley and he is a special guest at government house of Lord Minto and has had some extended interviews with the minister of agriculture, which he does not deny are in connection with the purchase of army horses for remounts.

WEATHER NOTES

Snow and sleet.

COLONIES AND NAVAL RESERVE

Self-Governing Empire Co-operating with the Admiralty

CANADA IS AN EXCEPTION

Activity of Colonies is Welcomed in England as Strength to Navy

London, February 27—The self-governing Empire, excepting alone Canada, is cordially joining in co-operation with the British navy. The First Lord of the Admiralty's annual statement says that the Newfoundland Branch of the Royal Naval Reserve is making steady progress. Now the Parliaments of the Commonwealth and New Zealand have adopted a naval agreement and it is hoped strong branches will shortly be established in Australia and New Zealand. It is hoped also shortly to establish a branch in Malta.

WELCOMED IN ENGLAND.

The papers welcome this growing spirit of solidarity throughout the Empire. The Pall Mall Gazette, which has hitherto been a somewhat pessimistic naval critic, says tonight, "With a growing royal fleet reserve a royal naval reserve, and a royal naval volunteer reserves, the manning of the navy will be placed on something like a safe basis. That is to say, there will be in a year or two a sufficiency of men, regulars and reserve, to man every ship that could be put into commission."

local Sports

The "Pen-pushers" of the Davis-Thompson Company have issued a challenge to the "Happy Thoughts" of the Best Stove Company. The "best" team, of course, will win.

The final game in the Trent Valley League will in all probability be played next week, when Napanee and the T.A.S. will play for the championship. If these two teams are billed to battle for the championship, the first final will be played in Napanee on Monday, and the return game at Peterborough some evening during the latter part of next week. Chaucer Elliott will referee the game at Napanee.

Defeated at Campbellford

Yesterday the T.A.S. boys journeyed to Campbellford, where they played in the afternoon, but were defeated by a small margin, 6—4. The following represents the line up of the T.A.S. boys;

Goal—McCoy.
Point—McCabe.
Cover point—Meagher.
Center—Parnell.
Right wing—Lynch.
Left wing—McGrath.
Rover—Callaghan.

A NEW ENTERPRISE

New Rink will be Constructed at Lakefield —Mr. Fred Darcy the Promoter

A new skating rink will be constructed at Lakefield on the Agricultural Society's grounds, which have been purchased by Mr. Fred Darcy. This gentleman visited our city yesterday and expresses himself as intending to build one of the finest rinks in the country, and any one who knows this energetic Lakefield citizen will at once pronounce this statement correct.

[illegible] ON THE MOVE

St. Petersburg, Feb. 25. — Viceroy Alexieff with a complete staff, now has his headquarters on a special train, which at present is about four miles from Mukden, fully equipped and ready to move from place to place as the necessities of the situation require.

WAR DECLARED AGAINST UNIONS

Powerful International Organization of Employers

ITS OBJECTS MADE CLEAR

Purpose of the Citizens' Movement—Arrogance of Labor Unions to be Checked

Five hundred delegates, representing associations of manufacturers and employers in every business industry and independent workingmen who look with forebodings on the anarchistic uprising in the ranks of organized labor, assembled to support the resisting measures that are deemed necessary to preserve the freedom of the people.

Directed in their efforts by David M. Parry president of the association, men representative of industrial affairs in all parts of the continent, participated in important action that is destined to stagger the efforts of American Federation of Labor leaders and their followers in the reckless career of strikes, violence, intimidation and revolution that has spread disaster.

Resolutions Will Precipitate Struggle.

The convention struck at the heart of the issue in two resolutions that will precipitate a struggle that can only end in the triumph of independent workingmen and employers. One of these resolutions was a declaration of opposition to the use of the union label on all manufactured articles and the other provided for the establishment of a bureau to trace and keep a record of the men in the organized labor movement who commit assaults, break the criminal laws and conspire to coerce the employing public and intimidate individuals.

Resolutions denouncing the socialistic measures championed by Samuel Gompers and his cabinet before congress, the anti-conspiracy and anti-injunction bill and the eight-hour bill were also adopted.

While the addresses made by President Parry and other leaders in the new emancipation movement were filled with important revelations and suggestions, the actions of the convention on the issues of the day gives the keynote of the convention.

Will Put Watch on Criminals.

The resolution providing for the establishment of an identification bureau for the criminals in the ranks of organized labor, introduced and championed by C. W. Post, president of the American Association of Advertisers, is as follows:

Resolved, That the propaganda of labor unionism in the United States and the every-day practical workings thereof are revolutionary and subversive of the rights of labor and of the employers of labor and of the laws of the land, but above all else they are destructive of the rights and liberties of the great body of the people irrespective of their affiliations with unionism or with employers of labor.

Resolved further, That the present condition of anarchy and contempt for law and the constituted authorities brought about by lawless leaders and members of labor unions has forced upon the peace-loving citizens of the United States the necessity of demanding that the names and whereabouts of these lawbreakers who practice intimidation, boycotting, picketing, destruction of property and who commit assaults upon their fellow laborers or commit other crimes in the name of labor be made known for the protection of all law-abiding people and for the best interests of labor itself and to the end that justice may be meted out.

Resolved further, That the executive committee is hereby directed to take the necessary steps to ascertain the identity of such persons and obtain full information in connection therewith and that a report of the same be made to each organization holding membership in this association.

Unions Led By Anarchists.

A rising vote of the delegates was called for on this resolution, and its adoption amid cheers and waving of hats was the climax of the days events in the convention. It was presented formally by the resolutions committee, of which William McCarroll, president of the New York Manufacturers Association as chairman, after Mr. Post had addressed the convention on the subject denouncing many of the leaders in the labor movement as anarchists and declaring that organized labor made no effort to check lawlessness and violence in times of conflict for the purpose of coercing and intimidating the people.

Continued in tomorrow's issue.

POPE MAY LEAVE ROME

Will Probably Spend Torrid Weather at Castle Gandolf

Rome, Feb. 27—The Roman correspondent of the London Daily Mail recently telegraphed to his paper that he had been informed by a high authority at the vatican that the pope would spend part of the summer at the pontificial villa of Castle Gandolfo, as the torrid heat of Rome during July and August would be absolutely unbearable for Pius X.

The revival of this rumor seems to have foundation, for the papal property on the Alban hills has recently been repaired at considerable expense and a snug apartment just adapted to the personal tastes of Pius X has been completely furnished under the supervision of one of the Pope's relatives.

It is also certain that Dr. Lapponi, the pope's medical adviser, has declared it absolutely necessary that Pius X should have a change of climate.

AGREES WITH ENGLAND

If Disputes Regarding Newfoundland Can be Settled

London, Feb. 25—Premier Balfour had sufficiently recovered his health to come from Brighton to this city today to preside at a Cabinet meeting.

Prior to the meeting, the French Ambassador, M. Cambon, called at the Foreign Office and had an hour's talk with Lord Lansdowne, Foreign Secretary. The Ambassador returned here from Paris last night, and apart from an exchange of views in regard to the most recent developments of the war, on which subject the two Cabinets are keeping in the closest touch with each other, there is good reason to believe that a settlement of all matters in dispute between France and Great Britain is on the eve of being arranged. Such questions as Egypt, Morocco, Newfoundland, etc., have been fully discussed by the two Governments for some months, and the differences are being gradually eliminated, until practically nothing remains to prevent an early signature of a treaty removing all outstanding obstacles to a complete accord between the two powers.

MRS. STRATTON'S DINNER

Given in the Speaker's Chambers—A Very Brilliant Affair

Toronto News—Mrs. Stratton was the hostess of a most unique dinner Wednesday evening, comprised solely of ladies. The idea probably evolved itself out of the fact that this is a leap-year, and Mrs. Stratton must be complimented on her originality, for it was in every way a success. Ladies luncheons are common, but a dinner is entirely new. At 7.30 the handsome reception room, decorated with pink flowers of every variety, and beautiful palms, commenced to fill up with a bevy of handsome and well-groomed women. An orchestra stationed in the hall played all evening. Mrs. Stratton received at the entrance, wearing a lovely gown of white net, richly embroidered in silver sequins, over white satin, a green and white wreath in her hair, and diamond ornaments. Mrs. Mortimer Clark, the guest of honor, was on her left, and was beautifully gowned in black Chantilly lace over white, a dainty wreath in her hair, and a necklet of carbuncles and pearls. Hon. Mr. Stratton welcomed the guests in his usual genial manner, but when dinner was announced, followed by laughter and witticisms from the fair sex, he slipped away. A long table was arranged in the dining-room with eighteen seats on either side, three at one end and two at the other. Down the entire centre billowly diamond tulle was placed over pale green silk, on which stood vases of various heights, filled with the loveliest of white flowers, roses, carnations, lilies and hyacinths, fringed with fern; the candelabra shaded in green. The color scheme was white and green throughout, and was really bridal in effect. The walls were draped in green and white, and the sideboard banked with flowers, added to the beauty of the room. Conversation flowed merrily, and many a clever story was told to appreciative listeners, whose musical laughter sounded above the noises of others seated beyond. At the end of the dinner, Mrs. Stratton cleverly following her role, proposed "The King and Queen." All standing sang the National Anthem, the orchestra chiming in; "The Hostess" followed to "For He's a Jolly Good Fellow;" "The Guest," Mrs. Clark, whenall again sang, "God Save Our King," "Peterborough," the home of the hostess, was proposed by Mrs. Forsyth Grant, about which place she gave some pleasant reminiscences. A move was then made to the reception room, and a little later the Hon. the Premier, the Attorney-General, Hon. Mr. Latchford, Hon. Mr. Harcourt, the Hon. the Speaker, Hon. Mr. Stratton, Mr. John Foy, Mr. Denis Murphy, M.P.P., Mr. Graham, M.P.P., Mr. Walter Bearmore, President Loudon and the husbands of the various guests appeared, and a great deal of auizzing went on, over which much merriment was displayed. Mr. A. A. Haston, a protege of Mr. and Mrs. S. H. James, gave several songs, which were thoroughly appreciated.

—Mr. Geo Primeau, of this city, visited Lindsay yesterday.

—We are pleased to report that Mr. Isaac Dormer, who was operated upon at St. Joseph's Hospital, a short time ago, is now convalescent.

EVERYBODY READS THE TIMES

APPEAL TO MAYOR & COUNCIL

And Also to the President of the Board of Trade

To the Editor of The Times—

Sir,—We understand you have a water frontage situated and lying between Simcoe and Wolfe Street, upon the east bank of the Otonabee river. The writer is informed that there is about 17 acres more or less contained therein. I am representing the Anglo American Frog Hatching Canning and Exploration Syndicate, who are now about to extend their foreign connections which has been destroyed by the action of the United States Senate within the past few days by its abolition of a free import on frogs legs from Canada, the classification of chickens and singing birds with the said frogs legs making it prohibitory for us to do business from this side. The industry which we propose to establish here will be unique in many respects, being the only one of its kind on this continent or possibly on earth. The concessions required by us are modest and inexpensive. Will require a band stand built at the foot of Sherbrooke street, with accommodation for at least 50 men, and will also require the services of the City Band three nights in the week during the batching period, as frogs are more prolific under the influence of harmony. We will require a sluice or small lock to control and supply water as required. Other details in connection with the working out of the scheme can easily be arranged between your Engineer and ours, as the work progresses. The property formerly known as the bridge works we will have to ask you to donate us for the purpose of there establishing the frog canning department of our hatchery. The chimney will be very valuable to us as a watch tower when you will have spent a little money on it in placing therein port holes for long range and rapid fire guns and searchlights. There will be a little extra, or extraordinary, expenditure in connection with the guns, as each gun will require 40 mile field glasses by which to site them.

Have only given you rough outline of our requirements, as the matter will have to be gone over carefully by your Engineer and ours to work out the details of this stupendous proposition, which will mean to Peterborough the love and admiration of its progressive citizens, of its progressive Mayor, Council and Board of Trade, and an important place in history for all time.

THE A. A. F. O. & C. CO

A NEW ROUTE

The C.P.R. Will Carry Emigrants From Antwerp

Montreal, Feb. 27 —The Canadian Pacific Railway has issued a map in three colors showing the connections which the Atlantic steamers make with the railways of Central Europe.

In this connection it may be remarked that the company has now arranged to have all its continental immigrants embarked at Antwerp, which will save the cost of further transportation to Liverpool, as formerly.

The immigration this season will be very heavy, as many as 1,700 being now enroute for Europe. There will reach the Windsor station toward the end of the week.

A party of 250 passed through the city last evening, and another party of 150, mostly English, not a few of whom, judging by their khaki uniforms, had been in the South African war, yesterday morning.

KICKS UP

No Matter How Hard the Work

A young man who works his way through college is generally made of the [illegible] when he needs all his pluck and determination. A young man at Stanford University, Calif., says:

"Since the beginning of last term I obtained permission from the faculty to take examinations in several studies for advanced credit.

"Here was my chance to gain a semester by taking 4 or 5 examinations so I studied until I could not sleep nights, was nervous and excitable and 'blue' and my weight went down to 128 pounds. My breakfasts at the inn consisted of fried potatoes, hash, oatmeal or wheat mush, hot cakes with syrup and coffee, making me dizzy all the morning and I had sour stomach all day, but a friend of mine, an assistant in the Chemistry Department, told me that when he was studying hard last year he used the food Grape-Nuts with wonderful results explaining to me that in this food the starches are changed into Dextrose and Grape-Sugar by heating.

"That's all right, said I, 'but Grape-Nuts make me sick. I have only tried it once and then it was delicious but I could not eat anything for three meals afterwards.'

"'How much did you eat?' said my friend and I had to confess I had eaten nearly a whole box at one meal.

"'You ever ate enough for a dozen people' was his comment. 'Try it again but follow directions.'

"So, I left off eating at the Inn except for supper and at a grocery store in Palo Alto I bought several pkgs. of Grape-Nuts and ordered the milkman to leave half a pint of cream every morning.

"For breakfast I had four teaspoonfuls of Grape-Nuts with half the cream and some fruit. For dinner I had the same with occasional extras. The result was that at the beginning of the Christmas vacation I weighed 142 pounds as is proved by the gymnasium records. I passed all my examinations with a clear head, slept well and I had a feeling that I wanted to kick up my heels when I got out of bed in the morning. When I went home for Christmas everybody remarked how well I looked and I had been studying 15 hours a day.

"A club of five of us boys, all too poor to pay for board, have eaten in Harvey's room for the past month and everyone of the fellows feels more reserve energy than he has before this year and all attribute it to Grape-Nuts.

"I took dinner at Rev. Heber Newton's the other day. He is the pastor of the new Memorial Church and what do you think? He served Grape-Nuts!" Name given by Postum Co., Battle Creek, Mich.

Look in each pkg. for the famous little book, "The Road to Wellville."

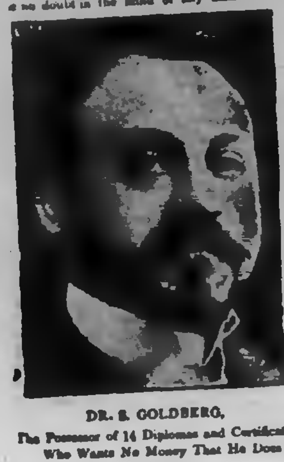
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room —, Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 27, 1904

THE NEUTRALITY OF CHINA

The success of Secretary Hay's plan for the neutralization of China now seems completely assured. All of the neutral powers have given their assent, and it is reported by the Associated Press correspondents at Tokio and St. Petersburg that the two belligerents also will accept it.

The reservations made by Russia concerning her leased territory in Manchuria—Port Arthur and Dalny—and concerning her treaty rights to maintain order by armed guards along the line of the Chinese eastern railways, do not seem to be detrimental to the arrangement. Japan's only reservation, we are told, is the right to counterbalance any action of Russia's in violation of the agreement.

It does not follow of course that China inside the great wall is absolutely secured from invasion by one or the other of the belligerents, but such invasion becomes highly improbable. Each belligerent will know that if it uses Chinese soil for the execution of a flank movement on the other, it will thereby forfeit the good will of the European-American concert of neutral powers. That good will is no flimsy thing to be lightly cast aside. It will of course have no effect on the actual outcome of the fighting, but it will play a most important part when victor and vanquished come to make their treaty of peace. The power that has violated the rules of the game, and been guilty, so to speak, of a "foul," may find itself deprived of the advantage it had gained thereby, for it will face an emphatic veto from the powers that are "keeping the ring." Thus the Hay proposal has very great inherent strength, despite the fact that there is no thought whatever of using armies to support it.

United States Secretary Hay has accomplished a fine work in the interests of world peace, for it is probable that no one of the European powers could have secured the general assent to any plan put forward directly by itself. It is specially fortunate that Secretary Hay has known how to take the essential step without making any engagement apt to embroil this country in a European struggle, should one unfortunately arise.

PEAT AS FUEL

The feasibility of using Canadian peat as a common fuel has been under consideration by the Ottawa Board of Trade. At a large meeting lately, Dr. Spencer, president of the Dominion Peat Products Co., delivered an address, impressing upon Canadians the necessity of securing and maintaining a constant supply of fuel in Canada. He referred to the situation a year ago, when the coal strike in the States was at its height and there was a local condition of affairs bordering on a fuel famine. Referring to the available supply of coal on this side of the line and particu- Scotia, Dr. Spencer said it could not be relied on to supply eastern consumers for the reason that the output was always placed some time ahead. Eastern mines are too far away and the most populous of the Provinces give no coal. Dependence therefore, upon the United States, Nova Scotia or British Columbia, is becoming a serious question. What has occurred may recur, and in the light of fuel getting dearer, wood scarcer, population larger and industries growing, it behooves Canada to look after its fuel supply. As regards peat, said Dr. Spencer, Providence has blessed Canada with an abundance both in area and quality. It compares favorably with that of any other country, and will make fuel equal in calorie energy and general usefulness to any other peat or coke. Reliable government statistics and other investigations show that there is from six to ten billion tons of peat fuel in Canada, and if this were sold at $2 per ton there is enough to last for many hundreds of years at present consumption.

Are You Troubled by Sleeplessness?

Over-wrough Nerves Cause the Trouble—Build Up, Fortify the Nervous System with Ferrozone—Then You Will Sleep Soundly.

There is probably no remedy that soothes the nerves and drives away those long nights of wakefulness like Ferrozone. Every person whose sleep is restless should take Ferrozone like Mr. J. H. McGaw, who writes from Saskatoon as follows:

"I was bothered with insomnia last summer to such an extent that my health almost broke down. I was frightfully nervous. If it had gone on much longer I would have been a physical wreck. I read about Ferrozone, and concluded it was the sort of remedy needed, I bought six boxes, and took one tablet with every meal. A change was at once noticeable, I no longer labored under such great mental excitement, and was able to take things more quietly. Ferrozone improved my digestion, I picked up in spirits and strength, and in a comparatively short time sleep came the minute my head touched the pillow. Ferrozone completely rehabilitated my system, and has made me a different sort of man altogether.

FERROZONE BRINGS RESTFUL SLEEP

Don't wait until your condition becomes nervous prostration; it's hard to cure. Take Ferrozone regularly and the cause of your sleepless nights will be removed. It always cures insomnia.

Ferrozone is the greatest health-giver, the most valuable tonic, that money can buy. It will bring you lasting strength, vigor and health, at small cost. Only Ferrozone can do this so be sure that no dishonest dealer substitutes something represented "just as good." No other remedy is so good as Ferrozone, price 50c. per box or six boxes for $2.50, at all druggists or N. C. Polson & Co., Kingston, Ont.

CHINESE SNUB RUSSIA

Open Defiance of Czar in Spite of Declaration for Neutrality

Tokio, Feb. 27.—Advices to the Japanese government from Pekin say that while at Moukden Viceroy Alexieff asked the Chinese troops to aid in guarding the railway so as to prevent the interruption of traffic. The Chinese refused the request and asked for instructions from Pekin. The Chinese government told them to inform Alexieff that as Russia had insisted that the Chinese were unable to guard the railway in time of peace surely Russia could not expect them to guard it in time of war.

The Toronto General Trusts Corporation.

PROCEEDINGS AT THE ANNUAL GENERAL MEETING.

The Fifth Annual Meeting of the Shareholders of the Toronto General Trusts Corporation (being the twenty-second of the Toronto General Trusts Company) was held in the Board Room of the Corporation on the corner of Yonge and Colborne streets, Toronto, on Wednesday, the 24th February, 1904. There were present—

Thomas Long, W. D. Matthews, Britton Osler, J. G. Scott, K.C., John Paton, George Porter, A. B. Lee, E. T. Malone, K.C., E. H. Bickford, E. B. Osler, M.P., F. C. Jarvis, J. W. Digby, M.D., J. J. Kenny, Alex Smith, James Henderson, Edward Galley, B. E. Bull, A. L. Crossin, Samuel Nordheimer, John Foy, A. L. Malone, T. Sutherland Stayner, J. J. Foy, K.C., E. R. Greig, George E. Dunbar, H. B. Hodgins, A. H. S. Marks, J. A. McEvoy, Thomas Paterson, R. S. Schell, John L. Blaikie, Aemilius Irving, K.C., Hon. S. C. Wood, W. H. Beatty, K.C., John Hoskin, K.C., LL.D., J. W. Langmuir, A. D. Langmuir, and others.

The President, Dr. Hoskin, took the chair, and Mr. A. D. Langmuir, the Assistant Manager, was appointed to act as Secretary.

The various Financial Statements, showing the operations of the Corporation for the year ended 31st December, 1903, were submitted by the Managing Director, Mr. J. W. Langmuir, and were respectively commented upon by him.

The report of the Directors for the year was then read, as follows;—

FIFTH ANNUAL REPORT OF THE DIRECTORS OF THE TORONTO GENERAL TRUST CORPORATION FOR THE YEAR ENDED 31st DECEMBER 1903.

To the Shareholders;—

Your Directors have pleasure in submitting the Fifth Annual Report of the Toronto General Trusts Corporation (being the twenty-second of the Toronto General Trusts Company), accompanied by the Profit and Loss Account and the various Financial Statements, showing the results of the operations of the Corporation for the year ending 31st December, 1903.

During the year new estates and business have been placed under the care of the Corporation to the extent of $3,001,088.11, as follows;—

Executorships	$ 405,958 44
Administrations	414,428 25
Trusteeships	1,137,428 12
Investment Agencies	400,000 00
Estate Agencies	201,075 81
Guaranteed Mortgage Investment Agencies	172,512 47
Committeeships	15,289 61
Guardianships	136,283 96
Receiverships	64,177 93
Lunatic Estate Agencies	29,096 13
Liquidatorships	24,837 39
Total	$3,001,088 11

In addition to the foregoing the Corporation has been appointed trustee for the issue and certification of debentures, registrar of stocks and bonds and transfer agent, aggregating transactions of a large amount, but in respect of which class of work the only responsibility which rests on the Corporation is the exercise of great care and systematic attention.

Your Directors had under consideration in the early part of the year the opening of a branch of the Corporation's business in the City of Ottawa. To that end steps were about to be taken to secure suitable premises, when information was received that the assets and business of the Ottawa Trust and Deposit Company, which had been in existence in that city for about five years, might be acquired on fair terms. Negotiations were opened, resulting in the acquirement of that Company, with all its assets and good will. As the Ottawa Company had power to transact business in the Province of Quebec, and had several unadministered estates in that Province, application has been made to the Legislature for a charter to issue to the Corporation. Your Directors also considered it advisable, both for loaning and estate purposes, to obtain a charter to transact business in the North-West Territories, which has been granted during the year. It will thus be seen that as soon as the Quebec charter is obtained the Corporation will have the necessary statutory authority to transact business in Ontario, Quebec, Manitoba and the North-West Territories. These branches will at the outset considerably increase the general expenses of management, but it is expected that they will soon prove largely remunerative.

An examination of the Profit and Loss sheet, herewith submitted shows that the gross revenue from the various departments of the Corporation's work and investments amount of $212,875.24, and after deducting the cost of management, including salaries, rent, taxes, Directors' and Auditors' fees, commissions for obtaining loans, and all other expenses at the Head Office in Toronto, and the branches at Winnipeg and Ottawa, and also all the preliminary expenses connected with the taking over of the Ottawa Branch, the net profits for the year amounted to $96,800.69. Out of these profits your Directors declared and have paid two semi-annual dividends at the rate of 7 1-2 per cent. per annum, amounting to $75,000; have written off the building and vault account the sum of $3,632.60, and have added 10,000 to the Reserve (thus increasing that fund to $300,000), carrying forward the sum of $8,168.09 to the credit of Profit and Loss Account.

All of which is respectfully submitted.

(Signed) J. W. LANGMUIR, Managing Director.
(Signed) JOHN HOSKIN, President.

Toronto, Feb. 24th, 1904

PROFIT AND LOSS STATEMENT FOR THE YEAR ENDED DECEMBER 31st 1903.

To salaries, rents, Provincial tax and office expenses at Toronto, Ottawa and Winnipeg, including preliminary expenses of organization at Ottawa	$88097 50	By balance brought forward from December 31st, 1902	$ 4,025 45
		Less vote of shareholders to Auditors for services for year ended December 31st, 1902	2,600 00
			$ 1,425 45
To fees paid President, Vice-Presidents, Directors, Advisory Boards and Inspection Committees	11036 80	By commission earned for management of estates, collection of revenue, etc.	98,423 32
To commission on capital loans, inspection of loans, and expenses for superintendence of properties and collection of rents	14131 05	By interest earned	94,261 30
To interest on mortgage on corporation's buildings at Ottawa	2800 00	By net rents from corporation's Buildings	9,037 99
To balance carried down	96800 69	By net rents from safe deposit vaults	4,727 18
		By profit on purchase and sale of municipal debentures under guarantee of the corporation	5,000 00
	$212875 24		$212,875 24
To Dividends Nos. 9 and 10	$75,000 00	By balance brought down	$96,800 69
To written off the corporation's safe deposit vaults	3,632 60		
To carried to reserve fund	10,000 00		
To balance carried forward	8,168 09		
	$ 96,800 69		$96,800 69

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of the Toronto General Trusts Corporation to the 31st December, 1903, and find the same to be correct and properly set forth in the above statement of Profit and Loss. We have examined and found in order all the mortgages, debentures, bonds and scrip of the Corporation, as well as those negotiated for the Supreme Court of Judicature for Ontario and trusts, estates and agencies in the Corporation's hands, and have checked same with the mortgage and debenture ledgers.

The bankers' balances, after deducting outstanding cheques, agree with the books of the Corporation. We have also examined the reports of the Auditors of the Winnipeg and Ottawa branches, and find that they agree with the Head Office books.

(Signed) R. F. SPENCE, F.C.A., (Can.), JOHN M. MARTIN, F.C.A., Auditors.

The President, DR. HOSKIN, in moving the adoption of the report, said:—

In moving the adoption of the Report, I think it will only be necessary to call attention to one or two points. The Profit and Loss sheet accompanying the report is so plain and so detailed that extended remarks are necessary.

The year's work has been normal in volume and character. We have had no unusually large items of revenue as in some previous years. The commissions for the management of estates were in round figures $100,000, but the simple statement of this fact gives an exceedingly meagre idea of the very great "care, pains, and trouble" involved in the getting of that sum in items of from one dollar upwards. Perhaps you may form an idea of this work (although I am sure it will be a very inadequate one) when I tell you that we have about 2,000 estates, large and small, to look after, and some of the small ones with assets under $10,000 give as much and frequently more trouble than an estate of a quarter of a million. In Britain, or the United States, with their great accumulations of wealth the commissions we have earned for the year might have been obtained out of half a dozen estates, but we cannot look for that yet in Canada. In the meantime the expenses of management are necessarily large, and perhaps out of proportion to the revenue derived from commissions.

This Corporation has in its control mortgages, debentures, real estate and other securities aggregating over $25,000,000, thus exceeding in value the assets of any loan company in Canada, and the bookkeeping, care and management connected with the administration of this large volume of business is no less, but probably greater, than that connected with the management of a company lending money similar in amount simply on real estate and debenture securities.

I may here repeat what I have so often stated, that every succeeding year adds to the confidence I have in the future of this corporation. This year there has come under our care $3,000,000 of new estates and there is no doubt that in the course of a few years we shall have double the volume of assets committed to our care, and with a few additional clerks, it will be just as easy, so far as clerical work is concerned, to manage an additional $10,000,000.

You must always bear in mind that the revenue of a Trusts Corporation, managed on the lines that your Directors have adopted, and religiously adhered to must be limited. We depend entirely on commissions earned and the investment of our capital and surplus. We scrupulously avoid speculation of every kind, no matter how tempting, we underwrite neither bond nor stock issues, nor guarantee the interest on such issues. We do not take deposits, which we are constantly asked to accept, as the investment of moneys received in this way would cast upon the Corporation the burden of looking after such investments to the detriment of our trust funds to care for which is our first duty. In short, the Corporation strictly confines itself to the performance of the duties of a corporate executor, administrator, trustee, etc., and we, your Directors, are fully convinced that a testator will be consulting the best interests of the beneficiaries of his estate, in appointing such a Corporation as ours instead of an individual executor, trustee, etc., and the superiority of a corporation over an individual executor, trustee, etc., must be apparent to all in the creation of trusts for the benefit more particularly of widows, minor children and female members of families.

I have often referred to the many obvious advantages existing in favor of creators of trusts, and of those who are the objects of the trusts, by the appointment of the Corporation, that I need not refer to them anew. Two, however, emphasize themselves so pronouncedly that I may be pardoned for adverting to them again, namely (1) the benefits that accrue to all concerned when they appoint a Trusts Company, in that they are thereby free from the annoying anxiety and disagreeable results which arise from the conduct of defaulting executors and trustees. Those who have read the newspapers during the past year will not have failed to note what has transpired in this respect, and cannot but see the force of what I say. Second, the costs of administration of estates by the Corporation are much less in the aggregate than the charges made by private individuals, and the papers on the files of the courts will substantiate what I say. Now and again we hear statements to the contrary—unsupported, however, by facts, emanating from those who desire to secure the control themselves. You can readily understand how persons such as those to whom I have referred will leave no stone unturned, however false and unjust it may be, to accomplish their end. I could tell you of many instances where those interested would be delighted today to pay the Corporation ten times their charge if their estates had originally been placed in our hands.

The Profit and Loss sheet accompanying the Report is so plain and so detailed that remarks thereon are scarcely necessary. Our net profits are not so great this year, because out of them we have paid all the preliminary expenses of opening our branch in Ottawa, and we have also paid all commissions connected with the large loaning business that we are now carrying on in Manitoba. In this connection I may also state that the cost of reconstructing our Head Office building has been nearly all paid off out of profits during the past five years. Notwithstanding these abnormal drafts upon our profit during the past year, we have paid our shareholders a dividend of 7 1-2 per cent, amounting to $75,000, we have written off our vaults $3,632.60, we have placed $10,000 to our Reserve account, which now stands at $300,000, and we have carried forward to the credit of Profit and Loss $8,168.09. Upon the whole, therefore, I think we should be fairly satisfied with the operations of the year.

It is with pleasure I convey to you the appreciation of your Directors of the zeal, diligence and faithfulness of the staff in the discharge of their varied duties. Formerly this reference was confined to the staff of what is now known as the Head Office, but we have extended our borders, and have branches at Winnipeg and Ottawa, under the care and supervision of Advisory Boards and Branch Managers. These Advisory Boards, comprising gentlemen of high standing in the community, are entitled to the hearty thanks of the Shareholders, for the interest they take in the affairs of the Corporation, and for the ability displayed in the management of matters coming under their direction. And these observations apply equally to the respective Branch Managers, namely, Mr. Davy, at Winnipeg, and Mr. Chamberlain at Ottawa. In this connection now as in the past, prominently stands forth our Managing Director, Mr. Langmuir, who, I know, dislikes to have any remarks made about him, and who is ignorant of my intention to make this reference. Only those who come in contact with him from day to day can understand how much he does (I wish he would do less), and what he endures, and how much at heart he has the interests of the corporation. I beg to move the adoption of the report.

In seconding the adoption of the Report said.

HON. S. C. WOOD, Vice-President.

In seconding the adoption of the Report, I have very little to add to what has been so fully and so well said by the President. Now that the Corporation is so well established, its objects so thoroughly well known, and its appreciation by the public becoming so general, it is perhaps unnecessary to reiterate these facts at every annual meeting. There is just, however, one point, and a most important one, that I would like very briefly to refer to, that is the great superiority in every respect of the Corporation over an individual executor and trustee. Dr. Hoskin has stated this to you from the standpoint of a lawyer. I do so from that of a business man. First, the Corporation has a Board of Directors comprising lawyers, presidents and directors of banks, loan associations and insurance companies, railway directors, merchants and capitalists. Surely the combined talent and experience of these gentlemen is infinitely better than that of any individual executor or trustee. Second, the supervision and management of estates placed with the Corporation, be they big or little, is methodical and systematic, and the exact terms of a will or a trust are carried out to the very letter. Testators and creators of trusts can rest assured of this, which we all know is not always done by individual executors and trustees. Third, mortgage and other investments for estate or trust funds are passed upon by the Board in every case and the varied and extensive knowledge of each member of the Board is brought to bear in deciding whether the proposed investment is an absolutely safe one before it is passed and no mortgage is passed without personal inspection and valuation. We all know that this cannot be done by individual executors and trustees, however, able they may be. Fourth, there is a committee of the Board whose duty it is to inspect the work done by the Board, and to see that its instructions have been faithfully carried out by the staff and who also must see every security belonging to a trust, and make a report back to the Board that it has done so. My friend, Mr. Beatty, will doubtless tell you how carefully this work has been done. We all know, some of us too well, how wreck and ruin have been brought upon families by neglect of this by individual executors and trustees. Fifth, every security is ear-marked in the books of the Corporation to the estate to which it belongs, and is the property of the estate or trust as much as if the security had been negotiated and paid for by the testator or creator of the trust. Sixth, the commissions paid to the Corporation are no greater, if they are as much, as are paid to individual executors and trustees.

These facts connected with the Corporation, I am sure, in the making of wills and trusts are not sufficiently well known to the public, and I feel assured that it is only necessary that they should be known in order to be appreciated and acted upon.

The Report of the Directors was adopted, as well as the Report of the Inspection Committee, as presented by the Chairman, Mr. W. H. Beatty.

Certain By-laws and amendments to By-laws were confirmed.

The following Auditors were appointed for the year 1904:—For the Head Office—Messrs. R. F. Spence, F.C.A., and J. M. Martin, F.C.A. For the Winnipeg Branch—Mr. P. A. McDonald. For the Ottawa Branch—Messrs. J. S. Chamberlain and J. H. Thompson.

The following shareholders were re-elected Directors for the ensuing year—John Hoskin, K.C., LL.D., Hon. S. C. Wood, W. H. Beatty, John Bell, K.C., John L. Blaikie, W. R. Brock, M.P., J. W. Digby, M.D., J. J. Foy, K.C., M.P.P., John Foy, Geo. A. Cox, T. Fulford, George Gooderham, Wm. Hendrie, Aemilius Irving, K.C., Robert Jaffray, J. J. Kenny, J. W. Langmuir, A. B. Lee, Thos. Long, W. D. Matthews, Hon. Peter McLaren, E. B. Osler, M.P., J. G. Scott, K.C., T. Sutherland Stayner, Byron E. Walker and D. R. Wilkie.

At a subsequent meeting of the Board Dr. John Hoskin, K.C., was re-elected President, and the Hon. S. C. Wood and Mr. W. H. Beatty, Vice-Presidents. The Executive Committee was re-elected, and Mr. W. H. Beatty, Mr. Aemilius Irving, K.C., and Mr. John L. Blaikie were appointed the Inspection Committee.

The following Advisory Boards were appointed—For the Ottawa Branch—the Hon. W. C. Edwards (Chairman), Messrs. Geo. P. Brophy, C. A. Douglas, Geo. Burn, W. D. Hogg, K.C., Capt. J. L. Murphy, J. B. Fraser, James Gillies, Hiram Robinson, and Peter Whelen. For the Manitoba Branch—the Hon. Sir Daniel H. McMillan, Messrs. D. W. Bole, A. M. Nanton and H. H. Smith.

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-22-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore-bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

GREAT BRITAIN IS READY TO SUPPORT JAPAN

King Edward Sends Empathic Intimation to the Czar

London, Feb. 25.—The Daily News, which lately boomed the departure of Count Beckendorff, the Russian Ambassador, last Saturday for St. Petersburg as connected with King Edward's alleged active efforts to bring about the restoration of peace, now professes to know the real reason for the Ambassador's sudden visit to the Czar, which it says was one of the causes for the panic on the Paris Bourse.

The reason for Count Benckendorff's visit, according to the News, was a question of his position as Russia's legitimate representative in Great Britain. There have been for some time other Russian representatives in London, making Count Benckendorff's task most difficult. These are Mme de Novikoff, the celebrated writer on Russian politics, and Baron Wessilitsky, formerly in the Russian Diplomatic Service, and now correspondent of the Novoe Vremya. They are emissaries of M. Pobiendonostzeff, Procurer-General of the Holy Russian Synod, whose immense power and influence in Russia are notorious. Their duty has been to watch Count Benckendorff, whose diplomatic [illegible] they have long made thorn

Their reports so conflicted with the Ambassador's that Count Lamsdorff, the Russian Foreign Minister was ultimately unable to convince the Czar they were wrong. They insisted that Great Britain would not fulfil her pledges to Japan in the event of war, while their co-agents in Paris concurrently insisted that Japan was bluffing.

Britain is Emphatic.

Their intrigues led to Prime Minister Balfour's public declaration that Great Britain would observe the terms of her alliance with Japan, which was intended not only to enlighten M. Pobiendonostzeff's pan-Slavist agents in London, but their friends in Paris, who, co-operating with Count du Mun, were trying to make impossible the position of Foreign Minister Delcasse because he declined to abandon an attitude of strict neutrality.

The intrigues were brought to King Edward's notice by a very high French politician. His Majesty therefore asked Count Benckendorff to make it thoroughly understood in St. Petersburg that any move of France outside the strictest neutrality, would bring Great Britain into the field, alongside of Japan. "At this moment," adds the News, "the success of Count Benckendorff's mission, on which may depend not only the limitation of the war, but European complications over the Balkan question remains doubtful."

London, Feb. 25.—The correspondent of the Times at Pekin says Viceroy Alexieff has issued the following proclamation to the people of Manchuria: "War having commenced between Japan and Russia, I, Imperially appointed by the great Russian Government the high officer in charge in the Far East, have determined upon six regulations, which all must tremblingly obey.

1. While peaceful negotiations were proceeding between Russia and Japan, the Japanese, harboring unexpected thoughts, made a treacherous and covert attack upon our fleet. Forced by circumstances of no great difficulty, it is incumbent upon us to offer a desperate resistance, to protect Chinese territory from invasion, and to prevent the Japanese from passing over it to devastate the Russian boundary.

CHINA'S NEUTRALITY

2. On this occasion the interests of Russia and Japan are indissolubly allied, and on the principle of mutual connection, of propriety, and of duty, China should join in attacking and destroying the invaders. But China has announced to me her resolve to remain neutral and to look on with her hands in her sleeves. Accordingly, I command every official in Manchuria not only not to hinder our troops whether on the march or in garrison, from purchasing whatever provisions are necessary, but also to render them every possible assistance.

3. All the inhabitants of Manchuria, the gentry, agriculturists, workmen and merchants, must continue their vocations as usual. When Russian troops enter your neighborhood you must treat them with confidence, and they will not ill-treat you, but accord you extra protection.

4. I hold all virtuous citizens residing in the neighborhood of the Manchurian railroads, the telegraph and telephone wires, responsible for their protection. The official head men and village elders must unanimously devise means to prevent damage to them. For this I shall be grateful. Should attempts at destruction be made, not only will the offenders be severely punished, but you, the officials proper, who witnessed the attempts, will be held responsible.

BRIGANDS TO BE EXTERMINATED

5. The Chunchuses, the red bearded brigands, are the curse of Manchuria. The Russian army desires to exterminate them. Be not afraid of their vengeance but learn in which thicket the desperadoes are assembling, and give information, so that they may be utterly destroyed. Anybody privily harboring desperadoes or concealing their hiding places will be punished as if he were a desperado himself.

6. I earnestly trust that the people will extend unanimous confidence to the Russian army. If the officials or people treat with enmity the Russian army, the Russian Government will assuredly exterminate those persons, showing them no mercy. When the time comes the Russian Government will devise a suitable policy to protect their interests."

LIPTON'S TEA

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

PRETENDER'S SON GOES

Before Leaving for the Front He was Blessed by the Pope

Rome, Feb. 24.—Don Jaime, of Bourbon, son of Don Carlos, the Spanish pretender, having asked the Czar to be sent to the scene of action in the Far East, has come to Rome, and was received yesterday by the Pope in private audience. Don Jaime entered the presence of the Pontiff in full Hussar uniform, and wearing the decorations he gained in the last Chinese war under Admiral Alexieff. The Pope received him cordially, gave him his benediction, wished him good luck and asked him to do whatever lay in his power for the protection of Roman Catholics in the Far East.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.65 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed and is in possession of the properties and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and add p into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

MUST AID RUSSIAN ARMY UNDER PAIN OF DEATH

Tokio, Feb. 26.—Delayed in transmission.—Advices are hourly anticipated here of the third naval engagement which has taken place at Port Arthur. It was known that the fleet under command of Admiral Togo had been in motion, but the nature of the operation about to be undertaken had not been disclosed to the Navy Department. The latter admits anticipating information, but says it does not expect to receive any before Wednesday.

It is thought here that Admiral Togo first attacked with his torpedo boats and then shelled Port Arthur. The opinion expressed by the Foreign Minister here, however, almost united against the ability of the Japanese ships to shell the place without dangerous exposure to the heavy guns of the shore batteries.

The Japanese, however, are confident that the place is vulnerable at three points on the sea side, and in proof of their opinions is the explosion of a number of shells in the town on the occasion of the recent night fight. The Japanese once possessed Port Arthur, and they have the most complete information in regard to distances and ranges. 'A bombardment of the place would prove highly destructive, as it is narrow and cramped. A few shells thrown over the hills into the basin holding the bay and town could not fail to do serious execution. The Japanese shells are charged with a high explosive, and are very effective, and it is believed possible to render the harbor untenable for Russian warships by bombardment, and force them to put to sea and [illegible] in the open.

It is thought here that the withdrawal of Admiral Alexieff from Port Arthur and the removal of headquarters and records to Harbin is an admission of the weakness of the place, and of its inability to make a sustained defence. It is believed that the Japanese intend to make a vigorous onslaught on Port Arthur. Its possession would deprive the Russians of a naval base, and insure the Japanese a base for future operations on the Liao Tung Peninsula.

Paris, Feb. 25.—Additional details of the Japanese attempt to close the entrance of the harbor of Port Arthur have been received from most authoritative quarters. These say that the Japanese sent five or six old transport hulks, convoyed by torpedo boats, to Port Arthur, with the evident purpose of sinking the hulks at the entrance [illegible]. The battleship Retvizan discovered their approach, and her fire on them was strongly seconded by that of the shore battery north of Port Arthur. The report adds that two Japanese ships were wrecked and lie in Tiger Bay, that along the shore another Japanese ship was burned, and that a fourth lies wrecked on the shore outside Tiger Bay. It is believed that these wrecks are not warships, but hulks designed to be sunk at the entrance of the harbor. The wrecks are said to be at considerable distance from the harbor entrance, which remains open.

This report gives no information concerning the Japanese fleet, which is said to have supported the operations against Port Arthur.

New York, Feb. 25.—A despatch from Washington to the Herald says of the Japan treaty with Corea: "There is much anxiety to see how Russia's ally, France, will accept this Oriental alliance against Russia. Corea is not a strong power, but it is pointed out her assistance to Japan may easily assume substantial proportions. The Japanese are expected to undertake the control of the Corean army which can easily be recruited up to a strength of 30,000 men. Officered by Japanese, this force might be sufficient menace to Russia to cause France to protest that the principle of confining the struggle to the two powers, Russia and Japan, was violated. The note which Mr. Hay sent to the powers indicated that the purpose of uniting for the preservation of China's neutrality was to prevent more powers being involved."

New York, Feb. 25.—According to a cable from Chefoo to the World, Manchuria is rising against the Russians. Five thousand Russian troops have been moved from Mukden to Sunnintung because in the villages along the west side of Liaotung peninsula the natives are making active preparations to cut off small bodies of Russian troops there.

Ten thousand Manchurians have already been enrolled in the movement which is spreading. Volunteers are plenty; there is no lack of ammunition or money, for the patriotic rich are subscribing.

JOS. KENNEDY ON TRIAL

FOR THE MURDER OF IRENE COLE AT BRANTFORD

A Jury Has Been Selected and the Prisoner Will Probably Know His Fate To-Day.

Brantford, Feb. 24.—In the trial of Joseph Kennedy yesterday afternoon on the charge of murdering Irene Cole, the 8-year-old girl, though no new evidence was produced, much progress was made by the Crown in the matter of witnesses called. No less than 20 persons told stories substantially the same as at the coroner's inquest. At the present rate of progress the Crown should be able to rest its case this evening.

The evidence brought out yesterday located Kennedy in the vicinity of the Willows before and after the time when the crime was committed. Bertha Potter, a little girl who lives next door to the Cole home, stated that she saw Kennedy on the dyke at noon of the day of the murder, beckoning in the direction of the Cole residence. Afterwards she saw the man disappear down the side of the dyke. The girl's mother was also called, and stated that she saw Kennedy there at the same time. She was within about twenty yards of him. Several witnesses swore that they saw Kennedy near the Willows on the afternoon of the crime, and a couple of corporation teamsters who were drawing gravel from a pit in the Willows stated that they met the prisoner coming away from there.

THE CHICKEN EPISODE.

The second day's proceedings in the trial saw continued progress in the case of the Crown. Fifteen witnesses were called this morning up to the hour of adjournment at one o'clock. The evidence yesterday traced the movements of the prisoner on the morning and afternoon of the crime, and wove a close net of circumstantial evidence about him. To-day's testimony dealt principally with the chicken episode, which gave promise to be an important factor in the case.

Subsequent to his arrest Kennedy admitted to Sergt. Wallace of the police force that he had been on the dyke as stated by the Potter witnesses, and had also been at the Willows on the afternoon of the crime. He accounted for the blood spots on his clothing at the time of arrest by stating that while in the Willows he tripped and fell on a chicken which he was carrying in a bag, and as a result the bird had been crushed and he had got blood on his clothes. This morning Mrs Howe, her son and husband testified that Kennedy bought a chicken from her on the morning of September 29, the day before the crime. He was drunk at the time and said he had a little girl who had been teasing him to buy a chicken for her as a pet. The same chicken had been found dead in the Willows near the scene of the crime on the morning following the murder. She subsequently identified it at the Police Court.

TRACING THE TRIAL.

In detail the Crown endeavored to trace the prisoner's movements on the morning of the murder and the previous afternoon. Between 2.30 and 4 on the afternoon he was in the bar and pool room of the Kerby House, and had the chicken with him. Again, on the morning following, the day of the tragedy, he was seen by Samuel Hobson, Oscar Johnson, two Colborne street merchants, who said he was carrying a bag with something in it. A bag was also found in the Willows after the crime, and Mrs. Howe identified this as being the one which she gave Kennedy in which to carry off the bird. She identified it because of a hole in it, which she told Kennedy would admit sufficient air to keep the bird alive.

Scarecrows.

The term is almost a misnomer, nowadays. For the "century-living crow" has been schooled by experience. The scarecrow doesn't scare him. Investigating ornithologists say that he can tell a gun from a stick and can count up to seven. Evidently the crow has progressed from the ignorance of his ancestry.

The crow is in some things in advance of the human family. There are scarecrows which scared our grandfathers, and which are just as fearsome to us. In spite of the fact that some scientific investigators say, "There's nothing to be afraid of. A scarecrow can't hurt you," the bulk of men and women still believe the scarecrow is a powerful and destroying fetish.

This attitude is most marked in relation to certain forms of disease. In diseases of the lungs and respiratory organs, for instance, it is the custom to assume that there is no cure for the cough, no help for the hemorrhage, no healing for the lungs. The scarecrow, Consumption, is set up, often taking the form of some inexperienced and unskillful practitioner who denies hope or help to the victim of disease.

Yet the records go to show that stubborn coughs have been cured, that persistent hemorrhages have been stopped, and that weak lungs have been made strong by the use of Dr. Pierce's Golden Medical Discovery.

TESTIMONY TALKS.

All the claims in the world for the curative virtues of a medicine will not equal one testimony to the actual fact of cure. Thousands of testimonials like the following have been received from persons cured of lung "troubles," bronchitis, hemorrhage, obstinate coughs, etc., by "Golden Medical Discovery:"

"I was very sick indeed," writes Mrs. Mollie [illegible], of Felton, Kent Co., Delaware, "and my family doctor said I had consumption. I thought I must die soon, for I felt so awfully bad. Had a bad cough, spit blood, was very short of breath; in fact, could hardly get my breath at all sometimes. I had pains in my chest and right lung, also had dyspepsia. Before I took your 'Golden Medical Discovery' and 'Pleasant Pellets' I was so weak I could not sweep a room, and now I can do a small washing. I worked in the canning factory this fall, and I feel like a new person. I thank the good Lord, and also Dr. Pierce for making such good medicine. I believe that the Lord and your good medicine have saved my life. I was sick over two years. I took [illegible] bottles of 'Golden Medical Discovery,' and four vials of Doctor Pierce's Pellets."

There is no alcohol in "Golden Medical Discovery," and it is entirely free from opium, cocaine, and all other narcotics.

Sometimes a dealer will offer a substitute for the "Discovery," claiming it to be "just as good." The substitute pays him more profit, that's why. Protect yourself from unscrupulous dealers by insisting on Dr. Pierce's Golden Medical Discovery.

31 CENTS' WORTH

Of knowledge wouldn't amount to much, you'd think. But for just 31 cents invested in one-cent stamps (to pay expense of mailing only), you can obtain knowledge which it has taken hundreds of years and millions of money to acquire. Dr. Pierce's Common Sense Medical Adviser covers the field of medicine and hygiene from the day of Adam to the present hour. [illegible]

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Compa
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:
J. R. CHAPTON, - - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer

Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated un the laws of the State of Nevada with a capital of $200,000, divid into 200,000 shares of the par value of $1 each, fully paid and forever no assessable.

Every safeguard to the stockholders which the most eminent leg talent could suggest has been taken advantage of in the organization of th company, so that the private property of the stockholders can never becor liable for the debts of the corporation, and that every stockholder may fe secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,0 shares have been issued in part payment for the mines. This left 120,0 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shar in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock a $1.00 per share. The sale of this 50,000 shares will place in the treasur sufficient funds to finish the construction of a 50-ton plant and leave severa thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanid plant as soon as treasury will permit from the sale of the 500,00 shares o the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine – Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

PROSPFCTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000   80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 6.02 ozs.; Silver 92 40 ozs. Total value $92.00. Value of ore in main vein ie the shaft end growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money a ready expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address,

GEO. W. E. DORSEY, President,
Boise City, Idaho.

Peterborough.

The Girls of France.

Mr. H. B. Marriott Watson, the novelist, complains of the decadence of the "American girl," owing to idleness and lack of aim. Mrs. Philip Gilbert Hamerton brings the same indictment against the girls of France. Forty years ago, she writes, the French girl was modest, retiring, simple in dress, diffident in talk, and respectfully obedient to her parents—either from natural bent and the powerful influence of her surroundings, or through the discipline of education and the weight of public opinion in her own country. That some French girls were by nature coquettish, fond of finery and show, impatient of restraint and control, cannot be doubted, but when these tendencies did exist they had to be carefully hidden behind the outward appearance of a willing and contented self-effacement in all circumstances by every girl who wished to be thought "bien elevee." For the slightest deviation from this strict rule was sufficient to mark her as "mal elevee," and to banish her from the intimacy of all friends who wished to be "comme il faut." To-day, Mrs. Hamerton says, the modern French girl would be astonished were she told not to take the leading part in conversation, not to giggle loudly, not to set her arms akimbo, and never to talk privately with a young gentleman. "She would think," adds Mrs. Hamerton, "that such recommendations were perfectly ridiculous as preventing all possible flirtations, for the art of flirtation is never at its best unless practised in private. But forty years ago, when parents deemed that marriage was not a proper subject for the thoughts of their daughters, flirtation—even as a word—was unknown in France. At that time simplicity in dress was the order of the day for young maidens, and even conferred a certain distinction, being carried as far as possible among the aristocracy. There were special light silks and inexpensive trinkets for jeunes filles, set with corals, enamels, and pearls, among which the tiniest of diamonds would never have been tolerated any more than costly laces, furs, or elaborate trimmings. At a glance it was easy to ascertain by the style of dress whether a young woman was married or not, whereas it is not by any means so easy now, the same satins, velvets, feathers, and jewels being worn alike in both cases. And it is not any easier to guess from the behavior in society, for it may happen that the conversation is taken up and carried on by the girls in their desire to shine and to attract attention—the married ladies being silenced and ignored in the midst of the excitement and amusement artfully created by free sallies, unrestrained laughter, and much attitudinizing. No doubt the conventional restrictions of forty years ago were somewhat excessive, and kept French girls till after marriage in a state of prolonged childhood; nevertheless, it remains to be seen whether the rapid change which has supervened is a real gain, for if it has remedied some evils of the old system, it has also engendered new ones, and on that account many thoughtful French parents are now seriously disquieted about the future of their daughters."

London to Have a Gay Winter.

The social outlook for the winter season in London is most promising now that the English royal family is out of mourning, and King Edward and Queen Alexandra have begun to entertain lavishly. The sisters of the King are also throwing off the mantle of sorrow. The papers comment enthusiastically on the recent brilliant dinner-party, followed by a ball, given on the Isle of Wight by Princess Beatrice, the widow of Prince Henry of Battenberg, the handsomest of all the "handsome Battenbergs." Her mourning for Prince Henry has been long and sorrowful, but she would have emerged sooner from the gloom that enshrouded her life for so many years had she been less the principal companion of Queen Victoria, and been allowed to follow the natural bent of her years, for of all the children of the late Queen there are none that seemingly love the pleasant things of this world more than her eldest son, King Edward, and her youngest daughter, Beatrice. According to the London correspondent of the New York "Herald," she is far more attractive than some of the younger members of the royal family in manner and appearance, although prone to stoutness, like Princess Christian, her eldest sister now living, and of late also the dispenser of considerable hospitality at her new, beautiful town house in Pall Mall. The most attractive of the King's sisters is Princess Louise, Duchess of Argyll, whose London residence is Kensington Palace, where her youngest sister, Princess Beatrice, has also had willed to her for life a suite of spacious apartments. Princess Louise has never acted as hostess to any great extent, and even since the accession of her husband as the sixth Duke of Argyll (who has nearly a dozen other hereditary titles in addition, and innumerable posts that increase his income), the expenditure of Princess Louise for purely social hospitality is very limited, both in London and at her Scottish seats.

Power of a Remark Overheard.

A man waiting patiently at the glove counter of a New York department store heard one young shopwoman say to another, as she handed down a box of gloves: "Maria told him downright she'd have nothing more to do with him; and she called him a poison-faced adder, he gripped her in the waltz that scandalous." This was all! Customers clamored for attention, and the confidence ceased at this point. But the force and richness of the language, the liveliness of the allusion, captivated the hearer's soul. He confessed that, for years afterwards, when he was waltzing with decorous reluctance under the compelling eye of his hostess, memories of Maria's partner would assail him, and he would find himself envying the adder the mysterious nature of his enthusiasm.—New York "Life."

Wasted Indignation.

"Let me see," said the minister, as he was making out the baptismal certificate, "this is the thirteenth, isn't it?"

"The thirteenth," exclaimed the indignant mother, "indeed, but it's only the seventh, and would have been the sixth, only two of 'em were twins."

"The thirteenth—of September," said the minister, mildly, and peace was restored.—Ex.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of 3[illegible] acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 100 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

WANTED—GOOD AGENTS IN EVERY CITY,

Catarrh Leads to Consumption

The Experience of a Lady in Sydney Who was Cured of Consumption by Inhaling Catarrhozone — This Case Should Warn Others.

"The beginning of my trouble was a cold just a single cold," writes Mrs. R. V. Thorburn, of Sydney. "I neglected this cold and then I got catarrh. When it became troublesome I took some medicine but it didn't help me. I began to cough a great deal and then consulted a doctor. I was horrified to find I must have had tubercular irritation in my lungs for a year or more. A friend strongly urged me to use Catarrhozone. I conferred with my doctor and he said that lots of fresh air and the frequent use of Catarrhozone would be the proper treatment. I used to cough for at least half an hour in the morning but after using Catarrhozone a few days my cough was much easier. The irritation gradually left my throat and I commenced to get better. I kept up the Catarrhozone treatment and inhaled the medicated air five minutes every hour. I believe this was the means of staying my disease, for I got quite well again in a few months. I have since advised other sufferers from catarrh and lung trouble to use Catarrhozone, and in each case good results were obtained. I attribute my recovery entirely to Catarrhozone, which I can honestly recommend in the strongest way."

The foregoing experience should convince everybody of the evil of allowing colds to develop. To neglect catarrh is even worse. Carry a Catarrhozone inhaler in your pocket and use it occasionally. It prevents colds, permanently cures every type of catarrh, and is known to be the only remedy that actually kills the germs of consumption.

Catarrhozone is used by all intelligent physicians and is endorsed by thousands of doctors, because it can be relied upon to absolutely cure catarrh, bronchitis, throat and lung trouble. Catarrhozone is simplest, surest and best remedy. Two months treatment guaranteed to cure. Price $1.00, trial size 25c., at druggists or N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont. Refuse a substitute for Catarrhozone and insist on getting it when you ask for Catarrhozone.

Great Loss to G. T. R.

The G.T.R. trains were considerably delayed again yesterday, owing to the abundance of snow on the tracks. Mr. F. H. McGuigan, of the Grand Trunk, expresses himself as never before, during his railroad experience, has he witnessed anything like the present blockade. This gentleman places the loss to the G.T.R. at a million dollars, but through no fault of the employes, who have been working day and night in their endeavors to convenience the public.

How a Boy Can Earn a Watch

We will tell any boy sending us his name and address how he can secure a fine watch for nothing, and that without canvassing or selling. It costs only a postal on which to send us the name and address to find out. You can decide what to do when you know what the plan is. Any good grocer can tell you if we are reliable.

THE MALTED CEREAL Co.
200 Moutain St., Montreal.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—If you don't advertise your goods the sheriff may.

—There was a clean sheet at the police court again yesterday.

—The Cobourg Woolen Mills have closed down owing to the scarcity of coal.

—Mr. M. J. Hickey, our popular tailor, has removed from his former premises to No. 433 George street.

—A meeting of the Transportation Commission will be held at Peterborough in the early part of March.

—Rev. W. E. Smith, representative of the Epworth Leagues of Peterborough District, is the possessor of a Boxer flag.

—John Brightwell, of Roseburg Hill, suddenly dropped dead, while chasing cattle at Port Hope, on Wednesday last.

—At a meeting of the Ladies' Literary Association of the T.A.S. last evening, Miss S. Kelly read an interesting paper on "Peace to the Church."

—Rev. Mr. Holah will deliver a lecture under the auspices of the Girls' Guild of St. Luke's, in Ashburnham Hall, on March 5th.

—The Russian navy has shown its teeth, but the few that Dentist Japan has not extracted appear to be rather unsound.

—The last issue of the Ontario Gazette contains the notice of the granting of a charter to the Peterborough Fuel and Cartage Company.

—For all the latest news watch The Times daily bulletin, which appears every morning. A cartoon depicting some important live issue will also be displayed each day.

—Cloth bound books in floral design by some of the best authors of the day, regular twenty-five cent line, on bargain at fifteen cents. Times Bookstore.

—In the report in yesterday morning's Times, of the fire on Sheridan street, it was stated that Mr. Smith was ill. This should have read Mrs. Smith.

—It is reported that the Standard Ideal Sanitary Company, of Port Hope, may have to close down until the railway is prepared to handle its freight.

—A number of our citizens attended the annual conversazione of the Whitby Ladies' College, and all present pronounced the affair a grand success. About 1,000 people were in attendance, and the music and floral decorations were of the best.

—Today we are selling, while they last, dolls at the following reduced prices, 50 cent line for 35 cents; thirty-five cent line for 20 cents; Other lines also reduced. Times Bookstore.

—Mr. W. J. Robertson of Massey Music Hall, Toronto, was in the city yesterday, in connection with the tour of Miss Muriel Foster, the great English contralto, and Elm Reneaud, the celebrated French pianist. There is a prospect of these two well-known artists appearing here in April.

—Mr. Jas. R. Bell has erected an artistic sign in front of his new grocery store on Hunter street, opposite Whiten's photo studio. Mr. Bell is commencing business with the excellent motto, "Advertising pays". See his advertisement in another column of this morning's Times.

—The annual meeting of the Port Hope Canal Association was held at that place last evening, when the coming visit of the Transportation Commission to Peterborough was discussed. The officers' reports were read, and a program for an effective year's work was mapped out.

—An interesting lecture on "Manitoba and the North-West," was delivered by Rev. A. J. Vining in Park street church, on Thursday evening. The speaker's wide experience in that portion of Canada was evidenced by his vivid descriptions of life in the West.

—The first monthly meeting of the Home Missionary Auxiliary, in connection with St. Paul's Presbyterian Mission church, was held on Wednesday afternoon. A goodly number was present, and the prospects of future successes are of the brightest.

—In a recent letter to a local paper, the writer condemns St. Andrew's Presbyterian church for advertising for paid soloists, and hints that the engagement of such salaried singers is an infraction of the Lord's Day Act. The agreement, on the surface, appears decidedly flat and lacking in reason. The choir is almost as important a part of the church service as the clergyman, and could he be expected to preach without receiving any remuneration? The church soloist is a professional just as much as the minister, and is just as deserving of a salary as he.

It pays to advertise in The Morning Times.

DIED AT SPRINGVILLE

Miss Georgie A. McIndoo, Daughter of Mr. and Mrs. Jas. McIndoo Passes Away

We join the community in deep and profound sympathy with Mr. and Mrs. James McIndoo, of Springville, in the loss of their eldest daughter, Georgie Alice, at the early age of nineteen years.

Deceased young lady was born in Toronto, the former home of her parents, but for the past twelve years the family have resided at Springville, where she was beloved by all for her bright and happy disposition and true Christian gentleness. Seldom has so sad a death taken place, and it may truly be said of her that "she lived in deeds not years." Her death was caused by a cold which she contracted in July last and later on settled on her lungs, and although she had the best medical treatment and the loving care of parents and sisters, she passed away peacefully yesterday at 1.30.

Deceased was a member of the Presbyterian church at Springville and was also a member of the choir, where her presence will be very much missed. Besides the stricken father and mother, two sisters are left to mourn her loss, Misses Bella and Flossie.

Funeral services will be conducted at the house by Rev. G. Yule this afternoon, and the remains will afterwards be taken to Toronto on the 5.10 C.P.R. train. The funeral will take place from the residence of Mrs. Joseph Coulter, 51 Sackville street, on Monday afternoon.

WILL BEGIN ON MONDAY

Operation in the Packing Department to be Commenced

It was officially announced yesterday that operations will be resumed in the Packing Department of the American Cereal Co.'s Works, on Monday. This will bring joy to the hearts of those who have of a necessity remained idle since the recent fire. The company is to be complimented on their beginning operations so soon and there may no longer be any apprehension of a scarcity of Quaker Oats.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—We had a call yesterday from Mr. Geo. B Hilliard, of Lakefield.

—Miss Pearl Junkin, Fenelon Falls, is the guest of Miss Mattie Robertson for a few days.

—Miss Griffin, of Peterborough, is the guest of Mrs. W. Fisher, Millbrook.

—Mr. Geo Lytle, of the Lindsay Watchman-Warder, paid the Times a pleasant call yesterday.

—Mr. John Menogue, member of the County Council for the northern division, left for home yesterday.

—Mrs. T. G. Rantin of Rochester, is visiting in town, and is the guest of Mr. and Mrs. Jas. Sutherland.

—Mr. Fred Darcy, proprietor of the Lakefield curling and skating rink, was in town yesterday, and dropped in to see The Times.

—Mr. Henry Newton returned yesterday from a visit to the Queen City, where he was attending the annual meeting of the Canadian Savings Loan and Bulding Association.

—Miss Lulu Chambers, daughter of Mr. James Chambers, Pontypool, is the guest of her sister, Mrs. J. J. McCrea, Water street, for a few days.

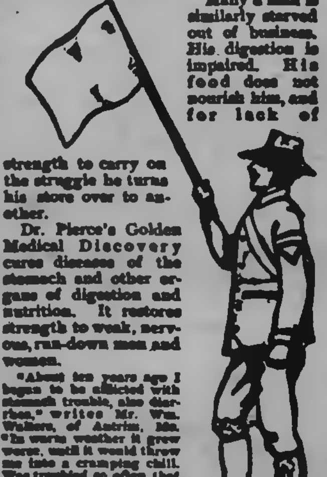
—Mrs. E. Best and her two little daughters, Misses Gladys and Hazel, of Winnipeg, are guests at the Oriental. Mr. E. Best, the popular hardware merchant, of Hunter street, is this lady's son.

—Mr. Harry Adams, who has been in the employ of the Golden Lion dry goods business for some years, intends commencing business for himself, and has severed his connection with the firm.

Guests at the Snowden; Geo. R. Nimmo, Montreal; Jno. A. Washburn, Montreal; A. B. Clarke, Toronto; A. J. Ritchie, Lindsay; G. T. Mitchell London; J. C. Ramsay, Hamilton; R. G. Wright, Toronto.

Arrivals at the National: W. C. Perry, Philadelphia; D. S. Watson, Listowel, F. Burnet, Rick Lake; Chas. W. Fowlds, Hastings; H. H. Stevens, Port Elgin; W. H. Weston, Toronto; J. McCauley, Newburgh.

Guests at the Oriental; A. D Deverall, Toronto; J. Michals, Montreal; R. R Sanderson, Toronto; Mr R. Young, Toronto; W. L. Robson, Toronto; A. Y Brown, Picton; M J. O'Leary, Toronto; T. Pinkerton, Toronto; R R Chamberlain, Montreal; C. S Morrow, Chicago; E E. Shortell, Toronto; P. Melchin, New York, J. N Marley, New York.



STARVED OUT.
Many a garrison has been forced to give up the fight and hang out the white flag of surrender, when lack of food has weakened the men past all power to continue the struggle.
Many a man is similarly starved out of business. His digestion is impaired. His food does not nourish him, and for lack of strength to carry on the struggle he turns his store over to another.
Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It restores strength to weak, nervous, run-down men and women.
"About ten years ago I began to be afflicted with stomach trouble, also diarrhea," writes Mr. Wm. Walters, of Antrim, Mo. "In warm weather it grew worse, until it would throw me into a cramping chill. Was troubled so often that I sometimes thought my end had come. Tried many remedies, but they gave only temporary relief. In November, 1899, thought I would try Doctor Pierce's Golden Medical Discovery. I got six bottles and took five in succession, then thought I would wait for a time and take the one left. Soon found I had symptoms of the trouble coming back, so took the sixth bottle and it cured me. I have enjoyed the best of health this summer, and the credit all belongs to your 'Golden Medical Discovery.' I can't express my many thanks to Dr. Pierce for his remedy, for it did so much for me. Words cannot express how severely I suffered.
"If any doubt the above statement let them address me, and I will take great pleasure in answering."
Dr. Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.

JAPANESE TORPEDO BOATS MAKE AN UNSUCCESSFUL ATTACK ON PT. ARTHUR

ap Army will Now Lay Siege--According to Report The Mikado's Transports are off Port Arthur to Disembark Soldiers for Land Operations

ndon, Feb. 27 — Most important news from the seat of war, if it is reliable, is that a large fleet of transports is off Port Arthur, preparing to disembark an army to besiege that place. Unofficial telegrams from St. Petersburg indicate that such a development is fully expected there. A large number of transports have returned to Nagasaki, where they are busily embarking more troops for the vicinity of Dalny. Over forty transports have sailed since Feb. 10. A still larger embarkation is proceeding from Ujina, near Hiroshima. The latter place, and not Kioto, will be the army and navy headquarters during the war. Over 36 big transports are now at Ujina and an enormous mass of soldiers has been detained there.

LEAVING DALNY.

ny is being evacuated. The Russians boast that they have mines at the breakwater docks and railway sidings, to prevent the Japanese from using them.

ere are only five months' supplies at Port Arthur. The Russians say they mean to defend Port Arthur, and to fall back with the rest of their troops from Dalny to the Yalu River, and if pressed upon Harbin.

the reported Japanese landing at Posiet Bay there is no confirmation, but the rumor recurs. Some scepticism is expressed over the report, partly because there is a large Russian garrison there. There is an unconfirmed report that a Japanese squadron is blockading Vladivostock, and still another report that the Russian squadron there has again put out to sea. Its destination in unknown.

ANOTHER BRUSH.

A Russian correspondent telegraphs from Port Arthur, under date of Feb. 28, as follows;—

"Last night at about 10 o'clock Japanese torpedo boats again unsuccessfully attempted to approach Port Arthur. Firing was heard at sea after midnight, and it is presumed that Russian torpedo boats or torpedo boat destroyers had attacked the Japanese. No details of the result are at hand".

AN UNEXPCETED MINE.

St. Petersburg, Feb. 27—An unofficial despatch from Port Arthur says that the Japanese steamers that were stranded at the entrance of the barbor have been examined. They were loaded with coal and kerosene. An electric battery on each steamer, placed in a companionway connected with wires in the holds, where apparently infernal machines were placed. One steamer that was on fire grounded near the cruiser Retvizan. The fire was quenched by the energetic efforts of the captain of the Sibiriak.

JUST PAINTED DUMMIES.

Tokio, Feb. 27—It is stated that the steamers sunk at Port Arthur were all painted to imitate warships, for which reasons the Russians mistook them, and helped to execute Japan's purpose in sinking them. Ten members of the crews on board were drowned.

migration from United States Will be Heavy

ROSPERITY IN THE WEST

n. Robert Rogers Speaks of Conditions Existing in Manitoba

Montreal, Feb. 28—Hon. Robert gers, minister of public works, in e Manitoba Government, reached city and is staying at the Wind r. In conversation with a reporter . Rogers spoke of the conditions t obtained in the West, and direct his remarks chiefly to the situa n created by the railway policy of Roblin administration.

Mr. Rogers is of the opinion that immigration of United States ttlers from the northern and mid west states to the Canadian North st this year will be a record aker. He attributed the rush om the border to two things. First all, land could be bought at con rably lower prices than those ked for equally well situated, but, almost every case, poorer lands, in States. A farmer could sell out farm in Dakota or Minnesota and ve to the Canadian Northwest ith sufficient money to y and stock a farm. This was the se of settlers that the West nted.

The second and principal reason of e so-called American invasion, Mr. gers said, was due to the railway licy of the Manitoba Government. eight rates had been reduced to ch a low point that they were from o 10 cents per 100 pounds cheaper the West than on the American de. This made all the difference in e world. Settlers had the advan ge of splendid railway facilities ith cheap freight rates, and were, erefore, able to get their produce the markets expeditiously and eaply.

"I firmly believe," said Mr. Rog s, "that our railway policy is re ponsible to a very great extent for e rush of good settlers from the uth. It is a policy that has been the best interests of the province nd is now bearing fruit."

Mr. Rogers is convinced that the ttlers from across the border will ake splendid citizens. The Ameri anizing of the West was a cry that ad no foundation in fact.

"Do not labor under the impres ion," continued Mr. Rogers, "that anitoba is undergoing a boom, that in the ordinary sense of the word oom.' The province is enjoying a eriod of great prosperity and is ex riencing a growing time. In every partment, agricultural, financial, nd commercial, the outlook was nev r better and exceeds the most opti istic hopes of the Manitoban of a ew years' residence."

A Handsome Sugar Shell for a Copper

Buy a postal with the copper, write your name and address on one side and our name and address on the other side, drop the postal into the post office and by return mail you will be told how you can secure a Sugar Shell without paying anything for it. We won't ask you to sell any trinkets to your friends. We'll tell you the plan and then you can do as you like about carrying it out. It's worth a copper to know how to get your table ware for nothing. Any good grocer can tell you if we are reliable.

COMMISSARIAT OF THE JAPANESE

Is a Perfect One Says an American Exper

THOUGHT OF EVERYTHING

Every Facility Provided for the Winter Campaign by Mobile Forces

London, Feb. 28.—A despatch to the Daily Mail from Ko-Yang says that foreign military men greatly praise the Japanese commissary and transport arrangements. Gen. H. T. Allen, chief of the Philippine Constabulary, who has been acting as American military attache at Seoul, told the correspondent that the infantry equipement was splendidly adapted for the work facing the troops in Corea. The food arrangements are perfect. Each infantry unit has a cylindrical stove and detachable kettle capable of cooking enough rice to furnish one meal for one hundred men. Nine such stoves and kettles are used for cooking for a battalion. Boxes containing half-pound cans of meat are carried by four horses for each battalion. A quantity of sodium sulphate is carried to purify water for drinking. Each soldier is provided with a German aluminum mess pan containing two cooked rations of rice, in addition to six emergency rations. The rice is boiled and dried in the sun and wrapped in cotton bags. It is of trifling weight.

London, Feb. 28.—A despatch to the Daily Mail from St. Petersburg says that Prince Alexander of Oldenburg, in addition to donating $750,000 to the Russian war fund, has made an offer to the Czar to raise a troop of irregulars from the bravest tribes of Buriats and Kalmuks of the Steppes, stipulating that the troop shall be under military rule, but that they shall be allowed complete freedom in making independent raids, according to their own modes of warfare. Prince Alexander offers to equip and support 1,500 of these warriors throughout the war. The Czar has accepted the offer.

THE TRENT VALLEY CANAL

MR. CULVERWELL SPEAKS ON THE TRENT VALLEY CANAL

At the Annual Meeting of the Surveyor's Association

At the annual meeting of the Association of Ontario Surveyors, held in Toronto, Mr. J. A. Culverwell spoke on the Trent Valley Canal. It was just as well to recognize that the canal had obtained a bad name owing to political considerations. As a matter of fact it was a waterway rather than a canal. Out of 200 miles between Midland and Lake Ontario, only 18 miles were actual canal. Four millions had been spent upon it, and five more, making nine millions in all, would be necessary to complete it. This should be compared with the cost of the Erie Canal at a hundred millions. The idea of deep-water canals was exploded, the best engineer having proved it a fallacy. The system depended on length and breadth of lock rather than depth, and it was recognized that a greater bulk could be more cheaply handled by the barge system. Mr. Culverwell hoped that a fresh start would be made on this work, which could be finished in three years if pushed, and that the public would be induced to consider it seriously.

—There was no police court again on Saturday morning.

ANNUAL MEETING OF PETERBOROUGH CHEESE BOARD

Officers All Re-Elected—And Other Business Transacted

The annual meeting of the Peterborough Cheese Board was held in the Council Chamber Saturday afternoon, the president occupying the chair.

The minutes were read and confirmed.

The treasurer's report was presented showing that $27.75 had been received, and $17.25 expenses, leaving a balance on hand of $10.50. This report was received and adopted.

It was moved and seconded that an inspector be engaged for the coming year. Mr. Jas. Ryan was appointed the Board arbitrator for the year.

Upon motion it was decided to have the first meeting on Wednesday May 18th.

A representative from the Stony Lake factory reported that that factory wished to withdraw from the Dairymen's Association for the year 1904.

There was considerable discussion on the question of buying and selling and of the relations between the salesman and buyer. It was stated that last year there was considerable trouble arising from the fact that the buyers often refused to pay what they had bid at the Board meeting because of the price of chees going down. Several expressions of opinion were given and some remedies proposed. One gentleman of considerable experience stated that the trouble last year was because the members did not keep the rules themselves, and the buyers, knowing this, had not acted fairly either. There was no such trouble in previous years, a that of last year, and if members would simply keep within the rules, the trouble would be remedied.

It was moved by Mr S. Ferguson, of Ida, that the president be instructed to accept no bid on the Board unless the sum of $100 be deposited with a salesman of each factory to be selected by the buyer at the time of the sale and this deposit be duly made.—Carried.

Upon motion, the present officers were re-elected for another year.

An interesting address on "Cold Curing," was given by Mr. Summerville of Brockville.

HAS A BOXER FLAG

Returned Methodist Missionary Has One Among His Curios

The following, from the Toronto Star, will be of interest to the many Peterborough friends of Rev. W. E. Smith, who lectured here a few months ago;

The only Boxer flag in America, captured from the Chinese rebels, is in the possession of Rev. W. E. Smith, a returned Methodist missionary. He is home on furlough, and temporarily residing with his family on Davenport road.

The flag is a very interesting object. It is a three-cornered, triangular affair, green in colour, for the most part, with a fringe of red several inches wide around it. It is disfigured by hundreds of good sized spots, and on enquiring of Mr Smith it was found that these were blood stains. Some of these may possibly have splashed upon it during battle, for it was taken from the Boxers after a terrible deafeat at the hands of Government troops near Chentu, Sze Chuen Province, but another explanation is more likely. The Boxers boast that before going into battle one of their number offers himself a willing sacrifice, and his blood is sprinkled over the flag to signify devotion to death on the part of all. The leader of the Government troops gave the trophy to Mr Smith, who values it the more highly because Boxers destroy their colours rather than allow them to fall into the hands of the enemy.

Mr. Smith has a number of valuable curios in his collection. One which he parted with yesterday was a solid bronze goddess of Mercy, as worshipped by the Lolos, the aborigines of China. They are a separate race, speaking a tongue of their own, and live in settlements in various parts of China. They are a very exclusive people, and unfriendly to the Chinese, who have to maintain an armed force in their vicinity. It appears that the prices of curios have stiffened recently, since the Rothschilds attempted to "corner" the market. John Chinaman who is a good business man, now stands out for better bargains.

Delegates from Port Hope

At the first annual meeting of the Port Hope Canal Association on Friday night last a committee, consisting of Dr. Powers, J. F. Clarke, and H. Barrett, was appointed as a deputation in the interests of the Port Hope Association to attend the sitting of the Royal Commission on Transportation to be held shortly in Peterborough, and to extend an invitation to the commissioners to hold a sitting in Port Hope and go over the site.

FUNERAL OF LATE MR. CAMERON

Over 100 Masons Attend the Obsequies of a Respected Brother

Death is no respector of persons. It visits alike the homes of rich and poor. But when of our most highly respected citizens, one to whom years of interest in the furtherance of Christian fellowship must be credited, is called from his place in the family circle, the tear of regret falls more freely. In the death of Mr. Charles Cameron, our city has lost one of its most respected and most highly esteemed citizens, and a large number of friends and acquaintances by their attendance at the funeral yesterday, testified to the high position the deceased held in the estimation of the people of the community.

About 125 members of the Masonic order, which had charge of the burial services, were present, and about 75 vehicles conveyed friends to the Little Lake Cemetery, where the remains were interred. Among the beautiful floral tributes sent were, a square and compass from the deceased's Masonic brethren, an anchor from the Sons of Scotland, a basket from the Post Office staff and a star of flowers from Hon J. R Stratton.

The pall-bearers were W. Bro R. Logan, W. Bro. W. Martin, and Rt. W. Bro H. Rush, of Peterborough Lodge, of which deceased was a member; and Ver. W. Bro H. C. Winch, W. Bro. H. C. Rogers, and Ver. W. Bro. A Dawson, of Corinthian Lodge. The impressive Masonic ceremony at the family residence was conducted by Wor. Bro. J. G. M. Wilson, Master of Peterborough Lodge, assisted by Rt. Wor. Bro. W. H. Walkey. The beautiful Masonic ceremony at the grave, committing deceased's body to the dust and his spirit to God who gave it, was conducted by Wor. Bro. J. G. M. Wilson Rt. Wor. Bro. H. Rush Wor. Bro. H. C. Rodgers and Rt Wor. Bro. W. H. Walkey Bro. D H Moore officiated as conductor of ceremonies and Bro. T. Tucker acted at chaplain, a position filled for many years past, at Masonic interments by the deceased who seldom failed attendance at the obsequies of a departed brother. Rev Dr. Torrance of St. Paul's church, of which deceased was a zealous member, also officiated at the house and at the cemetery.

THE TORONTO GENERAL TRUSTS CORPORATION

Twenty-Second Annual General Meeting—Report Shows Progress

One of the most progressive corporations in the Canadian financial world is the Toronto General Trusts Company, which held its twenty-second annual general meeting in Toronto on Wednesday of last week. Twenty-two years have elapsed since the first trust company in Canada was organized by Mr. J. W. Langmuir, and substantial progress has marked its history ever since that time. The legal profession and the general public have been familiarized with the many uses to which a company of this kind can be put, and to this fact the success of the company must be credited. It has in its care at the present time nearly $25,000,000 of assets, representing two thousand trusts and estates.

A close scrutiny of the profit and loss sheet reveals the fact that the compensation allowed the corporation for this vast responsibility, is of very modest proportions. An addition of $10,000 to the revenue fund has been made, after payment of the customary dividend of 7 1-2 per cent. per annum, and a surplus profit of $8,000 remains to be carried forward. The present reserve fund amounts to $300,000, which, with the fully paid capital of $1,000,000, furnishes security aggregating $1,300,000 to every person intrusting business to the corporation.

The assets and business of the Ottawa Trust and Deposit Company were acquired during the year, and a branch office with an advisory board established at the National Capital. The company's business is now conducted in Ontario Manitoba and the Territories, and it is expected that during the present year the Province of Quebec will also be entered.

INTERVIEW WITH LORD STRATHCONA

Regarding the Movement for Anglo-French Cordial Entente

CANADIANS WILL PROFIT

Declares His Lordship by Establishment of Good Relations with France

London, Feb. 29.—I interviewed Lord Strathcona to-day regarding his share in the Anglo-French entente movement. He said that the friendliest possible relations were not being established between business men in England and France. The results he said, must have an important bearing on Anglo-French diplomatic relations.

M. Mascurand, the president of the French Comite Republicain du Commerce et de L'Industrie, has assured him that the French members entered in the association now numbered no fewer than 11,000. It formed a most representative and influential body.

The Anglo-French character of the Canadian population rendered this movement of great interest and concern for all Canadians. For Canada would unquestionably benefit from friendly Anglo-French relations.

—The steam saw mill at Hall's Bridge is working under a disadvantage on account of the low water in the lake. The water has to be tanked from the lake up to the mill. The water has not been so low for many years.

DEATH OF MRS. BURKELL

Died Early Saturday Morning at St. Joseph's Hospital

Early Saturday morning, the death of Mrs. Eliza Burkell occurred at St. Josephs Hospital, after a prolonged illness. She was but recently taken to the hospital, and her case was, until a few days ago, not considered serious. Deceased has lived in this city all her life, and has a number of relatives in this locality. She had two sons, Charles at Yorkton, N. W.T., and Bert, of Toronto. Mrs. Leeper, of Roseneath, is a sister, and a brother, Mr. George Hunter, resides at Keene.

The remains were interred yesterday morning, in Roseneath Cemetery.

DEATH OF MRS. MENZIES

Another Aged Citizen Passes Away on Saturday Afternoon

Death has again claimed another of Peterborough's aged citizens, in the person of Mrs. Jane Menzies, who resided at Sherbrooke and Stewart streets. Deceased has resided in Peterborough over 50 years, and held a high position in the esteem of her large circle of friends.

The late Mrs. Menzies was born in Scotland in 1821, and in 1851 came to Canada, settling in Peterborough shortly after her arrival. She was a zealous member of St. Paul's Presbyterian church, which she attended with marked regularity, during her period of good health.

She was the mother of twelve children, eight of whom survive her. The members of the family left to mourn her loss are.—John, William and Donald, of town; James, of Montreal; Robert of Lindsay; Mrs. W Patterson, Scranton Pa., and Misses Jeanie and Catharine, of this place.

The funeral will take place this afternoon at 2.30 o'clock, from the family residence, to the Little Lake Cemetery.

CARRYING THE MAILS

Amounts Paid for Carrying Mails in This District

From the Government returns we find the following interesting information, giving the names of mail carriers and amount paid to each, for the district

Baillieboro to Millbrook, A. Dawson, contractor, $160.

Bensfort and South Monaghan, T. Armstrong, contractor

Bird all and Railway Station, Mary Lynch, $40.

Bobcaygeon and Silver Lake, W. D Coulter, $126.

Chemong and Selwyn, J. W. Jacobs, $29.75.

Fowler's Corners and Best's Station M. Ruth, $70.

Hall's Bridge and Stratton, J. Westlake, $75.

Hall's Glen and Warsaw, D. Madill, $60.

Hiawatha and Peterborough, R. Davis, $114.

Indian River and Station, S. Murphy, $75.

Jermyn and Lang Margaret Carter, $110.

Keene and Station R. McIntyre, $24.

Lakefield and Lakehurst, A. G. Shearer, $240.

Lakefield and Station, J. Cooper, $75.

Lakefield and Young's Point, P. A. Kearney, $190.

Lang and Station, R Spiers, $63.

Norwood and Station, D Foster, $200.75

Peterborough and Stations, Geo Fowler, $410.75.

Peterborough and street letter boxes, Chas. Cameron, $252.25.

Peterborough and transfers, Geo. Fowler, $25.

Peterborough and Warsaw, J. Crowe, $265.

The total gross revenue for Peterborough office for the year was $24,609.85

Salaries paid postmasters
Burleigh Falls, per year, $30.
Ennismore, $70.
Fortescue, $12.
Glen Alda, $12
Graystock, $14.
Indian River, $16.
Jermyn $30

VERDICT OF JURY FREES KENNEDY

Acquitted of Murder of Irene Cole at Brantford

ALIBI EVIDENCE EFFECTIVE

Jury Was Out Four Hours—Judge's Charge was Slightly Against the Prisoner

Brantford, Ont., Feb. 27.—John Kennedy, charged with the brutal murder of Irene Cole, in the Willows of this city, is a free man. At 10.20 last night the jury returned a verdict of not guilty. Mr. Justice Street, in discharging the prisoner, warned him against the further use of liquor, stating that if ever he was charged with another crime of a similar nature, it might not be such an easy task for him to clear himself. The prisoner was immediately released.

The case for the Crown was of the strongest possible character, but the evidence was circumstantial. It took the jury exactly four hours to arrive at a decision, and it is said not very much argument was required. A reasonable doubt was established by the strong alibi evidence of the defence.

Kennedy has all along avowed his innocence. He entered the court-room, however, with a faltering step, and when the foreman rose to render his verdict his face assumed a deathly pallor. As the words "not guilty" fell from the foreman's lips a glow of satisfaction came to the cheek of the prisoner, who at once resumed his military bearing.

The entire session yesterday was occupied with the addresses of the two counsel, and the charge of Mr. Justice Street. Mr. Hoyd spoke in defence [illegible] of the prisoner for four hours and twenty minutes. In presenting the case for the Crown Mr. Day occupied an hour and fifty minutes, while the judge reviewed the evidence, without comment, in an hour. The court room was crowded throughout the day and many were forced to remain in the hallways and corridors.

RUSSIANS CAPTURE TWO BRITISH TRANSPORTS

And One Norwegian Vessel Laden with Coal, Reports of Fighting

Special to The Times.

St. Petersburg, Feb 28—A despatch from Liu Yang, dated Feb. 28, says that Chinese on the Yalu River report that an advance guard of Russian cavalry, which has penetrated into Corea for a distance of about 200 versts across the river, had an encounter with a detachment of Japanese, and that the Japs were compelled to retreat, and fled, leaving their horses, which were seized by Cossacks. General Linevitch despatched cavalry and a body of infantry in pursuit with an order to occupy Northern Corea

Special to The Times.

London, Feb. 28—The following official despatch was received by the Japanese Legation here—

Tokio, Feb. 28, 9 a.m.—A number of the enemies' cavalry appeared at a point 700 metres north of Ping Yang, Corea. Our infantry fired on them, causing them to retreat.

Special to The Times.

Seoul, Feb. 28—Details of a skirmish at Ping Yang last Friday show that 50 Russian cavalrymen approached the north gate of the Japanese camp, and fired at a distance of 100 metres. A sharp fusilade took place and the Russians retired. All foreigners are safe.

Special to The Times.

St. Petersburg, Feb. 28—An official despatch dated today from Major-General Pflug to Viceroy Alexieff, chief of staff says—

"The night of Feb. 27th passed quietly at Port Arthur. The enemy's squadron keeps in this vicinity. Reports are coming in of movements of Chinese troops west of the Liao river, and according to rumors, 10,000 Chinese troops under General Ma are on the road between Ying Cheu and Chao Jan. The military guard on the San Min Lu railway has been reinforced from 40 to 50 Chinese soldiers having been placed at each place. Our mounted troops have entered Corea and the attitude of the population is friendly to us."

Special to The Times.

Tokio, Feb. 28—Corean soldiers on the Han Gyang frontier have been attacked and dispersed by Russian troops.

Special to The Times.

Suez, Feb. 28—The steamers laden with coal for Japan, captured by Russian torpedo boat destroyers are reported to be the British steamers Ettrick Dale from Barry, Feb. 3, for Batan, the British steamer Franby, from Barry, Feb. 3 for Hong Kong, and Norwegian steamer Matilda from Tenaren, Jan. 30, for Saseto.

SATURDAY'S MARKET

Not so Large as Usual—Prices Still High—Wood $8 and $9 a Cord

The market square on Saturday presented no livlier appearance than has been usual, since the bad weather set in, but, according to the farmers, the roads are now getting more passable, so we may expect a better showing this week. Prices were still high and the supply was by no means equal to the demand. There was a sufficient supply of butter but fowl and eggs were scarcer even than usual. A few loads of hay went quickly at $8 and $9 a ton, and one fine load brought $10. Wood was much sought after, but only two or three loads were there. The farmer knew well of its scarcity and his trouble in hauling it out, so he calmly asked $8 per cord. "How much for the wood?" asked a citizen, of a sturdy son of toil. "Eight dollars," he quietly replied. "Shake!" exclaimed the citizen, "you're the first man I've met today that's told the truth about the value of his produce." But the wood sold shortly after. Chickens were worth from 40 to 90 cents per pair, and turkeys brought $1.25 to $1.50 each. Geese sold for 75 cents and $1, and butter was worth 20 to 23 cents per lb. Eggs still sold for 30 cents a dozen and the prices of vegetables and beef remained the same.

FROM THE PULPIT

Interesting and Instructing Sermons by Prominent Clergymen Yesterday

CHARLOTTE STREET.

In the morning the pastor, Rev. W. J. Jolliffe preached an excellent sermon on the subject, "How we may know the doctrines of Christianity are true," and in the evening the subject was, "The greatness and goodness of God." A large number attended both services, and the eloquent divine introduced many suitable illustrations indicative of the supreme power and goodness of the Creator.

ST. ANDREW'S CHURCH

At the forenoon service Miss Miller sang most beautifully Gounod's "There is a Green Hill Far Away," and the pastor spoke on "Shelley's "Christian, the Morn Breaks Sweetly O'er Thee." The evening service was equally instructive, and the choir sang, "Savior Breathe an Evening Blessing."

MURRAY ST. CHURCH

Rev. Jas. Potter, father of Rev. J. G. Potter, missionary for the Upper Canada Tract Society, preached in the morning, and cited many interesting incidents of the difficulties that confront the life of a missionary. He must receive his brothers' aid in the spreading of the Gospel, and it should be a pleasure to all to render any assistance in the promotion of God's work. In the evening the service was conducted by the pastor on the special topic, "Memory, a Tormentor." No matter what evil deeds a man may commit, his memory is his strongest accuser. So long as memory exists sin will be more of a pain than a ple

Y.M.C.A.

In the afternoon, commencing at 4.15 o'clock, Rev. J. A. Wilson, assistant pastor of St. Paul's church, ably addressed the young men on the subject, "A Voice from a Dungeon." A song service was held at 4 o'clock.

PETERBOROUGH MAY GO INTO THE SEMI-FINALS

WILL PLAY MIDLAND HERE ON TUESDAY NIGHT

An unconfirmed report was received here yesterday to the effect that as a result of an investigation by the Executive of the O.H.A. Belleville has been disqualified, and that Peterborough would play Midland here tomorrow night and the return game in Midland on Friday night.

Mr. Morgan, of Peterborough, president of the Midland Football League, is taking steps already to get the game under way for the year 1904, and already a number of clubs have signified their desire to enter the League.

Skip J. D Flavelle and the members of his trusty rink arrived home Thursday from Peterborough flushed with victory over all the crack curlers at Peterborough bonspiel. They captured the main prize—two pairs of curling stones — and again demonstrated the superiority of Lindsay in all curling events. The result was expected by our citizens. — Lindsay Post.

After the successful winning of first place in the Consolation series, by the Peterborough Granites last week, the enthusiastic spectators could only shout justly: Girouxsalem!

The Old Country Wanderers' Football Club will enter the Midland League. We may expect some interesting games in this city during the coming season. The old countrymen are noted for their ability at football and cricket, and they will no doubt make it lively for any other local teams who may face them during the year.

OF INTEREST TO LADIES

The Beehive Annual Silk Embroidery and Lace Classes

These classes which have become quite a feature in connection with the Beehive, are looked forward to by the ladies of Peterborough and surrounding country with keen interest. This year, notwithstanding the most inclement weather which prevailed, they were very numerously attended. The ladies of Peterborough are noted for their artistic ambitions and the teachers who come here annually speak very highly of their ability in this direction. A new feature has been introduced in connection with the classes this year, viz., evening classes; this has been found so convenient for many whose engagements prevents them from coming through the day, that it has been decided to continue them in the classes in future. Half of the large mantle room, which extends over the whole length of the store, was cleared out and seated for the class. The room being comforted and thoughtfully arranged made a very comfortable class room.

Frozen Water Pipes

In Peterborough they have a unique way of thawing out frozen pipes. In this electric town, when the water pipes freeze, it is the custom to connect the most convenient electric wire with the frozen pipe, and the trouble is over in an instant. This method of saving money and averting a common annoyance may be rather a rude shock to the plumber gentleman, but it should be awfully good news to the victim who has to foot the bills which usually run hand-in-hand with the frost-bitten water pipe.

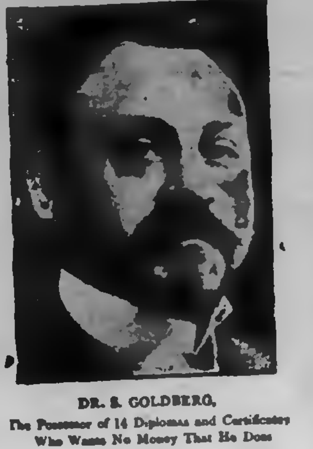
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 29, 1904

THE LIQUOR QUESTION

In connection with the possible submittal by the Ross Government of drastic legislation against the retailing of liquor by the glass in Ontario some interesting figures are given by the Brantford Expositor regarding the comparative consumption of liquor in this province and elsewhere.

In some respects, Ontario has made very great advancement as regards temperance and will undoubtedly compare favorably with any other country, or State, or Province. The number of licenses has been reduced from 6,185 in 1876 to some 2,300 there being now but one license to every 700 persons, as compared with one license to every 278 persons at that time. As compared with American States, the showing in this regard is as follows—

	One to each
Illinois	183
Indiana	247
Iowa	289
Michigan	239
Minnesota	301
New York	134
Ohio	203
Massachusetts	396

Then, as to commitments for drunkenness, take the following—

	No. of people to each conviction
Ontario	554
Quebec	600
Nova Scotia	229
New Brunswick	237
Manitoba	273
British Columbia	161
P. E. Island	446
The Territories	308

It is somewhat singular that the convictions for drunkenness should be fewer in Quebec, in proportion to population, than in this province, and is certainly creditable to Quebec. As regards the other provinces, and in comparison with any of the States of the Union, Ontario occupies a leading position.

Under the present license legislation, as will be seen, considerable progress has been made towards temperance, but a demand for more radical legislation in the form of absolute prohibition, has from time to time been heard, and is again finding expression.

In this connection the following figures of the vote in three prohibition plebiscites which have taken place in the province will be of interest.

	For	Against	Maj. For
894	192,489	110,720	81,700
898	154,498	115,284	39,216
902	199,749	103,548	96,201

The vote of 1902, it will be remembered, was not upon prohibition in absolute form, but upon the Manitoba Liquor Act, which included the power to prohibit the sale, but not the manufacture and importation of intoxicating liquors.

TRIAL ENDS TO-DAY

Kennedy May Go on Stand and Testify in His Own Behalf

Brantford, Feb. 25.—The Kennedy trial will be closed tomorrow morning, when the prisoner will learn his fate. The Crown evidence was concluded at an early hour this afternoon, and Mr. Heyd, counsel for the defence, will submit all of his testimony before the hour of adjournment at 6 o'clock. Probably the addresses of counsel and charges of the judge will be delivered tomorrow morning. The only feature of importance today is the definite statement of Mr. Heyd that he does not intend to put the prisoner in the box for the reason that he was drunk at the period of the crime, and might not have a clear recollection of facts.

"Of course," said Mr. Heyd, "if the man insists on going into the box and telling his story, I will let him go. On the whole, however, it is improbable that Kennedy will testify." He is still very cool, and follows the evidence in rather an indifferent manner.

Dr. Ellis, the Toronto analyst, was the principal witness this morning, testifying that he found two clots of blood on samples of Kennedy's clothing which had been sent to him for analysis. The blood might have been that of a man or beast. Sergt. Wallace of the police force was cross examined at great length by Mr. Heyd, but he stuck to his story that Kennedy had admitted to him in a voluntary statement that he was in the willows and fell on the chicken while there, getting blood on himself.

J. P. LEE DEAD

He Invented the Lee-Metford Afterward the Lee-Enfield Rifle

Galt, Feb. 25—James P. Lee, the noted inventor of firearms, died at New Haven, Conn., yesterday. Mr. Lee was 73 years of age, and had been a sufferer from an accident which befell him when a youth. By the accidental discharge of a gun he was shot in the heel, and he carried many of the grains for over 50 years, until the discovery of the X-ray machine.

The first magazine gun which Mr. Lee invented was purchased for the American navy, where it has been in use ever since. In the seventies Mr. Lee went into the manufacture of side carbines and sporting rifles in Milwaukee, and later had his inventions handled by the Remington Arms Company.

In the early eighties he went to England and laid his rifle before the British army authorities, who took it up and furnished the whole army with Lee-Metfords. The Government afterwards adopted a new bore for the rifle barrel, changing the name of the weapon to the Lee-Enfield.

Mr. Lee returned to reside in Galt in August, 1899, which was accorded a magnificent banquet by the citizens of the town and country. He left some months ago to spend the winter in New Haven.

Gained Ten Ponnds

His Weight increased Many Pounds His Health and Strength Completely Restored by Ferrozone the Great Food Tonic.

Mr. A. L. Godfrey is well known to everyone in Victoria, where he has been engaged in business for many years "Last winter I had la grippe" he writes, "and recovered very slowly. When well enough to leave the house I was many pounds lighter than my usual weight. My appetite was poor and my blood was thin. Ferrozone did me untold good. I recovered my weight in a short time and have felt like a different man ever since. I consider Ferrozone a wonderful tonic and a first class remedy for people who are run down. My reasons for believing Ferrozone so good are due to its bringing me health after doctors and many other medicines failed. My weight has increased at least ten pounds, my blood is strong and my system is in a very vigorous condition Ferrozone did it."

FERROZONE PRODUCES NEW TISSUE

From Nelson, B. C., comes the strongest possible proof that Ferrozone is a flesh-making, strengthening remedy. Mrs. G. C. Alker writes;—"A few months ago I was run down, tired, and nervous. I had once before been benefitted by Ferrozone, when living in Boston, and started using it again. Ferrozone at once gave me a splendid appetite, toned up my nerves, and actually made me fat. I used Ferrozone regularly and increased my weight several pounds. My cheeks filled out and became rosy. My nervous trouble disappeared, and I haven't had a single day's illness since using Ferrozone."

Ferrozone supplies the system with nourishment in a condensed form, and builds up weak constitutions to a state of permanent good health. It restores all weak organs, perfects digestion, enriches the blood and fortifies the nerves.

If it is better health you are seeking, you can find it with Ferrozone. Don't be misled into accepting a substitute or any article represented as "just as good." Ferrozone is unexcelled and it is in your interest to get it when you ask for it. Price 50c per box, or six boxes for $2.50, at all reliable druggists or by mail from N. C. Polson & Co., Kingston, Ont. and Hartford, Conn., U.S.A.

Ayer's Hair Vigor
Why not keep your own hair? And get more, too? Have a clean scalp; restore the color to your gray hair. [illegible]

The Toronto General Trusts Corporation.

PROCEEDINGS AT THE ANNUAL GENERAL MEETING.

The Fifth Annual Meeting of the Shareholders of the Toronto General Trusts Corporation (being the twenty-second of the Toronto General Trusts Company) was held in the Board Room of the Corporation on the corner of Yonge and Colborne streets, Toronto, on Wednesday, the 24th February, 1904. There were present—

Thomas Long, W. D. Matthews, Britton Osler, J. G. Scott, K.C., John Paton, George Porter, A. B. Lee, E. T. Malone, K.C., E. H. Bickford, E. B. Osler, M.P., F. C. Jarvis, J. W. Digby, M.D., J. J. Kenny, Alex Smith, James Henderson, Edward Galley, B. E. Bull, A. L. Crossin, Samuel Nordheimer, John Foy, A. L. Malone, T. Sutherland Stayner, J. J. Foy, K.C., E. R. Greig, George E. Dunbar, H. B. Hodgins, A. H. S. Marks, J. A. McEvoy, Thomas Paterson, R. S. Schell, John L. Blaikie Aemilius Irving, K.C., Hon. S. C. Wood, W. H. Beatty, K.C., John Hoskin, K.C., LL.D., J. W. Langmuir, A. D. Langmuir, and others.

The President, Dr. Hoskin, took the chair, and Mr. A. D. Langmuir, the Assistant Manager, was appointed to act as Secretary.

The various Financial Statements, showing the operations of the Corporation for the year ended 31st December, 1903, were submitted by the Managing Director, Mr. J. W. Langmuir, and were respectively commented upon by him.

The report of the Directors for the year was then read, as follows;—

FIFTH ANNUAL REPORT OF THE DIRECTORS OF THE TORONTO GENERAL TRUST CORPORATION FOR THE YEAR ENDED 31st DECEMBER, 1903

To the Shareholders;—

Your Directors have pleasure in submitting the Fifth Annual Report of the Toronto General Trusts Corporation (being the twenty-second of the Toronto General Trusts Company), accompanied by the Profit and Loss Account and the various Financial Statements, showing the results of the operations of the Corporation for the year ending 31st December, 1903.

During the year new estates and business have been placed under the care of the Corporation to the extent of $3,001,088.11, as follows;—

Executorships	$ 405,958 44
Administrations	414,428 25
Trusteeships	1,137,428 12
Investment Agencies	400,000 00
Estate Agencies	201,075 81
Guaranteed Mortgage Investment Agencies	172,512 47
Committeeships	15,289 61
Guardianships	136,283 96
Receiverships	64,177 93
Lunatic Estate Agencies	29,096 13
Liquidatorships	24,837 39
Total	$3,001,088 11

In addition to the foregoing the Corporation has been appointed Trustee for the issue and certification of debentures; registrar of stocks and bonds and transfer agent, aggregating transactions of a large amount, but in respect of which class of work the only responsibility which rests on the Corporation is the exercise of great care and systematic attention.

Your Directors had under consideration in the early part of the year the opening of a branch of the Corporation's business in the City of Ottawa. To that end steps were about to be taken to secure suitable premises, when information was received that the assets and business of the Ottawa Trust and Deposit Company, which had been in existence in that city for about five years, might be acquired on fair terms. Negotiations were opened, resulting in the acquirement of that Company, with all its assets and good will. As the Ottawa Company had power to transact business in the Province of Quebec, and had several unadministered estates in that Province, application has been made to the Legislature for a charter to issue to the Corporation. Your Directors also considered it advisable, both for loaning and estate purposes, to obtain a charter to transact business in the North-West Territories, which has been granted during the year. It will thus be seen that as soon as the Quebec charter is obtained the Corporation will have the necessary statutory authority to transact business in Ontario, Quebec, Manitoba and the North-West Territories. These branches will at the outset considerably increase the general expenses of management, but it is expected that they will soon prove largely remunerative.

An examination of the Profit and Loss sheet, herewith submitted shows that the gross revenue from the various departments of the Corporation's work and investments amount of $212,875.24, and after deducting the cost of management, including salaries, rent, taxes, Directors' and Auditors' fees, commissions for obtaining loans, and all other expenses at the Head Office in Toronto, and the branches at Winnipeg and Ottawa, and also all the preliminary expenses connected with the taking over of the Ottawa Branch, the net profits for the year amounted to $96,800.69. Out of these profits your Directors declared and have paid two semi-annual dividends at the rate of 7 1-2 per cent. per annum, amounting to $75,000; have written off the building and vault account the sum of $3,632.60, and have added 10,000 to the Reserve (thus increasing that fund to $300,000), carrying forward the sum of $8,168.09 to the credit of Profit and Loss Account.

All of which is respectfully submitted.

(Signed) J. W. LANGMUIR, Managing Director.
(Signed) JOHN HOSKIN, President.

Toronto, Feb. 24th, 1904

PROFIT AND LOSS STATEMENT FOR THE YEAR ENDED DECEMBER 31st 1903.

To salaries, rents, Provincial tax and office expenses at Toronto, Ottawa and Winnipeg, including preliminary expenses of organization at Ottawa	$88097 50	By balance brought forward from December 31st, 1902	$ 4,025 45
To fees paid President, Vice-Presidents, Directors, Advisory Boards and Inspection Committees	11046 00	Less vote of shareholders to Auditors for services for year ended December 31st, 1902	2,600 00
			$ 1,425 45
To commission on capital loans, inspection of loans, and expenses for superintendence of properties and collection of rents	14131 05	By commission earned for management of estates, collection of revenue, etc.	98,423 22
To interest on mortgage on corporation's buildings at Ottawa	2800 00	By interest earned	94,261 30
To balance carried down	96800 69	By net rents from corporation's Buildings	9,037 99
		By net rents from safe deposit vaults	4,727 28
		By profit on purchase and sale of municipal debentures under guarantee of the corporation	5,000 00
	$212875 24		$212,875 24
To Dividends Nos. 9 and 10	$75,000 00	By balance brought down	$96,800 69
To written off the corporation's safe deposit vaults	3,632 60		
To carried to reserve fund	10,000 00		
To balance carried forward	8,168 09		
	$ 96,800 69		$96,800 69

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of the Toronto General Trusts Corporation to the 31st December, 1903, and find the same to be correct and properly set forth in the above statement of Profit and Loss. We have examined and found in order all the mortgages, debentures, bonds and scrip of the Corporation, as well as those negotiated for the Supreme Court of Judicature for Ontario and trusts, estates and agencies in the Corporation's hands, and have checked same with the mortgage and debenture ledgers and registers.

The bankers' balances, after deducting outstanding cheques, agree with the books of the Corporation. We have also examined the reports of the Auditors of the Winnipeg and Ottawa branches, and find that they agree with the Head Office books.

(Signed)
R. F. SPENCE, F.C.A., (Can.), JOHN M. MARTIN, F.C.A., Auditors.

The President, DR. HOSKIN, in moving the adoption of the report, said;—

In moving the adoption of the Report, I think it will only be necessary to call attention to one or two points. The Profit and Loss sheet accompanying the report is so plain and so detailed that extended remarks are necessary.

The year's work has been normal in volume and character. We have had no unusually large items of revenue as in some previous years. The commissions for the management of estates were in round figures $100,000, but the simple statement of this fact gives an exceedingly meagre idea of the very great "care, pains, and trouble" involved in the getting of that sum in items of from one dollar upwards. Perhaps you may form an idea of this work (although I am sure it will be a very inadequate one) when I tell you that we have about 2,000 estates, large and small, to look after, and some of the small ones, with assets under $10,000 give as much and frequently more trouble than an estate of a quarter of a million. In Britain, or the United States, with their great accumulations of wealth the commissions we have earned for the year might have been obtained out of half a dozen estates, but we cannot look for that yet in Canada. In the meantime the expenses of management are necessarily large, and perhaps out of proportion to the revenue derived from commissions.

This Corporation has in its control mortgages, debentures, real estate and other securities aggregating over $25,000,666, thus exceeding in value the assets of any loan company in Canada, and the bookkeeping, care and management connected with the administration of this large volume of business is no less, but probably greater, than that connected with the management of a company lending money similar in amount simply on real estate and debenture securities.

I may here repeat what I have so often stated, that every succeeding year adds to the confidence I have in the future of this corporation. This year there has come under our care $3,000,000 of new estates and there is no doubt that in the course of a few years we shall have double the volume of assets committed to our care, and with a few additional clerks, it will be just as easy, so far as clerical work is concerned, to manage an additional $10,000,000.

You must always bear in mind that the revenue of a Trusts Corporation, managed on the lines that your Directors have adopted, and religiously adhered to must be limited. We depend entirely on commissions earned and the investment of our capital and surplus. We scrupulously avoid speculation of every kind, no matter how tempting, we underwrite neither bond nor stock issues, nor guarantee the interest on such issues. We do not take deposits, which we are constantly asked to accept, as the investment of moneys received in this way would cast upon the Corporation the burden of looking after such investments to the detriment of our trust funds to care for which is our first duty. In short, the Corporation strictly confines itself to the performance of the duties of a corporate executor, administrator, trustee, etc., and we, your Directors, are fully convinced that a testator will be consulting the best interests of the beneficiaries of his estate, in appointing such a Corporation as ours instead of an individual executor, trustee, etc., and the superiority of a corporation over an individual executor, trustee, etc., must be apparent to all in the creation of trusts for the benefit more particularly of widows, minor children and female members of families.

I have often referred to the many obvious advantages existing in favor of creators of trusts, and of those who are the objects of the trusts, by the appointment of the Corporation, that I need not refer to them anew. Two, however, emphasize themselves so pronouncedly that I may be pardoned for adverting to them again, namely (1) the benefits that accrue to all concerned when they appoint a Trusts Company, in that they are thereby free from the annoying anxiety and disagreeable results which arise from the conduct of defaulting executors and trustees. Those who have read the newspapers during the past year will not have failed to note what has transpired in this respect, and cannot but see the force of what I say. Second, the costs of administration of estates by the Corporation are much less in the aggregate than the charges made by private individuals, and the papers on the files of the courts will substantiate what I say. Now and again we hear statements to the contrary—unsupported, however, by facts, emanating from those who desire to secure the control themselves. You can readily understand how persons such as those to whom I have referred will leave no stone unturned, however false and unjust it may be, to accomplish their end. I could tell you of many instances where those interested would be delighted today to pay the Corporation ten times their charge if their estates had originally been placed in our hands.

The Profit and Loss sheet accompanying the Report is so plain and so detailed that remarks thereon are scarcely necessary. Our net profits are not so great this year, because out of them we have paid all the preliminary expenses of opening our branch in Ottawa, and we have also paid all commissions connected with the large loaning business that we are now carrying on in Manitoba. In this connection I may also state that the cost of reconstructing our Head Office building has been nearly all paid off out of profits during the past five years. Notwithstanding these abnormal drafts upon our profit during the past year, we have paid our shareholders a dividend of 7 1-2 per cent, amounting to $75,000, we have written off our vaults $3,632.60, we have placed $10,000 to our Reserve account, which now stands at $300,000, and we have carried forward to the credit of Profit and Loss $8,168.09 Upon the whole, therefore, I think we should be fairly satisfied with the operations of the year.

It is with pleasure I convey to you the appreciation of your Directors of the zeal, diligence and faithfulness of the staff in the discharge of their varied duties. Formerly this reference was confined to the staff of what is now known as the Head Office, but we have extended our borders, and have branches at Winnipeg and Ottawa, under the care and supervision of Advisory Boards and Branch Managers. These Advisory Boards, comprising gentlemen of high standing in the community, are entitled to the hearty thanks of the Shareholders, for the interest they take in the affairs of the Corporation, and for the ability displayed in the management of matters coming under their direction. And these observations apply equally to the respective Branch Managers, namely, Mr. Davy, at Winnipeg, and Mr. Chamberlain at Ottawa. In this connection now as in the past, prominently stands forth our Managing Director, Mr. Langmuir, who, I know, dislikes to have any remarks made about him, and who is ignorant of my intention to make this reference. Only those who come in contact with him from day to day can understand how much he does (I wish he would do less), and what he endures, and how much at heart he has the interests of the corporation. I beg to move the adoption of the report.

HON. S. C. WOOD, Vice-President, in seconding the adoption of the Report said:

In seconding the adoption of the Report, I have very little to add to what has been so fully and so well said by the President. Now that the Corporation is so well established, its objects so thoroughly well known, and its appreciation by the public becoming so general, it is perhaps unnecessary to reiterate these facts at every annual meeting. There is just, however, one point, and a most important one, that I would like very briefly to refer to, that is the great superiority in every respect of the Corporation over an individual executor and trustee. Dr. Hoskin has stated this to you from the standpoint of a lawyer. I do so from that of a business man. First, the Corporation has a Board of Directors, comprising lawyers, presidents and directors of banks, loan associations and insurance companies, railway directors, merchants and capitalists. Surely the combined talent and experience of these gentlemen is infinitely better than that of any individual executor or trustee. Second, the supervision and management of estates placed with the Corporation, be they big or little, is methodical and systematic, and the exact terms of a will or a trust are carried out to the very letter. Testators and creators of trusts can rest assured of this, which we all know is not always done by individual executors and trustees. Third, mortgage and other investments for estate or trust funds are passed upon by the Board in every case and the varied and extensive knowledge of each member of the Board is brought to bear in deciding whether the proposed investment is an absolutely safe one before it is passed and no mortgage is passed without personal inspection and valuation. We all know that this cannot be done by individual executors and trustees, however, able they may be. Fourth, there is a committee of the Board whose duty it is to inspect the work done by the Board, and to see that its instructions have been faithfully carried out by the staff and who also must see every security belonging to a trust, and initial it, and report back to the Board that they have done so. My friend, Mr. Beatty, will doubtless tell you how carefully this work has been done. We all know, some of us too well, how wreck and ruin have been brought upon families by neglect of this by individual executors and trustees. Fifth, every security is ear-marked in the books of the Corporation to the estate to which it belongs, and is the property of the estate or trust as much as if the security had been negotiated and paid for by the testator or creator of the trust. Sixth, the commissions paid to the Corporation are no greater, if they are as much, as are paid to individual executors and trustees.

These facts connected with the Corporation, I am sure, in the making of wills and trusts are not sufficiently well known to the public, and I feel assured that it is only necessary that they should be known in order to be appreciated and acted upon.

The Report of the Directors was adopted as well as the Report of the Inspection Committee, as presented by the Chairman, Mr. W. H. Beatty.

Certain By-laws and amendments to By-laws were confirmed.

The following Auditors were appointed for the year 1904—For the Head Office—Messrs. R. F. Spence, F.C.A., and J. M. Martin, F.C.A. For the Winnipeg Branch—Mr. P. A. McDonald. For the Ottawa Branch—Messrs. J. B. Chamberlain and J. H. Thompson.

The following shareholders were re-elected Directors for the ensuing year:—John Hoskin, K.C., LL.D., Hon. S. C. Wood, W. H. Beatty, John Bell, K.C., John L. Blaikie, W. R. Brock, M.P., J. W. Digby, M.D., J. J. Foy, K.C., M.P.P., John Foy, Hon. G. T. Fulford, George Gooderham, Wm. Hendrie, Aemilius Irving, K.C., Robert Jaffray, J. J. Kenny, J. W. Langmuir, A. B. Lee, Thos. Long, W. D. Matthews, Hon. Peter MacLaren, R. B. Osler, M.P., J. G. Scott, K.C., T. Sutherland Stayner, Byron E. Walker and D. R. Wilkie.

At a subsequent meeting of the Board Dr. John Hoskin, K.C., was re-elected President, and the Hon. S. C. Wood and Mr. W. H. Beatty, Vice-Presidents. The Executive Committee was re-elected, and Mr. W. H. Beatty, Mr. Aemilius Irving, K.C., and Mr. John L. Blaikie were appointed the Inspection Committee.

The following Advisory Boards were appointed:—For the Ottawa Branch—the Hon. W. C. Edwards (Chairman), Messrs. Geo. P. Brophy, C. A. Douglas, Geo. Burn, W. D. Hogg, K.C., Capt. J. L. Murphy, J. B. Fraser, James Gillies, Hiram Robinson, and Peter Whelen. For the Manitoba Branch—the Hon. Sir Daniel H. McMillan, Messrs. D. W. Bole, A. M. Nanton and H. H. Smith.

VARICOCELE NERVOUS DEBILITY CURED.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

We Treat and Cure Syphilis, Gleet, Varicocele, Emissions, Stricture, Unnatural Discharges, Seminal Weakness, Kidney and Bladder Diseases.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good Investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— • • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

MANCHURIA PREPARING TO HARASS RUSSIANS

The Chinese in Manchuria are Attacking the Russians--No Lack of Ammunition

TEN THOUSAND MANCHURIANS HAVE ALREADY VOLUNTEERED

Five Thousand Russian Troops Have Been Moved from Mukden to Sunnintung.

Special to THE TIMES.

Seoul, Feb. 26.—The Corean Government has decided to order the Corean troops to join the Japanese troops in the field. The Port of Wiju was open to foreign trade last night; the limitation to be placed on trade and other matters will be passed later, as the action necessitates. The harbor Wingampho has been decided upon.

Special to THE TIMES.

St. Petersburg, Feb. 26.—A despatch received here from Port Arthur, dated Feb. 26, says; At one o'clock this morning several Japanese boats were cited from here with their sail set for the purpose of disguising their character. The battleship Retvizan and shore batteries opened fire on them and continued firing until daybreak, without any visible results. After daybreak a Japanese squadron, apparently transports, were cited at 11.15. This squadron came nearer and an engagement which lasted 40 minutes ensued. There was no damage done. Few shells fell in Port Arthur. It is expected here that the Japanese will attempt a landing soon, and inspection of the Japanese ship sent in this harbor, Feb. 24, shows they were loaded with coal and kerosina, and that electrical infernal machines had been placed in the midst of the cargo.

Special to THE TIMES.

London, Feb. 26.—If the report from Yinkow of a Japanese landing near Vladivostock, which at present is based on missionary and native statements, should prove correct, a most important and new development has been revealed, as it points, according to British views, to an attack on Vladivostock.

Special to THE TIMES.

New York, Feb. 25.—According to a cable from Chefoo to The World, Manchuria is rising against the Russians. Five thousand Russian troops have been moved from Mukden to Sunnintung, because in the villages along the west side of Liaotung peninsula the natives are making active preparations to cut off small bodies of Russian troops there.

Ten thousand Manchurians have already been enrolled in the movement which is spreading. Volunteers are plenty; there is no lack of ammunition or money, for the patriotic rich are subscribing.

LIPTON'S TEA

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

The Oregon Mining & Smelting Co.

327 EXCHANGE BUILDING, . . . DENVER, COLORADO

AGREES WITH ENGLAND

If Disputes Regarding Newfoundland Can be Settled

London, Feb. 25—Premier Balfour had sufficiently recovered his health to come from Brighton to this city today to preside at a Cabinet meeting.

Prior to the meeting, the French Ambassador, M. Cambon, called at the Foreign Office and had an hour's talk with Lord Lansdowne, Foreign Secretary. The Ambassador returned here from Paris last night, and apart from an exchange of views in regard to the most recent developments of the war, on which subject the two Cabinets are keeping in the closest touch with each other, there is good reason to believe that a settlement of all matters in dispute between France and Great Britain is on the eve of being arranged. Such questions as Egypt, Morocco, Newfoundland, etc., have been fully discussed by the two Governments for some months, and the differences are being gradually eliminated, until practically nothing remains to prevent an early signature of a treaty removing all outstanding obstacles to a complete accord between the two powers.

COLONIES AND NAVAL RESERVE

Self-Governing Empire Co-operating with the Admiralty

CANADA IS AN EXCEPTION

Activity of Colonies is Welcomed in England as Strength to Navy

London, February 27—The self-governing Empire, excepting alone Canada, is cordially joining in co-operation with the British navy. The First Lord of the Admiralty's annual statement says that the Newfoundland Branch of the Royal Naval Reserve is making steady progress. Now the Parliaments of the Commonwealth and New Zealand have adopted a naval agreement and it is hoped strong branches will shortly be established in Australia and New Zealand. It is hoped also shortly to establish a branch in Malta.

WELCOMED IN ENGLAND.

The papers welcome this growing spirit of solidarity throughout the Empire. The Pall Mall Gazette, which has hitherto been a somewhat pessimistic naval critic, says tonight, "With a growing royal fleet reserve a royal naval reserve, and a royal naval volunteer reserves, the manning of the navy will be placed on something like a safe basis. That is to say, there will be in a year or two a sufficiency of men, regulars and reserve, to man every ship that could be put into commission."

CHINESE SNUB RUSSIA

Open Defiance of Czar in Spite of Declaration for Neutrality

Tokio, Feb. 27—Advices to the Japanese government from Pekin say that while at Moukden Viceroy Alexieff asked the Chinese troops to aid in guarding the railway so as to prevent the interruption of traffic. The Chinese refused the request and asked for instructions from Pekin. The Chinese government told them to inform Alexieff that as Russia had insisted that the Chinese were unable to guard the railway in time of peace surely Russia could not expect them to guard it in time of war.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, they, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.65 and $73.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite, and by driving this tunnel five or six hundred feet further it will cut the eastern contact and intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 200 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,550 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the *Flowery* and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of, all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and aid p into the 200-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

WAR DECLARED AGAINST UNIONS

Powerful International Organization of Employers

ITS OBJECTS MADE CLEAR

Purpose of the Citizens' Movement—Arrogance of Labor Unions to be Checked

Five hundred delegates, representing associations of manufacturers and employers in every business industry and independent workingmen who look with forebodings on the anarchistic uprising in the ranks of organized labor, assemble to support the resisting measures that are deemed necessary to preserve the freedom of the people.

Directed in their efforts by David M. Parry, president of the association, men representative of industrial affairs in all parts of the continent participated in the forum action that is designed to stagger the efforts of American Federation of Labor leaders and their followers in the reckless career of strikes, violence, intimidation and revolution that has spread disaster.

Resolutions Will Precipitate Struggle.

The convention strikes at the heart of the issue in two resolutions that will precipitate a struggle that can only end in the triumph of independent workingmen and employers. One of these resolutions was a declaration of opposition to the use of the labor label on all manufactured articles and the other provided for the establishment of a bureau to trace and keep a record of the men in the organized labor movement who commit assaults, break the criminal laws and conspire to coerce the employing public and intimidate individuals.

Resolutions denouncing the socialistic measures championed by Samuel Gompers and his cabinet before congress, the anti-conspiracy and anti-injunction bill and the eight-hour bill were also adopted.

While the addresses made by President Parry and other leaders in the new emancipation movement were filled with important revelations and suggestions, the action of the convention on the issues of the day gives the keynote of the convention.

Will Put Watch on Criminals.

The resolution providing for the establishment of an identification bureau for the criminals in the ranks of organized labor, introduced and championed by C. W. Post, president of the American Association of Advertisers, is as follows.

Resolved, That the propaganda of labor unionism in the United States and the every-day practical workings thereof are revolutionary and subversive of the rights of labor and of the employers of labor and of the laws of the land, but above all else they are destructive of the rights and liberties of the great body of the people irrespective of their affiliations with unionism or with employers of labor.

Resolved further, That the present condition of anarchy and contempt for law and the constituted authorities brought about by lawless leaders and members of labor unions has forced upon the peace-loving citizens of the United States the necessity of demanding that the names and whereabouts of those lawbreakers who practice intimidation, boycotting, picketing, destruction of property and who commit assaults upon their fellow laborers or commit other crimes in the name of labor be made known for the protection of all law-abiding people and for the best interests of labor itself and to the end that justice may be meted out.

Resolved further, That the executive committee is hereby directed to take the necessary steps to ascertain the identity of such persons and obtain full information in connection therewith and that a report of the same be made to each organization holding membership in this association.

Unions Led By Anarchists.

A rising vote of the delegates was called for on this resolution, and its adoption amid cheers and waving of hats was the climax of the day's events in the convention. It was presented formally by the resolutions committee, of which William McCarroll, president of the New York Manufacturers' Association, is chairman, after Mr. Post had addressed the convention on the subject, denouncing many of the leaders in the labor movement as anarchists and declaring that organized labor made no effort to check lawlessness and violence in times of conflict for the purpose of coercing and intimidating the people.

The other important resolution of the day, in which the union label is assailed by the independent manufacturers and workingmen who influence nearly 150 organizations in the United States, was deemed essential because the use of the union label on manufactured articles recognizes and indorses the endeavor of labor organizations to control the entire labor market and approves the attempt to "coerce manufacturers to employ only such labor and under such terms as these organizations may dictate, consequently repudiating the right of the citizen to dispose of his time, skill and products as his judgment and opportunity may suggest, thus attempting to subjugate all manufacturing interests to the control of irresponsible persons."

Union Label No Sign of Quality.

The resolution further specifies the use of the union label "is no indication of the quality of goods manufactured or that they were manufactured by a better class of laborers than goods which do not bear the union label; that the label when used is a surrender of individual freedom and a badge of subserviency and often an indication that undue influence has been exerted in the selection of the manufacturer bases on these premises."

The measure concludes as follows;

Resolved, That the Citizens' Industrial Association of America declares its opposition to the use of the union label and urges upon manufacturers that they refuse to use it upon their products, it being a species of boycott, and because it is only by reason of untrammeled enterprise that improvement in manufacture and national advancement can be secured.

Stand for the Open Shop.

After the president's stirring address the address of Frederick W. Job, revealing the inefficacy of the organized labor vote, and other stirring addresses, the convention reaffirmed its original declaration of principles, and on recommendation of C. N. Chadwick, of New York, adopted the following additional principles;—

We believe the truth should be ascertained and told.

We stand for the open shop.

We stand for the right of the youths of this country to learn the trade of their choice without limitation.

We stand for the right of the individual to work for as many hours or as few hours as he sees fit.

We stand for the right of private contract and the liberty of the individual.

We stand for the enforcement of the law.

IS CANADA PREPARING FOR WAR?

Color Given to This by Reported Army Movement.

BRITAIN MAY BE INVOLVED

Militia Authorities Affect to Disbelieve the Rumors, Indications That War May Come

Special from our own Correspondent.

Ottawa, Ont., Feb. 27—War is all the talk just now and the French-Canadian papers add to the excitement by giving reasons why England and France might become involved in the struggle.

La Presse, on the strength of a dispatch from Europe, via New York, stating that in Germany it was feared France and England might become involved, gives no less than seven reasons why such a thing might happen. Here they are:—First, the sympathetic Franco-Russian alliance; second, the Anglo-Japanese commercial union; third, the Wei-hai-Wei incident and the denunciation against England on the part of the Russian press; fourth, the sympathies of the British and French ships for the parties at war; fifth, the Turko-Bulgarian events; sixth, the preparations of the British and French squadrons; seventh, the mutual hatred between the Russians and the English.

In addition to these come the rumors that Great Britain intends sending seven more regiments of regulars to Canada, so as to have them handy in case they may be needed in the east. The dispatches, which were not quite official, said that two of these regiments were to be stationed in Halifax, two at Esquimalt and one each at Montreal, Quebec and Toronto.

[illegible] are Credited.

These are supposed to be moved, as a matter of course, by means of the Canadian Pacific railway, and although the militia authorities here laugh at the rumors there are many prominent politicians and others who think that there is something in them.

The reason why the militia authorities do not believe the news is that at the time of the intercolonial conference the Canadian representatives offered to garrison both Halifax and Esquimalt in addition to developing Canada's own defenses and that nothing more has been heard of it since.

There is a great anxiety on the part of militia officers to be attached to either of the bellicose armies, as military attaches from Canada, and it is understood that the government has received any number of applications.

The principal activity on the part of the government in connection with the war is shown in its desire to protect the Canadian missionaries in Corea. There are supposed to be about a score of these, and it is considered that their position is not the most comfortable just now.

British Officers' Mission.

It is considered rather a coincidence that simultaneously with the announcement that the Canadian officials have no reason to believe that England will be drawn into the eastern conflict a new British remount officer has made his appearance here. His name is Colonel Lawley and he is a special guest at government house of Lord Minto and has had some extended interviews with the minister of agriculture, which he does not deny are in connection with the purchase of army horses for remounts.

MILLIONS LOST IN BIG FIRE IN ROCHESTER

CONFLAGRATION IN HEART OF BUSINESS DISTRICT WIPES OUT BIG INSTITUTIONS

Special to THE TIMES.

Rochester, N. Y., Feb. 26. — The worst conflagration in the history of Rochester broke out a few minutes before 5 o'clock this morning in the basement of the Rochester Dry Goods Company's store at 156-166 Main street east. The fire, according to the nightwatchman, in the store, was discovered soon after it started, but it spread with such rapidity that by the time an alarm was turned in the entire front of the store was a mass of flames.

Within an hour after being discovered the fire had spread to the big granite building occupied by the firm of Sibley, Lindsay & Curr, and by hundreds of business and professional men. Flames also spread to the buildings in the rear of the Granite building.

The extreme cold made fire fighting difficult and hazardous, as the ladders were coated with ice.

The loss is estimated at between four and five million dollars, most of which will fall on Sibley, Lindsay & Curr Co., the Beadle & Shelbourne Co., the Rochester Dry Goods Co., and the Walkover Shoe Co. The loss to the business offices in the Granite building cannot be estimated at this writing.

Accident at Lindsay

What might have been a serious accident, occured at Lindsay yesterday morning, when Mr. Geo. Pope, an employee in Sylvester's machine shop, got his hand caught in the revolving machinery. A bad gash, which severed an artery, will lay him up for a few days.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:
J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees
J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

GEORGE T. ORDWAY, COMMISSION BROKER, CHICAGO, ILL.
EGBERT CHAMBERLAIN, ... NEW YORK
Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

BIG G
CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. [illegible] U.S.A.

ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is [illegible] feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92 40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5 500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and sure experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cor- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Mostly Men.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous enough I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty-nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $60 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 26 bushels. Take an average price of 50 cents per bushel, and you have a gross return of $13 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $50 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen—u—ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the houk! houk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen and as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do.
Yet, though I beggared go beyond relief,
Oh heart, the glad, mad spendthrift hours we knew!
—Theodosia Garrison in "Harper's Bazar."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of those Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

WANTED—GOOD AGENTS IN EVERY CITY.

The Catarrhozone Dry Air Treatment

THE ONLY RATIONAL, SURE CURE FOR CATARRH AND DISEASES OF THE NOSE, THROAT AND LUNGS.

The only natural cure for catarrh is the dry air treatment which effects startling cures without resorting to drugs, dangerous snuff and cocaine mixtures.

Catarrhozone kills the catarrh germs, soothes and heals the sore mucous membrane, clears the air passages of the nose and throat, cures chronic catarrh that has resisted all other treatments.

The reason why Catarrhozone cures is because it really gets at the cause of the disease. No matter how remote or long standing your catarrh may be you can place perfect faith in Ferrozone. It is Nature's Cure composed of the most healing balsamic antiseptics known to medical science. Read the following:

MR. L. MURPHY, well known in West Medford, Mass., writes: "Catarrhozone cured my catarrh, after a score of doctors failed. I used to hawk and spit, my nose was continually stuffed up, and often I was sick at my stomach. Catarrhozone has removed every trace of catarrh from my system."

MISS EMMA PETERS, Highland Grove, N.S., writes: "I am more than pleased with the results from Catarrhozone. It cured me of the worst kind of nose and throat catarrh. Other friends using Catarrhozone are greatly pleased with it and agree that it is the only sure remedy for catarrh they ever used."

Nr. LAWRENCE KENNEDY, of West New Annam, says: "For three years I suffered from catarrh and throat trouble. I tried many remedies but they were of no avail. I got no relief till I tried Catarrhozone. Too much cannot be said of so valuable a medicine. I shall always recommend Catarrhozone to anyone troubled with catarrh; it is a positive cure."

MR. W. W. BEACH, of Chapman, Ont., who suffered for years from systematic catarrh says: "Catarrhozone is the best remedy I have ever used for catarrh and I have used a lot of them. Catarrhozone was exactly suited to my case."

No intelligent person can doubt the merit of Catarrhozone which receives more praise from Medical Journals, doctors and the public than any other remedy; it is certain to cure every type of catarrh, lung and throat trouble. Two months' treatment, $1.00; sample size 25c. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S., and Kingston, Ont. Refuse a substitute for Catarrhozone.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

A New Vessel

Mr. C. J. Snyder, of Simcoe street, is the chief promoter in a scheme to place a new vessel on the Otonabee River. The boat will be known as the "Sovereign," and is now being completed at Montreal. It is expected that she will be running by the first of May.

Mr. J. Carew in Town

Mr. J. Carew, of Lindsay, who has purchased a portion of the timber on Wallis estate, near the city, spent Saturday in town, making arrangements for shipping it to Lindsay. Mr. Carew is a well-known lumber man and goes into the timber business on an extensive scale.

Another Wire to Peterborough

In order to provide for the rapidly increasing business in Ontario, the Canadian Pacific Telegraph Company will add a number of improvements to their present efficient system. An additional wire will be strung from Toronto to Peterborough, according to the statement of Mr. Jas. Kent, the manager.

DEATHS

MENZIES—In Peterborough, on Saturday, February 27th, 1904, Jane Menzies, relict of the late James Menzies, aged 83 years.

Funeral from the family residence, corner Stewart and Sherbrooke streets, on Monday afternoon at 2.30 to the Little Lake Cemetery.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Yesterday looked much like spring.

—The Board of Trade meets tomorrow evening.

—There are three cases of diphtheria in the Fifth Ward of Peterborough.

—An important meeting of the Board of Management of the Y.M.C.A. is called for this afternoon at 3 o'clock.

—The Salvation Army Band yesterday played "Cardiff" in the afternoon, and in the evening played "You have Carried Your Burden."

—The hot water pipes in St. Paul's Sunday school building burst yesterday morning, necessitating holding the school in the church.

—Mr. W. E. Jarrett, of the Canadian Correspondence College, Toronto, intends paying Peterborough a business visit this week.

—At the Board of Trade meeting tomorrow evening such important subjects as "The Trent Water Conservation," and "Fire Protection" will be discussed.

—A case of neglecting a two-year-old child was recently brought to the notice of the Children's Aid Society. A man named Wilson, along with his wife, were the accused, and they consented to allow the Society to care for the child in future.

—A chimney sweep could do a land office business in Peterborough, as there are many chimneys sadly in need of cleaning. The many small fires of late have in almost every instance originated in the chimneys.

—The sale of the Humphries wood and bush land which was to have been held on Friday, did not take place. Several offers were made but all were below the amount of the reserve bid.

—It is expected that there will be a shortage in the log cut also this spring. The majority of lumber firms fear that on account of the heavy snowfall the log shortage will be at least 25 per cent.

—The average newspaper man is in love with the individual who, when he is the sole possessor of information which should be given publicity carefully withholds it from the editor, and then spends half a day yapping round town that the "paper is no good and never has any news in it." We shall feel greatly indebted to our readers for any little items of interest that may have escaped the notice of our reporters on their rounds.

—P. T. Barnum once said "If you have $19 to put to use, pay $10 for the article and $9 for the advertising. I can talk to any man but an editor. He who publishes a paper and every week talks to a thousand men, while I am talking to one, is the man I am afraid of and I want to be his friend. The business man who does not advertise is poor stick. Trade with the men who advertise if you want to get bargains and the worth of your money." The Times is the best advertising medium in Eastern Ontario.

—York township and Junction people will be interested in learning that Mr. J. T. Anderson—who attended the Collegiate Institute in the latter place some years ago, and resided near Fairbank, in the former municipality—has accepted the appointment of city editor of the Peterborough Daily Times and is now doing duty on that journal. It always pleases me to see brainy young Canadians like Mr. Anderson coming to the front. Mr. Anderson is not only a good writer, but he is also a cartoonist of more than ordinary ability, as several of his sketches appearing in the Leader and Recorder from time to time amply testify. I am sure that my young friend Anderson has the very best wishes of hosts of friends in this good old county of York.—Toronto Junction Leader and Recorder.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Launt Thompson, of Chicago, is staying in town for a few days.

—Mr. J. J. McCrea, of Water st., is spending a week in Toronto.

—Mr. H. Soanes, of the C.G.E. Co's works here, is visiting at his home in Lindsay.

—Miss Lizzie Wicker returned to Toronto after a two weeks' visit to her parents, Victoria ave., town.

—Mrs. S. White and Mrs. Jas. Campbell are the guests of Mrs. Jas. Matchett, of Maple ave, Otonabee.

—Mr. Thos. Eastwood, of the Buckhorn Hotel, paid the Times a pleasant visit on Saturday.

—Capt. J. Perkin, Manager of the Kawartha Lakes Navigation Company, spent Saturday in the city.

—Miss Pearl Junkin, of Fenelon Falls, who has been spending a few days with friends here, leaves this morning for her home.

—Guests at the Oriental—R. J. Stewart, Norwood; Thos. Lenne, Chicago; H. B. Tuttle, New York; L. Thompson, Chicago; Belleville Hockey team; J. J. Daly, Belleville; Dr. W. R. Dean and wife, Mt. Pleasant.

Ho For Summer Climes!

The Grand Trunk Railway System have issued a handsome publication entitled "Winter Tours to Colorado and California," and which are now in their City Ticket Offices for free distribution. The publication deals with the attractions of the States of Colorado and California as winter resorts for Eastern people, and as the present season is the time to visit these Western resorts for pleasure, and the invalid for health, the publication is issued at an opportune time. It is handsomely illustrated with views of Manitou Springs, Pike's Peak, Gateway of the Garden of the Gods, Grand Canyon of Arizona, views in the Yosemite Valley, and the Big Trees of California; also views of interesting points on the line of the Grand Trunk. There is also a fund of information regarding Personally Conducted Excursions to these Western Points, time tables of trains, maps, etc.

Copies may be had on application to J. D. McDonald, District Passenger Agent, Union Station, Toronto.

RESPECTFULLY DEDICATED.

There was a chap named Giroux,
Who'd always put the stone through
He, as skip, did so well
The spectators would yell—
Hurroux for Giroux! Hip Hurroux!

WATCH FOR THE BIG RACE

They tells me as mi ole friend George Graham and Harry the Brun is goin' to skate a mile for oysters nex' Saturda. When Marire handed me the Times this mornin' after breakfast,—i allus read before eatin' an' of course the g. f. j. is the latest news goin',—I thot i'd die. Marire axed me the trouble, sayin', "Wot is you laffin' at Silas? Yer gettin' foolisher every day. Is them Rushing gettin' it agin, or wot's up?" "Rushins!" said I, 'Rushins ain't in it with this,' an' I read the report of the great race. Marire has been on bad terms with her husband for some time past, but i must blame that thar g. f. j. fer bringin' us closer together. She came right over to read it fer herse'f an' then she laffed so all sufferin' loud that the cat jumped thru the window an' i've had to advertise fer her. She ain't come back yet. She wasn't used to hearin' such lafter, and,—such news.

The Fat Man and the Noosboy.

Bein' old and unable to git out of the hous' much, I jest thot I'd picter out fer myself wot that thar race will look like, an' mi notes is these;—first, there will be grate preparashuns made. They'll likely hev ter enlarge the rink or else tak the middle ov the street, but then in the latter case ther woodn't be room ter accommodat ther crowd, so i gess the rink'll hev to do. Policeman McGigty will be ther to pertect the ticket agent from bein' crush ed by the crowd. Everybody will be interested. Even the nousboy will stop sellin' his papers to look on and the fat man will be a sympathetic specktater.

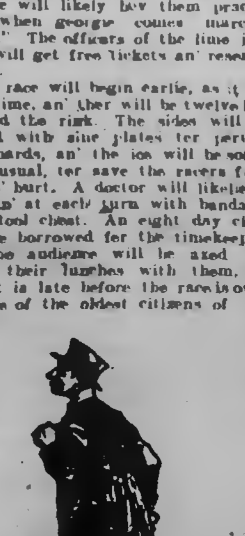
The affair will be talked erbout all weke an' everybody will hev his own opinion of the grate event. The gests at the grate hotel will hev it thrashed out, an' the town filosopher will be decided in his idee that George will be a winner.

The Town Filosophe.

Joe Halpany's orchestry will likely be ther full force an' the first piece played will be Marsellays an' the last will likely be "the dead march," altho george will likely hev them practice up, "when george comes marchin' home." The officers of the lime juice club will get free tickets an' reserved seats.

The race will begin earlie, as it will take time, an' ther will be twelve laps around the rink. The sides will be coated with sine plates ter perteck the boards, an' the ice will be softer than usual, ter save the racers from gettin' hurt. A doctor will likelie be standin' at each turn with bandages an' a tool chest. An eight day clock will be borrowed fer the timekeepers an' the audience will be axed ter bring their lunches with them, in case it is late before the race is over.

Some of the oldest citizens of the city will try ter be present an' will watch the grate skatin' with intrest, an' ther will likelie be a livlier market that Saturda than usual, as all the farmers will be comin' in an' stayin' over for the great affare. The Bonspeil won't be in it, an' the Saint Louie fall fare won't hev a better attrackshun.



"The oldest citizens will be there."

"Talk erbout Horse-racin!"

Talk erbout horse racin', why it won't be in the next lot to this affare. It will be tawked of far an' near an' no bet less than a nickel will be considered. This is erbout all I can say at present, but Marire hes promised ter go, an' after the greta event i'll write up her story of the fray from life.

Yours trulie
SI JONES.

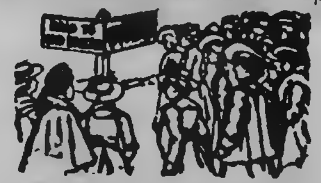
We want a good, steady boy to learn the bookbinding trade. A good chance for a bright boy. Apply at Times Bookstore.



$500 REWARD! FOR WOMEN

WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

The Vice-President Independent Order of Good Templars.

An experience which many women have was related by Miss Agnes Stebbings, of 231 East 29th Street, New York City, as follows: "I had very poor health for a year until life looked dark and dreary to me. Had headaches, backache, also pain, my sleep was broken and fitful. I longed for health. Tried several medicines but none were of any lasting benefit until I took Doctor Pierce's Favorite Prescription. I soon realized that I had found the right remedy. It helped nature to throw off the poisons that saturated the system, removed all pains and strengthened the digestive organs, and brought the roses of health back to my cheeks. This medicine if taken occasionally keeps the system in perfect condition, helping it to throw off the disease and consequences of exposure to dampness. I am pleased to give it my endorsement."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of 31 one-cent stamps for the paper-covered book, or 50 stamps for the cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

SCHEME TO BLOCK PORT ARTHUR HARBOR FAILED

Many of Those Who Manned the Vessels Sent in to Block the Harbor Drowned

Chefoo, Feb. 29— Fifteen survivors from the Jinsen Maru, and fourteen from the Bashu Maru which were sunk at Port Arthur, landed Thursday at Tenghaufu, near here. They travelled overland, and arrived at the Japanese Consulate Friday in a greatly exhausted condition. One Japanese was killed as the Jinsen Maru's boat was lowered. Lieut. Saito, who commanded the Jinsen Maru, declares that the steamer got so close to the Retvizan at the entrance of the harbor that the Japanese could have fired into her if the crew had rifles. When it was found that the scheme to block the harbor was a failure the vessels anchored, and their crews crowded into small boats. The steamers were then blown up. A strong wind and the glare of the search lights prevented the men in the boats from reaching the torpedo flotilla. The officers have shaved their heads as indicating sorrow for the failure of the expedition.

NINETEEN JAPS CAPTURED

Yin-Kow, Feb. 29—The first reports by eye-witnesses of the engagement at Port Arthur in the early morning of Wednesday have been received here. They say one Japanese coal hulk was sunk, and one was beached near the Retvizan, and that nineteen Japanese in civilian clothes escaped ashore, where they were afterwards captured. From long range two shells struck in the city.

Repeated attacks by the Japanese during the past week have resulted in the constant shifting of the troops, including the naval contingent organized from the crews of the disabled and idle warships, to all parts of the defences, and also to the hinterland.

Refugees arrived here yesterday report that the Russians momentarily fear land invasions of Port Arthur from Pigeon Bay.

The authorities have refused to permit the British captain Riddell, to sail his ship, the Foxton Hall, to Chefoo. It is understood that if the ship is released a Russian skimmer will be sent for the purpose of preventing intelligence of the Russian operations being given to the Japanese blockaders.

Russia Pouring 5000 Men a Day Into Pt. Arthur Vicinity

To Resist the Expected Japanese Attack, Troops Are Also in Force at Seoul

London, Feb. 29—Russia is said to be pouring 5000 men a day into the Liaotung Peninsula to resist the expected Japanese attack in the vicinity of Port Arthur. Troops are also in force on the Seoul-Pekin road, that runs from Liaoyang, between Mukden and New-chwang, to the Yalu River, thus presenting an army front against any advance from the direction of Port Arthur or Corea. The mounted scouts who have invaded Corea have penetrated to a few miles east of Pingyang. No clashes with the enemy are reported. There are no indications of a Japanese advance in Corea.

HAS A DREAM OF LONDOD BEING IN DANGER

England Learns that a Fleet Could Easily Sweep Up the Thames

Chicago, Feb. 27.—The Record-Herald has the following from London:

London at the mercy of German gunboats, her metropolis shelled from the lower Thames, her shipping destroyed, her public buildings reduced to ruins, and the British Empire thus struck that "terrible blow over the heart," against which the late Lord Salisbury warned his countrymen in one of his last speeches.

Such is the picture which has been painted in lurid colors as the outcome of a lecture the other night at the United Service Institution. Admiral Close, who took part in the discussion following the lecture, which was entitled "Coast Defence from the Imperial Standpoint," said he was astonished at the want of proper defence on the Thames.

SHOWS ONLY DEFENCE.

"If Germany declared war on Monday," he said, "they could have a couple of gunboats up the river to the middle of London the next night. London never will be save until we have a couple of such craft stationed in the river. A gunboat could get past Sheerness and there would be nothing to stop it except a few police boats. Invading vessels could inflict any amount of damage. They could destroy the Houses of Parliament, the Tower, and play havoc with the shipping.

The danger was not realized by the public, said the admiral, and until it was, London never would be safe.

Several alarmist articles were founded upon these premises, and may be presumed to have set multitudes of cockneys to trembling in their shoes at the thought of the dread possibilities.

It was pointed out that such a catastrophe might happen if the British fleet were defeated at sea. One newspaper says;

"It is not pleasant to reflect that the continental anglophobia generated by the Boer war could have been backed up by the river attack on London, had any foreign power thought it worth while to make the attack. Yet in 1899 there were no fewer than sixty obsolete muzzle-loading guns guarding the capital. Today thirty of these useless weapons crown the works of Cliffe and at the Coal House forts there are some 12.5-inch guns of ancient date, but at Tilbury and Shoremead scrap iron is now being supplanted by efficient ordnance.

"Much, however, remains to be done before the defences can be described as modern. In not a few of the forts round coast equipment is greatly at fault and a surprise attack would result in a scramble for both ammunition and gear.

"At Harwich in the Humber, the Tee, the Tyne, the Forth of Tay, the Cylde, and the Mersey, the defences are only now in course of being brought up to date. The cordon of land forts around London is comparatively a modern creation, but the gunners seldom handle the weapons'

GUNNERS NOT DRILLED.

The volunteer artillery, who, on mobilization, would man the Thames forts, still drill with obsolete weapons, and it is doubtful indeed if there are six men in each battery who know enough about the quick-firing rifles to use one effectively in a case of sudden emergency. Of course well known but anonymous military and naval experts have been called into consultation and one of them draw a startling picture of torpedoes at Westminster.

"Given first of all the one indispensable condition of surprise," he said, "the Thames could be entered easily at any time by an enemy's fleet. There are no defences that are available to check the ascent of the river, and a few vessels, say a small squadron of swift-sailing, powerfully armed destroyers or small cruisers, if they once got past the More, could torpedo the Houses of Parliament".

When you stop to think that home-made tea biscuit cost but five cents a dozen, is there any reason for buying at the baker's?

Made with Cleveland's Baking Powder they will taste better and will be more wholesome and appetizing than any you can buy.

Should Doctors Advertise?

Whatever dignity it may lend to the profession the etiquette which forbids doctors to advertise very often inconveniences the public. Tradition and dignity are, no doubt, both valuable assets, but while self-respecting medical men naturally shrink from the methods of the patent pill maker it is difficult to see what loss of dignity would be incurred by reputable doctors setting forth briefly their qualifications in the daily papers. It often happens, especially with new-comers in the suburbs, that in the case of sudden illness they have nothing whatever to guide them as to what particular doctor they should send for. Now, if they could only discover by consulting the local papers the qualifications of the various medical men in the district a great deal of trouble and inconvenience would be avoided.

WEATHER NOTES

Tuesday—Sleet or rain.

WE ARE PROUD OF THEM

Former Citizen Who Have Attained Success Across the Border

In the last edition of "Who's Who in America," we read the names of the following three gentlemen who proudly claim Peterborough as their birt-place—

Ryerson Ritchie, President of the American Trust Company, Cleveland, Ohio.

James H. Stevenson professor of Hebrew, Vanderbilt University Nashville, Tenn.

Trevor Kincaid, professor of Zoology University of Washington Seattle, Wash.

We are pleased to learn of the success of these, our former citizens, and may their success act as an incentive to our younger generation to strive to reach the top.

A SWIMMING RACE

Competitor Thinks the Exertion Required Would be Less

In Saturday's issue of The Times it was reported that Messrs. Geo. Graham, the popular proprietor of the Oriental Hotel, and Mr. Harry Le Brun, the well known clothier of George street, would skate in a mile race next Saturday. Since then the genial merchant has thought the matter over seriously and thinks it might be as well if this were called off. The exertion will be rather too much, according to his idea, but he thinks perhaps a "swimming race" —when we get a change of climate—would be still more satisfactory. A still later despatch states that the clothing man has a new idea in the racing line. It states that he considers a "sleeping race" would be more in accordance with the comfort of both contestants. Certainly, in the latter case, neither of the competitors would require very much training. The public will look forward with interest to the appearance of the reserved seat plan.

JAS. KENDRY M.P. HONORED

Presented With an Address by Employees of Canadian Woolen Mills

Mr. Jas. Kendrie, M.P., who is retiring from the office of General Manager of the Canada Woollen Mills, Hespeler, was presented by the employes of the Company with a handsome travelling bag and also received the following address,—

February 29th, 1904.

Dear Mr. Kendry,—We, the overseers of the Canada Woollen Mills, Limited, learn with regret that you are about to sever your connection with this company. We fully recognize your sterling ability as a manager of Woollen mills, and assure you that it has been a pleasure to work for you during the last two years.

We ask you to accept this slight token of esteem we have for you and our regret at your departure. We wish you every success in your undertakings, and trust you may be spared for a good many years to work for the benefit of the woollen industry.

Signed on behalf of the overseers,

R. A. PROUD,
A. G. BRIDGE,

Mr. Kendry made an able response, expressive of his regret at having to sever his connections with the company, but he wished them all future success under their new management.

JOHN SMITH AGAIN

An Eccentric Character Dead—Supposed to Have Lived Here

An Illinois paper publishes the following account of the death of a certain "Capt." John Smith,—

Close search in the squalid room where he lived like a hermit for 18 years, and finally committed suicide, has failed to reveal the identity of Capt. John H. Smith, for whose familiar figure Evanston, Ill., people now look in vain.

Smith, who was better known as "The Turk" was a character in Evanston, where his huge and ponderous figure has earned him the reputation of being a giant. It was his boast that he was the biggest man in the world.

An examination revealed the fact that he was a small man, and that his apparent great size was entirely due to the immense number of garments that he wore. His hat alone weighed fifteen pounds. Four suits of heavy clothes and enormous boots made up his usual street garb. His waist measurement, when he was dressed was almost seventy inches, and he boasted that he weighed over 400 pounds. His dead body weighed only a little more than 100 pounds, and his waist measure was less than thirty inches. Smith was born in England, and came to this country from Canada twenty years ago.

It is reported that the above "Turk" once was a laborer here, but he cannot learn of anyone having ever known him.

GERMANY LIKES RUSSIA

Von Bulow Says This is the Feeling of All but the Socialists

Paris, March 1.—The Petit Parisien records a conversation which, it states, a French visitor to Berlin had a few days ago with Count Von Bulow, the German Chancellor, who is reported to have stated that, with the exception of the Socialists, all parties were at one with the Government in its desire to remain on friendly terms with Russia. It was Prussian and German tradition to cultivate friendly relations with Russia. A Russo-German friendship was, therefore, in the nature of things.

"There are those who claim that Germany is pursuing in the far east a realization of her egotistical plans,' the Chancellor is credited with saying. "There are others who go so far as to say that German policy constitutes a black spot on the European horizon.

"How of what could those secret aims, these 'egotistical plans' be? We are suspected of seeking to lay hands on the provinces of Cee-Lee or some other portions of the Chinese Empire.

"We have agreed with the idea of neutralizing China with the exception of Manchuria. Naturally, then, if we are in favor of neutralization it is positive proof that we are not seeking for conquest. People must really think we are fools to credit us with such absurd dreams."

CANADA LIFE'S 57TH YEAR

Report Shows Splendid Progress Made During 1903—Large Increase in Business

The vast returns that will come to Canada Life policyholders and their families as years go by can be partially realized, when it is stated that $95,500,000 of assurances are now carried by this Company. During 1903 the new business paid for amounted to well over $10,000,000, which was a considerable advance over the record of any previous year. Policyholders and their beneficiaries received during the year about $1,675,000—making a total of about $27,000,000 paid out in this way by the Canada Life since it began business.

The assets of the Company show a gratifying increase, and now stand at well over $27,000,000. In making up its policy reserves the Company still employs the most stringent valuation basis of any old-established life company on this continent. Over and above these strong reserves surplus on policyholders' account stand at more than $1,860,000.

The branch opened in Great Britain a year ago has proved a most successful undertaking. The fact that the Canada Life's reserve basis is higher than that of any other Canadian or United States company doing business in the old land has proved an "open sesame" to the business public there. By extending its operations within, rather than beyond, Anglo-Saxondom, the Canada Life makes it possible to increase business without at all lowering it high standard in the selection of risks. The Dominion, the United Kingdom and the Northern States are certainly the "pick" of the world's insurance territories.

RUSSIA VERY HOSTILE TO U. S.

Growing Daily in Intensity in the Empire

MAY YET COME TO BLOWS

Vicksburg Incident Serious Menace to Trade with Russia

St. Petersburg, March 1.—The irritation against the United States on account of the unfriendly attitude of that country toward Russia, which was slightly noticeable throughout the negotiations, seems to have become daily more pronounced, and since the Vicksburg incident at Chemulpo, when the commander of the American gunboat is said to have refused to unite with the commanders of other foreign warships to protest against the fighting which resulted in the loss of the Russian warships Varing and Korietz, American business men here are really alarmed concerning the possible effect upon American trade.

ORDERS CANCELED.

Within the last few days orders for American goods have been countermanded, the only explanation given being that the prospective purchasers did not desire to buy American goods under the present circumstances. United States Consul General Watts has been appealed to in the case of an American firm which had a large contract for school supplies, the contract having been peremptorily canceled.

Orders for the importation of a big consignment of wood pulp have also been countermanded, the intending purchaser saying in his letter that he could not be expected to do business with America after the Vicksburg incident.

WARNS DEPARTMENT OF DANGER

Mr. Watts has felt it to be his duty to write to the State Department, pointing out the state of public feeling here, and the great prospective damage to American trade unless measures were taken to allay the irritation.

Americans believe here that an official explanation of the Vicksburg incident would be opportune and have an excellent effect. The government officially has not taken notice of the incident, being without direct official advices from the far east on the subject. In government circles, however, it is seen plainly that Russian susceptibilities have been wounded and the fear is expressed that should Washington now disregard Russia and procure exequaturs for the newly appointed American consuls at Moukden and Antung from Pekin and attempt to send those officials to their posts a really serious situation might be created.

MAY CONSIDER ACT UNFRIENDLY

Russia does not want to be placed in the position of refusing to allow these consuls to enter upon their duties, but with a state of war existing and commerce at a standstill military conditions herself warranted in interpreting such a course on the part of the United States to be political rather than commercial.

The refusal of Russia to allow Mr. Moran, the newly appointed consul at Port Dalny, to go to his post at present is based solely on the military situation, which may compel all foreigners to leave Port Dalny.

The sincere hope is expressed that the United States will not embarrass Russia further by pressing the question of consular representation at this time.

TO DAIRYMEN

The following has been received by The Times, with instructions to insert;

Gentlemen,—The Montreal Produce Merchants' Association desire once more to record its objections to the manufacture of fodder cheese, either at the beginning or at the end of the season, believing it to be against the interests of all connected with the manufacture of full grass cheese, from the farmer to the exporter. It is the opinion of this Association that the time has arrived when the manufacture of fodder cheese should be discontinued, and a time for the opening and closing of cheese factories definitely arrived at.

The amount of cheese manufactured in Canada last year reached the total of 2,900,000 boxes, being about 350,000 boxes over the previous year. This was largely owing to the excessive manufacture of fodder cheese in March and April, and November and December. The uncertainty of the extent and time of the manufacture of these fodders, together with the inferior quality produced, tends to depress the market, creates a lowering of values, and affects the prices obtainable during the whole of the summer season. The opinion of this Association is that it is strongly in the interests of dairymen that the manufacture of cheese should not commence before May 1st, and should close not later than November 15th. If this is done, a steadier market would result, and a better average price would be obtained. The question of what to do with the surplus milk during the seasons referred to, is easily settled by the manufacture of butter. By giving closer attention than heretofore to the requirements of the trade in Butter, the quality would be very much improved, and we should soon again gain a reputation and quick market for goods made during the winter and early spring months. Most profitable use could be made of the skim milk for the feeding of stock.

The prospects for the profitable manufacture of butter have never been brighter than they are this season. The exportation of butter from Russia, which is assuming large proportions, will probably be much curtailed by the war between that country and Japan and this fact, together with the firm advices from England, should bring about higher prices in the near future. With the present good home trade demand, producers of choice creamery butter will find prices profitable this spring. The stock of cheese in Great Britain and Canada, is now almost double that of last year, and if many fodders are made, it is bound to result in phenomenally low prices during the coming season.

I am, Gentlemen, yours truly,

J. STANLEY COOK,
Secretary.

EXPEDITION INTO THIBET

British Government Determined on Final Settlement

London, March 1.—Lord Hardwicke Under Secretary for India, in the House of Lords, replying to the request of Lord Reay (Liberal), for further information regarding the British mission to Thibet, said the Government was determined to insist on a final settlement regarding carrying out the terms of the convention of 1890.

The Thibetans have refused to have intercourse with Great Britain, but the result of the continual intercourse with Russia had been to inspire the Thibetans with the feeling that they had Russia behind them, and therefore they need not fear the British. The situation in the Indian Government His Majesty's Government could not tolerate for a moment. While Lord Hardwicke refused to pledge the Government regarding the limit of Col. Younghusband's advance into Thibet, he said the mission was friendly, and Col. Younghusband would do nothing to promote hostilities.

TRAGEDY NEAR NORWOOD

YOUNG GIRL IN BELMONT TOWNSHIP COMMITS SUICIDE

On Saturday Night at the Residence of Her Employer, Mr. Dan Muhroe - Took Diamond Dye

Sad news reached town yesterday when Coroner Gray received word of the supposed suicide of a seventeen-year-old girl, in the Township of Belmont, about nine miles from Havelock. A young girl, named Edith Gatow, was found dead at her employer's residence, at the above place, on Saturday evening, and the circumstances strongly point to suicide. The girl had been left alone in the house and was discovered lying dead about 6.30 o'clock by the owner of the property, Mr. Dan Munroe, When discovered she was lying prostrate across a bed upstairs, with her face, lips, mouth and hands dyed a clear purple color. A package, which had contained diamond dyes, was empty. Although this package was found lying on the floor downstairs, it is supposed that the unfortunate girl administered the poison and then staggered upstairs to lie down and die.

That the girl was determined to kill herself is proven by the presence of a razor, which bore stains of blood, and a package of strychnine, which lay unopened beside the bed. This had evidently been taken from a trunk, which had been burst open by a hammer, which lay beside it. Lying beside the victim on the bed was a smeared note, the only decipherable words of which were, "She will kill ——Good-bye."

A physician was immediately summoned from the village of Havelock, but, of course, his services were of no avail, as the girl had evidently been dead for some hours. About the head and neck were blood stains and gashes, all of which, with the distinct signs of her having taken poison, pointed to deliberate suicide.

The unfortunate girl had, it is reported, very often expressed a wish to die, although no particular attention, was paid to her remarks, as she was naturally of a most cheerful disposition. She had lived for some time with Mr. and Mrs. Munroe, and both testify that she was regularly bright and cheerful. On Saturday they were both absent from the house, Mrs. Munroe being in Havelock, and Mr. Munroe and the hired man were chopping in the woods.

Coroner Gray received word yesterday, and, as the circumstances surrounding the affair called for an inquest, he will leave for Havelock at noon today. Word was sent last night to have a jury empanelled and the affair will be thoroughly investigated.

FIFTEEN JAPANESE WARSHIPS FURIOUSLY BOMBARDED PORT ARTHUR YESTERDAY

For Two Hours--Russian Battleships Badly Damaged and a Torpedo Boat Sunk.

Special To the Times.

St. Petersburg, Feb 27—Direct confirmation of the report from Hakodate that Vladivostock is blockaded by Japanese vessels cannot be obtained here, but it is considered not improbable. During the Japanese landing operatings in Corea, the Russian warships to the North were a constant interference and blockading them would be the most effective means of securing non-interference.

Furthermore it is worthy of note that for more than a week no word has been allowed to come from Vladivostock and this, it seems, is strong presumptive evidence that important events are transpiring in that vicinity.

The report from Liao Yang, Manchuria, that the Japanese fleet has received orders to attack and capture Port Arthur on March 1st, at all costs coupled with the comparison of Port Arthur and Sebastapol made by the Novoe Vremya, has created a profound impression, and has added to the belief that the Japanese possibly intend to commence land and sea operations against Port Arthur sooner than was anticipated.

Special To the Times.

London, March 1st, a despatch to the Daily Telegraph from Yin Kow dated Feb. 29, says.—15 Japanese warships furiously bombarded Port Arthur from 10 o'clock to 12 o'clock this morning. The Russian cruisers, Novik, Askold, and Vayan, accompanied by four torpedo boats, cleared out to meet the attack. They were, however, forced to retire. The Askold was in a sinking condition, the Novik was badly damaged, and a torpedo boat was sunk. The Russian cruiser Retvizan was again damaged.

The Japanese withdrew in good order.

OPERATIONS RESUMED

Packing Department of Cereal Co. Has Recommenced

Many hearts were made glad yesterday morning by the re-commencement of the packing department of the Cereal Company's Works. Only twelve days have elapsed since the disastrous fire, and the company is to be complimented on the enterprise and energy displayed, in starting so soon. The works will not be running with the usual full force for a short time yet, as there are still some repairs to be made.

AMERICA TAKES A HAND

London Paper Comments on Attitude of United States,

London, March 1.—The Morning Post today devotes a long editorial article to a historical record of the rapid growth of American activity in far eastern affairs, comparing the present attitude of the United States with its passive interest in the Chino-Japanese war. The paper remarks on the notable pro-Japanese feeling in the United States after such a long traditional friendship with Russia, and contends that American friendship to the Czar's Empire was always artificial. Admiral Dewey's guns, the paper continues, literally shuttered the superstition that Russia was the appointed friend and Great Britain the appointed enemy of the United States. "We believe," the Morning Post concludes, "that the appearance of America as a working element in international affairs and her unmistakable hostility to Russia is destined to become 'epoch-marking if not epoch-making."

Local Sports

CURLING.

The four local rinks that were to have journeyed to Orillia today, did not go, owing to the blockage caused by yesterday's storm.

The games for the second draw for the Kendry Cup which were to have been played last night did not come off, owing to several of the skips being unable to play, owing to sickness and other reasons. A few practice games were played in the evening, but no games came off in the afternoon as was expected.

We understand from a local enthusiast that Mr. Geo. Giroux, the crack local curler, is about to challenge Mr. John Flavelle, of Lindsay, to play at an early date for a barrel of flour, which is to be donated to any charitable institution the winners may decide upon. The challenge is expected to read, "Mr. Flavelle's rink, or the best rink in Lindsay."

The T.A.S. hockey team intend playing the Lindsay septette as soon as they get through with their present engagements.

There is trouble again in the Trent Valley League. It appears that the rules of the League state that games must be played in open air rinks in the afternoons. Napanee has an open air rink and are desirous of playing in the evening, owing to the impossibility of drawing a crowd in the afternoon. But this being against the rules, the game with the T.A.S. of Peterborough did not come off yesterday. Word has been received, however, that Napanee will play our boys a sudden death game on Thursday night at the Brock St. rink. An exciting time may be expected, as both teams are in fine form.

"Chaucer" Elliott will referee the Midland-Peterborough game at Peterborough tonight, while Roy Thomas, of Barrie, will referee the return game in Midland.

EVERYBODY READS THE TIMES

PRESENTATION TO MR. IRWIN

His Sunday School Class Visited Him Last Night — Presented with Locket

Last evening, Mr. A. W. Irwin, who leaves today for Moosejaw, Assa., received an unexpected but most pleasant surprise when he was visited by his Sunday School class and presented with a beautiful locket, accompanied by a short address. While he and his family were sitting at tea together, all were surprised by the trampling of feet on his front verandah, and on opening the door, he was pleasantly surprised to meet his Sunday school class of young ladies from Charlotte street Sunday school who, it was soon learned, had come to present him with a beautiful locket. On one side of this beautiful emblem of their esteem for their former teacher, was a horseshoe neatly set in pearls, with a shamrock of olivines in the centre, and the departing teacher's initials were engraved on the other side.

The address, though brief, contained much, and read as follows;

Peterborough, Feb. 29, '04

Dear Teacher,—Please accept this gift as a slight token of our deep regard for you.

Wishing you a happy and prosperous future, From your Sunday School Class,

AGGIE CARR,
MARY RUTH,
ALICE HOPKINS,
MAUD MORTON,
ETHEL OLIVER,
GERTRUDE POLLARD
CLARA COLLINS,
MARIA HOPKINS,
EDNA SEE.

In thanking his scholars for their beautiful token of remembrance, Mr. Irwin assured them that while he would ever appreciate their most valuable present very highly, still it was not necessary for any token of this kind to keep the class ever fresh in his memory, as the most pleasant hours of his work in Charlotte street church for the last four years, were those spent in the study of the lesson with them. He hoped that they would all rally around his successor and give her as faithful support as they had always given him.

UNIONISM GONE MAD

Most Unreasonable Demands Made by th Brewery Employes

Chicago, Feb. 28—That labor unionism has gone mad, is evidenced by the strike in the breweries of this city. The new agreement presented by the union provides not only an increase in wages, but other conditions which the brewers claim it would be next to impossible for them to grant and remain in business.

The union demands an eight hour day and stipulates that ten minutes in each hour shall be given the workers in which to drink the product of their labors. No limit is placed by the agreement itself on the amount of beer the men are to drink in this time, but it is stipulated that rules now in force shall be continued. These rules limit the number of glasses served to each worker to seventy a day.

The workers demand that two workmen who are termed "watchmen," shall be employed in each brewery at $3 a day and they shall do nothing but distribute free beer to the thirsty toilers.

Another demand is that the brewers shall allow them to select the kind of kegs and barrels in which the beer is to be put on the market. None but union-made barrels are to be used by the brewers. An attempt to use the work of nonunion coopers would be considered an abrogation of the contract and cause for a strike.

In the first section of their agreement the brewery-workers practically make the brewers their agents in the matter of collecting dues from their members. The agreement provides for the employment of none but members of the Brewery-Workers' and Maltsters' union in good standing. The brewers are to compel their employes to show them the union working cards and to see that the cards are for the current month—an indication that the man who owns it has paid up his dues. This section necessitates the discharge of any worker behind in his dues.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room
Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $3 per year, strictly in advance.

PETERBOROUGH, MARCH 1, 1904

RUSSIA'S FIRE IN THE REAR

In spite of the ostentatious removal of the censorship, we are not likely to get much news about conditions in the interior of Russia. But some scraps of information point to a concealed fire in the rear at home, which is likely to weaken the forces of the empire quite as much as foreign intrigues. Probably little faith is to be put in reports of revolutionary outbreaks here and there. The military and police power of the empire is too strong to permit more trifling local disturbances. Later in the war when defeat and bankruptcy shall have weakened the empire, the revolutionists may work to more purpose.

We think Russia has no more dangerous enemy than the Jewish race, greatly as she has humbled it and much as she thinks she can despise it. A new edge is given to this Jewish hatred by the brutal expulsion of the Jews from Siberia, which is, at the same time, a fatal confession of weakness. The excuse is that the Siberian Jews hate the Government, and would betray its military secrets to Japan. This is probably true; but what is likely to become of a government whose oppression has turned millions of loyal subjects into secret enemies? The Siberian Jews are probably no more hostile than the survivors of the frightful massacres in the Russian pale. These will be found no less dangerous enemies, if their opportunity should come.

The rear of Russia is occupied by the ruins of kingdoms she has crushed and nationalities she has tried to destroy. Her fortunes of war will be followed nowhere with more eager interest than in Poland and Finland. What can be done in secret to hurt and hamper her here will probably be done from the outset. Should defeat or bankruptcy deliver Russia into the hands of her enemies, we may expect to see national revolt striking hands with internal revolution, and the vengeance of an outraged race to assail her in the rear.

INFLUX OF PUBLICATIONS

It is expected that at the next session of Parliament an effort will be made to have the postal regulations changed in such a manner that there will be some protection for Canadian books, newspapers, and periodicals against the influx of United States publications. Under the existing conditions more than 500,000 books and periodicals from the United States enter Canada every month, while only about 25,000 are sent out from here.

Not only this, but Canadian readers hardly ever see English copies of the English periodicals that have become world-renowned. Instead they see publication beyond the cover and the United States copies, which have hardly anything to resemble the original title page.

To change this state of affairs Canada and the United States will have to be brought under the regulation of the Universal Post Union. To do this the postal convention of 1875 will have to be canceled, and then the rate of letters will be 5 cents between the two countries, and while post cards would cost 2 cents, newspaper and book postage would be 8 cents per pound. It is figured out that at that rate the postoffice receipt of Canada would increase by about $200,000.

EDITORIAL COMMENT

All the great powers of Europe are "preparing for the worst," and the chances are that they'll get it.

* * *

Admiral Alexieff made a great mistake in not taking his torpedo flotilla with him when he went to Harbin.

* * *

A man 80 years old has just been admitted to the bar in Nebraska. With fair luck he hopes in time to be able to build up a good practice.

* * *

A rather curious thing in police annals was brought to light in the fact that of the total assessment for the city of Toronto of $149,000,000 a little more than $1,000,000 is held in the names of Toronto policemen and officers. The chief is worth $100,000, and one sergeant, Vaughan, $50,000, while detective Cuddy is worth $60,000. On an average the constables and patrolmen are rated at $32,000 each, this being the least amount which each one has in the bank or invested in real estate.

Best Way to Rear Healthy Children

Develop Their Strength With Ferrozone Which Makes Rich Blood, Hardy Muscle, Steady Nerves.

Children brought up on Ferrozone are known by their strong rugged frames, their chubby cheeks and healthful appearance. Mothers find it an indispensable tonic and body builder, and in thousands of homes no other remedy is used.

Mrs E. Montgommery, of Pittsburg, writes; "A little neice came to visit me, and noticing her pale looks and haggard looks, I started her on a course of Ferrozone. The change that girl underwent in a few weeks was marvellous. Her appetite chirped up, she had more spirit and energy and a rosy color came into her cheeks that I never saw there before. I weighed my neice about the time she started to pick up, in seven weeks she gained almost eight pounds, and just looked the picture of health. I think this should be an example to many mothers, and I hope that others will try Ferrozone for their little boys and girls. I am thoroughly convinced that it's the most strengthening tonic. It has my strongest endorsement."

EVERY CHILD IMPROVES ON FERROZONE.

The reason that Ferrozone works so beneficially with children is that it acts directly on their blood, freeing it of all unhealthy matter, at the same time giving it an additional supply of iron. This at once results in more strength, new spirit and renewed vitality. Just one tablet at meal time works wonders.

You must be sure to get Ferrozone. Refuse to accept any article the druggist may say is just as good. Get what you ask for, Ferrozone, and the result we guarantee will be satisfactory. Price 50c per box or six boxes for $2.50. By mail from N. C. Polson & Co Kingston, Ont. and Harford, Conn. U.S.A.

HAS A DREAM OF LONDOD BEING IN DANGER

England Learns that a Fleet Could Easily Sweep Up the Thames

Chicago, Feb. 27—The Record-Herald has the following from London;

London at the mercy of German gunboats, her metropolis shelled from the lower, Thames, her shipping destroyed, her public buildings reduced to ruins, and the British Empire thus struck that "terrible blow over the heart," against which the late Lord Salisbury warned his countrymen in one of his last speeches.

Such is the picture which has been painted in lurid colors as the outcome of a lecture the other night at the United Service Institution. Admiral Close, who took part in the discussion following the lecture, which was entitled "Coast Defence from the Imperial Standpoint," said he was astonished at the want of proper defence on the Thames.

SHOWS ONLY DEFENCE.

"If Germany declared war on Monday," he said, "they could have a couple of gunboats up the river to the middle of London the next night. London never will be save until we have a couple of such craft stationed in the river. A gunboat could get past Shiarness and there would be nothing to stop it except a few police boats. Invading vessels could inflict any amount of damage. They could destroy the Houses of Parliament, the Tower, and play havoc with the shipping.

The danger was not realized by the public, said the admiral, and until it was, London never would be safe.

Several alarmist articles were founded upon these premises, and may be presumed to have set multitudes of cockneys to trembling in their shoes at the thought of the dread possibilities.

It was pointed out that such a catastrophe might happen if the British fleet were defeated at sea. One newspaper says;

"It is not pleasant to reflect that the continental anglophobia generated by the Boer war could have been backed up by the river attack on London, had any foreign power thought it worth while to make the attack. Yet in 1899 there were no fewer than sixty obsolete muzzle-load ing guns guarding the capital. Today thirty of these useless weapons crown the works of Cliffe and at the Coal House forts there are some 12.5-inch guns of ancient date, but at Tilbury and Shoremead scrap iron is now being supplanted by efficient ordnance.

"Much, however, remains to be done before the defences can be described as modern. In not a few of the forts round east equipment is greatly at fault and a surprise attack would result in a scramble for both ammunition and gear.

"At Harwich in the Humber, the Tee, the Tyne, the Forth of Tay, the Cylde, and the Mersey, the defences are only now in course of being brought up to date. The cordon of land forts around London is comparatively a modern creation, but the gunners seldom handle the weapons"

GUNNERS NOT DRILLED.

The volunteer artillery, who, on mobilization, would man the Thames forts, still drill with obsolete weapons, and it is doubtful indeed if there are six men in each battery who know enough about the quick-firing rifles to use one effectively in a case of sudden emergency. Of course well known but anonymous military and naval experts have been called into consultation and one of them draw a startling picture of torpedoes at Westminster.

"Given first of all the one indispensable condition of surprise," he said, "the Thames could be entered easily at any time by an enemy's fleet. There are no defences that are available to check the ascent of the river, and a few vessels, say a small squadron of swift-sailing, powerfullly armed destroyers or small cruisers, if they once got past the Moro, could torpedo the Houses of Parliament".

UNIONISM GONE MAD

Most Unreasonable Demands Made by the Brewery Employes

Chicago, Feb. 28—That labor unionism has gone mad, is evidenced by the strike in the breweries of this city. The new agreement presented by the union provides not only an increase in wages, but other conditions which the brewers claim it would be next to impossible for them to grant and remain in business.

The union demands an eight hour day and stipulates that ten minutes in each hour shall be given the workers in which to drink the product of their labors. No limit is placed by the agreement itself on the amount of beer the men are to drink in this time, but it is stipulated that rules now in force shall be continued. These rules limit the number of glasses served to each worker to seventy a day.

The workers demand that two workmen who are termed "watchmen," shall be employed in each brewery at $3 a day and they shall do nothing but distribute free beer to the thirsty toilers.

Another demand is that the brewers shall allow them to select the kind of kegs and barrels in which the beer is to be put on the market. None but union-made barrels are to be used by the brewers. An attempt to use the work of nonunion coopers would be considered an abrogation of the contract and cause for a strike.

In the first section of their agreement the brewery-workers practically make the brewers their agents in the matter of collecting dues from their members. The agreement provides for the employment of none but members of the Brewery-Workers' and Maltsters' union in good standing. The brewers are to compel their employes to show them the union working cards and to see that the cards are for the current month—an indication that the man who owns it has paid up his dues. This section necessitates the discharge of any worker behind in his dues.

57th ANNUAL REPORT

The Year's Business The new business of the year was the largest ever submitted to the Company, and the figures in tabular form together with those for 1902 are as follows:

	1903	1902	Increase
Number of applications received	6863	5022	1841
Amount of Assurances applied for	$13,881,960	$10,687,672	$3,194,288
Policies Issued	12,635,032	9,734,002	2,901,030
Policies Paid For	10,122,139	8,398,386	1,723,753
Total business in force	95,531,110	89,170,575	6,360,535

Of the applications received, 266 for Assurances of $693,716 were declined, as not conforming to the Company's standard.

The Income The gross premium and Annuity income was $2,847,559.74, and the income from interest, including $30,757.20 profit on sale of securities, reached the handsome sum of $1,176,374.33 Together these make the total gross income (exclusive of payments on account of Capital Stock), $4,023,934.07.

The Payments The death claims paid during the year amounted to $1,227,414.43. The matured endowments and death claims, (including bonus additions), and annuities paid in 1903, amounted to $1,528,420.46 while $145,273.49 was paid as cash dividends and surrender values to policyholders, making total payments to policyholders $1,673,693.86.

The Assets The total assets at the 31st December 1903, as shown by the balance sheet, amount to $27,180,007.21, being an increase of $1,215,074.71 over 1902—a growth that your Directors think is very satisfactory. The usual conservative practice of the Company has been followed in the valuation of its assets.

The growth of the Company's assets in the past twenty years is shown by the following table:

TOTAL ASSETS.

In 1883	$5,664,000
In 1888	8,954,000
In 1893	$14,313,000
In 1898	20,038,000
In 1903	$27,180,000

Liabilities In the valuation of the policy liabilities the Company's own standard has again been employed, viz: the Institute of Actuaries' Table, with interest at 3½% for all business prior to January 1st, 1900, and the same table with 3% interest for policies issued since that date. The total net Reserve by this valuation standard amounts to $25,093,374 In addition to this the Company holds reserves of $82,315 for lapsed policies subject to revival and $55,028 for instalment claims fund. After providing for these Reserves and for all liabilities except Capital Stock, there remains a surplus on policyholders' account of $1,861,367.32 A large section of our business was valued on the new table known as the OM Table, and the Reserves brought out amounted to 99.7% of the Reserves required by the table now in use by the Company. So that it would appear that no material change in Reserves would result by the adoption of more recent tables of mortality. So far as is known this is the first occasion upon which these new tables have been used in a valuation in Canada or the United States by any Company having an established business.

A full report of the meeting will appear in the Company's papers, "Life Echoes".

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

he Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

0 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

etters from prominent people regarding the Bannie Mine

ROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-02.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

SSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1902.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1902.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-31-02
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

SSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1902.
Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

JAPANESE TORPEDO BOTS MAKE AN UNSUCCESSFUL ATTACK ON PT. ARTHUR

Jap Army will Now Lay Siege--According to Report The Mikado's Transports are off Port Arthur to Disembark Soldiers for Land Operations

London, Feb. 27 — Most important news from the seat of war, if it is reliable, is that a large fleet of transports is off Port Arthur, preparing to disembark an army to besiege that place. Unofficial telegrams from St. Petersburg indicate that such a development is fully expected there. A large number of transports have returned to Nagasaki, where they are busily embarking more troops for the vicinity of Dalny. Over forty transports have sailed since Feb. 10. A still larger embarkation is proceeding from Ujina, near Hiroshima. The latter place, and not Kioto, will be the army and navy headquarters during the war. Over 36 big transports are now at Ujina and an enormous mass of soldiers has been detrained there.

LEAVING DALNY.

Dalny is being evacuated. The Russians boast that they have mines at the breakwater docks and railway sidings, to prevent the Japanese from using them.

There are only five months' supplies at Port Arthur. The Russians say they mean to defend Port Arthur, and to fall back with the rest of their troops from Dalny to the Yalu River, and if pressed upon Harbin.

Of the reported Japanese landing at Posiet Bay there is no confirmation, but the rumor recurs. Some scepticism is expressed over the report, partly because there is a large Russian garrison there. There is an unconfirmed report that a Japanese squadron is blockading Vladivostock, and still another report that the Russian squadron there has again put out to sea. Its destination is unknown.

ANOTHER BRUSH.

A Russian correspondent telegarphs from Port Arthur, under date of Feb. 26, as follows;—

"Last night at about 10 o'clock Japanese torpedo boats again unsuccessfully attempted to approach Port Arthur. Firing was heard at sea after midnight, and it is presumed that Russian torpedo boats or torpedo boat destroyers had attacked the Japanese. No details of the result are at hand".

AN UNEXPCETED MINE.

St. Petersburg, Feb. 27—An unofficial despatch from Port Arthur says that the Japanese steamers that were stranded at the entrance of the harbor have been examined. They were loaded with coal and kerosene. An electric battery on each steamer, placed in a companionway connected with wires in the holds, where apparently infernal machines were placed. One steamer that was on fire grounded near the cruiser Retvizan. The fire was quenched by the energetic efforts of the captain of the Sibiriak.

JUST PAINTED DUMMIES.

Tokio, Feb. 27—It is stated that the steamers sunk at Port Arthur were all painted to imitate warships, for which reasons the Russians mistook them, and helped to execute Japan's purpose in sinking them. Ten members of the crews on board were drowned.

RUSSIANS CAPTURE TWO BRITISH TRANSPORTS

And One Norwegian Vessel Laden with Coal, Reports of Fighting

Special to The Times.

St. Petersburg, Feb. 28—A despatch from Lia Yang, dated Feb. 28, says that Chinese on the Yalu River report that an advance guard of Russian cavalry, which has penetrated into Corea for a distance of about 200 versts across the river, had an encounter with a detachment of Japanese, and that the Japs were compelled to retreat, and fled, leaving their horses, which were seized by Cossacks. General Linevitch despatched cavalry and a body of infantry in pursuit with an order to occupy Northern Corea

Special to The Times.

London, Feb. 28—The following official despatch was received by the Japanese Legation here—

Tokio, Feb. 28, 9 a.m.—A number of the enemies' cavalry appeared at a point 700 metres north of Ping Yang, Corea. Our infantry fired on them, causing them to retreat.

Special to The Times.

Seoul, Feb. 28—Details of a skirmish at Ping Yang last Friday show that 50 Russian cavalrymen approached the north gate of the Japanese camp, and fired at a distance of 100 metres. A sharp fusilade took place and the Russians retired. All foreigners are safe.

Special to The Times.

St. Petersburg, Feb. 28—An official despatch dated today from Major-General Pflug to Viceroy Alexieff, chief of staff says—

"The night of Feb. 27th passed quietly at Port Arthur. The enemy's squadron keeps in this vicinity. Reports are coming in of movements of Chinese troops west of the Liao river, and according to rumors, 10,000 Chinese troops under General Ma are on the road between Ting Chu and Chao Jan. The military guard on the Sin Min Lu railway has been reinforced from 40 to 50 Chinese soldiers having been placed at each place. Our mounted troops have entered Corea and the attitude of the population is friendly to us."

Special to The Times.

Tokio, Feb. 28—Corean soldiers on the Han Gyang frontier have been attacked and dispersed by Russian troops.

Special to The Times.

Suez, Feb. 28—The steamers laden with coal for Japan, captured by Russian torpedo boat destroyers are reported to be the British steamers Ettrick Dale from Barry, Feb. 3, for Taban, the British steamer Frankby, from Barry, Feb. 3 for Hong Kong, and Norwegian steamer Matilda from Tenarch, Jan. 30, for Sasebo.

PROMISES TO BE RECORD BREAKER

Emigration from United States Will be Heavy

PROSPERITY IN THE WEST

Hon. Robert Rogers Speaks of Conditions Existing in Manitoba

Montreal, Feb. 28—Hon. Robert Rogers, minister of public works, in the Manitoba Government, reached the city and is staying at the Windsor. In conversation with a reporter Mr. Rogers spoke of the conditions that obtained in the West, and directed his remarks chiefly to the situation created by the railway policy of the Roblin administration.

Mr. Rogers is of the opinion that the immigration of United States settlers from the northern and middle west states to the Canadian North west this year will be a record-breaker. He attributed the rush across the border to two things. First of all, land could be bought at considerably lower prices than those asked for equally well situated, but, in almost every case, poorer lands, in the States. A farmer could sell out his farm in Dakota or Minnesota and move to the Canadian Northwest with sufficient money to buy and stock a farm. This was the class of settlers that the West wanted.

The second and principal reason of the so-called American invasion, Mr. Rogers said, was due to the railway policy of the Manitoba Government. Freight rates had been reduced to such a low point that they were from 4 to 10 cents per 100 pounds cheaper in the West than on the American side. This made all the difference in the world. Settlers had the advantage of splendid railway facilities with cheap freight rates, and were, therefore, able to get their produce to the markets expeditiously and cheaply.

"I firmly believe," said Mr. Rogers, "that our railway policy is responsible to a very great extent for the rush of good settlers from the south. It is a policy that has been in the best interests of the province and is now bearing fruit."

Mr. Rogers is convinced that the settlers from across the border will make splendid citizens. The Americanizing of the West was a cry that had no foundation in fact.

"Do not labor under the impression," continued Mr. Rogers, "that Manitoba is undergoing a boom, that is in the ordinary sense of the word 'boom.' The province is enjoying a period of great prosperity and is experiencing a growing time. In every department, agricultural, financial, and commercial, the outlook was never better and exceeds the most optimistic hopes of the Manitoban of a few years' residence."

Delegates from Port Hope

At the first annual meeting of the Port Hope Canal Association on Friday night last a committee, consisting of Dr. Powers, J. F. Clarke, and H. Barrett, was appointed as a deputation in the interests of the Port Hope Association to attend the sitting of the Royal Commission on Transportation to be held shortly in Peterborough and to extend an invitation to the commissioners to hold a sitting in Port Hope and go over the route.

INTERVIEW WITH LORD STRATHCONA

Regarding the Movement for Anglo-French Cordial Entente

CANADIANS WILL PROFIT

Declares His Lordship by Establishment of Good Relations with France

London, Feb 29—I interviewed Lord Strathcona to-day regarding his share in the Anglo-French entente movement. He said that the friendliest possible relations were not being established between business men in England and France. The results he said, must have an important bearing on Anglo-French diplomatic relations.

M. Mascurand, the president of the French Comite Republicain du Commerce et de L'Industrie, has assured him that the French members entered in the association now numbered no fewer than 11,000. It formed a most representative and influential body.

The Anglo-French character of the Canadian population rendered this movement of great interest and concern for all Canadians. For Canada would unquestionably benefit from friendly Anglo-French relations.

COMMISSARIAT OF THE JAPANESE

Is a Perfect One Says an American Exper

THOUGHT OF EVERYTHING

Every Facility Provided for the Winter Campaign by Mobile Forces

London, Feb. 28.—A despatch to the Daily Mail from Ko-Yang says that foreign military men greatly praise the Japanese commisary and transport arrangements. Gen. H. T. Allen, chief of the Philippine Constabulary, who has been acting as American military attache at Seoul, told the correspondent that the infantry equipment was splendidly adapted for the work facing the troops in Corea. The food arrangements are perfect. Each infantry unit has a cylindrical stove and detachable kettle capable of cooking enough rice to furnish one meal for one hundred men. Nine such stoves and kettles are used for cooking for a battalion. Boxes containing half-pound cans of meat are carried by four horses for each battalion. A quantity of sodium sulphate is carried to purify water for drinking. Each soldier is provided with a German aluminum mess pan containing two cooked rations of rice, in addition to six emergency rations. The rice is boiled and dried in the sun and wrapped in cotton bags. It is of trifling weight.

London, Feb. 28.—A despatch to the Daily Mail from St. Petersburg says that Prince Alexander of Oldenburg, in addition to donating $750,000 to the Russian war fund, has made an offer to the Czar to raise a troop of irregulars from the bravest tribes of Buriats and Kalmuks of the Steppes, stipulating that the troop shall be under military rule, but that they shall be allowed complete freedom in making independent raids, according to their own modes of warfare. Prince Alexander offers to equip and support 1,500 of these warriors throughout the war. The Czar has accepted the offer.

A New Vessel

Mr. O. J. Snyder, of Simcoe street, is the chief promoter in a scheme to place a new vessel on the Otonabee River. The boat will be known as the "Sovereign," and is now being completed at Montreal. It is expected that she will be running by the first of May.

DEATHS

MENZIES—In Peterborough, on Saturday, February 27th, 1904, Jane Menzies, relict of the late James Menzies, aged 83 years.

Funeral from the family residence, corner Stewart and Sherbrooke streets, on Monday afternoon at 2.30 to the Little Lake Cemetery.

EVERYBODY READS THE TIMES.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.00 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.75 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.85 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite, and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.,
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air pipe into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

For the Ladies.

Knives.

The loosening of the handles of knives is due to the fact that the knives have been tossed into a pan of hot water, together with the forks and spoons, and, in consequence, the cement has melted away. Knives when brought from the table, should be scraped against the edge of a plate to remove as much soil as possible and the blades should then rest in a jug, not a pan, of hot water, into which a little bit of soda has been melted, care being taken that the water does not reach the handle, where it joins the blade.

Bookish Women.

Bookishness is an unreliable test of ability. I have known bookish women who were profuse readers and delighted in study, but were not of much use for anything else, and I have known other women who took books rather hard, but amply made up for that disability by their closeness of observation and mental energy. As between persons who read to save themselves the trouble of thinking, and persons who observe and think, but find reading laborious, the latter are likely to be best worth while. But reading, observation and thought ought to work well together and to make for practical efficiency. A mind that is capable of Greek and analytical geometry is usually capable also, under proper training, of omelets, good coffee and household administration.—E. S. Martin, in Harper's Bazar.

Hindu English.

Lady Curzon, who was Miss Leiter of Chicago, gets a lot of fun out of her life in India. Among other fads, it is said that she makes a point of collecting any amusing attempts made by Hindus to write English that may come under her notice, and has many ludicrous specimens in her scrapbook. Recently she got from Bombay a letter that two brothers sent out to their patrons on the death of their father, who had been the head of the firm. The letter ran: "Gentlemen,—We have the pleasure to inform you that our respected father departed this life on the 10th inst. His business will be conducted by his beloved sons, whose names are given below. The opium market is quiet, and mal. 1,500 rupees per chest. O death, where is thy sting? O grave, where is thy victory? We remain, etc."—Leslie's Weekly.

Care of House Plants.

The advent of colder weather means increased fire heat, the latter also meaning an increased aridity or dryness of the atmosphere. The latter condition will probably induce a visit from insect pests, unless precautions are taken to prevent their appearance. Green fly and red spider are most to be feared, especially the latter, as their appearance is not so easily detected as that of the aphis, or green fly.

Copious sprinkling and syringing with cold water is the best preventive for the attacks of the so-called spider. Salvias, fuchsias, roses and carnations are first favorites with this little pest. When first attacked, the leaves of these plants present a whitish, dusty-looking appearance, especially on the underneath side, and the leaves will soon commence dropping twice every day. Tobacco water is the best remedy for green fly, although tobacco leaf stems, or even a cigar thoroughly dried and rubbed into a fine powder and sprinkled on the plants infested with green fly will generally rid the plant of them. The latter application is best made after the plants have been recently sprinkled or syringed, as the tobacco dust adheres better when the foliage of the plant is moist.—William Hunt, Guelph, Ont.

Keep the Windows Open.

You would not think of drinking stale or poisoned water, would you? You know that if you were to be shut in an air-tight compartment death would result. Of all the necessities of life, you can live longer without any of them than air. Impure air and darkened apartments are the cause of an untold number of deaths annually. You know that on a sunless day, with a close atmosphere, you are out of sorts at the best, if you are lucky enough to escape physical ailments, while you are mentally depressed. But once let the sun shine brightly, and clear the atmosphere, how different, how much better you feel in every way.

Cold weather is coming, and when you are tempted to close up the house as tight as it can be made, remember these things, and don't do it, especially at night. Keep the windows in the sleeping apartments open enough to at least give you sufficient fresh air. A cold room does not indicate that it is healthy, far from it. A sleeper will soon breathe up all the fresh air in a room, and if there is not a constant supply of fresh air, he simply breathes over and over again the poison thrown off by his lungs. And the breathing of this vitiated air only tends to lower the temperature and vitality of the system, so that it is not as capable of withstanding the rigors of winter. Fresh air is heating to the body; in fact, upon it depends the combustion of the fuel in the body and by which we are kept alive, which we should always bear in mind.

Even with open windows during the night, bed chambers and bed clothing should be thoroughly aired each morning, and allowed all the sunlight possible. During sleep, not only do the lungs throw off more poison than during the day, but it is especially so with the body in its relaxed condition and when the pores are all open. During sleep the body should have plenty of covering; better to have too much than not enough, both to induce deep slumber and to keep the skin moist and the pores open that they may have the opportunity to rid the system of poison. Bear in mind that death would follow the closing of the pores.

Fresh air in cold weather will cost money, as more fuel will be required, but it will be economy, for if it does not save sickness and doctor bills, and which it most likely will do, you will feel better and the stronger for it.—Cooking Club.

POINTED PARAGRAPHS

Weeping willows should be planted in tiers.

The plainer a woman is the more she moralizes.

Continued cheerfulness is a manifest sign of wisdom.

To become rich without labor is the idea of most men.

Judge a man by his address rather than by his dress.

A man must feel girlish when he [illegible]

Creditors and poor relations always call at the wrong time.

It is an easy matter for a man to resist everything but temptation.

If any homely woman lives long enough she will become a pretty old one.

A writer says the only gems that are a drug on the market are gems of thought.

Many a man carries his total assets on his shirt front in the guise of a diamond pin.

Speech is silver and silence is golden—and there is more silver in circulation than gold.

The public trusts many a man with an office that his butcher wouldn't trust with a pound of bacon.—Chicago News.

The river Jordan has its origin in one of the largest springs in the world.

Howitzers are steel breechloading weapons weighing 2,500 pounds and having a length of six feet ten inches.

The shipyards of Great Britain, all working together, cound turn out a big steamship every day of the year.

Whatever the harm of sensational literature, it teaches the people to read.

Despite the defects of the American press, it holds up a mirror of the whole world's affairs. The mirror may not be the right kind, but its tendency is to lead the people to self-consciousness.

If you do not like vice and crime, change the light. If you look into a mirror and see a dirty face, do you wash the face or the mirror?

I do not want a press which shows up the virtues of humanity and not the faults; but let us have more truth, the whole truth and nothing but the truth.

GEMS OF THOUGHT

Deeds are greater than words. Deeds have such a life, mute but undeniable, and grow as living trees and fruit trees do; they people the vacuity of time, and make it green and worthy. Why should the oak prove logically that it ought to grow, and will grow? Plant it, try it; what gifts of diligent judicious assimilation and secretion it has, of progress and resistance, of force to grow, will then declare themselves.—Carlyle.

The longer we live and the more we think the higher value we learn to put on the friendship and tenderness of parents and of friends.—Dr. Johnson.

You may find two wity men, ten clever men, and twenty-foolish men before you will find one prudent—or thrifty man.—Old Humphrey.

About any art, think last of what pays, first of what pleases. It is in that spirit only that art can be made. —R. L. Stevenson.

One more good man on earth is better than an extra angel in heaven.

Man thinks he knows, but woman knows better.

It is not the wine that makes a man drunk, it is the man.

Only imbeciles want credit for the achievements of their ancestors.

Eloquence is a painting of the thoughts.—Pascal.

All things come to him who makes other people wait.

The average woman has a lot more intimates than she has friends.

Women consider any brilliant man good-looking, and men consider any good-looking woman brilliant.

If you have $25 and want a job it is better to spend $20 for clothes, $ for shoes and the rest for a shave and a hair-cut and a clean collar, and walk to the place than go with the money in the pockets of a dingy suit.

The world depends on its school-children.

A town which has no school should be abolished.

The world is only saved by the breath of the school-children.

Even for the rebuilding of the Temple the instruction of the children must not be interrupted.

If you interrupt your studies for one day it will take you two to make up for what you have lost.

THOUGHTS OF A QUEEN

The woman who forgives unfaithfulness has ceased to love; true love does not know forgiveness.

Animals move freely in their element; man is often out of his element because he is the slave of habit.

If your wife deceives you it's your own fault.

Mistrust a man who doesn't believe in domestic happiness.

There is nothing in a man that two smart women can't worm out of him.

You, I, all of us, will throw the first stone on a woman who does what a man of honor is freely permitted to do.

A woman that is misunderstood is one who doesn't understand other women.

When a man sets out to destroy things he goes about it like a steer or bear; woman, in the same mood, imitates the gnawing mouse or the spring of a serpent.

Value of Shredded Fodder.

Ask men who have made a practice of feeding shredded foder why they do it, and they will tell you that they feed it because their cattle, horses and sheep like it so well and thrive so well upon it, and because they cannot afford to let it go to waste and feed hay which could be sold for two or three times as much as the prepared fodder costs. When the farmer computes the cost of cutting and shredding his fodder it looks high, but he must remember that, although it does cost him from $2.50 to $3.50 per ton, it takes the place of hay which has a market value from two to three times that amount. Men who have made a practice of feeding shredded fodder state that it costs from $3 to $5 an acre to prepare it, and that an acre of average corn will yield from one and one-half to two and one-half tons of dry fodder. They say further that a ton of fodder has as much or perhaps more feed value than a ton of average hay. Corn used for shredding is bound and shocked when the grains are well dented and glazed over, but before the stalk has shown many signs of ripening. When thoroughly dry it is run through the husker and shredded and stowed away in the mow.—Iowa Agriculturist.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:
J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees
J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

EGBERT CHAMBERLAIN, ... NEW YORK
Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

BOARD OF DIRECTORS

JOHN A. THOMPSON,
WILLIAM GARLICK,
GEORGE B. WILCOX,
ARTHUR B. GARLICK,
RICHARD F. DOSSIE
B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

IGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPANY

corporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and successful experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address.

Langtry & King Edward.

In commenting on that interesting and now historical episode in which she was said to have playfully sent a lump of ice tobogganing down the spinal column of the present Edward Rex, Lily Langtry said to Acton Davies the other day: "There is no reason in the world why I shouldn't tell the truth about that little matter, for the very good reason that it never occurred. When the King, then the Prince of Wales, heard the story, he asked me if I knew how on earth it could have been started. Of course I couldn't. However, my old friend, Mrs. Cornwallis-West, finally solved the mystery of how the story started, and her explanation, though a very weak one I admit, is the only peg on which any of us have been able to hang this story. An informal dinner was given one night at which Mr. and Mrs. Cornwallis-West and myself were guests. The Prince of Wales was not present. It was a very jolly little party; we all knew each other very well, and everyone was having a beautiful time, with the exception of Mr. Cornwallis-West, who was tired and wanted to go home. Several times he asked his wife to make a start, but she was enjoying herself and refused point blank. Finally he became quite angry and begged her to start. The ices were still on the table, and, taking a spoonful of hers, Mrs. Cornwallis-West laughingly slipped it under her husband's collar, with the remark: 'There, my dear boy, that will cool you off for a few moments.' This story must have been repeated by some of the guests, and enlarged upon until it was landed upon his Royal Highness and myself. That, I assure you, is all I know about the matter. Even my enemies must admit that I have always been noted for gentle manners, and that I or any other woman would ever have dared take such a liberty with the prince is too ridiculous. His Royal Highness was charming and most good-natured about the whole matter. In fact, only this past summer, when the King was talking to me at Newmarket about my last American tour, he remarked, with a twinkle in his eyes: 'I suppose they are still telling that lump of ice story on us in America,' and I answered, 'Yes, and I'm afraid their time prancing about like marionettes.'"

Kill or Cure.

A short time ago a veterinary surgeon summoned a man to the Winkletown County Court for two guineas for attendance on a dog, reports an English paper.

He swore that he had been called in and found the dog suffering from distemper, and that he had paid so many visits and had supplied such and such medicines, for which he claimed two pounds two shillings as per agreement. Then came the defendant's turn.

"You say that I agreed to pay you two guineas?" questioned the defendant.

"Certainly you did!" replied the plaintiff.

"Do you remember what our arrangement was?"

"Perfectly."

"Didn't I say that I was afraid of you running up a long bill, but that if you would agree to take two quid, 'kill or cure,' you might have the case?"

"Quite right; and I said that if you would make it guineas I would take it on," answered the plaintiff, with a gleam of triumph.

"Well, now, on your oath, did you kill my dog?" demanded the defendant, with a sudden energy that woke up the judge and made the usher jump again.

"Certainly not," replied the other, with a bluster that was perhaps justifiable in the circumstances.

"And you didn't cure him, see he's dead; and as I promised to pay, and you agreed to accept, two guineas, 'kill or cure,' and you haven't done either, I wonder how you've got the nerve to ask for the money even, let alone bring me here."

At this point the learned judge intervened, and the case was remanded for further consideration.

An Engagement Extraordinary.

According to the Paris correspondent of the London "Telegraph," a determined suitor recently found a new way of using the motor-car for matrimonial purposes. The object of his affection was willing to wed him, but her parents were obdurate. He pretended to give up hope, and to be reconciled to the idea of being merely a friend of the family, and he took out the girl and her father for an automobile drive to Havre. At a dangerous part of the road he suddenly put on full speed, and the car sprang away at a terrific rate. The girl sat still and showed no fear, but her terrified father shouted to the man who wanted to be his son-in-law to stop. "Consent to my marriage with your daughter" was all the motorist replied. Still the car tore along, and if any obstacle had appeared in the road at least three fatalities would have occurred. "Stop! We shall all be killed!" the girl's father continued to cry. "Most certainly we shall," said the determined young man grimly; if you don't consent at once I am going to send the machine into the ditch, and at this rate that means quick death." As he spoke he imparted violent lurches from side to side to the car. "I consent!" gasped the now vanquished parent. Immediately the car slowed down, and the rest of the journey was done at a steady touring pace. But during the motor's previous mad career a policeman had jotted down its number. When the girl's father, to whom the machine belongs, appeared in court to answer to the summons, his future son-in-law accompanied him, and looked exceedingly pleased with himself. When a fine of sixteen francs was imposed the younger man said he would pay it himself with pleasure. He confided to the magistrate that the day had been named.

Her Own Opinion.

Miss Askew—So your marriage is put off?

Miss Crummy—Yes, papa is not at all satisfied with his position; mamma doesn't like his family connections, auntie thinks he is too careless in his dress, and I think——

Miss Askew—Yes, what do you think?

Miss Crummy—I think I ought to wait till he asks me.—"Town and Country."

She—Do thoughts that came to you long ago ever return?

He (a poet)—Sure, if I enclose a stamped envelope.—Denver "Republican."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of mody companies selling stock at 50 cents a share, and will stand a thorough investigation.

Fine Weather Gives Relief from Catarrh

But Never Cures it Because the Germs are Still Alive Though Inactive. First Kill the Germs Then You'll be Really Cured:

Catarrh germs are carried into the throat and lungs by the air we breathe. In the same way the remedy must be applied, to be effectual the cure must be breathed, for otherwise it can't get where the germs really are.

Mix your germ-killing medicine with air, breathe it right into all the little air cells where the catarrh really is, then you'll get cured quickly. This is exactly the way Catarrhozone acts. You inhale its medicated vapor to the very source of the disease. It destroys the cause of the inflammation, kills all the microbes that develop when the lining membranes become diseased. Besides this Catarrhozone is a wonderful healer. Every sore spot is rebuilt with new healthy tissue. All the poisonous secretions that have been putrifying the system are driven out. No trace of catarrh remains after Catarrhozone has been used.

Why don't you use Catarrhozone? Its the simplest thing in the world to use, and so sure to cure permanently that you really can't afford to be without it.

MISS E. M. PETERS is known by every resident in the pretty town of Highland Grove. She was cured by Catarrhozone of systematic catarrh and says; "For three years before I commenced using Catarrhozone I was continually bothered by a congested condition of my nose and throat. I was sneezing and coughing all the time and really never felt well. I perservered with Catarrhozone and was rewarded by being entirely cured. My recovery prompted others in this locality to use Catarrhozone, and many of them have had remarkable cures from using it."

MISS LOUISE MURPHY a well known society belle residing at 22 Monument St., Medford, writes; "Kindly forward me three outfits of Catarrhozone which I have found most valuable for catarrhal affections of the nose and throat. Catarrhozone cured me of weak lungs and really saved me from consumption. I am recommending Catarrhozone above all other treatments, knowing what great curative powers it possesses. I know others who have also benefited by Catarrhozone."

Catarrhozone is perfectly harmless and may be used with perfect safety by the most delicate infant. Instead of deadening the stomach with drugs, it sends the healing vapor along with the air you breathe into every air cell and passage of the nose, throat, lungs and bronchial tubes. Catarrhozone can't fail, it's sure to cure. If not satisfied you can have your money back for the asking. Two months' treatment, hard rubber inhaler and extra bottle of inhalent costs $1.00, sample size 25c. By mail to any address if price is forwarded to N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont., Can.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

20 Teams Wanted

To haul wood from Dest's Station to town. $1.75 per cord. R. HICKS & Co. 2td

Peterborough Man Injured

In a railway wreck on the "Soo" branch on Sunday night, Mr. J. B. McWilliams, of this city, sustained slight injuries. The train on which he was a passenger suddenly left the track and a number of passengers were badly shaken up. We trust Mr. McWilliams' injuries may not prove any more serious than have been reported.

Roads in Bad Shape

The reports from various parts of this country bear out the idea that the very large accumulation of snow must melt away considerably before travel reaches its normal state. To turn out when rigs meet makes getting back into the track almost an impossibility. The best way when rigs are coming towards each other is for one driver to secure a good chance to turn out and remain there until the feat has been successfully accomplished. This is being done with good results.

The attendance a the
Peterboro' Business College
is larger this' year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGLE,
Principal.

A Narrow Escape

Mr. Wm. Corneil, a local liveryman, had a narrow escape from serious injuries yesterday morning. While driving from his stables in the rear of the Snowden House, he turned the corner too quickly and was thrown from his sleigh. The horse became frightened, and started off, dragging Mr. Corneil for some distance along the icy road. His shoulder and leg sustained severe bruises, but he was otherwise unhurt.

Memorial services

The Rev. J. G. Potter, pastor of St. Andrew's church, preached at Lakefield and North Smith on Sunday. The services were of a memorial character. During the week the pastor, Rev. C. A. Campbell, had been called away by the death of a brother, and Dr. Johnston, a former member of St. Andrews Young Men's Guild, had been called upon to suffer grevious loss in the death of his young wife. Services appropriate to the incidents were held at each meeting.

"The Story of the Argonauts."

Owing to the inclement weather a great many who would otherwise have been in attendance, were prevented from enjoying the interesting lecture by Mr. R. M. Dennistoun, of St. John's Church school room, last evening. The subject of Mr. Dennistoun's most interesting speech was, "The Story of the Argonauts." The speaker, in dealing with his subject, showed a thorough knowledge of the old Grecian legend and those present received much benefit from the lecturers' instructive remarks.

Police Court Notes

The list of offenders at yesterday morning's police court was rather small, only two cases being brought up. Robt Wolstenholm drove on the sidewalk last week and yesterday morning he paid $2 for breaking the law. His Worship remarked that no more offences of this kind would be let pass. There are too many who do not abide by the law in regard to driving on the public walks.

John Louchs had indugled too freely in the cup that inebriates and he spent Sunday in the cells. Yesterday morning John came before His Worship and a fine of $2 was imposed.

The New Roy Studio

This is now nearing completion, and is thoroughly up-to-date and modern. Large luxurious reception room, decorated in dull red, burlap, furnished in mahogany and weathered oak. Turkish rugs and antique ornaments, etc., etc., giving instantly an air of quiet comfort and elegance. The Skylight Studio is now on the first floor, and is a veritable parlor of immense proportions, and is furnished with the most modern accessories. In this room Mr. Roy has installed one of the largest and most practical sky lights known. Adjoining are two spacious dressing rooms, with large mirrors and every convenience. In the working departments one of the most important items is the dark room. This is 10 x 25 feet in size, and is fitted with everything imaginable for the production of negatives of all sizes. The printing and finishing rooms are on the same floor and are decidedly spacious and complete. Mr. Roy and his son are thoroughly practical photographers and conversant with every detail of the art. The date of opening will be announced later. 1dlw

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—The Board of Trade meets tonight.

—It looks as though we are going to have winter again.

—Builders are anxious for suitable weather to begin work

—Mr. R. B. Rogers, chief engineer of the Trent Canal, delivered a lecture at Belleville last evening.

—The Rev. Wm. Major, of Toronto, has received a unanimous call to All Saints' Church, town.

—St. Andrew's Young Men's Guild will be held Tuesday, March 8th, instead of tonight, which is their regular meeting night.

—The G.T.R. way frieght was cancelled last night, and her engine was sent to Garden Hill to assist in pulling the Toronto train out of the snow below that point.

—Hunters and trappers are predicting an early spring, taking their cue from the weight of fur on such animals as the muskrat and beaver and the contruction of their winter homes.

—The Girls' Guild of St John's meets tonight and a full attendance is requested as considerable business of importance is to be transacted. All ladies of the congregation are welcome.

—Several loads of corwood were offerred for sale on the market square yesterday morning, but the prices still remain as high as $8 and $9 per cord. "We'll have more in a few days," remarked a farmer, "and then the prices will go down."

—Municipal ownership of street railways will not be assisted by the stowing made at Guelph, Ont. For the quarter ending Dec. 31st, the expenses exceeded the receipts by about nine hundred dollars, notwithstanding the economy in cutting of passes The directors have, it is stated resigned.

—The Dominion Government has appropriated $50,000 for the erection of Cobourg armory, the contract for which has been awarded to Mr. D. S. Booth, of Brockville. The building will be of two storeys with a frontage of 112 feet and a depth of 130 feet. The first storey will be of cut stone with butresses, and the second storey of pressed brick.

—A little girl of five years said to her mother the other morning, "I like to go to church, because they sing nice hymns about flowers, and and insects and things to eat, and the man in the night gown talks about birds." "Why Dottie," said her mother, "I don't think there are any hymns about insects and things to eat." "There is so," insisted Dot, "last Sunday we sang a beautiful hymn about 'bringing in the cheese,' and one before one what began 'just as I am without one flea,' and when we got through the man talked about a hawk and two pigeons." On the mother questioning her she found out the text had been, "Why halt ye between two opinions?"

THINGS GENERALLY

BY SI JONES

I see by the grate g. f. j. thet the doin's at ther perlice court is rather slack of late. This spekes well fer the local officers an' the fear of justice imparted by the judgments of his worship Magistrait Dumble. In a large place like Peterburrow ye wood expec' ter see a hole list of law brakers every day especilly when there is onlie three perlicemen on the force. But wnen ye look back for the last few wekes an' see that so few cases have been up ye cannot but admire an' praise the good work of p.c.'s Mcginnis, Stooort and Adams an' constable Moor, not fergettin the Chief, o' course. He sets the pace an' the other felers folers.

• • •

Yesterday a local citizun was pulled up fer ridin on the sidewalk,—or fer drivin i shood say. That bisness is becomin' too generl. Its bad nuff to hav to walk on the sidewalk these days without bevin' ter ride on them It ain't aginst the law fer walk in the middle of the strete, but it is ter drive on the sidewalk. The hors ain't got the privileges of the pedestrun unless it is paid fer. Two dollars ter the first ride is the latest charge lade down by his Wurship. He has not had many applicashuns fer season tickets, an' he claims he's a goin' ter raize the price fer the next applicant.

• • •

The Peterburrow fire brigade, acrodin ter sum people ain't wot it shood be. Sum people is sumtimes mistaken sum, an' i think in this case they are sum astray. Of course we agree that there mite be sum changes for the better in meny ways, but accordin' ter the present sistem our fire boys are doin' all that coo'd be expeckted unless a noo sistem was interdoored. Ye can't expeckt the coachmen ter drive a fine team wen ye onlie furnish him with mules, an' no more can ye expeckt a volunteer fire brigaid ter do the work in the same way as reglars. A local scribe in a recent letter says, "Can't we get a sistem whereby the members of the brigaid can get ter the scen of the fire quicker?" Now that seems ter me nonsense all thru. If men belong to a volunteer sistem an' are busy at their diffrunt employments, how can yer expeckt them ter git ter the fire except by quittin' work at wunce an' runnin there? That's wot our boys does hear an' until men learns ter fly i can't see eny better way out of ther presunt diffikulty.

• • •

His wurship Magistrait Dumble is one of the clearest headed magistraits we have in the province of Ontario. He has er wonderful gift fer seperatin' truth frum falsehood, in the grate bundles ov evidense submitted for his consideration frum time ter time. His decishuns are in accordince with the evidense given an' every fair purson must acknowledge that he fills his diffcult pursition in an able manner

• • •

We hev er fine library in Peterburrow, es fine ez yo'd see anywhere outside of Toronto er New York. It is a library containin' a large number of books by all the best authers,—ceptin' mi own ritens which ain't been excepted yet. Eny citisen can hev the run of all these fine works fer nothin more than a doller an' a halve, an' a free readin' room is throne in. It seems ter me, that the grate reason more don't join is the fact thet the abomnible rubish known ez "dime novles" has got sich a holt on our boys an' youths. Then agin people is readin' the noospapers more now a days, an' so much time is now taken up in "funkshuns," an hockey in the winter, an' baseball an so on in the sumer that no time can be found fer readin. In short the time is so mutch taken up in sports an' other things that the ole fashioned bookwurm is fast disapearin' an unless there is another change the species will becum extinkt before the close of the presunt centurie.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. E. Dodge, of Toronto, visited among city friends on Sunday last.

—Mr. W. Stubbs, of the School of Practical Science, Toronto, spent Sunday in town.

—Mr. W. G. Elliott, of this city, paid a business visit to Lindsay on Saturday last.

—Mr. A. Reinhardt, of Toronto, spent Sunday with Peterborough friends.

—Mr H Corey, of Toronto, was in town over Sunday, the guest of Mrs. P. Campbell.

—Mr. W. Beattie, who has been connected with the staff of the Collegiate Institute, left for Toronto yesterday.

—Mr. James Menzies, formerly of Peterborough, but now of Montreal, is in town, having come to attend the funeral of his mother.

—Mr. J. Knapman, of London st., who has been indisposed since Thursday last, is still unable to be around. We trust his recovery will be speedy.

—Mr. John Potts, who has been in the employ of Messrs. J Sutcliffe & Sons, left this morning for Lindsay, where he has accepted a position in the dress goods department of Messrs. Dundas & Flavelle's dry goods store.

—Guests at the Snowden House—S. C. Baker, C. H. Marsh, T. J. Williams, Lindsay; A. Black, Geo. Everall, H. E. Jenner, Toronto; W. J. Cairns, Lindsay; W. J. Stewart, Ottawa; J. E. Lewis, Hamilton; Wm. M. Molan and wife, and Miss B. Molan, Lakefield; R. M. Leggett, Lindsay.

—Guests at the National—Jno. W. Cowle, Marmora; Mrs. Brewster, Middleton; J. W. Kickup, Montreal; J. Goodman, Toronto; J. Wescott, Galt; Jas. Mulcahy, Toronto; A. H. Ross; Guelph; Percy Thompson, Alex Kempt and John Miller, Midland; H. McDougall, Fenelon Falls; Geo. Everand, Toronto; J. H. Courtin, Toronto; A. McMillan, Montreal.

—Guests at the Oriental—H. W. Armstrong, Lindsay; A. L. Mudge, Montreal; T. Worthington, Toronto; J. E. Lemon, Hamilton; E. M. Zabits, W. R. Bert, B. Bernard, R. D. Morgan, B. F. Selby, K. L. Atkins, E. Sale, W. A. Page, R. J. Orr, S. H. Smith, O. B. Dorland, Toronto; B. F. Griffith, Hamilton; Chas. F. Prescott, Toronto; A. D. Darevell, Toronto; James Thompson, Havelock; O. D. Thompson, Montreal; O. H. Thompson, Sarnia; O. F. Foley, Ashland, Ohio.

Children
Have "eyes bigger than their stomachs," according to an old saying. They overeat themselves, and are tempted by all sorts of injurious and indigestible edibles. As a consequence the foundation of serious stomach trouble is often laid in childhood.
For children with "weak" digestion or whose stomachs are diseased, Doctor Pierce's Golden Medical Discovery may be confidently recommended. It cures diseases of the stomach and other organs of digestion and nutrition, so that the nourishment contained in food is perfectly assimilated and the puny child is built up by food into a condition of robust health.
Dr. Pierce's Golden Medical Discovery contains neither alcohol nor narcotics.
Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach and other organs of digestion and nutrition.
Mrs. Ella Gardner, of Waterview, Middlesex Co., Va., writes: "My little daughter is enjoying splendid health, I am glad I found a doctor who could cure my child. Whenever she feels badly I give her Dr. Pierce's Golden Medical Discovery and she is soon all right. She took twelve bottles of the 'Golden Medical Discovery,' eight bottles of 'Pellets,' and one bottle of of Dr. Sage's Catarrh Remedy and she is well. We thank God for your medicine."
Dr. Pierce's Common Sense Medical Adviser, in paper covers, is sent free on receipt of 31 one-cent stamps to pay expense of customs and mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

MR. D. HUGHES-CHARLES AGAIN ELECTED PRESIDENT

Of the Board of Trade--Conservation of Trent Waters and Transportation Main Issues at Last Night's Meeting

The Board of Trade met in annual session last night, when there were present D Hughes-Charles, President, and Messrs. John Carnegie, A. L. Davis, E. J. Toker, T. A. S. Hay, J. Coyle Brown, J. H Burnham, K. Eardley-Wilmot, F. D. Kerr, Peter Campbell, A. H. Stratton, R. M. Dennistoun, T. E. Bradburn, R. Fair, Ald. Rush, Arthur Stevenson, W. H. Meldrum, B. Ackerman, Mayor Roger, B. Sutcliffe, ex-Ald Shortly, R. C. Winch, and the Secretary, Mr. T. Q Quartermaine.

The minutes of the last meeting were read and confirmed.

COMMUNICATIONS

The following communications were read by the Secretary ;

From Rt. Hon. Joseph Chamberlain, already published. His Worship Mayor Roger, enclosing copy of letters from Mr. John Bertram, Chairman Royal Transportation Committee, two letters, F. G Morley, Secretary Toronto Board of Trade, J. T. MacKay, Secretary Sault Ste. Marie Board of Trade. J. E. Wescott, re locating here, two letters, J. Alexr Culverwell, re Royal Commission on Transportation, already published, and a communication re fees for inspection of weights and measures, etc.

A telegram was read from Mr. J. Alexr. Culverwell, as follows: "Got registered letter for meeting. Trenton Board of Trade, Lindsay Post, Port Hope and other public bodies praising my efforts, notwithstanding the Examiner's jealousy, editorially expressed. My politics are all Trent Valley Canal, and protection of public interest."

PRESIDENT'S REPORT.

The President, Mr. D. Hughes-Charles, submitted his annual report, as follows.

That the past year has been a most satisfactory one in the history of Peterborough, every one conversant with current affairs must admit.

An amalgamation has taken place between the two municipalities, Peterborough and Ashburnham, and this must prove a great benefit to both, eventually.

The celebrated Hydraulic Lift Lock has been completed, and is now ready for work, which is another stride towards the completion of the Trent Valley Canal.

Many of our large factories have largely increased their buildings and plants, and one new industry has been launched. I refer to the Peterborough Beet Sugar Co., and we, the members of the Peterborough Board of Trade, wish it every success for it will be a valuable addition to our list of enterprises and will, like the American Cereal Co. and the Geo. Matthews Co., be of service to both town and county.

The Town Council are to be congratulated upon the fact that they have been able to arrange for the re-opening and the extension of the street railway in the near future. This cannot help but be of great service to our laboring men in going to and from work, and it must bring a great deal of trade to our merchants from outside places.

I regret to record the fact that we have had three large fires in town during the past year. Bad as they were they might have been worse and we should take warning in time and do all that lies in our power to provide more fire protection in the way of fire engines and inspection of premises. The telegraph and telephone wires are a great menace both in fire and tempest, besides being a great eyesore on our streets, and it would be well if some arrangement could be made with the companies to put their wires under ground, and if this cannot be carried out the poles should be painted.

We are well situated to become a manufacturing centre, a distributing centre, and a residential town. For manufacturing we have cheap electric power from the Otonabee River, good railway transportation, having both the C.P.R and G.T.R systems, and very soon I hope good canal transportation, and the latter is most required and it would be hard to estimate what the opening of the Trent Canal from Trenton to Midland would mean to Peterborough. We have had several meetings during the past year regarding this important matter, and I am glad to say that the committee appointed to bring it before the Dominion Government are well on with their work and have gathered much valuable information and so can present a strong case.

At present we have twenty-eight separate manufacturing industries some very large and some small, but all prosperous.

I have taken some trouble to collect statistics relative to our manufactures and I think they will prove a surprise to many of our citizens.

During 1903 there were 2750 hands employed, the wages paid being $1,887,900, and the output or value of production amounted to the very large sum of $7,581,600.

In addition to becoming a manufacturing centre I think it is both possible and probable that we may become a grain centre as well.

We have one large mill which bought last year from farmers 483,000 bushels of oats, and from dealers 4,555,000 bushels, total 5,083,000 bushels, and there are two flour mills with an output of 450 bbls. per day, and I am sure if we had canal transportation, this already large business would be doubled.

Our situation as a distributing centre is beyond question. We have an immense country on all sides all contributary to us, and we are in the midst of a large and fine agricultural district with no large town near us.

There are two wholesale houses here now, and it is expected that the number will be increased very soon.

Our retail merchants have had the largest year's trade on record and this is not to be wondered at when we take into consideration the large amount of money paid in wages, over one million dollars. In addition to this the American Cereal Co. bought 483,000 bushels of oats worth $156,000, from farmers, delivered at their mill and paid for in town.

The Matthews Co. paid out to farmers $105,600, for hogs delivered at their factory, and the cheese sales at our local board amounted to $650,000. It goes without saying that a good proportion of this large amount of money is spent in town.

The trade of the town is large and is growing fast, as all departments show large increases over previous years. The statistics for 1903 are ;—

Post Office revenue	$ 25,553
Inland revenue	63,133
Customs	229,927
Railway and river tonnage inward	175,292
Railway and river tonnage outward	145,184
Total tonnage	320,476

I wanted to give the Bank clearings, as they show more clearly than anything else the volume of business done in town, but for some reason or other, which is hard to understand, the manager of the Ontario Bank could not give me his figures.

To anyone seeking a place of residence I think our town offers many inducement. It is a healthy situation, with beautiful landscape scenery, hill and vale, river and lake, and with good shooting, fishing and boating within easy reach. Nature has done much for us, and it is only necessary for the citizens to be tasty and neat about their premises to make our town one of the prettiest in Canada.

If the Town Council will see to it that our streets are kept clean, free from loose paper, and in good repair, and each householder will endeavor to make his residence look better than his neighbors, then we will have a town which will attract strangers.

TREASURER'S REPORT.

The Treasurer, Mr. Peter Campbell, submitted his annual report, showing the receipts to have been $407.79, and the expenditures $147.70, leaving a balance on hand of $260.09.

AUDITORS APPOINTED.

Messrs. R McWhinnie and McFarlane Wilson were appointed auditors.

SECRETARY'S REPORT.

Mr. President and Gentlemen,—I have the honor of presenting to you, as Secretary, the Fifteenth Annual Report of this Board.

MEETINGS;—Since our last Annual Meeting we have held five meetings of the Board, viz.; On 24 March, 14 April, 26 June 14 August, and 3 November.

MEMBERSHIP;—The number of members on the roll last year was seventy-two, an increase of twelve on that of the previous year.

ATTENDANCE;—The average attendance of members at our meetings was eighteen, an increase of six on the previous year.

DEPUTATION;—At a meeting of the Board held 26 June, three prominent members,—Messrs. D Hughes-Charles, D. W. Dumble and Hampden Burnham —were appointed delegates to attend the "Congress of Chambers of Commerce of the Empire," held at Montreal, 17, 18, 19 and 20 August, the two latter gentlemen acting only in that capacity, our President being unable to attend.

SUBJECTS UNDER DISCUSSION;—The following subjects have been duly discussed at above meetings;

Sugar Beet Industry.
Location of Outlet of Trent Valley Canal in Lake Ontario.
Street Railway Franchise.
Bonded Baggage.
Fire Insurance Rates.
Singer Manufacturing Company.
Board of Trade Fees.
House to House Postal Delivery.
Congress of Chambers of Commerce of the Empire.
Navigation of the Otonabee River.
Conservation of Trent Valley Canal Waters as Effecting Navigation.
Mr Chamberlain's Fiscal Policy.
Alaskan Boundary.

MANUFACTURES ETC.—The Board has been in correspondence with the following manufacturing enterprises, with the object of inducing them to locate in our town;

Singer Manufacturing Company.
Williamsport Staple Company, of Williamsport, Pa.
McLennan Paint and Color Co., of Buffalo, N.Y.
J. F Harty, of New York City, re Pulp Manufactory.
J. T. Wescott, of Galt, re Hardware Specialties.

COUNCIL CHAMBER;—The thanks of the Board are due to His Honor Mayor Roger, the Board of Aldermen, and Town Clerk Armstrong, for the use of the Council Chamber during the past year.

LOCAL PRESS;—The thanks of the Board are also due to the Reporters of our three local papers, for the able manner in which the business of the Board has been reported.

T. Q. QUARTERMAINE,
Secretary.

Peterborough, 1 March, 1904.

PRESIDENT ELECT.

At this juncture, Mr. E. J. Toker moved, seconded by Mr. W. H. Meldrum,—That Mr. D. Hughes-Charles be elected President for the year 1904-5. In support of his resolution Mr. Tucker remarked that all recognize the very earnest and able manner in which Mr. Hughes-Charles had filled the chair the past year. Members, also fully recognized that outside the meetings he had worked earnestly and energetically in the interests of the Board of Trade and citizens in general.

The resolution was carried unanimously.

Mr. Hughes-Charles, in reply, thanked the members for their kind words and good opinion of him. He had always done what he could to forward the town's interests, and felt exceedingly honored on being again elected president of so important a body as the Board of Trade. He trusted in getting the active support of his fellow citizens and would like to see future meetings largely attended. In conclusion, he urged that when a meeting is called at 8 o'clock the members put in an appearance on time.

OTHER OFFICERS.

Vice-President—Mr. A H. Stratton.
Treasurer—Mr. Peter Campbell.
Secretary—Mr. T. Q. Quartermaine

Two nominations were made for Secretary as follows; Mr T. Q. Quartermaine, by Mr. W. H. Meldrum seconded by Mr. T. A. S. Hay; Mr. R F. McWilliams, by Mr. B. Ackerman, seconded by Mr. Burnham. Mr. Quartermaine was elected on a vote of 12 to 4.

THE COUNCIL.

Messrs. Dumble, Burnham and T. E. Bradburn were appointed a Committee to strike the Council for the ensuing year.

CULVERWELL CENSURED.

The President here said, "As to Mr. Culverwell's letter, I consider that by his speeches and letters in the press, Mr. Culverwell has behaved in a traitorous manner to the town. He came here to an open meeting of this Board, was given every latitude, and subsequently at Port Hope distorted almost everything that was said here. I do not recognize Mr. Culverwell as a member of this Board in good standing.

TRANSPORTATION COM.

The following communication was read;—

G. M. Roger, Esq. Mayor
Peterborough., Ont.

My Dear Sir,—Your letter of the 25th instant received, and I need hardly say that Mr. J. A. Culverwell has no authority to act for the Commission on Transportation. He, along with others, have been asking for a session to be held at Peterborough, or some central point, to take evidence re the Trent Valley Canal. We had no word from Peterborough until Mr. R. M. Dennistoun's letter reached here on the 25th inst., and I wrote you on the date, advising you what action had been taken Mr Bell unfortunately has been laid up for some time in Ottawa, and I have written him this morning to leave the matter for the arranging of a meeting in Peterborough in my hands. So if you will be good enough to act on the request of my letter to you on the 25th inst., and let me know how soon you can be ready. I do not want to hurry you, but rather to give you every opportunity to have the case for the Canal presented fully before the committee.

Yours very truly,
JOHN BERTRAM,
Chairman.

Toronto, Feb. 27th, 1904
31 Victoria Street.

TRENT WATERWAY

As a result of a lengthy debate on Transportation and Conservation of the Trent waters, the following resolution was adopted unanimously—

Moved by Mr. R. M. Dennistoun, seconded by Mr. P Campbell,—Whereas the commercial supremacy of the State of New York has been ascribed by all classes of the people of that State to the construction and operation of the Erie Canal.

And whereas, owing to the wise policy of the governments of Canada the Canals of the River St. Lawrence have been enlarged and deepened, so as to divert to Canadian ports a large amount of commerce that would otherwise have gone to the port of New York.

And whereas recognizing this fact the people of the State of New York, throwing aside the prejudices of party politics, have on the 3rd day of November, 1903 voted the expenditure of 101 millions of dollars for the enlargement and development of the Erie canal for the purpose of recovering, if possible, the commerce now being diverted to the St. Lawrence and Gulf of Mexico.

Therefore, be it resolved by the Board of Trade of the Town of Peterborough, that the Trent Waterway from Georgian Bay to Lake Ontario, with its great stretches of open water and short sections of canal, which can be navigated at 4 times the speed by barges of 4 times the capacity of those now in use on the Erie Canal, offers to the people of Canada a magnificent national route to the sea board, and the only means of maintaining and greatly extending the commerce of Canadian ports, notwithstanding the competition which will be furnished by the new 1000 ton barge canal from Lake Erie to the Hudson River

Resolved further that the completion of the Trent waterway will add material prosperity to every city, town and village in Central Ontario, by lowering freight rates on coal, grain, wood and all manufactured products and will prove an immense boon to the farming community, by affording increased facilities for the shipment of everything the farmer has to sell and lower prices on everything he has to buy.

Resolved further, in the opinion of this Board of Trade, that the completion of this great work will alone solve almost all the difficulties in the adjustment of railway freights, which now burden the manufacturers of this section of the Dominion.

Mr Burnham led the debate on the above question. He pointed out that the shallow condition of the river has been a serious drawback to the outgoing and incoming of people and transportation of freight. This is due to the lack of proper conservation. A report to the government gives a flow in the river during the spring freshets of 800,000 cubic feet a minute, while its natural capacity is 100,000 cubic feet, which is reduced to 20,000 cubic feet at low water in the summer. During three weeks in the spring we have a surplus flow of 700,000 cubic feet a minute, and at the end of four weeks an average flow of 350,000 cubic feet. This goes to show that there is an ample surplus of water to be distributed. We find that we have a river, that if its water is conserved, should have an average flow of from 95,000 to 100,000 cubic feet a minute the year round. The area covered by the Trent waters, not including Rice Lake, is 175,000 acres, with 51 dams, 23 of which are under the control of the Ontario government. All these dams could be taken over by the Dominion government, put under proper control, and in thorough working order, and the additional new dams built, at a cost of say $1150,000. which would conserve these waters and give up a properly equipped and thoroughly controlled system of transportation. In conclusion, Mr. Burnham said that the government are bound to aid in the matter of transportation, and urged that a committee be appointed to ascertain how much the municipalities ought to contribute in the interests of manufactories and trade and commerce.

Mr. R. R. Hall pointed out that so far as the Ontario government is concerned they are willing to hand over the control of these dams to the Ottawa government, without any other conditions than that the rights of lumbermen should be respected. He himself had urged upon the Minister of Railways and Canals the urgent necessity of conserving the Trent waters at once, and he has promised to look into the matter. The waters could be conserved even with present facilities, if they were but intelligently controlled and watched. It is a chronic state in Peterborough that every summer our boats are constantly bumping on the rocks, and manufacturing interests damaged. He would be glad to cooperate in any way he can with any person else to secure the desired conservation of these waters in time for next summer's needs.

Mr. R. M. Dennistoun, while agreeing with the previous speakers, pointed out that the Board of Trade should see that our constituents so far as as trade and commerce is concerned, are alive to their own interests. The Erie Canal gave to the State of New York the name of "the Empire State." Subsequently, however, this canal was somewhat neglected, to the advantage of the railways, which succeeded in competing with it. Finally the city of New York awakened to the fact that their trade was falling off, a large portion of which was going by the Gulf of Mexico and via the St. Lawrence route. The State of New York then decided to sink all political differences, and agreed that the Erie Canal must be enlarged at all costs, in order to save the status of the "Empire State." $101,000,000 has been appropriated for this purpose, so that the canal will accommodate barges of 1,000 tons burden. The Trent Valley Canal, with its present locks and depth of water, will accommodate barges of 800 tons burden, and we have an advantage over the Erie Canal in many miles of open lake water, which will permit towage by steam tugs at a greater speed than possible on the latter waterway. Barges on the Erie can only make 7 trips a season under present conditions. The people should be educated up to the needs and advantages to them of the Trent waterway in regulating freight rates. There is scarcely a man in Peterborough, who would not save from $5 to $15 and $20 a year in coal were this system completed; in Ottawa this commodity is today $1 a ton less than here. France, Austria, Germany and Russia are spending millions on their canals, which are invariably paralleled by railways; the latter carry the fast freight trade, and the former that for which speed is not urgent.

Mr. A Stevenson remarked that the people should take whatever steps necessary to secure the flow of water nature will permit of. Mr. Rogers says that had he control of the dams already built, he thought he could guarantee a steady flow in the river. It seems that as the Dominion government have expressed their willingness to take over the dams, all we have to do is to pass a resolution urging them to take decisive action at once, so as to be prepared for the spring freshets this year if possible.

His Worship said the water fell two feet at one dam yesterday afternoon, and the Canadian General closed down. There is something wrong, as I am informed by one who should know that the water has never before been handled as now—at times there is abundance, only to be followed by a deplorable scarcity. Manufacturers are embarassed and our fire protection hazarded. This is practically a local question, and we should perhaps give the canal uppermost place, although the two matters should go hand in hand. As to the meeting of the Transportation Commission, the Board of Trade should be prepared to present their views from a local standpoint. It would be wise to acquire facts and figures as to transportation by land and water, in the interests of Peterborough.

The President said the Board would be very glad to take the matter up and act in conjunction with the Town Council.

DELEGATES APPOINTED.

On motion of Mr. Burnham, seconded by Mr. John Carnegie, the President, and Messrs. F. T. Matthews and W. H. Meldrum were appointed delegates to wait upon the government at Ottawa re Transportation and Conservation of the Trent Waters.

Mr. R. R. Hall urged that a committee should work in conjunction with others along the line in gathering statistics as to the probable quantity of slow freight available for transportation by water, the industries within the Trent system, and number of employes, etc.

Mr. Dumble replied — This is a through route, and you need not discuss figures for it is a question of untold millions. He claimed that grain could be taken on at the Georgian Bay and carried straight through to Montreal and the barges return to Midland with heavy freight; this would give us lower rates than the railways can possibly offer. England and Germany are spending five and six millions, respectively on their interland waters. As to the lack of power, its the tight modern dam and the fly wheels which are causing all the trouble. With the old dams as much water flowed beneath the dams as over them, but today a man with tight stop logs can shut off his neighbour as long as he pleases. He would like to know, however, why, when at the Cereal Co's fire water pressure was put on their automatic sprinklers, there was not sufficient pressure left for the firemen. Was it the fault of a single pipe, or something wrong with the waterworks; this should be looked into.

At this juncture, the President, Messrs. A Stevenson and T. F. Matthews were appointed a committee to gather the necessary data as to freight rates and the Trent waterway to lay before the Transportation Commission, and it was suggested that a member from the manufacturers and the merchants be added,

FIRE PROTECTION.

Mr. A L. Davis took up the question of Fire Protection and urged that the Town Council be supported in any action calculated to keep fire loss down. He advocated the appointment of an inspector to inspect buildings at stated times. It is safe to say that had there been such inspection the fire at Roy's, the Grand Central building and Cressman's would not have occurred. An examination of the cellars of the different stores would reveal some to be all that could be desired, and others veritable fire traps.

Mr. Dumble replied that there are just about three people in town largely connected with this question, the Toronto Loan and Savings Co., Mr. Bradburn and one other; why do they not appoint their own inspectors? In Europe no man can erect a building without first submitting plans to the authorities, who insist on all constructions being in compliance with their fire by-law.

Mr. R. M. Dennistoun believed the Town made a good new fire engine, possibly two. He could not understand why our old engine had not sufficient force to such water from the Otonabee river, at the time of the Cereal Co.'s fire, instead of relying for its supply from a hydrant, getting its pressure four miles distant

Mr. Dumble favored a chemical engine being secured for the Town.

No definite action was taken on this matter and the Board adjourned.

SIR CHAS. TUPPER IN PETERBOROUGH

Veteran Conservative Detained Here on Account of the Big Storm

WILL SAIL FOR ENGLAND

On March 7th—What He Had to Say to a Times Representative

Sir Charles Tupper, Bart., the veteran politician and statesman of Canada, was in Peterborough yesterday, and was of course the center of interest in both Conservative and Liberal circles. The venerable old gentleman bears his years of public life well, and his voice still retains its wonderful strength and expression. He was to have addressed a meeting of the Crown Life Insurance Co., at Toronto yesterday, being president of this company, and was on his way there, when the conditions of the railroads necessitated his staying over at this point. Sir Charles received the press representatives with a glad hand, and spoke freely of the existing condition of affairs in both the local and the Dominion House.

"What do you consider the outlook is in the Dominion House," was asked by a Times reporter.

"Well Conservative stock is going up and Liberal stock is going down," was his emphatic reply. "Sir Wilfrid Laurier's government is fast sinking out of sight, and his administration is becoming more and more unpopular every day."

"As for the Ontario Government," the great politician continued, "its sands are pretty nearly run out. There is no prophet required to foretell the results of the next Ontario general elections. There are tremendous changes all over the country, and the unpopularity of the Liberal party's administration is becoming more and more apparent. When the Liberal party came into power in 1896 they had Nova Scotia, New Brunswick, Quebec, Ontario and Manitoba all strongly in their favor, with the government of the Northwest Territories more Liberal than Conservative, and British Columbia was given to a coalition government. To-day there is a Conservative Government in British Columbia, Northwest Territories, and in Manitoba. The government of Ontario that formerly had thirty or forty of a majority, has now only three, and the government of New Brunswick, which was dominated by Mr. Blair, has shown that there will soon be a change there.

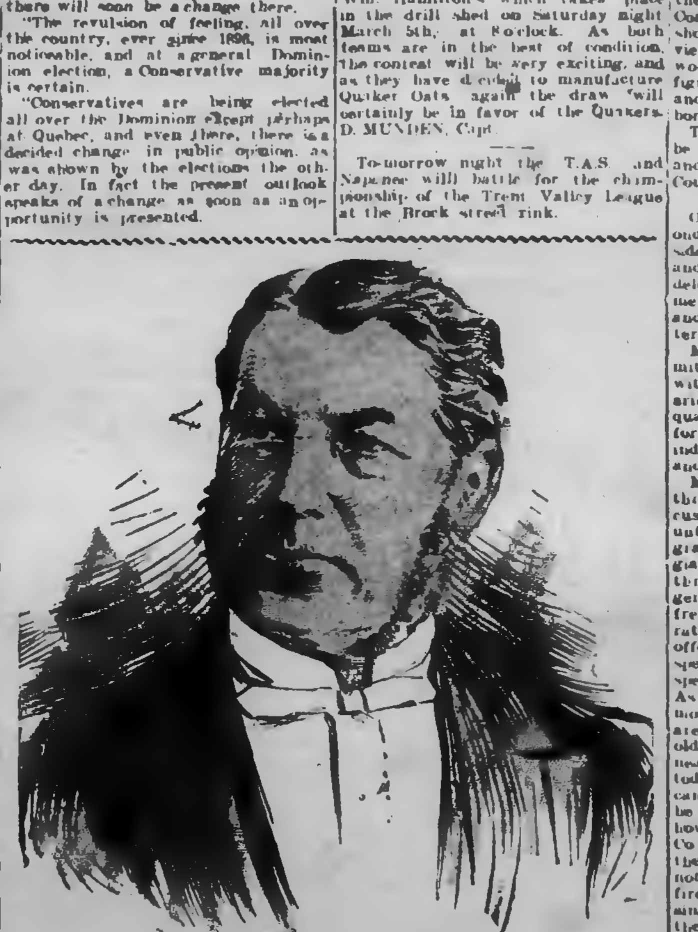
"The revulsion of feeling, all over the country, ever since 1896, is most noticeable, and at a general Dominion election, a Conservative majority is certain.

"Conservatives are being elected all over the Dominion except perhaps at Quebec, and even there, there is a decided change in public opinion, as was shown by the elections the other day. In fact the present outlook speaks of a change as soon as an opportunity is presented.

"When the Prime Minister of the Dominion of Canada is reduced to the terrible necessity of paying $10,000 a year of hush money to the head of a Railway board, to prevent his denunciations of the Grand Trunk Pacific project, his position must be uncertain. Blair has been given $10,000 a year without a word being said of his former denunciation of this project, and, I firmly consider that if it takes $10,000 a year to close the mouth of the head of a railway commission, against a railway measure, it shows that the government is not strong, and that the measure is not very acceptable."

In speaking of the condition of affairs in the Mother Country, Sir Charles said that while visiting in England last year he was surprised to notice the wonderful growth of public opinion in support of the Imperial policy of Mr. Joseph Chamberlain. This was the more remarkable when the conservatism of the British politicians and their marked slowness in adopting a change of so great import, was considered. "It is much to be regretted," remarked Sir Charles, "that Sir Wilfrid Laurier has not strengthened the hands of Mr. Chamberlain, by requesting the Canadian Parliament to declare its satisfaction at his acceptance of our offer of Imperial preference."

Sir Charles intends leaving Canada soon for England, when he will pay his daughter his annual visit, although pressing business also necessitates his crossing the ocean. He purposes, according to his present arrangements, to leave Halifax on the Allan Line steamer Bavarian about the 7th of this month, as he is desirous of reaching England in the early part of March.



SIR CHARLES TUPPER, BART.
Who was Snowbound at Peterborough Yesterday.

Local Sports

In last evening's Examiner the following appeared;

"A local morning paper contained the statement that Mr. G. H. Giroux had challenged Mr. J. D. Flavelle, of Lindsay to a game. Mr. Giroux states to the Examiner that this is not supported by facts, and that he knows nothing whatever of any challenge. Had he wished to issue one he would have made it through the proper source, and while he has no objection to playing Mr. Flavelle's rink, he has issued no challenge."

As The Times is the only morning paper between Toronto and Ottawa, we presume that ours is the paper referred to. If the writer of the above article will re-read the item published in yesterday morning's Times, and make use of a strong-er microscope he will probably see that it was published not as a challenge, but as a mere remark of "a local enthusiast."

TUG-OF-WAR

Don't forget the great tug of war contest between the Quakers and Wm. Hamilton's which takes place in the drill shed on Saturday night March 5th, at 8 o'clock. As both teams are in the best of condition, the contest will be very exciting, and as they have decided to manufacture Quaker Oats again the draw will certainly be in favor of the Quakers.
D. MUNDEN, Capt.

To-morrow night the T.A.S. and Napanee will battle for the championship of the Trent Valley League at the Brock street rink.

4,000 ADDITIONAL CHINESE SOLDIERS IN NORTH CHINA

The Chinese Government Has Placed a Large Order for Guns and Ammunition

Special to The Times.

Seoul, March 1—Advices from the North report that 1400 Russians are at Cheong Ju, 500 at Kusong and 50 at Anju. These forces are probably only feelers sent out to locate the position of Japanese troops All the Americans, formerly at Sun Thun, with the exception of one family, have arrived at Ping Yang. The Emperor of Corea has dissolved the organization of the Pedlers' Guild, which has been a disturbing factor in the situation.

Special to The Times.

St Petersburg, March 1—A Russian correspondent of the Associated Press, at Shang Hai, telegraphs that it is reported at Tein Tsin that 4,000 additional Chinese soldiers have been posted in Northern China and that the Chinese government has recently placed large orders for guns and ammunition.

Special to The Times.

St. Petersburg, March 1—Direct telegraphic despatches from Port Arthur tonight made no mention of the bombardment of that place the contrary these advices say the Japanese fleet has disappeared from the horizon of Port Arthur,

WEDDING BELLS

Miss Mable J. Chambers Becomes the Bride of Mr. B. Adams

Another pretty wedding was celebrated at four o'clock on Monday afternoon, at the residence of Mr. Geo. Chambers, 316 Aylmer street, when his third daughter, Miss Mabel, was united to Mr. Benjamin Adams, of Balgonie, Assa. Only a few relatives and most intimate friends were present at the ceremony, which was performed by Rev. W. J. Jolliffe. The bride was assisted by her sister, Miss Lizzie, and Mr. A. Fulton, of Harvey, attended the groom. The bride received many handsome and useful presents, among which was a beautiful piano, the gift of the groom.

At the conclusion of the ceremony a dainty wedding breakfast was enjoyed by those present, and the happy couple left for the West, yesterday, amidst showers of good wishes from their many friends.

PRODUCES KING OF POTATOES

Burbank Says New Variety will Revolution ize Industry

San Francisco, March 2. — Luther Burbank, the "wizard of horticulture" who produced the potato which bears his name, has produced an entirely new potato, which may supplant all others. A year ago he secured from a remote part of South America some potato seed, which he planted and watched carefully. He crossed and recrossed the plants in his mode of hybridization, and today he has produced something new. The potato is sweeter than the old. Its pulp is almost of carrot hue and very palatable. Mr. Burbank declared the new potato would revolutionize the potato industry of the world.

FRANCE NEAR TO WAR

Developments in Corea Come Near Involving Other Powe

Paris, March 1.—It is learned today on the highest authority that the end of last week brought about what might well have been a serious crisis in the international situation. It also accounts, to a considerable extent, for the financial panic Saturday in Paris.

At the close of last week Russia formally notified the powers that France had concluded that, in view of what had happened in Corea, she could no longer consider as valid the neutrality of that country.

This, of course, if Corea could be seriously regarded as a world power would have made Russia at war with two nations and might thus have brought into force the alliance with France and compelled France to take up arms. This, by the terms of England's treaty with Japan, would have forced her into the war.

France, however, was not desirous that the new situation might not affect an understanding with Great Britain in the far east and was anxious at once to send this information to London.

She communicated by special messenger with the British government, which returned an equally cordial and prompt reply. As it is, Japan has replied to Russia's notification by a declaration which is virtually an establishment of a protectorate in Corea.

WAR PREPARATION IN EAST

Alliance With England Imposes Burden on Portugal

Berlin, March 2.—Dispatches from Lisbon to the Vossiche Zeitung state that the alliance with Great Britain imposes at present heavy burdens on Portugal. Not only are new rifles being served to the army in all haste, but a representative of the Krupp firm is at present in Lisbon instructing artillery officers in the handling of the recently purchased field artillery. Coast defences are being overhauled in Lisbon, Fayal and Lagos, which could serve as naval stations for the British fleet.

Telegrams from Amsterdam state that everything is ready for the mobilization of the Dutch army. All leave is refused to officers.

EVERYBODY READS THE TIMES

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 2, 1904

A LONG WAR COME

There seems a large probability that the present war will be a long one, not less than a year in duration, very possibly a couple of years, owing to the peculiar difficulty, the impossibly almost, of either power getting at the vitals of the other. The "honor" of the bigger one, Russia, is so involved that many local defeats would have to be endured before Russia could give in; while on the other hand, Japan could not give in until driven hopelessly off the Asiatic mainland, for she went into the row to keep a grip there.

Japan apparently being certain of mastery of the sea, the war has to be *fought out on the mainland* of Asia, either in Korea or Manchuria. Japan may win victory after victory on land, may capture Port Arthur, may drive the Russian armies back into Siberia—what of it? Russia can not be further hurt; and may, if so the huge empire chooses, continue dully and slowly moving hundreds of thousands of soldiers across Siberia until at last the Japs may be pushed back into the sea. Assuredly Russia will not easily cry quits; the humiliation would be too shameful, the bar placed across the advance of Russia to open harbors on the Pacific would be too final and fatal. Next, take the opposite case. Suppose that Russia, not Japan, wins on land from the beginning what will follow? Certainly some months will be needed by the Russians to clear Korea of the Japanese, even with a constant succession of victories. The Japanese will not get out of Korea until all the reserves which they can venture to land there prove too little—and their reserves number hundreds of thousands.

Financial stringency may compel both parties to suspend hostilities, does some one say? No. There is no indication that either nation will suffer any financial embarrassment for a year or more, without a dollar of foreign loans. Neither power has as yet made any open overtures in foreign markets. Neither is thought likely to do so. Japan is presently to float, among her own people, a war loan of some $50,000,000, while Russia is issuing $25,000,000 Treasury notes. Both expedients conform in general expectations. Japan is well able, up to a certain point, to raise her own war fund; she did so in the Chinese war of 1895, when the $112,000,000 estimated to have been spent was raised entirely by loans placed in Japan, and by increased taxation. Russia's recourse to note issues may or may not be evidence that she has failed to sell bonds, on satisfactory terms in Paris or Berlin. It has been intimated that recent negotiations with French bankers came to nothing. But the issue of government notes is in all probability an expedient to utilize Russia's reserve of gold, which is very large if the government's official statements are to be trusted. The recent Russian budget claimed that there was $154,000,000 in gold in the treasury.

It must *not* be supposed, either, that war will be proportionately such a financial drain upon either Russia or Japan as the Boer war was upon Great Britain. Britain had to greatly increase her army, and to transport quarter of a million men half around the world by sea, chartering a huge fleet to do so. Russia at present can hardly find use in increasing her army, whose peace strength was a million; so she needs hardly pay more to feed or supply her men than in peace; all transportation will be over a government railway, which would be an expense anyway, although now of course a greater one. The Japanese also, until they call out their army reserves largely will *not find* expense tremendously increased over what it would be in peace, except in the transportation of troops to Korea, and conveyance of supplies to them.

Of course, we speak comparatively Greta expense there must be. Financial stringency will of course come in time. But not soon. Nor is it easy to see how either pride or the deep interest of either belligerent can give way soon under any sort of defeat which seems possible to either. This war will be no flash in the pan.

MORE MUSCOVITE "WHEELS"

It really is too bad to be forever taking flings at the Muscovite, but the wheels in his brain revolve in such wonderful ways that one simply can't help it.

For instance, Russia is just at the present time horribly shocked at the action of the barbarous Japanese, who are not only marching troops through Korea but who have actually made a treaty with that land guaranteeing its integrity and independence in return for the right to operate forces within its limits. All Russia sympathizes with poor oppressed Emperor Yi. All Russia loathes wicked Mutsuhito.

At the same time Admiral Alexieff is issuing a proclamation to the Manchurians, who stand to Russia in much the same relation that the Koreans stand to Japan as far as immediate practical purposes are concerned. "China," he proclaims, "has announced to me its resolve to be neutral. Accordingly I command every official of Manchuria (Chinese, of course) not only to not hinder our troops but also to render every possible assistance." Fine logic, for a time of war. Futher the admiral declares that if any attempts are made to damage the railroad or telegraph lines, "not only will offenders be severely punished, but you, officials proper, who witnessed the attempts also will be held responsible." In addition all Manchurians are warned that they must be careful lest they be numbered with "the Chunchuses, the red-bearded brigands," and punished as if they were desperadoes themselves.

For magnificent Jekyll-and-Hydeism the Muscovite is entitled to all the front seats.

A Good Complexion Rich Soft Skin

Bring Joy to Every Woman's Heart, and Draw Admiration from Every Man How to Improve Your Appearance.

The true source of beauty is health, so at the first signs of failing health everyone should take proper steps to regain and maintain health.

When beauty begins to fade you can be almost certain that some derangement of the functional activity is secretly undermining strength and vigor. This must be stopped, and can be stopped by Ferrozone, which vivifies all bodily functions so quickly that an improvement in health and looks immediately follows.

Ferrozone increases the appetite and improves digestion. This stimulates nutrition and quickens the formation of rich pure blood. Better blood means stronger nerves. Increased nerve force reduces the wear and tear on the body. Strength develops, spirits rise an all-round improvement follows.

A rebuilding process is started by Ferrozone that results in a plump, well developed figure; the complexion becomes clear and rosy, pale hollow cheeks fill out and sunken eyes take on a new lustre and brightness.

No lady can afford to miss the benefit that invariably follows the use of the grand restorative. Ferrozone is a tonic, a rebuilder and regulator of unqualified merit. To its enduring and lasting results thousands have testified. In a convincing letter from her home in Lansdowne, Mrs. F. G. Butler says;

"For years I had a sallow complexion. I did everything to improve it but didn't succeed till I used Ferrozone. It improved the condition of my blood and in a few weeks brought a rosy flush to my cheek. I took one Ferrozone tablet at meals and gained strength and flesh. I can strongly recommend Ferrozone to every woman who wants clear healthy complexion. Ferrozone did wonders for me."

Ferrozone is the best, quickest and most permanent road to health. You should get it right away. But beware of a substitute and be sure to get Ferrozone when you ask for it. Price 50c. per box or six boxes for $2.50, at all druggists or by mail from the Ferrozone Company, Kingston, Ont.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."—London "Truth."

Life Boats Sink With 14 Passengers of Str. Queen

Got Away From Burning Ship, But Those Who Remained Subdued Flames

Port Townsend, Feb. 29—After suffering the most harrowing experiences from fire and storm, the steamer Queen has put in here to report the loss of fourteen lives. The dead;—

First-class passengers—Miss Steiner Clellum, Wash., drowned; Mrs Adams, died from exposure.

Second-class passengers —D. Newsbury, Texas; S. Buckley, both drowned.

Crew—A; Neilsen, J. Neilsen and H Preitus, stewards; F. H. Eneman M. Somers, H. Dougasl, A. Donnelly and —. —. Raymond, engineering department; Peter Mullin and M. Flynn.

Fire in Saloon.

About 3.45 Sunday morning, while off the mouth of the Columbia River, fire broke out in the after saloon. The cause of the blaze is not known. The fire gained headway rapidly and soon threatened to envelop the whole ship.

The heavy seas meant death to any passenger sent away in the life boats. The flames became more and more threatening until, when it seemed but a choice of death either by fire or drowning, Captain Cousins ordered the lifeboats launched. They were manned and a number of women and children were lowered into them. Hardly had the boats been cast loose than two of them were capsized by huge waves. Those of the passengers and crew who remained on board continued to fight against the flames with increasing success, until at 7.40 a.m., the blaze was brought under control. When it was seen that the danger from fire was past Capt. Cousins recalled the lifeboats and their occupants were taken on board.

Sighted a Steamer.

The Queen was headed for the mouth of the Columbia, and about 9 o'clock the steamer Santa Monica was sighted. The Queen signalled, and asked the vessel to stand by until temporary repairs could be made. When everything had been made safe the Queen continued on to the mouth of the Columbia, only to find the seas too rough to allow passage in. The distressed craft was pointed towards Puget Sound, when bad misfortune still pursued, and when she rounded Cape Flattery she encountered a terrific electrical storm. With difficulty she weathered the gale, reaching here without further mishap and proceeded to Seattle, where she arrived about nightfall.

Ayer's Cherry Pectoral
Ask your doctor if this is the medicine that cured his hard cold. Doctors have used it for over sixty years.

High Class Investment
THE OREGON MINING AND SMELTING COMPANY
Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.
I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.
The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.
The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.
There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

The mouey obtained from this sale is to be used for development and equipment purposes

tters from prominent people regarding the Bannie Mine

OHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am in-
that the Bannie mine is among the very best prospective proper-
in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

S. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear
property well and favorably spoken of by parties who have been on
ground and whose opinion should carry considerable weight; and the
n that the miners who work in said mines are, according to reliable in-
mation, investing in Bannie stock, would indicate that the property pos-
a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
OHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand.
e Bannie mine is considered by all mining men here to be one of the
prospects for a big mine in this part of th ecountry. The officers are
men of standing and good, conservative business men. The miners work-
in the mine are taking one-half their wages in stock, which speaks for
elf. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

HN BROS. Cincinnati, O. Prescott, Ariz, 7-22-03
Gents—Replying to your wire of today, we have heard a great many good,
y good, reports of the Bannie mine, and have never heard a man say
ything against it. Miners who are working there are buying the stock.
The president of the Bannie M. Co. is an old mining man of experience.
e believe that this company is mining on a strictly business basis and
a good investment. Yours truly.
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., July 21, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron,
d and copper sulphide, which carries very good gold, silver and copper
The ore bodies, as far as they have been explored, are quite large
well defined, which indicates permanence. My information is principal-
from practical miners who have been working in the property, therefore
consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising
in this section. Yours very respectfully,
ED. BLOCK.

FIFTEEN JAPANESE WARSHIPS FURIOUSLY BOMBARDED PORT ARTHUR YESTERDAY

For Two Hours--Russian Battleships Badly Damaged and a Torpedo Boat Sunk.

Special To the Times.

St. Petersburg, Feb 27—Direct confirmation of the report from Hakodate that Vladivostock is blockaded by Japanese vessels cannot be obtained here, but it is considered not *improbable*. During the Japanese landing operatings in Corea, the Russian warships to the North were a constant interference and blockading them would be the most effective means of securing non-interference.

Furthermore it is worthy of note that for more than a week no word has been allowed to come from Vladivostock and this,it seems, is strong presumptive evidence that important events are transpiring in that vicinity.

The report from Liao Yang, Manchuria, that the Japanese fleet has received orders to attack and capture Port Arthur on March 1st, at all costs coupled with the comparison of Port Arthur and Sebastapol made by the Novoe Vremya, has created a profound *impression*, and has added to the belief that the Japanese possibly intend to commence land and sea operations against Port Arthur sooner than was anticipated.

Special To the Times.

London, March 1st, a despatch to the Daily Telegraph from Yin Kow dated Feb. 29, says.—15 Japanese warships furiously bombarded Port Arthur from 10 o'clock to 12 o'clock this morning. The Russian cruisers, Novik, Askold, and Vayan, accompanied by four torpedo boats, cleared out to meet the attack. They were, however, forced to retire. The Askold was in a sinking condition, the Novik was badly damaged, and a torpedo boat was sunk. *The* Russian cruiser Retvizan was again damaged.

The Japanese withdrew in good order.

SCHEME TO BLOCK PORT ARTHUR HARBOR FAILED

Many of Those Who Manned the Vessels Sent in to Block the Harbor Drowned

Chefoo, Feb. 29— Fifteen survivors from the Jinsen Maru, and fourteen from the Bushu Maru which were sunk at Port Arthur, landed thursday at Tenghaufu, near here. they travelled overland, and arrived at the Japanese Consulate Friday in a greatly exhausted condition. One Japanese was killed as the Jinsen Maru's boat was lowered. Lieut. Saito, who commanded the Jinsen Maru, declares that the steamer got so close to the Retvizan at the entrance of the harbor that the Japanese could have fired into her if the crew had rifles. When it was found that the scheme to block the harbor was a failure the vessels anchored, and their crews crowded into small boats. The steamers were then blown up. A strong wind and the glare of the search lights prevented the men in the boats from reaching the torpedo flotilla. The officers have shaved their heads as indicating sorrow for the failure of the expedition.

NINETEEN JAPS CAPTURED

Yin-Kow, Feb. 29—The first reports by eye-witnesses of the engagement at Port Arthur in the early morning of Wednesday have been received here. They say one Japanese coal hulk was sunk, and one was beached near the Retvizan, and that nineteen Japanese in civilian clothes escaped ashore, where they were afterwards captured. From long range two shells struck in the city.

Repeated attacks by the Japanese during the past week have resulted in the constant shifting of the troops, including the naval contingent organized from the crews of the disabled and idle warships, to all parts of the defences, and also to the hinterland.

Refugees arrived here yesterday report that the Russians momentarily fear land invasions of Port Arthur from Pigeon Bay.

The authorities have refused to permit the British captain Riddell, to sail his ship, the Foxton Hall, to Chefoo. It is understood that if the ship is released a Russian skipper will be sent for the *purpose of preventing* intelligence of the Russian operations being given to the Japanese blockaders.

Russia Pouring 5000 Men a Day Into Pt. Arthur Vicinity

To Resist the Expected Japanese Attack, Troops Are Also in Force at Seoul

London, Feb. 29—Russia is said to be pouring 5000 men a day into the Liaotung Peninsula, to resist the expected Japanese attack in the vicinity of Port Arthur. Troops are also in force on the Seoul-Pekin road, that runs from Liaoyang, between Mukden and Newchwang, to the Yalu River, thus presenting an army front against any advance from the direction of Port Arthur or Corea. The mounted scouts who have invaded Corea have penetrated to a few miles east of Pingyang. No clashes with the enemy are reported. There are no indications of a Japanese advance in Corea.

HAS A DREAM OF LONDOD BEING IN DANGER

England Learns that a Fleet Could Easily Sweep Up The Thames

Chicago, Feb. 27—The Record-Herald hasthefollowing from London;

London at the mercy of German gunboats, *her metropolis* shelled from the lower, Thames, her shipping destroyed, her public buildings reduced to ruins, and the British Empire thus struck that "terrible blow over the heart," against which the late Lord Salisbury warned his countrymen in one of his last speeches.

Such is the picture which has been painted in lurid colors as the outcome of a lecture the other night at the United Service Institution. Admiral Close, who took part in the discussion following the lecture, which was entitled "Coast Defence from the Imperial *Standpoint*," said he was astonished at the want of proper defence on the Thames.

SHOWS ONLY DEFENCE.

"If Germany declared war on Monday," he said, "they could have a couple of gunboats up the river to *the middle of London* the next night London never will be save until we have a couple of such craft stationed in the river. A gunboat could get past *Sheerness* and there would be nothing to stop it except a few police boats. Invading vessels could inflict any amount of damage. They could destroy the Houses of Parliament, the Tower, and play havoc with the shipping.

The danger was not realized by the public, said the admiral, and until it was, London never would be safe.

Several alarmist artists were founded upon these premises, and may be presumed to have set multitudes of cockneys to trembling in their shoes at the thought of the dread possibilities.

It was pointed out that such a catastrophe might happen if the British fleet were defeated at sea. One newspaper says;

"It is not pleasant to reflect that he continental anglophobia generated by the Boer war could have been backed up by the river attack on London, had any foreign power thought it worth while to make the attack. Yet in 1899 there were no fewer than sixty obsolete muzzle-loading guns guarding the capital. Today thirty of these useless weapons crown the works of Cliffe and at the Coal House forts there are some 12.5-inch guns of ancient date, but at Tilbury and Shoremead scrap iron is now being supplanted by efficient ordnance

"Much, however, remains to be done before the defences can be described as modern. In not a few of the forts round coast equipment is greatly at fault and a surprise attack would result in a scramble for both ammunition and gear.

"At Harwich in the Humber, the Tee, the Tyne, the Forth of Tay, the Cylde, and the Mersey, the defences are only now in course of being brought up to date. The cordon of land forts around London is comparatively a modern creation, but the gunners seldom handle the weapons'

GUNNERS NOT DRILLED.

The volunteer artillery, who, on mobilization, would man the Thames forts, still drill with obsolete weapons, and it is doubtful indeed if there are six men in each battery who know enough about the quick-firing rifles to use one effectively in a case of sudden emergency. Of course well known but anonymous military and naval experts have been called into consultation and one of them draw a startling picture of torpedoes at Westminster.

"Given first of all the one indispensable condition of surprise," he said, "the Thames could be entered easily at any time by an enemy's fleet. There are no defences that are available to check the ascent of the river, and a few vessels, say a small squadron of swift-sailing, powerfullly armed destroyers or small cruisers, if they once got past the Moro, could torpedo the Houses of Parliament".

UNIONISM GONE MAD

Most Unreasonable Demands Made by th Brewery Employes

Chicago, Feb. 28—That labor unionism has gone mad, is evidenced by the strike in the breweries of this city. *The* new agreement presented by the union provides not only an increase in wages, but other conditions which the brewers claim it would be next to impossible for them to grant and remain in business.

The union demands an eight hour day and stipulates that ten minutes in each hour shall be given the workers in which to drink the product of their labors. No limit is placed by the agreement itself on the amount of beer the men are to drink in this time, but it is stipulated that rules now in force shall be continued. These rules limit the number of glasses served to each worker to seventy a day.

The workers demand that two workmen who are termed "watchmen," shall be employed in each brewery at $3 a day and they shall do nothing but distribute free beer to the thirsty toilers.

Another demand is that the brewers shall *allow them* to select the kind of kegs and barrels in which the beer is to be put on the market. None but union-made barrels are to be used by the brewers. An attempt to use the work of nonunion coopers would be considered an abrogation of the contract and cause for a strike.

In the first section of their *agreement the brewery-workers practically* make the brewers their agents in the matter of collecting dues from their members. The agreement provides for the employment of none but members of the Brewery-Workers' and Maltsters' union in good standing. The brewers are to compel their employes to show them the union working cards and to see that the cards are for the current month—an indication that the man who owns it has paid up his dues. This section necessitates the discharge of any worker behind in his dues.

AMERICA TAKES A HAND

London Paper Comments on Attitude of United States

London, March 1.—The Morning Post today devotes a long editorial article to a historical record of the rapid growth of American activity in far eastern affairs, comparing the present attitude of the United States with its passive interest in the Chino-Japanese war. The paper remarks on *the notable pro-Japanese feeling* in the United States after such a long traditional friendship with Russia, and contends that American friendship to the Czar's Empire was always artificial. Admiral Dewey's guns, the paper continues, literally shattered the superstition that Russia was the appointed friend and *Great Britain* the appointed enemy of the United States. "We believe," the Morning Post concludes, "that the appearance of America as a working element in international affairs and her unmistakable hostility to Russia is destined to become "epoch-marking if not epoch-making."

GERMANY LIKES RUSSIA

Von Bulow Says This Is the Feeling of All but the Socialists

Paris, March 1.—The Petit Parisien records a conversation which, it states, a French visitor to Berlin had a few days ago with Count Von Bulow, the German Chancellor, who is reported to have stated that, with the exception of the Socialists, all parties were at one with the Government in its desire to remain on friendly terms with Russia. It was Prussian and German tradition to cultivate friendly relations with Russia. A Russo-German friendship was, therefore, in the nature of things.

"There are those who claim that Germany is pursuing in the far east a realization of her egotistical plans," the Chancellor is credited with saying. "There are others who go so far as to say that German policy constitutes a black spot on the European horizon.

"How of what could these secret aims, these 'egotistical plans', be? We are suspected of seeking to lay hands on the provinces of Chee-Lee or some other portions of the Chinese Empire.

"We have agreed with the idea of neutralizing China with the exception of Manchuria. Naturally, then, if we are in favor of neutralization it is positive proof that we are not seeking for conquest. People must really think we are fools to credit us with such absurd dreams."

Should Doctors Advertise?

Whatever dignity it may lend to the profession the etiquette which frobids doctors to advertise very often inconveniences the public. Tradition and dignity are, no doubt, both valuable assets, but while self-respecting medical men naturally shrink from the methods of the patent pill maker it is difficult to see what loss of dignity would be incurred by reputable doctors setting forth briefly their qualifications in the daily papers. It often happens, especially with new-comers in the suburbs, that in the case of sudden illness they have nothing whatever to guide them as to what particular doctor they should send for. Now, if they could only discover by consulting the local papers the qualifications of the various medical men in the district a great deal of trouble and inconvenience would be avoided.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the *Alpine, the Imperial* and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is *another* vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten *inches of ore* in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve *inches* wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the *formation, showing it to be a true fissure*, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon those two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, thus, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken *from* the dump. The other two assays are $62.68 and $79.68 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will cut a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore..

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. P. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the *North Bonanza, Flowery* and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (*triple compartment, 9x16 feet in the clear*) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the *Flowery* and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, *for a* good, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the *Company* is *free from* debt. Its policy is to pay as it goes, in this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and aid p into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons *of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put* is constantly increasing and all the Company needs is more mill capacity to handle its ore.

RUSSIA VERY HOSTILE TO U. S.

Growing Daily in Intensity in the Empire

MAY YET COME TO BLOWS

Vicksburg Incident Serious Menace to Trade with Russia

St Petersburg, March 1.—The irritation against the United States on account of the unfriendly attitude of that country toward Russia, which was slightly noticeable throughout the negotiations, seems to have become daily more pronounced, and since the Vicksburg incident at Chemulpo, when the commander of the American gunboat is said to have refused to unite with the commanders of other foreign warships to protest against the fighting which resulted in the loss of the Russian warships Variag and Korietz, American business men here are really alarmed concerning the possible effect upon American trade.

ORDERS CANCELED.

Within the last few days orders for American goods have been countermanded, the only explanation given being that the prospective purchasers did not desire to buy American goods under the present circumstances. United States Consul General Watts has been appealed to in the case of an American firm which had a large contract for school supplies, the contract having been peremptorily canceled.

Orders for the importation of a big consignment of wood pulp have also been countermanded, the intending purchaser saying in his letter that he could not be expected to do business with America after the Vicksburg incident.

WARNS DEPARTMENT OF DANGER

Mr. Watts has felt it to be his duty to write to the State Department, pointing out the state of public feeling here, and the great prospective damage to American trade unless measures were taken to allay the irritation.

Americans believe here that an official explanation of the Vicksburg incident would be opportune and have an excellent effect. The government officially has not taken notice of the incident, being without direct official advices from the far east on the subject. In government circles, however, it is seen plainly that Russian susceptibilities have been wounded and the fear is expressed that should Washington now disregard Russia and procure exequaturs for the newly appointed American consuls at Moukden and Antung from Pekin and attempt to send these officials to their posts a really serious situation might be created.

MAY CONSIDER ACT UNFRIENDLY

Russia does not want to be placed in the position of refusing to allow these consuls to enter upon their duties, but with a state of war existing and commerce at a standstill military conditions herself warranted in interpreting such a course on the part of the United States to be political rather than commercial.

The refusal of Russia to allow Mr. Moran, the newly appointed consul at Port Dalny, to go to his post at present is based solely on the military situation, which may compel all foreigners to leave Port Dalny.

The sincere hope is expressed that the United States will not embarrass Russia further by pressing the question of consular representation at this time.

EXPEDITION INTO THIBET

British Government Determined on Final Settlement

London, March 1.—Lord Hardwicke Under Secretary for India, in the House of Lords, replying to the request of Lord Reay (Liberal), for further information regarding the British mission to Thibet, said the Government was determined to insist on a final settlement regarding carrying out the terms of the convention of 1890.

The Thibetans have refused to have intercourse with Great Britain, but the result of the continual intercourse with Russia had been to inspire the Thibetans with the feeling that they had Russia behind them, and therefore they need not fear the British. The situation in the Indian Government His Majesty's Government could not tolerate for a moment. While Lord Hardwicke refused to pledge the Government regarding the limit of Col. Younghusband's advance into Thibet, he said the mission was friendly and Col. Younghusband would do nothing to promote hostilities.

Poultry For England.

The Department of Agriculture has received the following communications from British dealers who desire to purchase Canadian poultry. One of the dealers is at present in Canada negotiating for the shipment of poultry. He writes the department as follows:—"I am in Canada soliciting consignments of poultry to England. My name has been before your department for several years as a large importer of poultry. You have sent me consignments of chickens. I should be glad if you would name the Canadian poultry shippers and mention my name if possible, so that they may commence to ship early in December. Yours truly (Signed) James Blackburn."

For four years the Department of Agriculture has exported chickens fatted at the illustration stations to Mr. Blackburn. His address is Wholesale Fish Market, Manchester, England. The dealings have been perfectly satisfactory, and the prices obtained for the chickens have been profitable. Mr. Blackburn stated that he would like to handle 3,000 cases of chickens per week. The department has also received a letter from Mr. William Rothwell, Manchester. Mr. Rothwell says: "There seems to be a very good prospect for all kinds of poultry this Christmas. If you can give or have any consignments sent me, you can rest assured of the utmost value being obtained. Cash and sales sent immediately goods are disposed of. The probable prices are as follows: large cock turkeys, plucked, 14 to 18 pounds, 9d to 10d per pound; plucked turkeys, 12 to 13 pounds, 8 1-2d to 9d per pound; plucked turkeys, 9 to 11 pounds, 7 1-2d to 8d per pound; plucked chickens, 8d per pound; plucked ducks, 7d per pound; turkeys in feather, 6 1-2d to 7d per pound. I trust that I may have consignments from Canada."

Mr. Hare, chief of the Dominion Poultry Division, stated that these approximate prices should offer substantial inducements to Canadian exporting firms to ship poultry to Great Britain. The poultry should be forwarded in a steamship equipped with cold storage. Even on small consignments the freight charges will not be over one cent per pound.

British Object to Mixed Lots.

Writing to the fruit division, Ottawa, Mr. A. W. Grindley, inspector of the Department of Agriculture in Great Britain, quotes as follows from a letter received from a firm of fruit importers: "If your department, through a circular, could induce shippers to use some common sense in sending apples, you would do them much good financially. For instance, yesterday the Tunisian was cleared up, the bulk having been disposed of earlier in the week, and in the catalogues there were over 1,250 lines under 10 barrels each (we should guess averaging two and three barrels), of different varieties. We do not know of any trade where so much money is being wilfully thrown away."

Regarding this point, Mr. Grindley refers to one lot of apples catalogued on October 23, in which there were 30 varieties in a lot of 41 barrels, and says that no buyer will pay top prices for these mixed lots, and that the shipper loses heavily every time. The establishment of co-operative packing and shipping houses, advocated by Mr. MacKinnon, is pronounced by Mr Grindley a splendid idea, and one that if carried out, would, to a large extent, do away with the small lots of mixed varieties of which importers complain.

A Russian Railway.

There has of late been so much talk about the Siberian Railroad, its "fast freight" and its passenger trains "de luxe," that there is danger that some people will suppose it to be a steam highway comparable with our own transcontinental roads, says The New York Tribune. We have repeatedly pointed out in these columns that, despite the opening and operation of the railroad, it is still found best to send merchandise from Russia to China and to the Siberian coast by water. The sea route is as quick as that by land, and is much cheaper. This view of the case is amply confirmed by the latest authentic reports upon the Siberian Railroad. The distance from Moscow to Vladivostok is 6,166 miles. The choice express trains, passenger trains "de luxe," run as fast as thirteen and a half miles an hour. Thus, if they are not delayed, and are able to keep running steadily, night and day, they make the trip in sixteen days; but so unbroken and expeditious a run is infrequent, and judicious travellers allow three weeks for the journey. As for freight trains, they make at best about eight miles an hour. But they do little running at night, and are necessarily subject to frequent and prolonged stoppages, so that their running time is seldom less than fifty, and often reaches sixty, days, or even more. In view of such a schedule it is not surprising that for through traffic the ocean route is still preferred. Doubtless things will be better some day. The Siberian Railroad was hurriedly built. Its 5,166 miles of rails were laid in ten and a half years, while it took the Canadian Pacific ten years to lay 2,921. That does not mean that the Russians were the better railroad builders. It means that the Siberian road was built flimsily, with narrow embankments, short ties, little ballast, sharp curves, and steep grades, and with very light rails. Such conditions make it impossible to run trains at a high rate of speed. Already the work of practically rebuilding the road from end to end has been begun. When it is finished, at a cost not much less than the original cost of the road, a few years hence, it is promised that trains will be run as rapidly as twenty-two miles an hour—that is, the fastest expresses—reducing the time across the continent to less than ten days.

It would be a mistake, however, to deduce from these facts the conclusion that the Siberian Railroad is a failure, or that it is not proving of service and of profit to its builder. On the contrary, it is of enormous practical value. But that value—apart from military considerations—lies not in through traffic, but in war traffic, especially west of Lake Baikal. It is opening up and settling western Siberia in a marvellous manner. Hundreds of thousand of peasants are now yearly migrating from the overcrowded villages of European Russia to the virgin plains beyond the Urals, where each head of a family receives forty acres of land, free of taxes for three years and for three years more taxable at only half rate. The railroad does not amount to much as a leap across the continent. But as a part of a steady eastward march and growth its importance is inestimable.

Interesting for Ladies.

About Furs.

Furs are always of supreme interest at the approach of winter, says The London Daily Graphic, and anything new in the way of skins is eagerly sought after. A well-known Old Bond street house has just introduced the "Russian mink" fur, which, unlike the ordinary mink, has no tinge of red, but is shaded almost identically with a sable. This fur deserves popularity, not only on account of its novelty, but for its intrinsic value, as it is unquestionably superior to any mink fur hither to in the market. A costly dress in the old shade of heliotrope cloth had the skirt very gracefully pleated and trimmed with a stole of Russian mink, falling from the waist at each side, terminating in five tails, and shorter stoles more towards the back. The bodice was a mink bolero applique on a blouse of heliotrope panne, ornamented with motifs of cream braid, passementerie, and Oriental embroidery. At the top was an embroidered shaped facing of green velvet, and the full sleeves were finished with lace ruffles. The toque intended to go with this handsome dress was of rough cream beaver, with turned-up directoire brim, overlaid with medallions of virgin gold embroidery, and a Russian mink placed flat on the outside, the tails falling over the back.

Monkey fur is likely to be fashionable for women's wear during the coming season, says an English exchange. A French furrier is responsible for the introduction of this latest novelty, and already a few wraps of the long-haired, silky, shining, uneven fur have been seen. One has cuffs, stole-collar and muff of dazzling white fox skins. English furriers prefer mole to monkey fur, as it is new to the public, and pretty. Sable, however, is still the standard fur, and ermine is being generally used. There are two novel fur models. One is a pelerine cape of Russian sable, cut rather low at the throat, with a line of dark fur edging the triangular opening. Round the shoulders is a hood-like drapery of ermine, fastening in front under grey satin rosettes, and cut to a point at the waist-line. From under the hood falls a flounce of sable, arranged in supple folds suggestive of plaiting. The other notable fur is a belted blouse of mink. Over the shoulders the fur is folded back, resembling a hood, the fur coming to a point in front and behind. Muffs are very large this winter, principally in sable, with the sides draped in box plaits, lined [illegible]

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 800 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. [illegible] U.S.A.

MEN AND WOMEN.
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper [illegible]

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B. WILCOX, RICHARD F. DORSEY
WILLIAM GARLICK, ARTHUR B. GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

HIGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPANY

ncorporated Under the Laws of the State of California.

La Zaluaipa Rubber Plantation is sit- ated in the best location in Mexico for e cultivation of rubber. It has been own for a great many years as a ry choice strip of rubber land and subse- uent experience has shown that it is ual to all that has been claimed for . The affairs of the company are in e hands of men of undoubted integrity d high reputation as successful men business. To those seeking a safe in- stment which will secure a good in- me for life, this proposition offers a vorable opportunity

hares in La Zacualpa Rubber Planta- on are not capital stock of a corpora- on, and carry none of the responsi- ilities and obligations, or liability to ssessment of capital stock; but repre- ent an undivided interest in the planta- on itself.

The twelve thousand acres comprising e plantation are divided into twelve ousand shares, each share represent- g one acre of land, and the holders f shares in La Zacualpa Rubber Plan- ion are the actual owners of one un- vided acre of land, for each share held, ith a guarantee expressed upon the rtificate by La Zacualpa Rubber Plan- tion Company, under its official seal, plant two hundred or more rubber ees per acre for each share sold, and care for same for a period of five ears, and at the expiration of that time gather the first harvest and deliver e net proceeds thereof to the share- older.

n other words, La Zacualpa Rubber antation Company sells to each share- older one undivided acre of land in La acualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
13 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Out Into the World.

It was in Cairo that they first met, in a narrow street, amid a motley collection of Arabs and native Egyptians, Dervishes and Orientals. She and her mother found themselves straying one day from their hotel.

"May I assist you?" he observed; and, thankfully accepting his proffered aid, they had permitted him to escort them to a place of safety.

It could not have been long after this that they came across each other again in Rome. There is a little, straggling Roman street, or way, that leads off from the Coliseum.

It was there that their eyes met. His were large and dark and grave; hers blue and a trifle confused.

She inclined her head. He bowed, with a half-smile.

This incident, however, put him in a different mood for the rest of the day. He wondered at what hotel she was stopping. He wondered where she came from, whither she was going. He had started out on his travels months before with a vague, undefined sense of loneliness, a desire for companionship.

New York, he thought, was the most lonesome place in the world. Perhaps he would run across someone, somewhere, who would be a treasure of friendship, or love—who could tell?

And now that he had seen her, he felt somehow that she would fulfil these requirements. This girl, with the serene blue eyes that yet showed depths of humor and courage and that certain quality of innate refinement which reflects itself from some eyes, disturbed him greatly.

Who was she?

It was going down the Rhine that they met again.

He became conscious of a gaze—what is the subtle psychology of that look beaming upon us from the unknown? He had turned, and there indeed she was, with the golden sunset gleam lighting up her almost classic face—classic save for the rather large mouth which, when she smiled, gave to her features just the irregularity that was needed.

He bowed again, and in a few moments more found himself seated by the ladies' side, talking commonplace language, and thinking uncommonplace thoughts.

When they met again it was in Paris, if not by appointment, at least by the aid of a certain sort of understanding. She had remarked casually that they expected to be in Paris on a certain date, and he had replied that he was glad that this was so, for he expected to be there himself at that time, although only at that instant his determination to do this had defined itself.

In Cairo and Rome they were to each other merely travelers from the same land, bound together by the distant claims of patriotism. On the Rhine, they were acquaintances. In Paris, they became friends, and then——

On the homeward voyage, when, one night, they stood by the rail and watched the moon come up over the waters, he held her hand in his, and said:

"Dearest, I knew that if I went out into the world I should find you; I knew it instinctively—I must have known it. I was so lonesome living all those years in New York by myself—and now, to think I have found you, at last!"

And she replied:

"Do you know, I felt much the same way. I, too, was lonesome. No one in New York seemed to satisfy my longings. I sometimes wonder why we have never met before."

He smiled. "Do you want to know the reason?" he asked. "I can tell you, for the other day your mother told me the street and the number where you lived."

"Indeed," she said, "what has that to do with it? What is the reason?"

"Because," he replied, with a smile, "all these years I have lived next door to you."—Tom Masson in "Smart Set."

Some Clever Epigrams.

One of the epigrams mentioned by Professor Brander Matthews, in an article on "American Epigrams," in Harper's for November, is the following by Walter Learned:—

"You say, when I kissed you, you are
sure I must quite
Have forgotten myself. So I did;
you are right.
No, I'm not such an egotist, dear, it
is true,
As to think of myself when I'm looking at you."

Many examples are also given of epigrams by Holmes, Lowell, Aldrich, and other of our poets, among them this, adapted by Fitz-Greene Halleck from Goethe:

"All honor to woman, the sweetheart,
the wife,
The delight of our homesteads by
night and by day,
The darling who never does harm in
her life—
Except when determined to have
her own way."

"Ragtime" Hear to Stay.

Recently The New York Sun published an interview with John Philip Sousa in Chicago, in which he asserted that ragtime will last as long as the great operas. "Ragtime," says the famous bandmaster, "is an established feature of American music; it will never die, any more than "Faust" and the great operas will die. *Of course, I don't mean to compare* them musically, but ragtime has become as firmly established as the others, and can no longer be classed as a craze in music. Nearly everybody likes ragtime. King Edward VII. liked it so well that he asked us to play more of it, and we gave him 'Smoky Mokes' and 'Georgia Camp Meeting.' Emperor William and the Czar were also converted to ragtime. It is just as popular everywhere as ever it was, and I see no reason why it should not remain in favor so long as music is played."

The New York Times, commenting on this latter assertion, remarks:—"Well, why not? One of the most important functions of music is to give pleasure, and if ragtime pleases, why should it not last and give pleasure to future generations? Those who prefer what the east side critic of the park concerts characterized as 'misery music' can usually get it, and doubtless will continue to prefer it to the more popular varieties of song and dance music."

Little Emily Kingsbury, aged four, who attends the kindergarten and calls it the "kidney garden," was being examined as to the senses.

"What are your ears for, Emily?"

"To hear with," was the answer."

"And what are your eyes for?"

"To see with."

"And what is your nose for?"

"To blow," was the innocent answer.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,800 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

Consumption Can Be Cured

A Powerful and Effective Destroyer of Disease Germs Discovered Which Cures Consumption.

The ravages of consumption which for years have terrorized the modern world will no longer continue to cut off our population by thousands. Science has at last produced a remedy which not only can be readily applied to the lungs, but also kills every trace of bacilli in the throat, bronchial tubes, and air passages of all the breathing organs.

The name of this marvellous antiseptic about which the doctors are talking so much is Catarrhozone, the ozonated air cure. The vapor is more soothing than the air of pine woods, and its healing properties are without limit.

Through a skilfully devised inhaler the sufferer is enabled to breathe this fragrant medicated vapor into the most minute air cells of the lungs. It is so destructive to microbic life that the tubercular germs are rapidly killed and prevented from ever returning. Congestion and inflammation are relieved, coughing stops, all disagreeable symptoms are quickly cured by Catarrhozone.

So simple is Catarrhozone that anyone can use it. So certain to cure lung and throat troubles that it is prescribed by not less than twenty thousand doctors in United States and Canada. One well known authority who has made a life long study of consumption, has the following to say: "Catarrhozone is certainly a true specific for white plague. I find that its healing vapor readily spreads all through all the breathing organs passing over probably not less than one thousand square feet of mucous surface at a single inhalation. It is a perfect germicide and destroys tubercular germs with wonderful certainty. Catarrhozone is entitled to rank among the great medical discoveries of the age."

No matter how often you have been disappointed with other remedies you must not be discouraged. In Catarrhozone you will find new hope. What it has done before it can do again. Your case is not worse than others it has cured. Therefore if properly used you can also be cured by Catarrhozone. Two months treatment $1.00. At druggists or by mail from N. C. Polson & Co, Hartford, Conn., U.S.A., or Kingston, Ont. Refuse any substitute for Catarrhozone—only the genuine can cure.

To haul wood from Best's Station to town. $1.75 per cord. R. HICKS & Co. 2td

Discount Increased

At Monday's meeting of the Water Commissioners it was decided to allow consumers the advantage of a further increase in discount, from twenty to twenty-five per cent., in event of payment within fifteen days, this rate to go into effect on April 1st.

Fire on Downie Street

The firemen were again called out yesterday to extinguish a blaze on Downie street. A shed at the rear of the house occupied by Rev. J. Bastow, caught fire, but the Brigade soon had the fire under control and no great damage was done.

They Want to Vote

The Indians of the Six Nations have applied to the Ontario Legislature to restore to them the franchise, so as to allow them an opportunity to vote. The usual promise was given. Should the request be granted, the Indians of Alnwick will have another opportunity to mark the ballot.

Accident at Mann's Planing Mill

Yesterday morning about nine o'clock, while Mr. John Dorris, of 91 London street, was at work in Mann's Planing Mill, he received a painful cut on his left wrist. While chiseling some wood, the instrument with which he was working accidentally slipped, inflicting a nasty gash on his wrist. Mr Dorris will not be able to resume his work for some time.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

[illegible]

Y. W. C. A.

The regular Sunday meeting of the Y.W.C.A. will be addressed by Miss Caroline A. Macdonald, B.A., travelling secretary of the Dominion Council who leaves shortly for Japan, where she intends entering upon Y.W.C.A. work at Tokio University.

A reception will be given on Tuesday afternoon next, at the home of Mrs. A. L. Davis. All the young women of Peterborough who are interested in the work of the Association will be welcomed.

We are Giving the Girls of Canada Bracelets

We are giving the girls of Canada Bracelets. If any young lady would like a present of a Silver Bracelet, we will tell her how she can have it, if she will send us her name and address on a postal. No canvassing or selling, but—well write us and we'll tell you. Any good grocer can tell you if we are reliable.

THE MALTED CEREAL CO.,
200 Mountain St., Montreal.

Preparing for Spring

The streets at present present a most deplorable sight. Heaps of ice and snow are to be seen in front of almost every store and dwelling house. Some energetic citizens have endeavored to brighten the appearance of the front of their premises by having the snow and ice hauled away in sleighs, but the weather has been so changeable of late, that only a few have resorted to this means out of the difficulty. In anticipation of a sudden thaw the street authorities have dug trenches along the sides of the main thoroughfares. A great amount of money will have to be spent if the citizens are to be protected against damage through the spring freshets.

CONFERENCE MEETS HERE

To be Held in George Street Church in Month of June

The annual Conference of the Methodist church will be held in Peterborough in the month of June. This, according to a prominent city clergyman, will be the first time in nine or ten years that the meeting has been held here. There are 450 churches in the Bay of Quinte Conference, and a large number of delegates are expected to be in attendance. The conference will be held in George street church, and the stationing committee will in all probability meet in Charlotte street church.

A combined meeting of the Official boards of George street, Mark street, and Charlotte street churches, was held in the office of Mr. Aaron Cox, last evening, and arrangements were made for the conference. A good representation of the different Boards was present and every thing in their power will be done in arranging for a most successful and beneficial meeting in June next.

PRESENTATION TO MR. LLOYD

Members of St. Andrew's Choir Present Retiring Choir Master with Inkstand

A very pleasing event took place at St. Andrew's church manse on Monday night, when the choir was entertained by the Rev. Mr. and Mrs. Potter, and Mr. H. M. Lloyd, the retiring choirmaster was presented with a beautiful onyx inkstand, accompanied by an address which was read by Mr. Stewart Ferguson, and a copy of which follows;

To Mr H. M. Lloyd;

Dear Sir,—We, the members of St. Andrew's choir, desire to express our heartiest good-will to you as you lay down the office of organist and choirmaster.

We deeply regret that the duties of your profession have caused you to feel that time did not permit you to continue the interest you have taken in us, and for the welfare of the choir. We desire to express our high appreciation of your uniform courtesy and of the kindly way in which you have conducted the practices from week to week. We feel personally indebted to you for the care you have taken, for the patience you have had with us, and we desire to assure you of our best wishes towards you. We trust that you and Mrs. Lloyd may be long spared to live the useful and exemplary lives, and our comfort at a time such as this is that we shall continue to have your presence and sympathy with us in St. Andrew's. Will you kindly accept this simple pledge of our esteem and believe us to be ever your sincere friends

Signed on behalf of choir.

(MRS.) VIDA Kerr,
President Choir Association

Miss Mamie Thompson made the presentation, and Mr. Lloyd's remarks were expressive of his appreciation of the evidence of esteem in which the choir had held him

The happy gathering was brought to a close about midnight, by the singing of "Auld Lang Syne."

MOTHER ST FRANCIS DEAD

At One Time in Charge of St. Joseph's House of Providence

The following communication has been received from Port Arthur, Ont;—

On Thursday, Feb. 11th, just as the morn was breaking, and the first glimmer of light in the east heralded the approach of day, the soul of Mother M. Francis, of Fort William, passed away from earth to greet the eternal dawn. Like a child falling asleep without a struggle or sign, she departed. Her last words, addressed to a Sister, who had performed some little service, were,—"May God reward you for your kindness." "Mother Francis is dead," may not mean much to many who knew her not. But to her Sisters in religion, and to anyone who has once felt the influence of her loving heart they came with a great shock.

Mother Francis was Miss Norah Burke, of Pickering, Ont., and thirty-one years ago entered the Novitiate of St. Joseph's Convent, Toronto. Her amiable disposition soon endeared her to all her fellow Religious. Many of the pupils of the Convent in those days will remember her. How could they forget the gentle footsteps and kindly smile, the ready sympathy and helping hand of the good Sister. When a pupil, lonely and homesick, after her first separation from her loved ones, sought for comfort, she was sure to find it in the loving words of this sympathetic Nun.

In 1885, when the Sisters were asked to take charge of the Indian Mission at Port William, this self-sacrificing Sister volunteered to go, and offered for the conversion of one near and dear to her, the severing of all the ties she had formed in the Convent. God blessed her desires and her good-will by giving her such an interest in her work, that it became a labor of love. She would gladly have spent her life among her dear Indians. In 1896 failing health obliged her to come east, and she was stationed at St. Joseph's Hospital, Peterborough, where, notwithstanding her own sufferings she was always bright and cheerful. Her next mission was Lindsay, where her memory as an amiable, humble, self-denying religious will live for many a day. Night or day her services were at the command of all who needed them. She never seemed to mind the nature or difficulty of the work to be done. Her patience was unbounded and her life so mortified, that no one ever heard her complain of what was served her. In 1902, she was placed in charge of the House of Providence, Peterborough, where she was indeed indefatigable in her labors for the sick and poor. Last September the desire of her heart was granted, and she was sent back to her beloved Indians at Fort William Mission. God accepted the dedication of her life and has called her home to her reward. A weak heart left her unable to combat the dread disease, pneumonia, and the day came when she saw the sun set, never again to see it rise. She died at Port Arthur Hospital, where she had been taken for treatment.

The funeral was held at the Mission Church on Friday morning, 12th inst., at 9 o'clock. The church was heavily draped, and the solemn services of the dead were very impressive. The Rev. Fathers LaMarche, Dugas, Arpin and La Fortune were in the sanctuary. The Mayor of Port Arthur and many of the prominent merchants of both towns were present. There was great grief among the Indians, who filled every available space in the sacred edifice. They have lost in Mother Francis a true friend, and surely he, who has said that He will reward a cup of cold water given in His name, will welcome her home, and forgive her faults for the greatness of her love, and not detaining her long from the sight of His glory in Heaven.

"One smile alone can gladden,
What'er the pilgrim's lot,
It is the smile of Jesus.
For Jesus changeth not."
—Com.

NO GAME TO-NIGHT.

BELLEVILLE ISSUES AN INJUNCTION TO RESTRAIN GAME FROM TAKING PLACE WITH MIDLAND TO-NIGHT

The following telegram was received by Mr. R. M. Glover, yesterday evening;—

Toronto, March 1.

Mr. R. M. Glover,
Peterborough, Ont.

"We have been notified of issuance of injunction at Belleville, restraining Peterborough and Midland from playing championship games as ordered. Games are therefore cancelled.

"W. A. HEWITT."

No information can be obtained from Toronto except to the effect that Midland will likely play off the first game in Stratford on Friday, and the second in Midland on Tuesday next. By that time the injunction will have been disposed of, and the winners of the Stratford—Midland games will play the winners of this district. There will of course be no game this evening.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Rev. Marmaduke Hare, of Toronto, will address the special service at St. John's Church tonight.

—A number of emigrants were among the list of snowbound passengers yesterday. They landed a short time ago on the steamer Bavarian, and are bound for the Northwest. In an interview one of them was quite conversant and although no interpreter was at hand it was easily understood that he was criticizing our severe climate.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Mabel Roy is the guest of her aunt, Mrs. Hannaford, Montreal.

—Miss Agnes Hall, is visiting Montreal friends, and is the guest of Mrs. Robinson

—Miss Jennie Mann, who has been visiting her uncle, Mr. John Mann, George street, has returned to her home in Cobourg.

—Miss Lucy Tate, of Hastings, was united in marriage to Rev. Thos. J. Small, of Glenglale, Man., at the home of the bride's sister Mrs. Huycke, of Hastings, on Wednesday of last week.

—Mr. R. Morrison, who has been in town for the past three years, left yesterday morning for Brandon, Man., where he will take up his abode for the future.

—Mr. H. J. Stewart, who has until recently held a position on the staff of the Lakefield bank, visited friends in town yesterday. Mr. Stewart will leave shortly for Calgary N. W.T., where he intends entering the insurance business.

—At the Snowden House—T. H. Cook Kingston, Geo. R. Nimmo, Montreal; J. C. Boughner and M. Matlock, Ottawa; P. J. Cou, Montreal; J. E. Lewis, Hamilton; A. Jenner, Spokane, C. Sinclair, Hamilton, W. A. Thornton, Toronto; I. O. Hays, Glengarry; P. R. Young, Young's Point.

—Mrs. McAllister, of this city, is the guest of Mrs. G. W. Spencer, St. Catharine street. The Montreal Star in its social columns, contains the following,—"Mrs. Boyd, 4465, St. Catharine street, entertained at tea this week for Mrs. McAllister of Peterborough, who has been the raison d'etre of several pleasant entertainments while in town.....Mrs. C. B. McAllister of Peterborough was the guest of honor yesterday at a very pleasant informal tea, given by her hostess, Mrs. C. W. Spencer, St. Catharine st. Mrs. McAllister, who was gowned in black and white point d'esprit, received with Mrs. Spencer, who wore black voile, trimmed with lace and touches of pale blue. The decorations of the house were carried out in American Beauty roses.

Love is sometimes a hard taskmaster. He drives women to tasks beyond their strength and lays heavy burdens on their shoulders. Love of husband, love of family, forces many a woman day by day to labor for the home when aching back and throbbing head make her utterly unfit for household duties.

Weak, nervous women who suffer from headache, backache, bearing-down pains and other consequences of womanly disease, can be completely cured by the use of Doctor Pierce's Favorite Prescription. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

"About two years ago I was taken sick and it seemed as if I had no nerves at all," writes Mrs. F. Woodbeck, of Delray, Mich. "Could not work an hour in the day without being tired out. I doctored first with one physician, then with another, but did not receive any benefit. One would say one thing and the next something else. I had almost given up when I thought your medicine might help me, so I wrote to you asking what to do. You advised me to take Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery.' I did so and could see a difference right away. I only took four bottles in all and felt better than I had in a long time. Can work all day now and not feel tired as I would in an hour before taking your treatment. I think it is the only medicine."

Dr. Pierce's Pleasant Pellets cure dizziness and sick headache.

Are You Looking FOR A Good Investment ?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED ?
We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500 00 per day to say nothing of the vast amout of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

PORT ARTHUR IS IN A DESPERATE STATE.

Battleships Landlocked by Wreck of Retvizan --Cruisers Out of Action

Special to The Times.

New York, March 2—The position of the Russians at Port Arthur, says a cable to the World from Berlin is described by the St. Petersburg correspondent of the Schlesische Zeitung as desperate.

"The damaged Retvizan," he states "blocks the narrow entrance to the harbor against other battleships. She can neither be repaired nor moved. All the other battleships are landlocked.

"Scarcely anything is heard of the torpedo boats. It is assumed that they are without ammunition. There are consequently still only the three cruisers, the Bayan, the patched up Novik, and the Askold."

According to accounts now published the Novik and the Askold have been put out of action.

FOR CIVILIZATION.

St. Petersburg, March 2—The Novoe Vremya today prints an editorial on the "Anglo-Saxon rejoicing in England and America at the reports of Japanese victories," in which it says "the whole world, with these two exceptions realise that the Russian occupation of Manchuria would benefit civilization.

THE BLACK SEA FLEET TO STAY BOTTLED

Turkey, Under Pressure by Powers, Decline to Allow It to Pass Through Straits.

Constantinople, March 2—The Turkish Government has resolved to forcibly prevent Russia's Black sea fleet from passing through the Dardanelles, and a fight will probably occur should such an attempt be made. The defences along the straits have been strengthened and mines have been laid. Officers have been specially appointed to supervise these measures. The reason for Turkey's bold action, it is learned, is that strong representations have been made by the other powers against such a breach of Russia's treaties as the passing would incur. England has informed the Sultan that should the Russian vessels pass through the straits a British fleet would do likewise, and would make a demonstration before the windows of the Yildiz Kiosk.

JAPANESE IN KOREA.

ira, March 2—Information reaching here from official cources shows that Japanese concentration of troops is going on extensively in the neighborhood of Pingyang, Corea. Large forces are debarking from transports at nearby forts from which it is assumed that an extensive land engagement is imminent in Northern Corea.

HAS PORT ARTHUR FALLEN?

London, March 2—A rumor was circulated in the lobby of the House of Commons this afternoon that Port Arthur had fallen. The origin of the rumor could not be traced, and no confirmation whatever was obtainable.

RUSSIA PREPARING THE FLEETS FOR ACTION

St. Petersburg, March 2—Although it is denied that the present plans of the Admiralty contemplate the despatch of either the Black Sea or Baltic fleets to the Far East, both are being prepared with the greatest haste to meet any emergency that may arise. General Altvater the artillery specialist, and Admiral Verbosky have been inspecting the ships and crews of the Black Sea fleet.

ORD DALMENY KILLS MAD BULL

ord Rosbery's Heir Has an Exciting Battle in Park

HOT AFTER A WILD CHASE

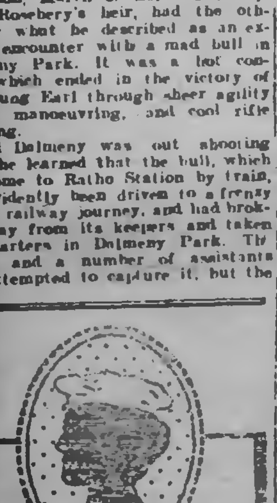
ol Behavior of the Young Nobleman Prevented a Tragedy

ondon, March 3.—Lord Dalmeny, rd Rosebery's heir, had the oth- day what he described as an ex- ng encounter with a mad bull in lmeny Park. It was a hot con- t, which ended in the victory of young Earl through sheer agility lful manoeuvring, and cool rifle ting.

ord Dalmeny was out shooting en he learned that the bull, which come to Ratho Station by train, evidently been driven to a frenzy the railway journey, and had brok- away from its keepers and taken quarters in Dalmeny Park. Th mer and a number of assistants attempted to capture it, but the fierce charges of the animal sent them for refuge into trees.

Lord Dalmeny exchanged his sporting gun for a rifle, and went in pursuit, followed by gamekeepers. Lord Dalmeny's first shot had no effect and the mad bull tore down a narrow path towards the young man, but on each occasion he got out of harm's way, the gamekeepers looking anxiously on for the safety of their young master.

In the bull's third attack Lord Dalmeny had a narrow escape, only springing up an embankment in time to save himself from the horns of the bull, which was bellowing with rage, but the young nobleman kept remarkably cool until he got the opportunity wanted, took steady aim and shot the maddening beast through the heart. The bull fell with a crash, and in a few minutes was dead.



The housewife who does not use Cleveland's Baking Powder is at a disadvantage, She cannot get the same perfect work from any other.

BAY OF QUINTE CONFERENCE

Arrangements Made for Reception of Delegates—About 300 Expected

A meeting of the Boards of George street, Charlotte street and Mark street Methodist churches was held in the office of Mr. Aaron Cox, on Tuesday evening, for the purpose of making final arrangements for the Bay of Quinte Conference which will meet here in June. A committee consisting of the following members of the union boards, was appointed to look after the billeting of the many delegates expected; — Messrs. B Shortly, chairman; Dr. Morrison, secretary; J. P. Jeffries, treasurer; Rev. J. P. Wilson, Rev W. J. Joliffe, Rev. J. G. Lewis, and Messrs. T. W. Robinson, J. A. Sutcliffe, and D. W. Dumble, for the George street church J. Forester, A. B Cunningham and W. P. Adamson for the Charlotte street church, and J. Davy, W. Crowe and M. Carton for Mark street church.

It was remarked that there would in all likelihood be a large delegation here,—perhaps about 300. A very excellent suggestion, that a booklet printed, containing a programme and the names of the various delegates, was discussed and may be acted upon.

—A meeting of the Sons of England was held in their hall last night to make final arrangements for their attendance at the funeral of the late Mr. Cooper, which takes place today. It was also decided that a wreath would be presented by the Society.

SERVICES AT ST LUKES

Rev. T. Dewyn Owen Spoke on the First Commandment Last Night

At the special Lenten service at St. Luke's Church last evening, the meeting was addressed by Rev. T Detwyn Owen, of St Stephen's Cathedral, Toronto. The speaker chose as his subject the 30th verse of the 12th chapt. of St. Mark's Gospel, "Thou shalt love the Lord thy God." The speaker pointed out, love for God was the object of man's existence. "God asked for our love because He is our Father and could not be expected to ask for less," said the able scholar. "To love God is the highest work of the mind, the soul, and the heart, and none of these are doing their best work unless they are imbued with that love."

Rev. Mr. Gustin, of St. Mark's Church, Port Hope, will address the meeting on Wednesday evening of next week.

OLD COUNTRY WANDERERS

Met Last Night—Sixteen New Members Enrolled

A meeting of the Old Country Wanderers was held at the Crown Hotel last evening, when a good representation of members was in attendance. As has been reported the club intends putting a football team in the field during the coming season, and judging from the enthusiasm displayed by the energetic Englishmen, we may expect them to hold their own with the other teams of the district.

The popularity of a club of this kind was evidenced by the enrollment of 16 new members, and the report that many more intend joining. Many subjects were discussed and a communication stated that the Drill Hall could not be used for practice. The secretary was instructed to ask for tenders for 16 suits, including boots, for the first eleven, and a reserve.

Anyone wishing to have his name placed on the list of members, and is unable to attend the meetings personally, may do so, either by sending his fee to Secretary Littledale or to the Treasurer, Mr. R H. Jackson.

It was also decided to make the club so far as possible, self-supporting. It was considered expedient that all desirous of becoming member should attend next Wednesday night's meeting.

REV. MARMADUKE HARE SPEAKS

Interesting Meeting at St. Johns Church Last Night

A large audience attended St. John's Church last evening, to hear the Rev. Marmaduke Hare, of St. George's church, Toronto, speak on the subject "The Call to Discipleship" The reverend gentleman was formerly Rector of Bow church, in London, England, and is a man of considerable eminence. Coming out to Canada through the failure of his health, he settled in Toronto, and is now prominent in church work in that city. His discourse last evening was an earnest explanation of the "call to discipleship," and his hearers listened attentively to one of the most interesting discourses ever heard here. The speaker based his remarks on the request of St. James and St. John for a high place in the kingdom He carefully brought out the point that such eminence could not be granted off hand, but had to be won by conscientious effort. Dr Hare went on to show how the principle was exemplified in different departments of life, especially in education, and concluded by urging his hearers to be heroic in life, ambition, and enterprise, and to willingly endure the cost.

Rev. Dr. Macklem, provost of Trinity College, Toronto, will speak at next Wednesday evening's meeting

THE TRENT VALLEY CANAL

MR. J. A. CULVERWELL WRITES TO BOARD OF TRADE

Urges the Advantages of the Route for the Grain Trade — The Royal Commission.

The following letter is from Mr. J. Alexr. Culverwell, and is addressed to the Secretary of the Board of Trade;

Dear Sir,—I wrote you on the 17th inst. regarding my application to the Chairman of the Royal Commission on Transportation, to have a sitting at Peterborough re Trent Valley Canal. I now give you this letter to me, dated Feb. 16th, viz;—"The subject of your letter in the matter of the Trent Valley Canal will be brought before the Transportation Commissioners at their next meeting, and receive their consideration, of which you will be advised; as to any petitions coming from public bodies, or copies of any resolutions bearing on the subject, that is for them to decide. So far we have only your request and that of Mr. Lott, of Stirling, made personally to the writer."

I was afterwards notified by the Chairman, Mr. Bertram, and accordingly wrote the Mayor of Peterborough on Feb. 23rd, as follows;—"Dear Sir,—I have the honor to inform you that I have been requested by the Chairman of the Royal Commission on Transportation, Mr. John Bertram, of Toronto, to notify you that the Commission will be ready to have a sitting at Peterborough in about ten days, to take evidence as to the matter of the Trent Valley Canal. The Secretary of the Commission is writing you to arrange matters regarding the sitting.

"As you will have noticed in the Press, I have been pressing for this sitting of the Commission, and that my application was to be taken into consideration. I have now the reply which I have given you."

"May I humbly request that your Honorable Council record itself in a memorial to the Commission as to the feeling of the necessity of this great work of utility—not only for the country at large—but from a local standpoint—suggesting also that you press forward strongly the great benefit the opening up of the bottled up middle completed portion will be to the great Trent Valley Districts."

I will now give the same information to the Board of Trade, suggesting that they embody in a memorial to the Commission the different reasons why this international grain route should be completed. I have, as you know, the past year devoted considerable time in journalistic and other public ways in advocating the interests of the Trent Valley Canal, and for the last two months I have been advocating the matter to the Chairman personally, and was honored with his presence at my lecture at the Canadian Institute, Toronto.

Being an income ratepayer in the Town of Peterborough—having an office there, and being a large owner of property in the County of Peterborough, and having expended some $5,000 the last two years in advertising and in other ways placing Peterborough's advantages before the public, I feel that I have only done my duty not only to the district in which I shall take up my residence this spring for the future, but also to myself, and I trust therefore I shall be pardoned for having taken so prominent and active a part in the advancement of the Trent Valley Canal

Faithfully yours
J. ALEXR CULVERWELL.

DEEP SNOW IN THE WOODS

ROADS ARE IMPASSABLE--MEN AND HORSES SUFFER GREATLY

Deer and Moose Die of Starvation in Some Parts—Similar Condition of Affairs in Northern States

The great depth of snow in Peterborough county is almost without a precedent in the history of the past 25 years. In some parts of the woods it lies over six feet deep, and at the edges of spruce forests to the north of us, the drifts are ten to fifteen feet in depth.

Records kept at one camp show that thirty inches of snow fell in February, which is nearly a foot more than the average for all winter. Most of the downfall came in very cold weather and in the form of dry and mealy snow, so that no teaming along the roads could tread it down, or make it lie in shape for loads to pass along.

In one camp in Northern Ontario are thirty men living on salt pork and Indian meal, and fifteen horses with nothing to eat except frozen branches and twigs from trees. No supplies can reach the camp owing to the depth of the snow, and it is feared the horses may starve unless supplies are soon brought in.

Reports from other points state that the deer and moose are unable to move about in the woods on account of the deep snow, and that many of them will perish from hunger before spring. A hunter in Mtune recently came upon six dead moose and five very lame ones that were too feeble to break through the deep snow when discovered.

One large bull that was reduced to skin and bones, allowed him to come up and feel his ribs, and showed no signs of fear. When the hunter held out a fragment of Indian bread the moose ate it ravenously and was so greedy for more that he tried to follow the prospector when he quit the yard.

Wildcats had entered the yard and fed on the frozen bodies of the moose. From the number of tracks entering and emerging from the yard, the hunter thinks there must have been at least a dozen wildcats close by waiting to prey upon the survivors as soon as they became weakened from starvation.

In addition to the wild cats, he saw signs where foxes had been at work among the bones. Though he had heard reports that wolves had crossed over from Canada, he saw no traces of these animals.

This of course is a more pitiful state of affairs than at present exist in Ontario, but the vast amount of damage done and the great loss suffered through the severe winter have been great, and all now eagerly look forward to signs of spring.

THRILLING EXPERIENCE

Peterborough Man Relates Interesting Story Since Monday Coming from Cobourg

An interesting story of an adventure arising from the recent railway blockade, is related by one of our well-known citizens, who arrived in town yesterday after a visit west. We quote his own words, as follows; "We left Cobourg on Monday at noon," he began, "and we arrived here, in Peterborough, this morning on time, but forty-eight hours late."

"Why were we delayed? Well to go back, we had smooth sailing till we got very near the Summit, a small flag station, about four miles south of Millbrook. There were about fifty passengers on the car, and they represented various towns and cities all over Canada and the the States. Yes, they were there from the sunny south and from the frozen north—they were all there stuck fast in that snowbank, and feeling too cold to even pray for spring. The engine had broken away from the passenger coach, and stuck tight about ten feet ahead. It could not be got back, and consequently the only means of obtaining heat for the unfortunate passengers was cut off. Soon the pangs of hunger began to become apparent, and then it was that the brave conductor, 'Charlie' Mitchell, came to their assistance."

"Accompanied by a cattleman named Aikens, he struck out about 6 p.m for the village of Millbrook, in search of provisions, and returned about midnight with an ample supply. Men were sent to Millbrook and Garden Hill for assistance and soon two gangs of men were at work shovelling out the imprisoned engine and car. Two farmer's teams drove the passengers to Millbrook, and the G.T.R. cannot be too highly praised for the part played in its treatment of the passengers. Soon after the crowd became more satisfied, and some even laughed at their experience."

"I'm an old man, nearly seventy," concluded our citizen, "But I bet I could walk that distance in less time than that train took, and I've driven it many a time, in the early days, with an ox team."

WEDDING BELLS IN CAVAN

Mr. J. Scott and Miss Effie Larmer United Yesterday

"The Maples," the residence of Mr Isaac Larmer, Cavan Township, was the scene of a pretty wedding yesterday afternoon, when his third daughter, Miss Effie, was united in matrimonial bonds to Mr. J Scott, of Almeda, Assa. Many relatives and friends of the popular young bride were present, and the house was prettily decorated for the occasion. Mr. A. L. Gibson acted as groomsman and the bride was assisted by Miss Jennie Hillier, of Millbrook. The bride looked charming in her pretty silk attire, and the dainty wedding repast was of the choicest viands. The ceremony was performed by Rev. J. W McIntosh, of Centreville.

The happy young couple passed through Peterborough yesterday, and they will visit various points previous to their departure for their futuure home in Almeda, Assa.

LATEST NEWS IN THE WORLD OF SPORT.

THE FINAL GAME IN THE TRENT VALLEY LEAGUE TO BE PLAYED TO-NIGHT

CRICKET.

The Junior Colts intend organizing a cricket club for the coming season.

CURLING.

The Times is requested to state that a rink skipped by Mr. Wm Croft, the veteran curler, and consisting, besides, of the curlers, Messrs. W Scowden, G Brown and J. Robertson, is prepared to play any rink skipped by Mr. Geo Giroux for fun, money or marbles.

Belleville will now have to turn out a team that is "above board." It is risky for an inexperienced town to deal in uncertainties. It's as bad as playing with stocks—you may get the rubber-ball bounce at any moment. Let Belleville try and turn out a team of home production. Peterborough has been doing that ever since hockey was introduced.

Barrie's Bedelias were badly beaten by the machinists of the C.G.E Company, at the Brock street rink, the score being 9 to 3. E Dormer was a satisfactory referee.

The Peterborough Seniors are trying to arrange for a match with the Marlboros of Toronto. After the hard usage the latter received at Ottawa they may not care to venture east again this season.

Mr. "Chaucer" Elliott arrived in town yesterday and will referee the T.A.S.—Napanee game this evening.

"It was shoot and then duck," said a Marlboro' forward, in speaking about his troubles, at the recent Ottawa games. "The Ottawa defence didn't give a hang whether a goal had been scored or not; there was a wallop coming to you, to teach you better manners next time."

Stratford intermediate hockey team will play semi-final games on Friday with Midland at Midland, and with the same team at Stratford on Tuesday next.

Vice-President Nelson and Secretary Hewitt of the O.H.A. were served on Tuesday night with a writ and an injunction issued at Belleville restraining them from carrying into effect the resolutions of the Executive Committee passed at last Saturday's meeting by which Aeneas McMillan was suspended and all games in which he palyed for Belleville cancelled and Peterborough declared the winner of the group and ordered to play off with Midland.

The plaintiff is McMillan. He asks for $200 damages for being restrained from playing hockey as an amateur with the Belleville Club for the O.H.A. trophy. On the application of McMillan's solicitor, Mr. Carnew, of Porter and Carnew, an injunction was obtained from Junior Judge Fralick at Belleville on Monday prohibiting the association and its executive officers from enforcing or carrying out those resolutions.

The writ is made obtainable next Monday when it will probably come up at Osgoode Hall. Mr. F. R. Johnston has been retained by the O.H.A. —Toronto Star.

MORE CHANGES IN ARMY SYSTEM

British Committe Abolishes Brodrick's Scheme .

NUMBERS FOR REGIMENTS

The Territorial Names are to Be Discontinued

London, March 3—A supplementary report drawn by the War Office Reconstitution Committee makes further sweeping changes. It abolishes Mr. Broderick's scheme for six army corps and restores the numerical designation of regiments, instead of continuing their territorial names.

A general staff will be established, which the committee defines as a department devolving its undivided attention to military problems in their wildest sense, and as a body of officers occupied in time of peace in training all ranks of the army and prepared to direct operations in the field.

ONLY 15,000 JAPANESE SOLDIERS REPORTED TO BE AT PING YANG

Russians at Sea as to the Whereabouts of the Japanese in Pt. Arthur Vicinity

Special to The Times.

St. Petersburg, March 2—In a despatch to the Czar, Viceroy Alexieff says;—Admiral Stark telegraphing from Port Arthur today, March 2, says;—

The enemy did not appear off Port Arthur on Feb. 28th, 29th or March 1st. Reconnoissances made by the cruisers and torpedo boats over a radius of 60 miles from Port Arthur also failed to discover the enemy's vessels.

Major Pflug, through Viceroy Alexieff, chief of staff sends the following telegram, dated March 2;—

According to additional information which has reached here, our patrols, having passed the night, 12 versts—eight miles—from Pingyang, approached that town on the morning of Feb. 28. They were closely crushing a Japanese patrol of 7 officers. Lieut. Lonchakoff attacked this patrol with 3 Cossacks, forcing it to retreat at a gallop toward the gates of the town. The presence of our patrol near Pingyang caused great alarm and soon the enemy's sharpshooters manned the walls and towers and opened fire, expecting an attack. According to the report our patrols approached within 700 paces of the town, which they found to be surrounded by old and new ramparts. These, however, were not occupied by the enemy and it is supposed that the Japanese have not more than 15,000 men in Pinlyang.

Japanese Delay Assault On Pt. Arthur for Two Weeks

Reported That Japs Think Two Weeks on Short Allowance will Weaken Resistance to Attack

Special to The Times.

Washington, March 2—The landing in force of the Japanese on the Liao-Tunk peninsula and the beginning of the land investment of Port Arthur will not begin for a fortnight, according to advices received here from what are believed to be reliable sources. It was expected that the attack upon the fortress would take place yesterday or today, but the later advices, without explaining the reason for the delay, show that there has been a change in the original plans. Army officers here think that the Japanese have decided that with the rail road connecting Port Arthur with the outside world cut, thus preventing supplies from reaching the place, two weeks' privation will render the final assault easier. Moreover, as Port Arthur can be safely left as it is for the time being, the Japanese troops may be employed instead in Northern Corea, near the Yalu River, where they are most needed.

KAISER TO VIEW GIBRALTAR ROCK

Will See Famous Fortress for the First Time

ITINERARY OF HIS TOUR

Emperor William will Meet Rulers of Spain Portugal and Italy also the French President

Berlin, March 3— Emperor William has never travelled far in a modern passenger steamer, and that fact is given as the reason for his taking the North German Lloyd steamer Koenig Albert on his twelve days' trip to the Mediterranean. His Majesty has rather suddenly decided not to call at Antwerp at all. No explanation is made of this change in the plans. The Emperor will go from Bremerhaven to Vigo, Spain, direct, where King Carlos, of Portugal, will doubtless meet him, and at Gibraltar, where he will spend two days, his Majesty will see the fortress for the first time. He will debark also for a few hours at Port Mahon, and will leave the Koenig Albert and board the Imperial yacht Hohenzollern at Messina on March 24. The Koenig Albert will, consequently, be unable to leave Genoa that day, as she is advertised to do.

The gossip regarding the Emperor's meeting President Loubet outside of Brest is altogether incorrect. The cruiser Heinrich II, will convoy the Koenig Albert all the way to Messina and afterwards with the despatch boat Sleipner will accompany the Hohenzollern in a leisurely four weeks' cruise, without a fixed itinery, to Corfu, and as far eastward as Athens, but not to Constantinople.

On his way back Emperor William may see the King of Italy at Naples. The Empress may join the Emperor toward the end of the excursion. The return will be made overland, and at no time during the trip will his Majesty be more than two days out of reach of land.

—At a meeting of the Directors of the Peterborough Industrial Fair, it was decided to hold the annual exhibition on the 26th, 27th and 28th of September.

EVERYBODY READS THE TIMES

BRITAIN BENT ON PRESSING THIBET

Government is Determined to Insist on Final Settlement

CHECK TO RUSSIA'S DESIGN

Will Not Tolerate Situation by which Thibetians Have Muscovite Support

St Petersburg, March 2.—In case England becomes involved in the war the Baltic will be closed by Denmark and Sweden, under the protection of Germany. England was aimed at directly in the late Russian note concerning the independence of Korea. The active preparations of Sweden and Denmark, combined with the recent presence here of a special messenger from the Kaiser, are taken as substantiating this statement, which was put forth several weeks ago by the Times.

The Novoe Vremya takes up the matter, saying; "England keeps silent now, when Russia demands the recognition of the independence of Korea, but will howl loudly when the times arrives, which will surely come, that Russia begins to drive the Japanese back. If England does not declare herself Russia will have full right to consider the Anglo-Japanese treaty as directly against herself."

The Viedomosti says; "The outlook is very dangerous. The United States has entered de facto into the Anglo-Japanese alliance. Yesterday told how the international difficulties are looming in the minds of all experienced politicians; today all the talk is of the possibilities and probabilities of a general international war."

Like a draught of water to a thirsty traveler comes the news of the repulse of the Japanese in the latest assault on Port Arthur. It is even magnified in many quarters as a grand Russian victory.

London, March 2.—A serious anti-European rising has broken out in Southern Nigeria.

This is the work of a secret society known as "The Silent Ones," organised for the special purpose of overthrowing white rule. The members of this society, who never speak, and exchange ideas entirely by signs, have already made two attempts to abolish European control.

T.A.S.—NAPANEE GAME TO-NIGHT

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, [illegible] Woodward Ave., Room
Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 3, 1904

NO MORE LABOR RIOTS

When the convention of the Citizens' Industrial Association of America adjourned at Indianapolis last week, not a word had been said in its proceedings against labor unions or even against strikes. The association was organized to oppose not organized labor and its legitimate methods but only the lawless violence on which it now wholly relies for the promotion of labor interests.

Accordingly the most important action taken by the convention was the provision it made for the organization of a "law and order department," which is to have a branch in every labor center in Canada and the United States, and which will devote itself to the detection, arrest and prosecution of every labor man who attempts to give efficacy to a strike by destroying property and by beating and murdering non-union workmen. This department is to be organized by the executive committee of the association and may be in operation within a few weeks.

This department will not rely on city officials who are after the labor vote and who welcome labor riots for the opportunity they afford of winking at crime and securing the political support of the labor unions. It will have an overflowing treasury, and will be able to employ all the all the detectives, private policemen and criminal lawyers that it can possibly need. It intends, in spite of everything, to run down every labor man who commits any sort of outrage in aid of a strike and never let up on him until he is duly and legally punished for violating the law.

This department will adopt measures for getting intimately acquainted with the leaders in labor outrages. It will have a sort of identification bureau in which the likeness and criminal record of every such criminal will be furnished to branch departments all over the country.

This department will make a point of protecting all witnesses who testify against riotous strikers.

In short, every sort of labor union crime, strike rioting, and slugging is going to be suppressed. The law and order department has all the money and all the brains that are necessary and it has the law of the land and public sentiment on its side. It means business and it means to win. The Citizens' Industrial Association of America and its law and order department have ushered in a new regime.

A SATISFACTORY REPORT

THE WATER WORKS COMMISSIONERS' STATEMENTS

An Increase in the Discounts to Consumers After April 1st Promised

The following is the secretary-treasurer's report of the Water Commissioners, which was presented yesterday. Heretofore the discount allowed in cases when payments have been within fifteen days has been twenty per cent.; from April 1st this will be increased to twenty-five per cent. The following report shows a very satisfactory state of affairs;

To the Peterborough Water Commissioners;

Gentlemen,—I herewith submit the financial statement of the Waterworks Department for the year 1903.

The amount expended on the extendent's salary was charged to construction was $4,651.73, and in laying services, $1,951.01, a total of $6,602.74, expended in construction work. Last year, following the practice of the water company, a portion of the superintendent's salary was charged to construction work. This year a change was made by your directors and no part of the superintendent's salary was charged to construction, which has reduced the amount charged to capital account and increased the expense accounts. In accordance with your instructions, of the surplus revenue for the year, over operating expenses and the sums provided for interest and sinking fund on account of waterworks debentures, $2,097.00 has been credited to the Town of Peterborough on revenue account and $2,096.99 transferred to a contingent fund now established under the authority of an Act of the Legislature of Ontario, passed in 1903.

All of which is respectfully submitted.

S. R. ARMSTRONG,
Secretary-treasurer.

Good Things to Know.

When tired, drink hot water as a tonic. When hot and thirsty drink it as a cooler, for it never disappoints, says The Philadelphia Press.

Headache almost instantly yields to the simultaneous application of hot water to the feet and back of the neck.

A strip of flannel or towel folded several times lengthwise and dipped in hot water, then slightly wrung out and applied to the neck of a child suffering with an acute attack of croup will usually relieve the sufferer in the course of ten minutes if the flannel is kept hot.

A towel folded, dipped in hot water, quickly wrung out and applied quickly over the seat of pain will in most cases promptly relieve.

There is no domestic remedy that so promptly cuts short congestion of the lungs, sore throat or rheumatism as hot water when applied promptly and thoroughly.

Many eminent bacteriologists call attention to the power of fruit juices to kill disease germs. Lemon juice and apple juice are especially mentioned, the one containing citric acid and the other malic acid. Cholera germs are killed in fifteen minutes by either, and typhoid germs in half an hour.

If a lemon be squeezed into a glass of water containing cholera germs, the water may be drunk with perfect safety if allowed to stand fifteen or twenty minutes. A fruit diet will cleanse the stomach and the alimentary canal and drive off any of the germs that cause disease.

Simple Toys Best.

A little girl in the Horace Mann Kindergarten in New York was asked by her mother what she would like for a birthday present, says Ethel McKinney in Good Housekeeping. She had so many things, beautiful toys and all else a child could wish, that what to give her next became a problem. After thinking a minute she said: "In school we have some boxes with little square blocks inside. Could I have one of those to play with all the time?" She had had fun building things with those cubes. It seemed greater bliss to have them at home to play and invent with, unhindered, than to possess any costly and perfect "boughten" toy, good for nothing but just to sit and look at.

Why is it that children prefer sticks and corncobs to French dolls and take more comfort in a house made out of a pasteboard box than in an electric-lighted doll's palace? Friedrich Froebel discovered that children's minds are not empty vessels, to be filled up by a judicious pouring in, but that they possess a wonderful force, "creative self-acting." So he invented a series of playthings, the "gifts" of the kindergarten to-day. They are absolutely simple, but they gave the child something to do, to invent with, to exercise his own thought and self-activity upon.

Beauty-making Foods.

"The best of all beauty-making foods are fresh fruits and fresh vegetables," said Prof. H. W. Wiley, the famous United States Government chemist, who is incidentally a skilled physician. "They contain relatively little nourishment—a woman could hardly live on them exclusively for any length of time—but for reasons which as yet are imperfectly understood, they possess extraordinary value as health-givers. If you want bright eyes and a clear complexion, eat plenty of them."

The fact is that most fresh vegetables and fruits are nearly all water. Spinach is 92 1-2 per cent. water, cabbage is 77 per cent. water, beets are 88 per cent. water, carrots are 91 per cent. water, cauliflower is 91 per cent. water, cucumbers are 96 per cent. water, egg plant is 93 per cent. water, onions are 78 1-2 per cent. water, tomatoes are 96 per cent. water, green corn (cut from the cob) is 81 1-2 per cent. water, and celery is 94 1-2 per cent. water. Fruits are pretty nearly all water, though the banana is relatively rich in starch.

Fruits and vegetables, then, are of no great use in supporting the human body. Their value is mainly medicinal, and as beauty-makers they are the chief among foods. It is almost impossible to eat too much of them in a fresh state, though, of course, the diet must include a reasonable proportion of those substances, such as meat, which furnish blood and muscle tissue.

Teacher—How far is Philadelphia from Pittsburg?

Tommy—Jist about as fur as it kin be. Pittsburg's got de pennant cinched, an' Philadelphia's wid de tail-enders.—Philadelphia Press.

How, says Mary, with many sighs,
Shall I prevent those nasty flighs
From spoiling this, the best of pighs?
A welcome step is heard—"Arighs!
Sighing will never win the prighs;
Success is hers who only trighs
Poison the crust, and each one dighs!"
Now Mary turns, and with surpright
Reflected in her wondrous eighs
Before her sees dear Cousin Lighs.

"If honesty is the best policy——"
"Well?"
"Why, then most politicians ain't politic."—Chicago Evening Post.

Well Balanced Nerves

YOUR SUCCESS IN LIFE DEPENDS UPON THEM

If Lacking in Nerve Force, Build Up Your System With Ferrozone—It Has Helped Others—Let It Help You too

Happy is the man who can work unceasingly without fear of an "attack of the nerves." He gets along, prospers, rises to position of power and importance. The strong man is pushed over the heads of his weaker brothers by virtue of being capable to do and act when necessity calls.

The weak nervous man is distanced before the race starts. But he shouldn't give up without trying what Ferrozone can do for him. This strengthening tonic has great power for building up people who are run down, tired and exhausted.

Ferrozone starts right at the root of the trouble, and drives all impurities out of the blood. Then it gives the blood an additional supply of iron and other strengthening elements which enables it to nourish the nerves back to normal condition. Once the nerves are toned up, indigestion and stomach trouble disappear. Then your system is in good order, and capable of being rebuilt in the proper way. Nerve tissue is formed, flabby muscles begin to harden, weak organs regain strength, and before long the half-wrecked man glories in the new-found vigor that Ferrozone has brought him.

You may have tried a hundred remedies; they may all have failed. But this mustn't influence you against Ferrozone, which is no different from other preparations. Ferrozone actually makes blood, and makes the kind of blood that is valuable in maintaining health. Then Ferrozone has a wonderful action on food, converting it into nutriment, so that everything you eat is going to be useful to your body.

Ferrozone is unexcelled as a rebuilding tonic for children, women and men, the young and old, in fact everybody can derive benefit from Ferrozone, which is specially recommended for chlorosis, anaemia, lassitude, weakness, and all disorders arising from impaired nerves or blood. Try Ferrozone yourself. Price 50c. per box or six boxes for $2.50. Sold by druggists and by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

Ayer's Hair Vigor

This is what it does: Restores color, stops falling, makes hair grow, cures dandruff. Is not that enough?

Be not too bold." Yet better the excess
Than the defect; better the more than less;
Better like Hector on the field to die,
Than like perfumed Paris turn and fly.
—Longfellow

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."—London Truth.

INTERCOLONIAL RAILWAY

Calendar for March says:

"There are more faults in the humour than in the mind".

La Rochefoucauld.

Therefore cultivate a good humour. If business should ever call you to the Maritime Provinces (the pleasures of nature always will) good humour is assured on the "Maritime Express," for the road bed of the Intercolonial Railway is of the very best, its equipment perfect, and the dining car service excellent.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

Germany's Rise.

The most significant fact in the world-politics of the hour is the rise of Germany as a great naval power, says The Literary Digest. Of this we are assured on the authority of the ablest contemporary writers who deal with international affairs in the current European periodicals. Students of the subject were long inclined to doubt the ability of the Berlin Government to realize its ambitions in the direction of sea power. No doubts are entertained at present. France, the second naval power, will yield that position to Germany by the year 1916, perhaps by the year 1910, we are informed. The following from The National Review (London) represents expert though anonymous opinion: "The German fleet is at present being yearly increased by two first-class battleships, one armored cruiser and six destroyers, while at the same time additional ships are to be constructed to replace those which become obsolete. This is business, and not haphazard and panic building like our own. Twenty-five years from the date of the laying down of each battleship on the list, a new Ersatzbau, or supplementary ship, has to be laid down to take the old vessel's place. It follows that in 1905 Germany will dispose of fourteen battleships of modern design, and in 1908 of at least twenty, and perhaps twenty-five, with a proportion of armored cruisers and destroyers. Owing to the fact that the programme is determined long beforehand for a term of years, ships are built more cheaply than in any other country. The shipbuilders and armor-plate makers know exactly what orders to expect, and can make arrangements accordingly, while the steadiness and regularity of the demand enable them to keep their plants occupied."

The mobilization of the fleet, under the German system, we read further, is "rapid in the extreme." "Germany counts much upon the rapidity of her action at the outset, upon striking heavy blows before the antagonist is ready; in a word, upon using the weapon which surprise offers to the well-prepared." Here is a statement of what the immediate present holds in store:—"The German fleet at the close of this year will number eight modern battleships of the first-class, with two modern armored cruisers, which are for many purposes little inferior to battleships, eight older battleships of inferior power, but recently rebuilt and brought up to date in many respects, and twenty-four destroyers. The new ships in this fleet are admirably designed, heavily armed, and well officered and manned. The shooting is excellent, for last summer before the Kaiser the flagship fired eight rounds in a minute from a six inch gun, and every shot hit the target. This is quite as good as the practise of the very best of our ships, and is undoubtedly a fine performance. In coaling a German battleship holds the world's record, having taken on fuel at the rate of 230 tons an hour, though it is true that the total quantity shipped was less than is usually embarked in the case of British battleships, and, therefore, the strain on the crew was less severe. It is then obvious that the German navy, so far as can be judged by the mathematical tests usually applied, has attained a very high degree of efficiency."

A Romantic Episode.

The King's visit to Paris has been marked by a singular and picturesque incident, says the "Spectator." It appears that in 1878 a chemist named Danval was accused of poisoning his wife and that the King, then Prince of Wales anxious to watch French procedure, attended the trial, which ended in a sentence of imprisonment for life. The Prince, who had watched the evidence for five days, was certain that justice had miscarried, and visited the convict in his cell to tell him so, and enquire if any remedy were possible. None could be found, but after twenty years' imprisonment the sentence was revised and M. Danval liberated. The kindness of the Prince in his hour of despair had made a deep impression on his mind, and when the King recently visited Paris he addressed him a letter full of gratitude for the visit paid twenty-five years before. One wonders if kings know the depth of the impression both of regard and of hatred which they can almost unconsciously make.

"What's the difference between obstinacy and firmness?" "Why, obstinacy in oneself is firmness and firmness in another is obstinacy."—Chicago "Post."

Estate agent (to laborer's son)—Here, my boy, where can I find your father? Boy—In the pig stye, sir. You'll know 'im by 'is brown 'at!—"Punch."

Barber—How will you have it cut, sir? Peppery—Both short. "Both? Hair and beard?" "No; hair and conversation."

"Who originated the remark, 'It is always the unexpected that happens?'" "I don't know," said the melancholy government attache, "but I suspect he worked in the weather bureau."—Washington "Star."

"W'y don't you put mo' hell in yo' sermons, Brer Williams?" "Well, w'en I gives 'em too much er it de congregation makes sich a noise fannin' deyself, I has ter order a recess!"—Atlanta "Constitution."

Von Quizz—What does your friend write? Verse? Novels? Tragedies? H. Kashe—Great Scott, what do you take him for? An amateur? No, sir! He writes advertisements, of course!—New Orleans "Times-Democrat."

Ascum—How are the plans for your new house coming along? Subbubs—Splendidly. My wife has finally laid out all the closets she wants, and now all the architect's got to do is to build the house around them.—Philadelphia "Press."

FROM THE GOSPELS

By their fruits ye shall know them.

Be ye therefore wise as serpents and as harmless as doves.

The tree is known by its fruit.

Sufficient unto the day is the evil thereof.

Neither cast ye your pearls before swine.

Love your enemies, bless them that curse you, do good to them that hate you, and pray for them that despitefully use you and persecute you.

He cannot serve God and Mammon.

Where your treasure is there will your heart be also.

Judge not.

Whatsoever ye would that men should do to you do ye even so to them.

Many varieties of colored marbles are found on the mountains surrounding Carrara, in Italy. Two varieties of blue, dove-colored marble, known as "Bardiglio" and "Pavonzaro," are well known in the United States, the latter especially being largely used and commanding a high price.

UP IN THE GRAND OLD MOUNTAINS

Freed from the daily struggle, free from the cares of earth,
Far from the noise-rent city, teeming with pain and mirth,
Freed from the bonds of labor, hidden from sham and fraud,
Hearing the songs of wild birds, living close up to God!
O what a sense of freedom, O what release from pain,
O what a heavenly calmness soothing the care-worn brain,
Out where the trout are leaping, out where the wild deer play,
Up in the grand old mountains dreaming the hours away.

Lie in the breast of Nature, held in her mighty arms,
Drinking her wondrous beauties, revelling in her charms,
Feeling the mountain breezes, soft as a feathery kiss
Fresh from the lips of Nature, thrilling the soul with bliss!
Flowers of tender beauty gazing with timid eyes
Into the pine tree's shadow, where the intruder lies—
Never is heaven nearer than here on a sunlit day,
Up in the grand old mountains dreaming the hours away.

Dashes the crystal brooklet down through its narrow bed,
Eager to meet in battle the boulder giants ahead,
Fearlessly smites the monsters, pounds at their breasts all bare,
Flinging its misty banners high in the balmy air!
Down through the gorge it dances, babbling a gay refrain
Till hid in the breast of the river that flows through the spreading plain,
Leaving behind the laggard, nor cares if he choose to stay
Hid in the breast of the mountains dreaming the hours away.

This is the dream of leisure, this is the cream of rest,
Far from all care and trouble, hid in old Nature's breast,
Coaxing the red health roses back to the toil-paled face,
Feeding the brain prostrated and wrecked in the wealth-mad race,
This is the Elysian haven to which we with gladness flee
When worn and sore from the beating of the billows of labor's sea,
Tasting the sweets of idling, drinking the breath of May,
Up in the grand old mountains dreaming the hours away.

—James Burton Adams.

Valpy's Dinners.

I have more than once referred to Mr. L. R. Valpy as a friend of Howell and Rossetti, and an extensive purchaser of the latter's works, writes "Sigma" in his reminiscences in "Blackwood." Mr. Valpy was by profession a Lincoln's Inn Fields family lawyer of good position and repute; but though a strenuous worker in his vocation, his heart was divided between two curiously antagonistic predilections—the "austere" and the "sensuous," his religious tendencies being sternly Calvinistic, and his artistic sympathies chiefly identified with the school of Rossetti and Burne-Jones. This singular contrast of proclivities led not infrequently to scenes and situations of a distinctly comical nature. Many a time have I met in his dining-room, hung with a superb line of Rossetti's red-chalk studies, a solemn assemblage of Exeter Hall lawyers and Low Church clergymen, who looked upon their host's cherished drawings either as autotype reproductions or the work of some inspired madman! Two instances of this Philistinism I particularly remember. The hero of one of them was an eminent commercial solicitor, who, after inspecting some newly-acquired treasure contemptuously for half a minute, turned on his heel with the comment that "faces of that kind were usually symptomatic of scrofula!" The other offender, a gormandising clergyman, was even more flagrant. Uplifting his eyes from his empty plate during a change of courses, he happened to catch sight for the first time of three new purchases from Rossetti's studio. "Queer-looking affairs those, Valpy," he remarked with a pitying sneer; "where did you pick them up?" "They are the work of one Rossetti," replied Valpy with simmering irony. "Rossetti, Rossetti? Never heard of him," rejoined the appalling guest. Then glancing at an idealized study of his hostess, which formed the center of the three drawings, he added, "And who, may I ask, is that ill-looking woman over the mantelpiece?" "That, sir," replied Valpy with what Dizzy used to call "a superb groan"—"that, sir, is my wife!" Yet, strange to say, Valpy persisted to the last in entertaining these uncongenial guests, who never failed to drive him nearly frantic with their outrageous comments. Occasionally, however, in his bachelor days he would invite one or two artists, and perhaps myself or some other more sympathetic friend, to what he called a quiet dinner, but which really was almost Spartan in its provender. I suppose he imagined that artists were too ethereal to care for the succulent fare which he set before parsons and lawyers, a theory wherein he was, of course, grievously mistaken. I well recollect dining with him once to meet Rossetti and Samuel Palmer, when the menu actually consisted of nothing more luxurious than thin pea-soup, cold boiled beef (as the waiters say, "low in cut"), and a "roly-poly" pudding! Samuel Palmer rose superior to this fare, and was cheery and charming throughout the evening; but it was otherwise with poor Rossetti, who, without being a gourmand, was constitutionally unable to appreciate plain diet. His normal melancholy deepened into positive gloom, and I cannot recollect his uttering a syllable during the whole of dinner, at which he sat like one of the figures at the banquet in Holman Hunt's picture of Isabella and the Pot of Basil. Valpy seemed quite unconscious of offence, and to see him persistently plying Rossetti with "roly-poly," which the poet-painter as persistently refused in ever more deeply accentuated tones of weary dejection, was irresistibly comic.

The Playful Czar.

London "Truth."

I do not know whether—as stated by a medical journal—Peter the Great first made Spa a fashionable resort. But what I do know is that when his Czarish Majesty—as he was then termed—frequented a watering-place in order to benefit his health, his habits were peculiar. When he visited Marienbad or Carlsbad (I think it was Carlsbad), his doctor recommended him to take three glasses of water on rising. The next day, on calling upon him, he found Peter with three water barrels before him. He had got through the first and was attacking the second, but he complained that he was already feeling somewhat uncomfortable. The doctor assured him that he had recommended three glasses and not three barrels. In order to avoid such mistakes in future, Peter took up a pistol and shot him through the head.

"Pa, what's an auto-da-fe?" "Ask your uncle Billy; [illegible]"

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the value.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly.

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully.

ROBERT HARRISON

Manager.

MR. D. HUGHES-CHARLES ELECTED

President of the Board of Trade—President's and Secretary's Report.

The President, Mr. D. Hughes-Charles, submitted his annual report, as follows.

That the past year has been a most satisfactory one in the history of Peterborough, every one conversant with current affairs must admit.

An amalgamation has taken place between the two municipalities, Peterborough and Ashburnham, and this must prove a great benefit to both, eventually.

The celebrated Hydraulic Lift Lock has been completed, and is now ready to work, which is another stride towards the completion of the Trent Valley Canal.

Many of our large factories have largely increased their buildings and plants, and one new industry has been launched. I refer to the Peterborough Beet Sugar Co., and we, the members of the Peterborough Board of Trade, wish it every success for it will be a valuable addition to our list of enterprises and will, like the American Cereal Co. and the Geo. Matthews Co., be of service to both town and county.

The Town Council are to be congratulated upon the fact that they have been able to arrange for the re-opening and the extension of the street railway in the near future. This cannot help but be of great service to our laboring men in going to and from work, and it must bring a great deal of trade to our merchants from outside places.

I regret to record the fact that we have had three large fires in town during the past year. Bad as they were they might have been worse and we should take warning in time and do all that lies in our power to provide more fire protection in the way of fire engines and inspection of premises. The telegraph and telephone wires are a great menace both in fire and tempest, besides being a great eyesore on our streets, and it would be well if some arrangement could be made with the companies to put their wires underground and if this cannot be carried out the poles should be painted.

We are well situated to become a manufacturing centre, a distributing centre, and a residential town. For manufacturing we have cheap electric power from the Otonabee River, good railway transportation, having both the C.P.R. and G.T.R. systems, and very soon I hope good canal transportation, and the latter is most required and it would be hard to estimate what the opening of the Trent Canal from Trenton to Midland would mean to Peterborough. We have had several meetings during the past year regarding this important matter, and I am glad to say that the committee appointed to bring it before the Dominion Government are well on with their work and have gathered much valuable information and so can present a strong case.

At present we have twenty-eight separate manufacturing industries some very large and some small, but all prosperous.

I have taken some trouble to collect statistics relative to our manufactures and I think they will prove a surprise to many of our citizens.

During 1903 there were 2750 hands employed, the wages paid being $1,087,906 and the output or value of production amounted to the very large sum of $7,581,600.

In addition to becoming a manufacturing centre I think it is both possible and probable that we may become a grain centre as well.

We have one large mill which bought last year from farmers 483,000 bushels of oats, and from dealers 4,555,000 bushels, total 5,083,000 bushels, and there are two flour mills with an output of 450 bbls. per day, and I am sure if we had canal transportation, this already large business would be doubled.

Our situation as a distributing centre is beyond question. We have an immense country on all sides all contributary to us, and we are in the midst of a large and fine agricultural district with no large town near us.

There are two wholesale houses here now, and it is expected that the number will be increased very soon.

Our retail merchants have had the largest year's trade on record and this is not to be wondered at when we take into consideration the large amount of money paid in wages, over one million dollars. In addition to this the American Cereal Co. bought 483,000 bushels of oats worth $150,000 from farmers, delivered at their mill and paid for in town.

The Matthews Co. paid out to farmers $105,600, for hogs delivered at their factory, and the cheese sales at our local board amounted to $650,000. It goes without saying that a good proportion of this large amount of money is spent in town.

The trade of the town is large and is growing fast, as all departments show large increases over previous years. The statistics for 1903 are:—

Post Office revenue	$ 25,553
Inland revenue	63,133
Customs	228,927
Railway and river tonnage inward	175,292
Railway and river tonnage outward	145,184
Total tonnage	320,176

I wanted to give the Bank clearings, as they show more clearly than anything else the volume of business done in town, but for some reason or other, which is hard to understand, the manager of the Ontario Bank could not give me his figures.

To anyone seeking a place of residence I think our town offers many inducement. It is a healthy situation, with beautiful landscape scenery, hill and vale, river and lake, and with good shooting, fishing and boating within easy reach. Nature has done much for us, and it is only necessary for the citizens to be tasty and neat about their premises to make our town one of the prettiest in Canada.

If the Town Council will see to it that our streets are kept clean, free from loose paper, and in good repair, and each householder will endeavor to make his residence look better than his neighbors, then we will have a town which will attract strangers.

TREASURER'S REPORT.

The Treasurer, Mr. Peter Campbell, submitted his annual report, showing the receipts to have been $401.79, and the expenditures $147,10, leaving a balance on hand of $[illegible].

AUDITORS APPOINTED

Messrs. R. McWhinnie and McFarlane Wilson were appointed auditors.

SECRETARY'S REPORT.

Mr. President and gentlemen,—I have the honor of presenting to you, as Secretary, the Fifteenth Annual Report of this Board.

MEETINGS.—Since our last Annual Meeting we have held five meetings of the Board, viz., On 24 March, 14 April, [illegible] June, 14 August, and [illegible] November.

MEMBERSHIP.—The number of members on the roll last year was [illegible]-two, an increase of twelve on that of the previous year.

ATTENDANCE.—The average attendance of members at our meetings was eighteen, an increase of six on the previous year.

DEPUTATION.—At a meeting of the Board held 26 June, three prominent members.—Messrs. D. Hughes-Charles, D. W. Dumble and Hampden Burnham—were appointed delegates to attend the "Congress of Chambers of Commerce of the Empire," held at Montreal, 17, 18, 19 and 20 August, the two latter gentlemen acting only in that capacity, our President being unable to attend.

SUBJECTS UNDER DISCUSSION.—The following subjects have been duly discussed at above meetings.

Sugar Beet Industry.
Location of Outlet of Trent Valley Canal in Lake Ontario.
Street Railway Franchise.
Bonded Baggage.
Fire Insurance Rates.
Singer Manufacturing Company
Board of Trade Fees
House to House Postal Delivery.
Congress of Chambers of Commerce of the Empire.
Navigation of the Otonabee River.
Conservation of Trent Valley Canal Waters [illegible].
Mr Chamberlain's Fiscal Policy.
Alaskan Boundary.

MANUFACTURES ETC.—Your Board has been in correspondence with the following manufacturing enterprises, with the object of inducing them to locate in our town.

Singer Manufacturing Company.
Williamsport Staple Company, of Williamsport, Pa.
[illegible] Paint and Color Co., of Buffalo N.Y.
J. F. Harry of New York City, re [illegible] Manufactory,
J. F. Wescott, of Galt, re Hardware Specialties.

COUNCIL CHAMBER.—The thanks of the Board are due to His Honor Mayor Roger, the Board of Aldermen, and Town Clerk Armstrong, for the use of the Council Chamber during the past year.

LOCAL PRESS.—The thanks of the Board are also due to the Reporters of our three local papers for the able manner in which the business of the Board has been reported.

T. G. QUARTERMAINE,
Secretary.

Peterborough, 1 March, 1904.

SIR CHAS. TUPPER IN PETERBOROUGH

Veteran Conservative Detained Here on Account of the Big Storm

WILL SAIL FOR ENGLAND

On March 7th—What He Had to Say to a Times Representative

Sir Charles Tupper, Bart., the veteran politician and statesman of Canada, was in Peterborough yesterday, and was of course the center of interest in both Conservative and Liberal circles. The venerable old gentleman bears his years of public life well, and his voice still retains its wonderful strength and expression. He was to have addressed a meeting of the Crown Life Insurance Co., at Toronto yesterday, being president of this company, and was on his way there, when the conditions of the railroads necessitated his staying over at this point. Sir Charles received the press representatives with a glad hand, and spoke freely of the existing condition of affairs in both the local and the Dominion House.

"What do you consider the outlook is in the Dominion House," was asked by a Times reporter.

"Well Conservative stock is going up and Liberal stock is going down" was his emphatic reply. "Sir Wilfrid Laurier's government is fast sinking out of sight, and his administration is becoming more and more unpopular every day."

"As for the Ontario Government," the great politician continued, "its sands are pretty nearly run out. There is no prophet required to foretell the results of the next Ontario general elections. There are tremendous changes all over the country, and the unpopularity of the Liberal party's administration is becoming more and more apparent. When the Liberal party came into power in 1896 they had Nova Scotia, New Brunswick, Quebec, Ontario and Manitoba all strongly in their favor, with the government of the Northwest Territories more Liberal than Conservative, and British Columbia was given to a coalition government. To-day there is a Conservative Government in British Columbia, Northwest Territories, and in Manitoba. The government of Ontario that formerly had thirty or forty of a majority has now only three and the government of New Brunswick, which was dominated by Mr. Blair, has shown that there will soon be a change there.

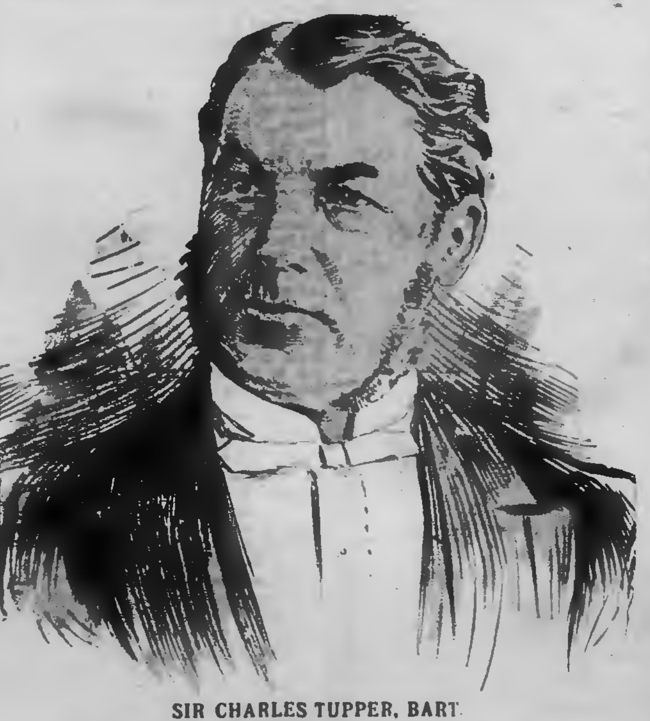
"The revulsion of feeling all over the country, ever since 1896, is most noticeable and at a general Dominion election, a Conservative majority is certain.

"Conservatives are being elected all over the Dominion except perhaps at Quebec, and even there, there is a decided change in public opinion as was shown by the elections the other day. In fact the present outlook speaks of a change as soon as an opportunity is presented.

"When the Prime Minister of the Dominion of Canada is reduced to the terrible necessity of paying $10,000 a year of hush money to the head of a Railway Board, to prevent his denunciations of the Grand Trunk Pacific project, his position must be uncertain. Blair has been given $10,000 a year without a word being said of his former denunciation of this project, and, I firmly consider that if it takes $10,000 a year to close the mouth of the head of a railway commission, against a railway measure, it shows that the government is not strong, and that the measure is not very acceptable."

In speaking of the condition of affairs in the Mother Country, Sir Charles said that while visiting in England last year he was surprised to notice the wonderful growth of public opinion in support of the Imperial policy of Mr. Joseph Chamberlain. This was the more remarkable when the conservatism of the British politicians and their marked slowness in adopting a change of so great import, was considered. "It is much to be regretted," remarked Sir Charles, "that Sir Wilfrid Laurier has not strengthened the hands of Mr. Chamberlain, by requesting the Canadian Parliament to declare its satisfaction at his acceptance of our offer of Imperial preference."

Sir Charles intends leaving Canada soon for England, when he will pay his daughter his annual visit, although pressing business also necessitates his crossing the ocean. He purposes, according to his present arrangements, to leave Halifax on the Allan Line steamer Bavarian about the 7th of this month, as he is desirous of reaching England in the early part of March.



SIR CHARLES TUPPER, BART.
Who was Snowbound at Peterborough Yesterday.

4,000 ADDITIONAL CHINESE SOLDIERS IN NORTH CHINA

Special to The Times.

Seoul, March 1—Advices from the North report that 1400 Russians are at Cheong Ju, 500 at Kusong and 50 at Anju. These forces are probably only feelers sent out to locate the position of Japanese troops. All the Americans, formerly at Sun Thun, with the exception of one family, have arrived at Ping Yang. The Emperor of Corea has dissolved the organization of the Pedlers' Guild, which has been a disturbing factor in the situation.

Special to The Times.

St. Petersburg, March 1—A Russian correspondent of the Associated Press, at Shang Hai, telegraphs that it is reported at Tein Tsin that 4,000 additional Chinese soldiers have been posted in Northern China and that the Chinese government has recently placed large orders for guns and ammunition.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9,68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $19.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite, and by driving this tunnel five or six hundred feet [illegible] meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 200 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $8.25 per ton as cost of mining and milling. One-half of all over and above this $8.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air p into the 205-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSBY
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which mprises three claims located in the San Juan District, Hindsdale County, olorado.

Over $25,000 has been spent on this property in getting it in its pre- ent condition, which is as follows:—Private wagon road from main road up mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 1 feet—it would be hard to find a better made tunnel in the whole state of olorado. Two good houses large enough to accommodate fifty men. here are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from uth of tunnel, and all three are in a space of less than four feet. Mining per s claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Cop r, 16.05 per cent.; Gold 6.02 ozs.; Silver 92 40 ozs. Total value $92.00. alue of ore in main vein in the shaft and growing richer as depth is attained. pper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and und everything as above. We have had the property surveyed, and are w working on the spur vein in the tunnel, taking out high grade ore. We all also continue the tunnel so as to cut at depth the above immensely ch vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness what- ever. The ore is of such grade that it does not need milling, as it is ready concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second no other mine in Lower Colorado. The first class ore having a value of 00.00 per ton, as it was assorted and sold. We believe a little money diciously expended upon the property will prove it to be as valuable as it as ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San an District to-day (and most valuable mines) were abandoned about the me time work was discontinued upon this property and that they remain- l so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth 5,000,000). About six years have elapsed since he purchased it. The d "Hotchkiss" now the "Golden Fleece," while not as valuable, has been e of the great producing mines of Colorado. New men are taking hold of l the old mines and meeting with great success and with a smaller outlay they avail themselves of the benefit of the money already expended. We not know of anything in the shape of a promising property in the whole ate of Colorado where the same thing can be done to as good an advantage in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M.E., formerly of Middletown, Conn., who was e original discoverer of the Calumet and Hecla mine of Lake Superior, ade a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that will co-operate with us in developing same, in the way of producing a vidend-paying mine in the near future.

B. F. BARNES, Fiscal Agent

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

IGH CLASS INVESTMENT

ZACUALPA RUBBER PLANTATION COMPANY

orporated Under the Laws of the State of California.

Zalualpa Rubber Plantation is situ in the best location in Mexico for ultivation of rubber. It has been for a great many years as a strip of rubber land and success experience has shown that it is to all that has been claimed for affairs of the company are in s of men of undoubted integrity gh reputation as successful men ess. To those seeking a safe in which will secure a good in- for life, this proposition offers a opportunity

s in La Zacualpa Rubber Planta- are not capital stock of a corpora- and carry none of the responsi- s and obligations, or liability to of capital stock; but repre- n undivided interest in the planta- itself.

twelve thousand acres comprising plantation are divided into twelve shares, each share represent- e acre of land, and the holders res in La Zacualpa Rubber Plan- are the actual owners of one un- acre of land, for each share held, a guarantee expressed upon the ate by La Zacualpa Rubber Plan- Company, under its official seal, two hundred or more rubber per acre for each share sold, and for same for a period of five , and at the expiration of that time the first harvest and deliver proceeds thereof to the share-

milar words, La Zacualpa Rubber ation Company sells to each share- one undivided acre of land in La lpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

Langtry & King Edward.

In commenting on that interesting and now historical episode in which she was said to have playfully sent a lump of ice tobogganing down the spinal column of the present Edward Rex, Lily Langtry said to Acton Davies the other day: "There is no reason in the world why I shouldn't tell the truth about that little matter, for the very good reason that it never occurred. When the King, then the Prince of Wales, heard the story, he asked me if I knew how on earth it could have been started. Of course I couldn't. However, my old friend, Mrs. Cornwallis-West, finally solved the mystery of how the story started, and her explanation, though a very weak one I admit, is the only peg on which any of us have been able to hang this story. An informal dinner was given one night at which Mr. and Mrs. Cornwallis-West and myself were guests. The Prince of Wales was not present. It was a very jolly little party; we all knew each other very well, and everyone was having a beautiful time, with the exception of Mr. Cornwallis-West, who was tired and wanted to go home. Several times he asked his wife to make a start, but she was enjoying herself and refused point blank. Finally he became quite angry and begged her to start. The ices were still on the table, and, taking a spoonful of hers, Mrs. Cornwallis-West laughingly slipped it under her husband's collar with the remark: 'There, my dear boy, that will cool you off for a few moments.' This story must have been repeated by some of the guests, and enlarged upon until it was landed upon his Royal Highness and myself. That, I assure you, is all I know about the matter. Even my enemies must admit that I have always been noted for gentle manners, and that I or any other woman would ever have dared take such a liberty with the prince is too ridiculous. His Royal Highness was charming and most good-natured about the whole matter. In fact, only this past summer when the King was talking to me at Newmarket about my last American tour, he remarked, with a twinkle in his eyes: 'I suppose they are still telling that lump of ice story on us in America,' and I answered, 'Yes, and I'm afraid their time grancing about like [illegible] time.'"

Kill or Cure.

A short time ago a veterinary surgeon summoned a man to the Winkletown County Court for two guineas for attendance on a dog, reports an English paper.

He swore that he had been called in and found the dog suffering from distemper, and that he had paid so many visits and had supplied such and such medicines, for which he claimed two pounds two shillings as per agreement. Then came the defendant's turn.

"You say that I agreed to pay you two guineas?" questioned the defendant.

"Certainly you did!" replied the plaintiff.

"Do you remember what our arrangement was?"

"Perfectly."

"Didn't I say that I was afraid of you running up a long bill, but that if you would agree to take two quid, 'kill or cure,' you might have the case?"

"Quite right; and I said that if you would make it guineas I would take it on," answered the plaintiff, with a gleam of triumph.

"Well, now, on your oath, did you kill my dog?" demanded the defendant, with a sudden energy that woke up the judge and made the usher jump again.

"Certainly not," replied the other, with a bluster that was perhaps justifiable in the circumstances.

"And you didn't cure him, cos he's dead; and as I promised to pay, and you agreed to accept, two guineas, 'kill or cure,' and you haven't done either, I wonder how you've got the nerve to ask for the money even, let alone bring me here."

At this point the learned judge intervened, and the case was remanded for further consideration.

An Engagement Extraordinary.

According to the Paris correspondent of the London "Telegraph," a determined suitor recently found a new way of using the motor-car for matrimonial purposes. The object of his affection was willing to wed him, but her parents were obdurate. He pretended to give up hope, and to be reconciled to the idea of being merely a friend of the family, and he took out the girl and her father for an automobile drive to Havre. At a dangerous part of the road he suddenly put on full speed, and the car sprang away at a terrific rate. The girl sat still and showed no fear, but her terrified father shouted to the man who wanted to be his son-in-law to stop. "Consent to my marriage with your daughter" was all the motorist replied. Still the car tore along, and if any obstacle had appeared in the road at least three fatalities would have occurred. "Stop! We shall all be killed!" the girl's father continued to cry. "Most certainly we shall," said the determined young man grimly; if you don't consent at once I am going to send the machine into the ditch, and at this rate that means quick death." As he spoke he imparted violent lurches from side to side to the car. "I consent!" gasped the now vanquished parent. Immediately the car slowed down, and the rest of the journey was done at a steady touring pace. But during the motor's previous mad career a policeman had jotted down its number. When the girl's father, to whom the machine belongs, appeared in court to answer to the summons, his future son-in-law accompanied him, and looked exceedingly pleased with himself. When a fine of sixteen francs was imposed the younger man said he would pay it himself with pleasure. He confided to the magistrate that the day has been named.

Her Own Opinion.

Miss Askew—So your marriage is put off?

Miss Crummy—Yes, papa is not at all satisfied with his position; mamma doesn't like his family connections, auntie thinks he is too careless in his dress, and I think——

Miss Askew—Yes, what do you think?

Miss Crummy—I think I ought to wait till he asks me.—"Town and Country."

* * *

She—Do thoughts that came to you long ago ever return?

He (a poet)—Sure, if I enclose a stamped envelope.—Denver "Republican."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,400 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

Lung, Throut and Catarrhal Troubles

A MARVELLOUS DISCOVERY THAT HAS DELIGHTED ALL CANADA BY ITS PROMPT CURES

The method that has proved successful through its enormous advantages of being pleasant and free from the danger of creating the drug habit employs dry air as the carrying agent.

By this method every part of the breathing apparatus is bathed by a medicated air. Germs which excite the trouble are immediately destroyed. Sore and tender spots are healed and the congested surfaces restored to normal condition.

This method of treatment is known as Catarrhozone, and has obtained a footing never attained by any other remedy for the many diseases affecting the respiratory tract.

Catarrhozone is fragrant, healing, balsamic, pleasant as the air of the pine woods and more active as a healing agent than anything hitherto discovered. It contains neither cocaine nor any of those irritating substances which really increase the congestion and add to the difficulty, instead of curing as Catarrhozone so quickly does.

MRS. BINY BROWN, of Tenecape, N.S., had lung trouble and catarrh. She took cough mixtures but they made her sick. Then she used an atomizer, but after resorting without benefit to poultices and numerous other remedies, she tried Catarrhozone. "I used Catarrhozone Inhaler," she writes, "five minutes every hour, and soon recognized it was going to cure. I could feel the soothing medicated air spreading through the air passages of the throat, and it touched the sore spots in the lungs that other remedies failed to reach. Catarrhozone seemed to go just where it was needed most, and soon put a stop to my cough. It restored me to perfect health, and I am convinced that no cough, cold or catarrh can exist where Catarrhozone is used."

The complete Catarrhozone outfit contains a large bottle of inhalent, sufficient to keep recharging the inhaler for two months. It costs $1.00 and is guaranteed to cure; sample size 25c. Sold by all druggists or sent direct to your home by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A.

Bill Introduced Yesterday

Peterborough's bill following the union of Peterborough and Ashburnham was taken up at the Private Bills Committee of the Legislature, but was only discussed in part, the remainder being left over till today.

Roof Fell In

Owing to the great amount of snow lying on the roofs of buildings this winter, many Peterborough property owners have suffered losses. Yesterday afternoon the roof and sides of the Allan Ice Co.'s large icehouse fell in, leaving the ice exposed. The building is owned by Mr. McDonald, and the loss will be considerable.

Colportage Missionary

Mr. Geo. Buskin the veteran Colportage missionary, who has been paying annual visits to Peterborough for the past few years, has completed his work here, and leaves today for other fields of labor. During his visit here he has received contributions to the amount of $40.10 in aid of the International Colportage Mission.

—It reminded one very forcibly of spring, when the road-scraper appeared on George street yesterday.

The attendance a the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write fo pa ticulars regarding our correspondence course

WM. PRINGLE, Principal.

Mr. Wm. Cooper Dead

We regret to learn of the sudden death of Mr. William Cooper, at his home in Toronto. Deceased was well and favorably known in Peterborough, having resided here for a number of years. While in the city he was a staunch member of the Salvation Army and all of his comrades speak well of their departed brother.

The funeral will take place from Mr. D. Belleghem's undertaking rooms tomorrow afternoon at two o'clock and proceed to Little Lake cemetery. The funeral will be conducted by the Sons of England, of which lodge the deceased was a member.

February Donations

The committee of management of the Peterborough Protestant Home gratefully acknowledge the following donations for the month of February; A friend, clothing; Mrs. (Dr.) Burnham, Toronto papers; Mr. Neil, clothing and reading matter; Mr. T. H. Harington, milk and cream; Mr. T. S. Boswell, clothing; Mrs. Munro, clothing; Bachelors of North Monaghan, cake; a friend, milk; Mrs. Brown, spoons and clothing; Richard Hall & Son, clothing; Mrs. C. Lyle, reading matter; Mrs. W. Hamilton, fruit; Mrs. George W. Stinson, hymn books; Mrs. Dowdal, chili sauce; Mr. Hunter, cream.

DIED IN AUSTRALIA

Late Mrs. R. D. Ollard was Well Known in Peterborough

News has reached Peterborough of the death in far off Australia, of one of its former citizens, being Mrs. R. D. Ollards. She was the only daughter of Rev. J. C. Taylor who, about fifty years ago, was the esteemed rector of St. John's church, of this city. Deceased had been in poor health for some time, and died at the age of 60 years.

The late Mrs. Ollard's brother, Mr. Taylor, visited Peterborough last year.

INQUEST ON FRIDAY

Supposed Suicide of Edith Garow to be Investigated To-morrow

Owing to the blockade the inquest concerning the death of Edith Garrow, who was found dead at her employer's house, nine miles from Havelock, on Saturday evening last, has been somewhat delayed, but it is expected that it will be held tomorrow afternoon. As was reported in Tuesday's issue, Dr. Gray communicated instructions concerning the empanelling of a jury. It is generally supposed that the girl deliberately took her own life, but the air of mystery that surrounds the case makes a thorough investigation absolutely necessary, and in some quarters it is expected that some startling revelations may yet be made.

DEATH OF MRS O. CURRAN

Passed Away on Tuesday Evening at Ripe of 89 Years

Still another of Peterborough's oldest citizens has been called away, in the person of Mrs. O. Curran, who died at her daughter's residence, 33 Elm street, on Tuesday evening, at the advanced age of 89. Deceased has resided in Peterborough for over 50 years, and her death is lamented by a wide circle of relatives and staunch friends. Born in Ireland in 1815, deceased came to Canada in 1849 and has resided in Peterborough ever since. A family of seven children is left to mourn her loss, their names being Patrick, Timothy, and Cornelius, of Perry Harbour; Morris of Rochester; Mrs. Wm. Kimmet, of Missouri; Mrs. Jas. Wood, of Syracuse, and Mrs. F. Welsh, of Peterborough.

The remains will be interred in the Roman Catholic cemetery to-morrow morning, the service in St. Peter's Cathedral, commencing at 9 o'clock.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—March certainly came in a Russian. Will it go out like a Jap?

—It is thought that the boating on the streets will be good if the spring comes quickly.

—The Press Dinner which was to have been held tomorrow evening has been postponed till next week.

—Seven children were born in Toronto on Feb. 29th. Each will be presented with a silver mug by the the Toronto World.

—There was practically nothing on at the police court yesterday morning. One case of non-support was enlarged for a week.

—"That's favoring home consumption," remarked a local hotel-keeper as he tucked another slug of his own whiskey beneath his waist coat.

—The Daughters of England intend holding an open meeting to-morrow evening. All the members are cordially invited and may bring their friends as well.

—Some of our grocers have been receiving perishable freight in an awful condition. One merchant recently received a case of bottled catsup, adn on opening it found sevcatsup, and on opening it found sevsup frozen.

—The other evening as the Street Commissioner was viewing some work at the corner of Murray and George streets, he left his umbrella on the corner, but on returning for it discovered that some one else had gone off with his property.

—One fatal sign of the approach of spring is the millinery openings.

At a recent wedding in the country, not far out of Peterborough, the wedding party were received at the station with showers of pease and wheat. As the price of wheat is away up, one would naturally infer from this that the couple were unusually popular.

—A pleasant looking Irishwoman walked into a store on George street the other day and asked the price of some collars she had noticed in the shop window. "Two for a quarter," said the clerk. "How much would that be for one?" asked the woman. "Thirteen cents," was the reply. After running the thing over in her mind, the woman said. "That would make the other collar twelve cints, wouldn't it? Just give me the other wan."

THINGS GENERALLY

BY SI JONES

If sum people minded there own bizness as well as they mind other peoples they'd be er bowlin' suckcess, but if the town council didn't mind our bizness we'd soon be agin them ter mind there own. But the Council is doin' pretty well so far an if they carry out their present good intenshuns we won't hev ter complane mutch. It's no easy matter ter please evryone. Ye might jest as well go out into the park an' throw the almanack away an' then try ter gess what season it is from the weather, as ter try an please evryone.

• • •

I hear thet mi ole friend Charlie Tupper was in Peterburrow yesterda an' lookin' hale an' hearty asever. Charlie hez cum thru meny a perlitickle battle but he looks none the wors for it. I understan he is quite confidant thet the tories 'll soon be turnin' the wheels down ter Ottawy and up ter Tronto. Of coarse thet's natteral fer him ter think so an as things look jest erbout now, he's got some grounds fer thinkin as he do.

It has been suggested that Canada send a couple of stalwart young men to witness the Russ—Jap war. A couple of stalwart chaps, who are used to any amount of punishment could be chosen from the Peterborough Seniors.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. Wood, of Toronto, is visiting at her Peterborough home, in the Fifth Ward.

—Mrs. J. D. Douglas, of Peterborough, is paying a visit to friends at Smith's Falls.

—Miss Laura Belleghem, of Hunter street has returned from a prolonged visit to Bowmanville friends.

—Miss McKittrick, of Toronto, has accepted a position in the dress-making department of Cressman's store.

—Mrs. H. M. Lloyd, of Park street, is spending a month with her mother, Mrs. Clelland, of Montreal.

—Miss M. Berry returned to town yesterday, after a short visit to her home in Cavan Township.

—Mrs. Dr. White, of Vancouver, B. C., who has been visiting friends in the city, left for her western home yesterday.

—Miss Paisley, who will have charge of the Millinery Department of Cressman's this season arrived in town today.

—Mrs. J. R. Stratton will not be at home today. She will receive on the 17th of March, the 3rd Thursday in the month.

—Mr. A. Pearson, of Montreal, who has been purchasing horses in and around Peterborough, returned to his eastern home yesterday.

—Miss Squair, of Gladstone, Man., left for her home in the Prairie province yesterday, after a pleasant visit to Peterborough friends.

—Mr. Dunlop, M.P.P., was snowbound here on Tuesday, and was consequently unable to deliver his address at the West York Conservative banquet, held on that evening.

—At the National—E. E. Bowles, Montreal; J. J. Turner, Toronto; Jas. Sutton, Lindsay; W. Hawkes, Hamilton; F. W. Weeks, Ottawa; W. Brethour, Toronto; A. J. Rankin, Montreal.

—Mr. and Mrs. C. E. Frost, of Orillia, who have been visiting the former's brother, Mr. R. J. Frost, returned to their Orillia home yesterday morning. Their visit to Peterborough was an item of their honeymoon trip, as the happy couple were married on Wednesday last.

—At the Snowden House—H. C. Filsinger, Toronto; W. W. Parmenter, Detroit; Robert Turner; H. B. Morley, A. R. Taylor, R. B. Masken, Thos. Smith, J. B. Paisley, J. M. Oliver, H. E. Matthews and Thos. O'Brien, Toronto; Geo. Witmer and D. T. Wilgiamson, Brantford; W. F. Wood, Montreal.

—At the Oriental—H. C. Douglas, F. Whitfield, Montreal; L. Glover, Toronto; L. B. Hartle, Hamilton; A. L. Lyon, Jas. Cooper, C. E. Kyle, W. E. Jarrett, J. E. Davis, J. H. Walker, O. Bastede, M. M. Lynch, A. J. Gough, N. M. Bogart, Toronto; A. H. N. Bruce, Ottawa; W. B. Skinner, Kingston; W. H. Matthews, G. W. Stewart, Berlin; Arthur MacBean, Galt; F. B. Leslie, Montreal; W. Williamson, Walkerville; J. Everett, Geo. McQuillan, O. Ruse, Toronto; K. N. Welland, Kingston; W. Kennedy, Grand Rapids; J. Dodds, Toronto, Mich.

Will be paid by the World's Dispensary Medical Association, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"For about two years I suffered from a very obstinate case of dyspepsia," writes R. E. Secord, Esq., of 13 Eastern Ave., Toronto, Ontario. "I tried a great number of remedies without success. I finally lost faith in them all. I was so far gone that I could not for a long time bear any solid food in my stomach; felt melancholy and depressed. Some four months ago a friend recommended your 'Golden Medical Discovery.' After a week's treatment I had derived so much benefit that I continued the medicine. I have taken three bottles and am convinced it has in my case accomplished a permanent cure. I can conscientiously recommend it to the thousands of dyspeptics throughout the land."

A man can succeed and be strong if he heeds Nature's warnings. When there is indigestion, loss of appetite, ringing in the ears, dizziness, spots before the eyes or palpitation of the heart; any or all of these symptoms point to weakness and loss of nutrition. Dr. Pierce's Golden Medical Discovery is the medicine to turn to.

"Golden Medical Discovery" contains no alcohol and is entirely free from opium, cocaine and all other narcotics. It is strictly a temperance medicine.

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach.

The "Common Sense Medical Adviser," 1006 pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps, to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

THAT MISSING WATCH

nd by Boy on Aylmer St.—Claimed by Passer-by

he other day Mrs. Braund lost gold watch and through the clever work of the police officials, it is in safely in her possession. On day a woman residing on Patter- street noticed a young lad jack a gold watch, on Aylmer street immediately ran up to him, and med the time-piece as her own. went home happy. The boy in- med the Chief of Police, and Con- ble Adams visited the Patterson et lady, and asked to see the ch. It bore Mrs. Braund's name, P. C Adams of course took pos- ion.

This Jaunty Jappy Has a Chip on His Shoulder —Vanquished One Fleet and are Now Ready for France.

New York, March 3—Baron Suyematsu, son-in-law of the Marquis Ito, and formerly Minister of the Interior in Japan, arrived here yesterday from Yokohama on his way to London. Regarding interference by France, he said if France saw fit to send warships to fight Japan, his country, having vanquished one fleet, would not mind fighting another.

CAR THROWN OFF TRACK

Mr. J. B. McWilliams Received Nasty Cut—Not Seriously Hurt

Mr. J. B. McWilliams, the Peterborough citizen who was injured in the recent railway wreck near the "Soo" arrived in town on Wednesday night. Although not seriously hurt, he was severely shaken up, and will have to take a few days rest. The car in which he was riding was turned nearly over, and Mr. McWilliams was thrown against the opposite side from which he was seated, striking his head on the steel basket. He was for a time unconscious and received a nasty cut on the head. His many friends will be pleased to learn that he was not seriously injured.

COREANS JOIN RUSSIA.

ial to The Times.

Petersburg, March 3—A despatch from Port Arthur says it is stated from Chefoo and Wei-Hai-Wei that the bodies of seven Japanese were washed ashore near the former place and fifty near Wei-hai-Wei. The latter were probably those of men who took part in the night attack on Port Arthur on Feb. 25

ondon, Thursday, March 3—An official despatch from St. Petersburg timed 4 a.m., says that General Pflug reports that no enemy has been seen by the patrols before Ping-Yang or Gensan. The Japanese force in the vicinity of Ping-Yang consists of 6,200, including 200 cavalry. No particulars have been obtained regarding artillery. Two thousand Corean troops joined the Russians between Ping-Yang and Seoul. Ping Yang is being fortified. All is quiet at Port Arthur, and all is well in Manchuria. It has been learned that the Japanese bring troops by sea from Fusan to Chanampo (on Ping-Yang Inlet, whence they come to Ping-Yang.)

tween 1,000 and 2,000 Corean troops have been sent to Ping-Yang from Seoul.

cording to Corean reports a detachment of 2,500 Japanese, without artillery, landed at Song-Chen— Hueng Sang, north of Cape Bruatt and on February 19 marched toward Southern Manchuria.

re have been heavy snowfalls at Port Arthur, and in Manchuria recently. At Port Arthur there were 10 degrees of frost, and Vladivostock had a heavy snowstorm.

RE AFRAID OF THE FOREIGNER

itish Manufacturers Fear Retaliation

INION IS DIVIDED ON IT

Others Believe That Colonial Trade Will Continue to Increase with Preference

ondon, March 4.—The Sheffield ncil of the Chamber of Commerce issued a report containing the mary questions recently submit- to the members respecting their ws of the fiscal policy. On the tion whether the power to levy aliatory tariffs would lead to the elioration of foreign tariffs, a ma- ity approximating three to one re of the opinion that such power uld. Those who are of the opin- that the Colonial tariffs have not d injurious effects upon their trade in a slight majority, but others int out that the risk lest the Co nial markets should become pro cted markets and be closed to the itish manufacturer. Others stat at the colonial trade is largely in- eased by reason of the existing pre rences to the extent of 10 to 300 r cent., and the Canadian prefer- nce have stimulated trade with th other Country considerably.

IMMIGRANTS COMING.

The Lake Manitoba yesterday sail- for Canada with over one thou- nd steerage passengers, 700 of hom are continental emigrants, in- uding Italians, Austrians, Hungari- ns, Russians and Galatians. The lance include one hundred young en emigrating under the auspices the Canadian Farmers' Help So- ty.

RESS PRAISEs HARCOURT

ND REGRETS THAT THE GREAT ENGLISH PARLIAMENTARIAN IS TO RETIRE

inancial News Expresses an Expert Opinion on the G. T. P. Scheme

London, March 2—The press of the whole country expresses regret at the announcement of the approaching retirement of Sir William Vernon Harcourt. The Times laments the disappearance of a picturesque personality from the House of Commons where he stood as the representative of larger days.

The London Daily Mail says nothing could be simpler than the unostentatious announcement of the "Old Reservist" to withdraw from politics —a man who has sacrificed great ambitions and a great fortune for Liberalism and the State.

The Daily Graphic pays a high tribute to Sir William's courage, and says he has maintained more than any man among his colleagues, the doctrine that the Opposition exists to oppose.

The Telegraph calls Sir William "the last of the great Parliamentarians," and says he played the part in British politics that Mirabeau played in the early days of the French Revolution.

GREATER THAN C.P.R.

Such is a British Estimate of the Grand Trunk Pacific.

London, March 2— The Financial News says the Grand Trunk Pacific scheme exceeds in magnificence even that which excited admiration and skepticism when the C. P. R. was broached. The Grand Trunk should now be called "The Little Trunk." There is every reason to believe that the shareholders on Tuesday will heartily support the G.T.P scheme for the advantages to the G. T. R. far exceed the risks.

A MOCKERY OF IMPERIALISM.

Mr. Redmond Thus Designates Colonial Contribution to British Navy.

London, March 2—Lady Lugard (formerly Miss Florence Shaw,) of London Times and Klondike fame, in a lecture yesterday, declared it was a possibility that Nigeria would produce the greater part of the raw material required by British cotton manufacturers.

Mr. Redmond, speaking in the House of Commons in the navy debate said the small contribution of the colonies to the expenses of the navy was a mockery of Imperialism. Ireland's contribution should be the same as Australia, as she had no over-sea trade.

Lord Cecil, addressing a free trade meeting at Wilmslow, said the speaking out of the Unionists implied no disloyalty to the Government, for the Government was still hesitating about protection. When protection was defeated retaliation would receive a respectful hearing. A colonial preference was not needed, since there was no colonial disloyalty, and the empire was immeasurably more united than fifty years ago.

SEPARATE SCHOOL BOARD

Supplementary Reading to be Supplied—Medal for Best Slant Writing

The regular meeting of the Separate school board was held Wednesday evening, the members present being the chairman, Mr. J. Lynch, and Messrs. Henry, Murty, Hickey, Hourigan, Goselin, Ball, Clancy and Carveth . Rev. Father McColl, the Superintendent of Schools, was also present.

The minutes of the last meeting were read and confirmed.

Inspector O'Brien's report of his visit to the Convent and the Murray street school, was read. It was ordered to be received and placed on file.

The following accounts were received and referred to the Finance Committee;—

R. Hicks & Co.	$29 75
A. H. Stratton & Co.	10 90
L. Leahy	1 00

ATTENDANCE.

The following is the school attendance for February;—

	Average
The Convent	203
Murray street school	185
Lake street school	138
	528

Mr. Pringle wrote, offering a silver medal for the best specimen of slant writing from the pupils of the fourth reader, the competition to be held at midsummer.

It was decided to vote $60 for the purchase of supplementary reading for the schools, and the matter was left in the hands of the School Management Committee.

It was moved by Mr. Clancy, seconded by Mr. Henry, that the Town Treasurer be requested to provide the sum of $5280 for the school's expenditure for the current year.—Carried.

The Board then adjourned.

In Interest of Immigration

Ottawa, March 4.—The Department of Immigration has arranged for a number of personally conducted parties from Liverpool to Winnipeg this spring. The first party left on the steamer Manitoba yesterday under the direction of Mr. R. J. Masters.

CHICAGO NOW IN A UNION LABOR WAR

A Campaign Against Unionism in Every Form

CITY TIRES OF STRIKES

Organized Work men are Accused of Tyranny, Assault and Inciting Riot

Chicago, Ill., March 4 — On the ground that "to have the strength of a giant is excellent, but to use it like a giant is tyrannous," grand jurors, courts and the Employers' Association have been invoked to wipe out the outrages that have been inspired or winked at by labor unions of Chicago. Already half a hundred men have been indicted by the December and January grand juries for assault, intimidation, conspiracy and inciting riot. One man has been convicted, and the chances are that a score or more of others will feel the weight of the law before the snows of winter are gone.

Chicago is aroused as it never was before against what it calls the tyranny of union labor. The city has suffered untold loss by reason of strikes, riots and lockouts during the last year. The teamsters' strike, nearly a year ago; the restaurant and hotel tie-up, the strike of the Chicago City Railway Company, on the Kellogg Company, on the Illinois Steel Company, on the printing trades —these are a small portion of the disturbances which have been featured with violence.

property has been destroyed, lives have been sacrificed, persons maimed for life and common rights trampled upon until the limit of endurance has been reached, according to the expressed views of property owners employers and manufacturers.

CHASED BY LYNXS

Deer Flounder in Deep Snow—The Prey of Wolves and other Animals

It is a terrible hard time just now for the deer, as they cannot get about in the snow, while the animals who prey upon them can run along the crust, and have the poor deer at a stand-still. The only way the deer can get about to feed is to follow the bush roads made by the jobbers, as most of the camps have now stopped, these roads are pretty well filled. Last week, near Bass lake, a fine young deer was attacked by a lynx, which it fought off till it managed to get to a log road. As soon as it struck the road, it had more of a fighting chance, and the lynx seeing that the deer could now get away, jumped on its back and fastened its claws and teeth into the poor animal's neck. As the deer could not shake off its enemy, it bounded along the road and some choppers, who were working near by, say it went off at a forty mile an hour clip, with the lynx clinging to its victim like grim death. After a terrific run of over three miles the terror driven animal came out near the Bobcaygeon road, where it tripped, and fell exhausted to the road. The lynx quickly finished its work at the torn and lacerated throat of the gasping, stricken animal and after satisfying itself, slunk off into the woods, leaving the dead deer laid out on the road.—Bobcaygeon Independent

MRS H. BRADBURN ENTERTAINS

Former Peterborough Lady's Delightful Reception at Winnipeg

The following taken from the Telegram, Winnipeg, will prove of interest to our readers.

"Last Saturday afternoon Mrs. H. H. Bradburn was the hostess at a large tea. Her home on Balmoral street was decorated throughout with the two colors most suggestive of spring, green and yellow. Beautiful large roses were the flowers used, with garlands of smilax. Mrs. Bradburn received in a handsome costume of white silk embroidered net over apple green brocaded satin, with trimmings of plaited chiffon and pearl passementerie. In the tearoom the decorations were most elaborate. The entire table was covered with puffings of soft green silk. Streamers of yellow and green satin ribbon twined with smilax reached from the electroliers to the four corners of the table, where they were caught by butterfly bows of the ribbon. The centrepiece and doilies were of white moire silk, with a hand-painted design of yellow roses, and all the dishes used on the table were hand-painted with the same design, the hostess herself, it was whispered, being the artist. In the centre, a tall china vase matching the dishes was filled with lovely yellow roses. Mrs. DuVal and Mrs. Charles Gordon presided the first hour, and were then relieved by Mrs. J. A. Hunter and Mrs. G. B. Wilson. A number of young ladies and gentlemen assisted in the tea room. Among them were noticed Miss Sparling, Miss Rourke, Miss DuVal, Miss Witcher, Miss Harmer, Mr. Hugo Ross, M. Thomas Bland, Mr. Gordon McTavish and Mr. W Whyte. Some delightful pianoal music added to the pleasure of the afternoon.

"There were about one hundred guests present, among whom were many of the clergy, physicians lawyers and other prominent citizens of Winnipeg."

Mr. Bradburn is a son of the late William Bradburn, while Mrs. Bradburn is the daughter of Mr. R J Winch, of town.

WHITEN'S FORWARD MOVEMENT

One of the Prettiest Studios in Canada—Thoroughly Refitted Throughout

Wonderful advances have been made during the past few years in the beautiful art of photography and all who have visited the popular Whiten studio, on Hunter street will unanimously assert that Mr Whiten's 25 years experience has produced in him a master of this art. The studio has been thoroughly remodeled and refitted throughout and is now beyond doubt one of the prettiest and most modern in America. Mr. Whiten recently paid a visit to Toronto, and while there visited all the best equipped studios, and in purchasing his costly fixtures, he has endeavored to outclass all others.

A beautiful beveled glass door greets the visitor as he enters, and he at once feels at home amid the strains of sweet music from a costly automatic instrument, which has but recently been purchased. The reception room is most tastefully decorated and arranged. The walls are covered with beautifully designed red and gold paper, and dozens of picturesque studies in color and shade are hanging on all sides. Among the most attractive are several mirror effects, but all are the work of a master photographer. The floor is covered with handsome Turkish rugs of unique design, and the new upholstered furniture is of the finest quality of carved oak and mahogany. Many new fancy camplo frames have been added, some having recently arrived from Chicago. A most attractively arranged group of pictures depicting scenes in and around Peterborough is in itself an object of interest, and the large mirror on a handsomely carved pedestal adds much to the general effect. The archways are draped with Madras curtains, trimmed with silk, and costly double Lambrican curtains hang from the windows. And the cosy corners! They are the most inviting. Closed in with Oriental drapery, lighted by a soft red light, and abounding in beautiful cushions, you could not imagine a prettier spot.

A new natural oak counter, beautifully carved stands at the rear and palms and blooming plants complete the list of decorations in one of the prettiest reception rooms in America. A ladies' dressing room, with all modern conveniences, is found upstairs, and the large studio has been thoroughly equipped. Mr Whiten's is the only studio in town where the back grounds may be pushed back handily and of these he has a choice assortment, one being an excellent study painted by the gold medalist scenic painter of America. The room is 4 feet long and 24 feet wide and contains two large cameras, equipped with the very best Dalmeyer lenses, one of which is the largest in Peterborough. The skylight is composed of the finest white ground glass, made especially for taking pictures on a dark day. With all these modern appliances and his long experience, there will be nothing in the city to equal the work Mr. Whiten will turn out.

The work room is one of the largest in Ontario, and is equipped with all the latest improvements, and no pains have been spared to facilitate the work of producing such beautiful creations of art as may be seen on the walls of the various rooms. The public are extended a cordial invitation to come and inspect the beautiful collection, and certainly no one will depart without feelings of admiration and wonder, at so much beauty. Sittings may be arranged by phoning No. 418

About the Weather

The month of February has been surpassed but twice during the past 60 years. February of 1875 and 1886 being somewhat colder.

In Peterborough it was below zero about 20 different days. The average night temperature was 5.5 degrees below zero; the average day temperature was about 10 above, making a mean daily temperature a little above zero.

The coldest day was the second of the month, viz., 27 below zero. The highest temperature was on the 28th 37 degrees above. We had 19 inches of snow, and 1.20 inches of rain.

RUSSIANS ANXIOUS OVER THE DISAPPEARANCE OF THE JAP'S FLEET FROM PORT ARTHUR

Heavy Reserves Are Being Sent to the Yalu to Check The Japanese Forces---The Railway Kept Open

SMALLPOX SCOURGE

Already Sixty Victims in the North West Territories

Winnipeg, March 4.—A scourge of smallpox has nearly wiped out the Indians of the Isle of Lacrosse District, sixty victims being numbered within a few weeks. The epidemic is still in active operation, according to last reports, and has extended to Portage La Roche, and the frenzied natives, fleeing from the danger, are spreading the disease. The Catholic mission at Lacrosse, under Father Simeon, is making heroic efforts to cope with the dread situation. An expedition, provided with medical comforts, and escorted by a body of North-West Mounted Police, had been despatched to the scene. Dr McCullough, of Battleford, is in Chicago for the medical equipment, and has orders to vaccinate every person he encounters in the affected district.

May Sink Ships and Abandon Port Arthur—Chinese Asked to Betray Japanese Spies.

New York, March 3 —Ominous rumors, says a cable from St. Petersburg to the Herald, have spread through business circles that Port Arthur will be abandoned to the enemy, after sinking the ships, as was done in the Crimean war.

SEARCH FOR SPIES.

Vladivostock, March 3—The police have placarded the city with notices in Chinese and Russian, calling on the Chinese to betray Japanese spies masquerading in Chinese clothing.

IN TIME OF PEACE PREPARE FOR WAR

This is What Canadian Authorities are Now Doing

Ottawa, March 4.—Enquiries are being made by military experts as to the troops that could be mobilized and placed in the field for the defence of Canada in case of a grave contingency, also to the supplies of ammunition. The Dominion arsenal at Quebec is capable of turning out sufficient ammunition to meet present needs, but the idea is to increase the quantity to an extent that would meet a serious emergency. Hence it is likely that a surplus will be accumulated, and supplies stored at convenient strategical points in the country. The location of these magazines will be kept secret, and known only to military officials whose discretion can be depended upon.

Special to The Times.

St. Petersburg, March 3—Since the disappearance of the Japanese fleet from before Port Arthur, the Russian authorities have been waiting anxiously for the next move of the Japanese on the sea. There is an inclination here to believe that the Japanese have been discouraged by the failure of their attacks, and perhaps by losses they have not announced.

It is evident, even from the meagre information regarding Russia's dispositions in Northern Corea, that the plan for checking the Japanese land advance is perfected, and that heavy reserves are being brought up to the Yalu River.

Every energy of the authorities is now directed to prevent a blockade on the Siberian railroad. Twenty new sidings, each of 2,200 feet, are being erected. Owing to the heavy movement of rolling stock carrying reinforcements, war munitions and commissary stores eastward, there is a great danger that in bringing back the empty cars the whole line may be stopped. With the sidings now building, the authorities hope to be able to keep the line clear, and to send eleven trains in each direction daily.

FRANCE STRICTLY NEUTRAL

Paris, March 3—Credence is not given by the Foreign Office to the reports that China is on the eve of joining Japan in the war. All the advices received here indicate that China proposes to observe her declaration of neutrality, and that the Chinese troops sent north have instructions to enforce her neutrality. It is understood that China disavowed any collusion between her troops and the Chinese outlaws, explaining that those who have joined the latter are deserters, and that in the undisciplined state of the army it is impossible to prevent them from [illegible]

It is authoritatively announced that France has not been approached to cede any islands to Russia for use as coaling stations by the latter when she sends her Baltic fleet to the Far East. Should Russia make a request to this effect, it will be denied, as such action would be regarded as a breach of neutrality. To show France's purpose to remain neutral, it is pointed out that Russia has a coal depot at Ville-Franche, near Nice, but that Russian ships will not be allowed to use that station, as in time of peace.

PETERBOROUGH BILL PASSED

Committee Passed Concluding Part Yesterday—Will Go to Legislature

The Peterborough Bill, entitled "An Act Respecting the Town of Peterborough," introduced by Hon. J. R. Stratton, reached on Wednesday the crucial stage, the Private Bills Committee, and successfully passed the ordeal.

The first section authorizes the Commissioners of the Town Trust to invest sinking funds in their hands remaining uninvested, in the purchase of buildings and other permanent improvements erected or made by tenants of the Market Block.

The second section vests in the Town Trust, the real estate owned by the former village of Ashburnham with power to lease or sell the same.

Section three also vests in the Town Trust the sinking funds of the former village.

Section four permits the town to pass a bylaw, without submitting it to the people, to authorize the Water Commissioners to expend the sum of $10,000 annually in providing improvements and making extensions of the works, instead of the $5,000 per year the Commissioners are now by law permitted to expend.

Section five confirms the town bylaw passed Jan. 11th, 1904, authorizing the purchase of the Hilliard property.

Section six authorizes the Town Council, without the consent of the ratepayers, to pass bylaws providing for the erection of an isolation hospital, or hospitals.

Section seven confirms the purchase by the Little Lake Cemetery Company, of a plot of land within the limits of the town, and west of the present cemetery, on which is erected the superintendent's residence.

Section eight provides for the conveying to the Peterborough Lock Manufacturing Company certain lots upon which to erect large manufacturing buildings.

Section nine gives the Council authority to fix the assessment of the land and buildings of the Peterborough Lock Manufacturing Company at $12,000 for a term of ten years.

The concluding section of the Bill authorizes the Town Council, without the consent of the ratepayers to fix by bylaw for a term of ten years the assessment of lands, and buildings erected thereon, and used as an opera house or academy of music, the assessment so fixed to be a sum not less than the land upon which such buildings may be erected.

Sections eight and nine were passed yesterday morning. The whole bill was passed unopposed.

Special to The Times.

Vladivostock, March 4—It is reported here that a Japanese steamer, the name of which is not known, was sunk in the Sea of Japan on Feb. 25 while on her way to Wonsan with a load of ice. Eye witnesses of the naval fight at Port Arthur have just arrived here. They declare that the losses of the Japanese up to Feb. 25 are greater than have been admitted in foreign newspapers.

In addition to five steamers sunk they say that five torpedo boat destroyers, one gun boat and two torpedo boats were put out of action, and several others so badly damaged they they will require extensive repairs.

RUSSIAN RAILWAYS ARE BUSY CONVEYING TROOPS

Every Railway in Russia in the Country now Working Overtime

St. Petersburg, March 4 — Every railway in Russia is carrying soldiers to junction points that connect with the Trans-Siberian Line. Troop trains are followed by processions of cars loaded with ammunition, guns, two-wheeled carts, provisions, army kitchen utensils, and hospital supplies. The soldiers are generally between twenty-one and twenty-seven years of age, beardless and full of vigor. They wear bulky fur caps and heavy felt boots. Their uniforms are plain almost to the point of meanness. Each man has two sets of underclothing, a long thick overcoat, and a short sheepskin jacket.

When the troops reach the military storehouses east of Lake Baikal they will be provided with long sheepskin overcoats and double jackets of deerskin or goatskin. Each company, under the direction of its captain supervises its own kitchen and nominates its cook and provision master. All matters pertaining to the company are managed with great efficiency, as the majority of the soldiers are peasants, accustomed to a highly developed communal life.

There is a serious scarcity of provisions, and the troops en-route to the Far East are living principally on thick, sour soup, with cabbage. Meat rations are sparingly distributed in view of delays by the way. Tea is not provided by the authorities, but nearly every company supplies itself, though the men receive only seven roubles ($3.60) a year. The captains say that tea keeps the rank and file in humour to bear hardship, and face [illegible]

General Kuropatkin is daily inspecting the contingents bound for the front, and declares that they will astonish the world by their willingness and capacity to meet the exigencies of the [illegible],

Dinners are being given regiments in their native towns and cities before they leave for the front. These functions are attended by civil and military officials in uniform and decorations. The dinners are served by women. In these scenes of animation the soldiers behave with a civil dignity that impresses even hostile critics with a sense of their fitness for trying work. The majority of them are fresh from lives of extreme frugality and even privitation. Their eyes are bright, their flesh firm, and their frames well-knit and muscular.

Local Sports

HOCKEY.

The Junior Cordage Hockey team have challenged the Aberdeens to a game in the near future.

TUG OF WAR.

The Quakers and Wm. Hamilton tug of war teams will pull for the Sykes Trophy tomorrow night.

Still, again have our citizens been disappointed owing to the expected hockey team not arriving. The Napanee hockeyists failed to appear last night, owing to their train being late and consequently there was no match. It is expected however, that they will be here to play to-morrow night. The following is a list of the local players who will probably represent the T.A.S.—

Goal—McCoy.
Point—Meagher.
Cover point—Crowley.
Forwards—Parnell, Lynch, McGrath, George.

THE SOO WORKS

Reorganization All but Complete of Lake Superior Company

Toronto, March 4.—It is announced that within six days the plan for the reorganization of the Consolidated Lake Superior Company will be declared operative, all obstacles having been finally swept aside. The re-organization committee probably will enter upon possession of the properties next week. A new company will be incorporated immediately thereafter with a capital of one class only of $40,000,000. First mortgage 40 year 5 per cent. gold bonds, to the amount of $10,000,000, will be issued, together with five per cent. gold income bonds, bringing the total bonds and stock of the new company up to $53,000,000. The new bonds will be offered to the old stockholders at 70 per cent. of their face value. In the meantime the works will be operated as at present, and with the opening of navigation the steel plant will be started. It is expected that Cornelius Shields will be selected as general manager of the new company.

WEATHER NOTES

Friday—Fair, and decidedly cold.

Yesterday morning the heavy downfall of rain in Peterborough, and the mildness of the weather suggested very strongly the near approach of spring, but when just before noon, the rain changed to snow, all our hopes were dispelled.

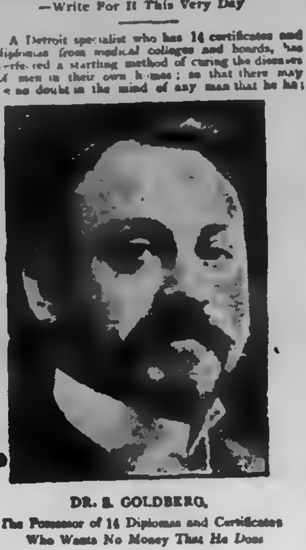
Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 4, 1904

HIGHWAYRY IN WARFARE

"All's fair in love and war" is one of those axiomatic falsehoods to which custom has lent a semblance of truth. As originally conducted warfare was wholly without ethical restrictions, and any means employed to subdue the enemy was justified by the end. As mankind progressed in civilization certain barbaric and inhumane practices were discountenanced and afterwards abandoned, while other methods adopted by combatants against useless destruction of life and property became recognized as established rules of warfare.

The chief tendency of all these rules has been to eliminate cruelty on the battlefield and to protect the lives and in some measure the property of non-combatants. Many years have passed since so-called civilized nations abandoned the practice of slaying unarmed men and women but even the most advanced nations still cling to the practice of confiscating and destroying private property of the enemy's people. The worst form of piracy in war has been abolished. Letters of marque and reprisal are no longer issued to privateers licensing them to attack commerce upon the high seas, thus confining the capture and confiscation of the enemy's merchant marine to the warships of the belligerent nations.

This form of piracy is defended by many experts in warfare on the grounds that it creates a wholesome fear of war on the part of the commercial world and assist in hastening the end of hostilities. This argument might be used with equal force in favor of privateering, which all nations claiming to be civilized have abolished.

The use of life-destroying gases, projectiles hurled from balloons, dum-dum or soft-nosed bullets, together with bombardment of cities and towns without notice, all of which were prohibited by The Hague peace tribunal, could be defended on the same grounds. All of them make the prospect of war more terrible and increase the dread of it and all of them aid in shortening the duration of hostilities.

There are considerations of humanity, however, which outweigh any interests of warring nations, and hence these these inhuman features hence these inhuman features great nations having agreed to refrain from wanton destruction of human life by cruel and inhuman means, the next restriction to be placed upon methods of warfare should be an agreement to refrain from the wanton and senseless destruction or confiscation of the commerce of the enemy's people.

DOURO COUNCIL MEETING

Council met pursuant to adjournment. Members were all present. The minutes of the previous meeting were read and confirmed.

Moved by Mr. Moher, seconded by Mr Leahy, that the Reeve do order the payment of $20.00 to James [illegible], for services rendered to his father's family during an attack of scarlet fever in April and May, 1903.

Moved by Mr. Allen, seconded by Mr. Moher, that the Reeve do order the payment of $2.00 to B Morrow for registering by-law No. [illegible] re S. S. No. 12, Douro and Dummer.

Moved by Mr. Leahy, seconded by Mr. Jory, that the Treasurer pay the Clerk the sum of $1.00 to procure copies of the Public Health Act for use of the Board of Health.

Moved by Mr. Jory, seconded by Mr. Leahy, that the Reeve do order the payment of $1.15 to Alex Kearney for necessaries furnished James Robertson, re scarlet fever attack.

Moved by Mr. Allen, seconded by Mr. Jory, that B. Leahy and Thos E. Jory expend the sum of $5.00 each as charity for the benefit of Mrs. Sutcliffe and James Edwards, also that Frank Moher expend the sum of $5.00 for the benefit of Pat. Davey as charity.

Moved by Mr. Allen, seconded by Mr. Jory, that the Clerk get 100 copies of Statute labor bylaw printed for use of Postmasters.

Moved by Mr. Moher, seconded by Mr. Allen, that the Times Printing Co. be paid the sum of $30.00, balance of printing account for 1903, and $7.20 advertising tenders re Buckley's Lake.

Moved by Mr. Moher, seconded by Mr. Jory, that W. E. O'Brien be appointed to collect the balance of taxes of 1903.

Moved by Mr. Allen, seconded by Mr. Leahy, that the Reeve be instructed to interview J. M. Killbourne re drainage of Buckley's Lake.

Moved by Mr. Allen, seconded by Mr. Leahy, that a resolution of the Board of Health ordering the payments of certain accounts be confirmed by this Council.

Moved by Mr. Moher, seconded by Mr. Allen, that the auditors' statement be received, and that the Clerk get 200 copies printed; also that the Auditors be paid the sum of $12 each, $4.00 of this sum being for extra duties.

Moved by Mr. Moher, seconded by Mr. Allen, that the Council adjourn to a call from the Reeve.

Do You Tire Easily?

IF YOU LACK STRENGTH ENERGY AND FORCE, IT'S BECAUSE YOUR BLOOD IS THIN AND WATERY

The Best Tonic is Ferrozone—Read of the Marvel it Performed For Three Sisters in Lawrencetown—It Can Do The Same For You

Speaking for herself and sisters, Miss Dorothea Bordman writes; "I am anxious to make known the great benefit that I and my sisters derived from Ferrozone. A short time ago I was tired out and depressed, and felt as if some severe illness was hanging over me. I was so nervous that I found it hard to keep up with my work. Noticing that many Canadian women were being built up by Ferrozone I sent for a supply, and took it regularly for a month. So great was the improvement that my sisters also took Ferrozone. Not one of us had a spark of color in our cheeks, but Ferrozone soon made our complexions ruddy. We soon had good appetites, slept better, and were helped a lot by Ferrozone. We still use Ferrozone, because we find it keeps our systems in a strong, healthy condition. It is certainly a wonderful tonic, and a fine remedy for weak women. Ferrozone has been worth its weight in gold in our family."

To take Ferrozone means you get more strength; means a reserve of energy, and protection against weakness and sickness. Ferrozone is a food medicine, that supplies the body with everything needed to build up the brain, blood and nerve tissues. If its health you seek, Ferrozone will bring it quickly. It is a food tonic that every woman should use. Refuse a substitute and see that you get the genuine Ferrozone. Price 50c. per box or six boxes for $2.50, at all Druggists or N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

the Farmer.

Do not abandon the old reliable varieties. Try all the novelties that are brought out, for some of them may be excellent, but do not venture on them until entirely satisfied of their worth. It is not always that new varieties are adapted to all soils, climates and conditions.

Fruit-growing is usually interesting to the young people of the farm. It is rather neat, cheerful work, and the income, especially from orchards, increases rapidly with time and attention. Fruit-growers, as a class, are often fortunate in retaining some of their children to help in the business.

When the season of berries is over collect all the crates and berry boxes and store them away for next season's use. The farm not only looks better for having the crates and boxes gathered from the field, but also indicates a careful and thrifty farmer. There were berry fields every winter where boxes and crates are strewn in confusion everywhere, and about the railroad stations are piled crates and boxes exposed to wind and rain. With such management berries do not pay.

For horses fagged out after a tiring journey, there is no safer or better tonic than a "white drink," made by stirring a pint of oatmeal in a pail of water off which the chill has been taken. White drinks of this kind are not only good thirst quenchers, but they also seem to act as restoratives, and are found very effective in enabling animals to regain the "tonicity" of constitution lost either through illness or through undergoing severe exertion.

OUR FAR EAST COMMERCE.

Canada's Trade With Japan, Russia and China—What We Import and the Wares We Export.

According to the trade returns of the Dominion Government for the fiscal year ending June 30 last, the aggregate trade of the Dominion, on the basis of goods entered for consumption and exported, with China and Japan, amounted to $2,440,999, as compared with $1,709,856 in 1873. On the value of exports the trade with the same two countries was $501,037, as against $46,466 in 1873.

To Japan our exports in the last fiscal year amounted to $625,146, the most important items of which follows Coal $3,605, pickled salmon $158,209, planks and boards $68,140, other lumber $640, butter $1,816, cheese $1,076, condensed milk $18,183, fruit, etc $1,291, grain $480, flour $2,176, books, etc. $1,057, cotton fabrics $20,250, drugs $2,1[illegible], fertilizers $[illegible]707, houshold effect, [illegible]54, machinery $1,419, steel and mfrs $1,150, whiskey $828, metals [illegible]91, tin manufacturers $4,840, bicycles $6,062, wood pulp $7,588, miscellaneous $7,965.

The total exports to China amounted in the last fiscal year to $175,776, of which the leading items were: Gold quartz $1,991, planks and boards $57,497, butter $141, cheese $1,734, condensed milk $55,145, peas $770, flour $2,881, cotton fabrics $39,757, other cotton $4,046, drugs $1,398, household effects $4,845, steel and mfrs. $2,800, miscellaneous articles $2,052.

Through the United States we imported from China $89,250; from Japan, $333,993, from Russia, $156,490. Through the United States we exported to these countries respectively $36,432, $11,467 and $187,654. Our exports to Russia are by this route four times as great as to the other two nations combined.

From Japan we imported direct during the last fiscal year:

Dutiable goods	$ 741,135
Free goods	746,316
	$1,487,451

On the $681,569 worth of goods imported for home consumption was collected $222,914.69 duty.

The following are the chief items of imports. Baskets $1,431, rice $105,208, rice uncleaned $6,899, rice flour, etc., $104, brushes $18,142, Portland cement, $17,485, coal $58,800, clothing $408, gum camphor $8,569, drugs $221, earthenware $4,328, chinaware $26,722, earthenware $1,748, embroideries $2,155, bead ornaments, etc. $593, fancy boxes $1,300, fans $796, toys and dolls $2,064, fancy goods $1,383, feathers $336, carpeting, etc. $9,940, linen mfrs., etc., $6,063, fruits $2,000, oranges, etc., $6,924, furniture $1,418, calfskins, etc., $1,490, mats and rugs $1,862, packages $3,543, wall paper $1,521, paper pads, etc., $4,558, pickles $6,531, silks $268,583, handkerchiefs $56,338, clothing $16,300, spices $4,624, ginger $436, wines $6,814, carpeting $47,296, tobacco, pipes, etc., $419, tomatoes, etc., $3,227, wood manufactures $951, umbrellas, etc., $1,682, fish $8,046.

Of free imports: Dried grasses $279, florist stock $1,281, books $840, brimstone $30,304, drugs $364, fishing tackle $21,334, hatter's bands $8,664, kelp $1,164, plaits, etc., $6,451, tea $673,213.

Canada's import trade with China aggregated $512,167, on the dutiable portion of which we collected $133,057.23.

With Russia our import trade totals $205,876, $39,202 being dutiable, and $166,674 free, the duty collected amounting to $5,190.46.

Our main imports from China are as follows: Boots and shoes $4,716, biscuits $593, rice $62,576, rice uncleaned $14,834, rice flour, etc., $564, clothing $2,527, drugs $2,568, chinaware $1,069, eggs $961, fans $675, fireworks $6,307, fish $5,393, carpeting, etc., $419, fruits $722, furniture $680, furs $4,882, mats and rugs $525, packages $9,268, paper pads, etc., $1,753, provisions $5,221, silks $6,000, handkerchiefs $3,722, clothing $1,821, spices $4,042, ginger $4,182, cordials, wines, etc., $15,215, starch $556, carpeting $8,081, sugar candy $1,242, tea $803, tobacco $751, tomatoes, etc., $10,564, wood manufactures $1,246.

Of free imports Hides and skins $23,402, wool $1,865, florist stock $447, plaits, etc., $2,435, coffee $500, tea $257,767.

The total amount of imports from Russia into Canada during the last fiscal year is $205,876, of which $39,202 only was dutiable, being chiefly: Furs $34,607, Russia iron $675, mats and rugs $502. Of free imports: Hides and skins $9,718.

Our total exports to Russia amounted to $224,583, being in chief, Coal $3,876, lobsters (canned) $8,400, flour $22,019, agricultural implements $121,945, organs $3,440, tin and manufactures $150.

Our shipping with Japan consisted of 28 vessels entered inwards, and 22 entered outwards, with 68,368 and 24,919 tons measurement of freight respectively.

With China, 18 vessels were entered inwards and 9 outwards, and with Russia 1 vessel was entered inwards and 5 outwards.

Miss Hamilton for the Stage.

Says the London St. James' Gazette: "The Right Rev. Charles Hamilton, Anglican Bishop of Ottawa, one of whose daughters has created a sensation by declaring her intention of going on the stage, is of the Hamiltons of Hainwood, County Meath. The head of this branch was Charles Hamilton, youngest son of Alexander Hamilton, M. P., of Knock. His third son, George, went to Quebec, and made his fortune, and many other people's at the same time, by founding the Hawkesbury Lumber Limits, on the Ottawa River. The Bishop, who is his fourth son, came home to Oxford for his education, and is regarded as a learned and pious churchman. He is well known in England."

Tree Within a Tree.

At Moulton, South Lincolnshire, England, there is a willow tree which in consequence of having been beheaded and having reached an old age has become hollow and rotten. From a seed which has dropped into the hollow a healthy sycamore tree has grown to a height of ten feet.

THINGS CHINESE.

Many Chinese temples have windows made from mother-of-pearl, found in oyster shells. The material is transparent and looks like opal glass.

The best quality of Chinese tea is very expensive and so little of it is grown that there is never any of it to export. The Chinaman knows good tea and keeps it all for his own consumption.

The Chinese think they occupy the middle of the earth, and that all other nations are merely dwelling on the edges. Their most respectful term to designate a foreigner is "the ocean man."

Millions have been spent in civilized countries in futile efforts to preserve grapes. The Chinese have known the secret for many centuries, and millions more have been vainly used in the effort to drag from them the recipe.

In northern China hot-water peddlers go about with a whistling kettle—the whistle announcing that the water is at a boiling point. When they hear the whistle the people run with their teapots and buy enough hot water for their day's tea.

A celebrated Chinese dancing master, Hung Foo-Choo, announces in a Chinese paper that he is to hold a religious service, to which he invites everybody, in honor of the 1000th anniversary of the death of his ancestor, who was the first of the family to take up the profession.

A curious industry in some of the provinces in China is the manufacture of mock money for offering to the dead. The pieces are only half the size of the real coins, but the dead are supposed not to know the difference. The dummy coins are made out of tin, hammered to the thinness of paper, and stamped out to the size required.

INTERCOLONIAL RAILWAY

Calendar for March says:

"There are more faults in the humour than in the mind".

La Rochefoucauld.

Therefore cultivate a good humour. If business should ever call you to the Maritime Provinces (the pleasures of nature always will) good humour is assured on the "Maritime Express," for the road bed of the Intercolonial Railway is of the very best, its equipment perfect, and the dining car service excellent.

MIDY

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 310 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

ONLY 15,000 JAPANESE SOLDIERS REPORTED TO BE AT PING YANG

Russians at Sea as to the Whereabouts of the Japanese in Pt. Arthur Vicinity

Special to The Times.

St. Petersburg, March 2—In a despatch to the Czar, Viceroy Alexieff says;—Admiral Stark telegraphing from Port Arthur today, March 2, says;—

The enemy did not appear off Port Arthur on Feb. 28th, 29th or March 1st, Reconnoissances made by the cruisers and torpedo boats over a radius of 60 miles from Port Arthur also failed to discover the enemy's vessels.

Major Pflug, through Viceroy Alexieff, chief of staff sends the following telegram, dated March 2;—

According to additional information which has reached here, our patrols, having passed the night, 12 versts—eight miles—from Pingyang, approached that town on the morning of Feb. 28. They were closely crushing a Japanese patrol of 7 officers. Lieut Lonchakoff attacked this patrol with 3 Cossacks, forcing it to retreat at a gallop toward the gates of the town. The presence of our patrol near Pingyang caused great alarm and soon the enemy's sharpshooters manned the walls and towers and opened fire, expecting an attack. According to the report our patrols approached within 700 paces of the town, which they found to be surrounded by old and new ramparts. These, however, were not occupied by the enemy and it is supposed that the Japanese have not more than 15,000 men in Pinlyang.

PORT ARTHUR IS IN A DESPERATE STATE.

Battleships Landlocked by Wreck of Retvizan --Cruisers Out of Action

Special to The Times.

New York, March 2—The position of the Russians at Port Arthur, says a cable to the World from Berlin is described by the St. Petersburg correspondent of the Schlesische Zeitung as desperate.

"The damaged Retvizan," he states "blocks the narrow entrance to the harbor against other battleships. She can neither be repaired nor moved. All the other battleships are landlocked.

"Scarcely anything is heard of the torpedo boats. It is assumed that they are without ammunition. There are consequently still only the three cruisers, the Bayan, the patched up Novik, and the Askold."

According to accounts now published the Novik and the Askold have been put out of action.

FOR CIVILIZATION.

St. Petersburg, March 2—The Novoe Vremya today prints an editorial on the "Anglo-Saxon rejoicing in England and America at the reports of Japanese victories," in which it says "the whole world, with these two exceptions realize that the Russian occupation of Manchuria would benefit civilization.

THE BLACK SEA FLEET TO STAY BOTTLED

Turkey, Under Pressure by Powers, Decline to Allow It to Pass Through Straits.

Constantinople, March 2—The Turkish Government has resolved to forcibly prevent Russia's Black Sea fleet from passing through the Dardanelles, and a fight will probably occur should such an attempt be made. The defences along the straits have been strengthened and mines have been laid. Officers have been specially appointed to supervise these measures. The reason for Turkey's bold action, it is learned, is that strong representations have been made by the other powers against such a breach of Russia's treaties as the passing would incur. England has informed the Sultan that should the Russian vessels pass through the straits a British fleet would do likewise, and would make a demonstration before the windows of the Yildiz Kiosk.

JAPANESE IN KOREA.

Paris, March 2—Information reaching here from official sources shows that Japanese concentration of troops is going on extensively in the neighborhood of Pingyang, Corea. Large forces are debarking from transports at nearby forts from which it is assumed that an extensive land engagement is imminent in Northern Corea.

HAS PORT ARTHUR FALLEN?

London, March 2—A rumor was circulated in the lobby of the House of Commons this afternoon that Port Arthur had fallen. The origin of the rumor could not be traced, and no confirmation whatever was obtainable.

RUSSIA PREPARING THE FLEETS FOR ACTION

St. Petersburg, March 2—Although it is denied that the present plans of the Admiralty contemplate the despatch of either the Black Sea or Baltic fleets to the Far East, both are being prepared with the greatest haste to meet any emergency that may arise General Altvater the artillery specialist, and Admiral Verhosky have been inspecting the ships and crews of the Black Sea fleet.

Japanese Delay Assault On Pt. Arthur for Two Weeks

Reported That Japs Think Two Weeks on Short Allowance will Weaken Resistance to Attack

Special to The Times.

Washington, March 2—The landing in force of the Japanese on the Liao-Tunk peninsula and the beginning of the land investment of Port Arthur will not begin for a fortnight, according to advices received here from what are believed to be reliable sources. It was expected that the attack upon the fortress would take place yesterday or to-day, but the later advices, without explaining the reason for the delay, show that there has been a change in the original plans. Army officers here think that the Japanese have decided that with the rail road connecting Port Arthur with the outside world cut, thus preventing supplies from reaching the place, two weeks' privation will render the final assault easier. Moreover, as Port Arthur can be safely left as it is for the time being, the Japanese troops may be employed instead in Northern Corea, near the Yalu River, where they are most needed.

THE TRENT VALLEY CANAL

MR. J. A CULVERWELL WRITES TO BOARD OF TRADE

Urges the Advantages of the Route for the Grain Trade The Royal Commission.

The following letter is from Mr J. Alexr Culverwell, and is addressed to the Secretary of the Board of Trade;

Dear Sir,—I wrote you on the 17th inst. regarding my application to the Chairman of the Royal Commission on Transportation, to have a sitting at Peterborough re Trent Valley canal. I now give you this letter to me, dated Feb. 16th, viz;—"The subject of your letter in the matter of the Trent Valley Canal will be brought before the Transportation commissioners at their next meeting, and receive their consideration, of which you will be advised; as to any petitions coming from public bodies, or copies of any resolutions bearing on the subject, that is for them to decide So far we have only your request and that of Mr. Lott of Stirling, made personally to the writer."

I was afterwards notified, by the Chairman, Mr. Bertram, and accordingly wrote the Mayor of Peterborough on Feb. 23rd, as follows;—"Dear Sir,—I have the honor to inform you that I have been requested by the Chairman of the Royal Commission on Transportation Mr. John Bertram, of Toronto, to notify you that the Commission will be ready to have a sitting at Peterborough in about ten days, to take evidence as to the matter of the Trent Valley Canal. The Secretary of the Commission is writing you to arrange matters regarding the sitting.

"As you will have noticed in the Press, I have been pressing for this sitting of the Commission, and that my application was to be taken into consideration. I have now the reply which I have given you."

"May I humbly request that your honorable Council record itself in a memorial to the Commission as to the feeling of the necessity of this great work of utility—not only for the country at large—but from a local standpoint—suggesting also that you press forward strongly the great benefit the opening up of the bottled up middle completed portion will be to the great Trent Valley Districts."

I will now give the same information to the Board of Trade, suggesting that they embody in a memorial to the Commission the different reasons why this international grain route should be completed. I have, as you know, the past year devoted considerable time in journalistic and other public ways in advocating the interests of the Trent Valley Canal and for the last two months I have been advocating the matter to the Chairman personally, and was honored with his presence at my lecture at the Canadian Institute, Toronto.

Being an income ratepayer in the Town of Peterborough—having an office there, and being a large owner of property in the County of Peterborough, and having expended some $5,000 the last two years in advertising and in other ways placing Peterborough's advantages before the public, I feel that I have only done my duty not only to the district in which I shall take up my residence this spring for the future, but also to myself, and I trust therefore I shall be pardoned for having taken so prominent and active a part in the advancement of the Trent Valley Canal

Faithfully yours.
J. ALEXR. CULVERWELL.

DEEP SNOW IN THE WOODS

ROADS ARE IMPASSABLE--MEN AND HORSES SUFFER GREATLY

Deer and Moose Die of Starvation in Some Parts—Similar Condition of Affairs in Northern States

The great depth of snow in Peterborough county is almost without a precedent in the history of the past 25 years. In some parts of the woods it lies over six feet deep, and at the edges of spruce forests to the north of us, the drifts are ten to fifteen feet in depth.

Records kept at one camp show that thirty inches of snow fell in February, which is nearly a foot more than the average for all winter. Most of the downfall came in very cold weather and in the form of dry and mealy snow, so that no teaming along the roads could tread it down, or make it lie in shape for loads to pass along.

In one camp in Northern Ontario are [illegible] living on salt pork and Indian meal, and fifteen horses with nothing to eat except frozen branches and twigs from trees. No supplies can reach the camp owing to the depth of the snow, and it is feared the horses may starve unless supplies are soon brought in.

Reports from other points state that the deer and moose are unable to move about in the woods on account of the deep snow, and that many of them will perish from hunger before spring. A hunter in Maine recently came upon six dead moose and five very lame ones that were too feeble to break through the deep snow when discovered.

One large bull that was reduced to skin and bones, allowed him to come up and feel his ribs, and showed no signs of fear. When the hunter held out a fragment of Indian bread the moose ate it ravenously and was so greedy for more that he tried to follow the prospector when he quit the yard.

Wildcats had entered the yard and fed on the frozen bodies of the moose. From the number of tracks entering and emerging from the yard, the hunter thinks there must have been at least a dozen wildcats closely waiting to prey upon the survivors as soon as they became weakened from starvation.

In addition to the wild cats, he saw signs where foxes had been at work among the bones. Though he had heard reports that wolves had crossed over from Canada, he saw no traces of these animals.

This of course is a more pitiful state of affairs than at present exist in Ontario, but the vast amount of damage done and the great loss suffered through the severe winter have been great, and all now eagerly look forward to signs of spring.

FOREST MINING CO.
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southeasterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $42.65 and $79.08 respectively, thus being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite, and by driving this tunnel five or six hundred feet further it would cut or meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.
R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 600 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them, The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air pipe into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

LORD DALMENY KILLS MAD BULL

Lord Rosbery's Heir Has an Exciting Battle in Park

SHOT AFTER A WILD CHASE

Cool Behavior of the Young Nobleman Prevented a Tragedy

London, March 3.—Lord Dalmeny, Lord Rosebery's heir, had the other day what he described as an exciting encounter with a mad bull in Dalmeny Park. It was a hot contest, which ended in the victory of the young Earl through sheer agility skilful manoeuvring, and cool rifle shooting.

Lord Dalmeny was out shooting when he learned that the bull, which had come to Ratho Station by train, had evidently been driven to a frenzy by the railway journey, and had broken away from its keepers and taken up quarters in Dalmeny Park. The owner and a number of assistants had attempted to capture it, but the fierce charges of the animal sent them for refuge into trees.

Lord Dalmeny exchanged his sporting gun for a rifle, and went in pursuit, followed by gamekeepers. Lord Dalmeny's first shot had no effect and the mad bull tore down a narrow path towards the young man, but on each occasion he got out of harm's way, the gamekeepers looking anxiously on for the safety of their young master.

In the bull's third attack Lord Dalmeny had a narrow escape, only springing up an embankment in time to save himself from the horns of the bull, which was bellowing with rage, but the young nobleman kept remarkably cool until he got the opportunity wanted, took steady aim and shot the maddening beast through the heart. The bull fell with a crash, and in a few minutes was dead.

BRITAIN BENT ON PRESSING THIBET

Government is Determined to Insist on Final Settlement

CHECK TO RUSSIA'S DESIGN

Will Not Tolerate Situation by which Thibetians Have Muscovite Support

St Petersburg, March 2.—In case England becomes involved in the war the Baltic will be closed by Denmark and Sweden, under the protection of Germany. England was aimed at directly in the late Russian note concerning the independence of Korea. The active preparations of Sweden and Denmark, combined with the recent presence here of a special messenger from the Kaiser, are taken as substantiating this statement, which was put forth several weeks ago by the Times.

The Novoe Vremya takes up the matter, saying; "England keeps silent now, when Russia demands the recognition of the independence of Korea, but will howl loudly when the times arrives, which will surely come, that Russia begins to drive the Japanese back. If England does not declare herself Russia will have full right to consider the Anglo-Japanese treaty as directly against herself."

The Viedomosti says; "The outlook is very dangerous. The United States has entered de facto into the Anglo-Japanese alliance. Yesterday told how the international difficulties are looming in the minds of all experienced politicians; today all the talk is of the possibilities and probabilities of a general international war."

Like a draught of water to a thirsty traveler comes the news of the repulse of the Japanese in the latest assault on Port Arthur. It is even magnified in many quarters as a grand Russian victory.

London, March 2.—A serious anti-European rising has broken out in Southern Nigeria.

This is the work of a secret society known as "The Silent Ones," organized for the special purpose of overthrowing white rule. The members of this society, who never speak, and exchange ideas entirely by signs, have already made two attempts to abolish European control.

KAISER TO VIEW GIBRALTAR ROCK

Will See Famous Fortress for the First Time

ITINERARY OF HIS TOUR

Emperor William will Meet Rulers of Spain Portugal and Italy also the French President

Berlin, March 3— Emperor William has never travelled far in a modern passenger steamer, and that fact is given as the reason for his taking the North German Lloyd steamer Koenig Albert on his twelve days' trip to the Mediterranean. His Majesty has rather suddenly decided not to call at Antwerp at all. No explanation is made of this change in the plans. The Emperor will go from Bremerhaven to Vigo, Spain, direct, where King Carlos, of Portugal, will doubtless meet him, and at Gibraltar, where he will spend two days, his Majesty will see the fortress for the first time. He will debark also for a few hours at Port Mahon, and will leave the Koenig Albert and board the Imperial yacht Hohenzollern at Messina on March 24. The Koenig Albert will, consequently, be unable to leave Genoa that day, as she is advertised to do.

The gossip regarding the Emperor's meeting President Loubet outside of Brest is altogether incorrect. The cruiser Heinrich II, will convoy the Koenig Albert all the way to Messina and afterwards with the despatch boat Sleipner will accompany the Hohenzollern in a leisurely four weeks' cruise, without a fixed itinery, to Corfu, and as far eastward as Athens, but not to Constantinople.

On his way back Emperor William may see the King of Italy at Naples. The Empress may join the Emperor toward the end of the excursion. The return will be made overland, and at no time during the trip will his Majesty be more than two days out of reach of land.

MORE CHANGES IN ARMY SYSTEM

British Committe Abolishes Brodrick's Scheme

NUMBERS FOR REGIMENTS

The Territorial Names are to Be Discontinued

London, March 3—A supplementary report drawn by the War Office Reconstitution Committee makes further sweeping changes. It abolishes Mr. Broderick's scheme for six army corps and restores the numerical designation of regiments, instead of continuing their territorial names.

A general staff will be established, which the committee defines as a department devolving its undivided attention to military problems in their wildest sense, and as a body of officers occupied in time of peace in training all ranks of the army and prepared to direct operations in the field.

Anecdotal.

Baroness de B., one of the most popular of French hostesses, who, besides being a very pretty woman, is remarkably slight and graceful, was asked, a few days ago, why she invariably engaged such enormously stout servants. Her answer was characteristic: "To prevent them wearing my clothes when I am away from home."

An amusing story is told of Emperor William and Richard Strauss, the composer. One day recently, when at the opera, the Kaiser said that he liked the simple old operas better than the modern complicated ones, and, turning to Strauss, he asked him his opinion. Strauss took the liberty of disagreeing with his Majesty, who, turning in comic despair to those around him, said: "Now see what an adder I have been nurturing in my bosom!" Since then Strauss is called the "Imperial bosom adder."

The Dowager Czarina is a great favorite in Russia. Among other stories illustrating her character is this: She saw on her husband's table a document regarding a political prisoner. On the margin Alexander III. had written, "Pardon impossible; to be sent to Siberia." The Czarina took up the pen and, striking out the semi-colon after "impossible," put it before the word. Then the endorsement read: "Pardon; impossible to be sent to Siberia." The Czar let it stand.

Some years ago there was an agitation on the part of the undergraduates at one of the Cambridge colleges to effect a change in the color of the gowns (blue), which were not altogether to their liking. An appeal was made to the master, who listened attentively to the arguments of the deputation, and then replied: "Quite so, gentlemen, quite so; but we must not be too hasty in these matters. Time is required; so we will change the gown by degrees." A capital play on words, as the bachelor's gown is always black.

Menotti Garibaldi, who died the other day, resembled his illustrious father in everything—in physiognomy, build and constitution. He had also the same moral attributes, the same simplicity, frugality, modesty and love for the most humble poor. In his family he was all peace and work. Englishmen have reason to regret his loss, for during the Boer War he was one of the few Italians who did not insult and jeer at England He nobly restrained Garibaldians from joining the Boers. "No Garibaldian," he said, at the time, "shall ever take up arms against England!" The funeral was very imposing.

Dr. Alfred Wallace, the octogenarian scientist, lived in his youth in the Moluccas. One of his neighbors in those remote islands was an old sailor, and of this aged man Dr. Wallace sometime tells an old story. In a certain port the sailor had been once invited to a dance. He accepted the invitation, and all through the evening he bounded in a hearty and uncouth manner through dances of every kind. But he wore no gloves, and hence, the climate being tropical, his large, moist hands left stains on the white raiment of the women. One, a little vexed, thought she would take him to task for this. "Don't you think, dancing so much, you ought to wear gloves?" she said. "Oh, that's all right," he answered. "I'll wash my hands when I'm through."

Had Lost His Baggage.

On one occasion Lindsay, who succeeded Carlisle as a Senator from Kentucky, was coming east with Blackburn, says The Saturday Evening Post. It was morning; the train was swaying and rocking through the Alleghany hills; precisely the hour, the motion and the place to remind a gentleman of Blue Grass genesis that he needed a stomachic. Lindsay, returning from the smoking-room, was concerned to note that his colleague's countenance, usually so bland, wore a look of troubled gloom.

"What's wrong?" asked Lindsay anxiously.

"The worst thing in the world," returned Blackburn. "I've lost the better part of my baggage."

"Was it stolen, or did you leave it behind?"

"Neither; the cork came out."

Manager—I want you to appear in just one piece holding a stick of dynamite.

"Yes, and how many pieces will I appear in if the dynamite should explode?"—Life.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers :
J. R. CHAPTON, - - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - Treasurer

Trustees
J. R CHAPTON, E. P. CHAPTON. CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPION.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends ?

We make a special offer of a limited number of shares of stock, at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 557 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92 40 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6 82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800 00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 11, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUAIPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacuaipa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacuaipa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacuaipa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacuaipa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacuaipa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacuaipa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacuaipa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacuaipa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management

For the Ladies.

Knives.

The loosening of the handles of knives is due to the fact that the knives have been tossed into a pan of hot water, together with the forks and spoons, and, in consequence, the cement has melted away. Knives, when brought from the table, should be scraped against the edge of a plate to remove as much soil as possible, and the blades should then rest in a jug, not a pan, of hot water, into which a little bit of soda has been melted, care being taken that the water does not reach the handle, where it joins the blade.

Bookish Women.

Bookishness is an unreliable test of ability. I have known bookish women who were profuse readers and delighted in study, but were not of much use for anything else, and I have known other women who took books rather hard, but amply made up for that disability by their closeness of observation and mental energy. As between persons who read to save themselves the trouble of thinking, and persons who observe and think, but find reading laborious, the latter are likely to be best worth while. But reading, observation and thought ought to work well together and to make for practical efficiency. A mind that is capable of Greek and analytical geometry is usually capable also, under proper training, of omelets, good coffee and household administration.—E. S. Martin, in Harper's Bazar.

Hindu, English.

Lady Curzon, who was Miss Leiter of Chicago, gets a lot of fun out of her life in India. Among other fads, it is said that she makes a point of collecting any amusing attempts made by Hindus to write English that may come under her notice, and has many ludicrous specimens in her scrapbook. Recently she got from Bombay a letter that two brothers sent out to their patrons on the death of their father, who had been the head of the firm. The letter ran: "Gentlemen,—We have the pleasure to inform you that our respected father departed this life on the 20th inst. His business will be conducted by his beloved sons, whose names are given below. The opium market is quiet, and mal. 1,500 rupees per chest. O death, where is thy sting? O grave, where is thy victory? We remain, etc."—Leslie's Weekly.

Care of House Plants.

The advent of colder weather means increased fire heat, the latter also meaning an increased aridity or dryness of the atmosphere. The latter condition will probably induce a visit from insect pests, unless precautions are taken to prevent their appearance. Green fly and red spider are most to be feared, especially the latter, as their appearance is not so easily detected as that of the aphis, or green fly.

Copious sprinkling and syringing with cold water is the best preventive for the attacks of the so-called spider. Salvias, fuchsias, roses and carnations are first favorites with this little pest. When first attacked, the leaves of these plants present a whitish, dusty-looking appearance, especially on the underneath side, and the leaves will soon commence dropping twice every day. Tobacco water is the best remedy for green fly, although tobacco leaf stems, or even a cigar thoroughly dried and rubbed into a fine powder and sprinkled on the plants infested with green fly will generally rid the plant of them. The latter application is best made after the plants have been recently sprinkled or syringed, as the tobacco dust adheres better when the foliage of the plant is moist.—William Hunt, Guelph, Ont.

Keep the Windows Open.

You would not think of drinking stale or poisoned water, would you? You know that if you were to be shut in an air-tight compartment death would result. Of all the necessities of life, you can live longer without any of them than air. Impure air and darkened apartments are the cause of an untold number of deaths annually. You know that on a sunless day, with a close atmosphere, you are out of sorts at the best, if you are lucky enough to escape physical ailments, while you are mentally depressed. But once let the sun shine brightly, and clear the atmosphere, how different, how much better you feel in every way.

Cold weather is coming, and when you are tempted to close up the house as tight as it can be made, remember these things, and don't do it, especially at night. Keep the windows in the sleeping apartments open enough to at least give you sufficient fresh air. A cold room does not indicate that it is healthy, far from it. A sleeper will soon breathe up all the fresh air in a room, and if there is not a constant supply of fresh air, he simply breathes over and over again the poison thrown off by his lungs. And the breathing of this vitiated air only tends to lower the temperature and vitality of the system, so that it is not as capable of withstanding the rigors of winter. Fresh air is heating to the body; in fact, upon it depends the combustion of the fuel in the body and by which we are kept alive, which we should always bear in mind.

Even with open windows during the night, bed chambers and bed clothing should be thoroughly aired each morning, and allowed all the sunlight possible. During sleep, not only do the lungs throw off more poison than during the day, but it is especially so with the body in its relaxed condition and when the pores are all open. During sleep the body should have plenty of covering; better to have too much than not enough, both to induce deep slumber and to keep the skin moist and the pores open that they may have the opportunity to rid the system of poison. Bear in mind that death would follow the closing of the pores.

Fresh air in cold weather will cost money, as more fuel will be required, but it will be economy, for if it does not save sickness and doctor bills, and which it most likely will do, you will feel better and the stronger for it.—Cooking Club.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares, Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $125,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY,

Consumption is Not Hereditary

It is Not Handed Down From Generation to Generation but is Simply "Caught" by the Germs Getting Into Your Lungs. Cured by Catarrhozone

Consumption was formerly believed by some to be due to poverty of the blood. By others it was supposed to be hereditary. Both these beliefs are incorrect.

If the disease passes through several members of the same family it is because the germs get into the clothes, bedding, furniture and carpets that are in general use.

These germs find their way into the air, are inhaled, lodge themselves securely in the throat and lungs were they rapidly increase, and soon claim another victim.

The only remedy that has cured a genuine case of Consumption is Catarrhozone. Its germ killing vapor is inhaled into every air cell and air passage of the head, throat and lungs, and creates a healthy condition of these organs in which disease germs cannot live.

It is impossible for consumption to make headway is the soothing antiseptic vapor of Catarrhozone is inhaled a few times daily into the lungs. The cause of the disease (germ life) is at once removed, the inflamed mucous surfaces are healed, and a lasting cure effected.

Catarrhozone in breathed right into the lungs. By its soothing influence the soreness caused by coughing is removed. The cough becomes less severe and soon ceases all together. Catarrhozone aids expectoration, quiets the nerves, and lends to the patient a large measure of comfort.

Consumptives are strongly urged to use Catarrhozone as immediate relief always follows. It is a direct method of treatment, and is endorsed by the highest medical authorities everywhere. The balsamic vapor reaches the lungs and respiratory tracts in a speedy manner that no medicine taken into the stomach can do.

Catarrhozone is just as good as a change of climate, equally pleasant and cheaper. It can be used at home at any hour of the day or night and never causes inconvenience or bother.

The complete Catarrhozone outfit contains two months treatment and costs only $1.00. It is a perfect boon to consumptives and their surrounding friends. You cannot afford to miss the benefit of Catarrhozone and should order it today. Sold by all druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Camps Closed

A large number of lumbermen arrived in the city yesterday from the northern lumber camps. McDonald's camps have been closed down owing to the deep snow, preventing the men from getting out the timber, and nearly all the other camps will be closed in a few days.

A Fine Proposition

We call the attention of investors to the advertisement of the Old Mesa Gold Company, which appears on the 8th page of today's issue. This proposition is one that should prove attractive to Canadian investors. A lengthy write-up of the property will appear in a few days.

Y.M.C.A. Notes

At the meeting of the Union to be held on Friday at eight p.m., in the Y.M.C.A., the Primary and Junior Sunday school lesson for March 6th will be taken. Rev. J. G. Lewis will have charge of the latter and a special effort is being put forth to make the entire meeting of practical benefit to Sunday school workers.

Guy Wires Broken

Owing to the heavy winds yesterday the lower guy wires of the huge smoke stack at the Canadian General Electric Co's works gave way, and most of the employes of the pattern and carpenter shops were sent home at 3 o'clock. It is expected the repairs will have been completed and the men at work again this morning.

The attendance at the
Peterboro' Business College
is larger this year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 50% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write to us [illegible] regarding our correspondence course
WM. PRINGLE.

Thief Stole Purse

While walking along the G.T.R. track near the Protestant Home, after dark last night, Mrs. Charles Baker, of 573 Gilchrist street, was confronted by a man, who suddenly snatched her purse and then made off. The purse contained eight dollars.

How a Boy Can Earn a Watch

We will tell any boy sending us his name and address how he can secure a fine watch for nothing and that without canvassing or selling anything. It costs only a postal on which to send the name and address to find out. You can decide what to do when you know what the plan is. Any grocer can tell you if we are reliable.

THE MALTED CEREAL CO.,
200 Mountain St., Montreal

A Spring Poem

Mamma, may I walk down George street?
Yes, my dearest daughter,
Keep your skirts above your feet
And don't go near the water.

She started out to see the shops,
It was a lovely morning,
And got in over her rubber tops,
Unheeding mother's warning.

You've mussed up all your clothes my child,
The frantic mother cried,
Don't worry me, you make me wild,
The sassy maid replied.

I'll wear my bathing suit when next
I go down, said the daughter;
Her mother then, in accents vext,
Remarked, I guess you'd oughter.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—It will now be in order for trains to be blocked by water.

—The Young Men's Guild of Charlotte street Methodist church, intend holding an entertainment this evening.

—An Ontario lady has invented a new voting machine, and yet they say that a woman does not understand politics.

—Citizens will do well to closely watch their cellars in the event of a sudden thaw, and take steps to prevent them from being flooded.

—The Water street canal is now open for business. The pavements are all the way from two to ten inches under water.

—The relugar monthly meeting of the Ladies' Aid Society of St. Andrew's church will be held this afternoon, March 4th, at half-past three.

—At the County Police Court this morning, J. Hatley, of Lakefield, was charged with selling liquor without a license. Owing to the inability of the defendant to appear in court, the case was adjourned.

—The coal supply in town is scant and it looks as if we were going to have a famine. A number of our citizens are burning soft coal.—Hastings Star.

—There are drifts on some of our roads so high that, standing on the top of them, one can take hold of the telephone wires. This item has been given us by some ladies who were out snow-shoeing last week.

—A man 102 years of age out in the great and woolly west writes The Times that we had a harder winter than this in Ontario 87 years ago. The old codger has the deadwood on most of us, including this g.f.j.

—The factories at Campbellford have had considerable trouble with ice stopping the flow of water to the water-wheels. The paper mills there found it necessary to use dynamite to clear the race-way, and 542 shots were fired.

—According to a correspondent, the snow in the Algoma woods is only 27 and 30 inches deep. The thermometer has never registered more than 40 degrees below zero this winter, and the roads have been in much better condition than in the Midland counties.

—Several of our exchanges are announcing the appearance of crows and robins. If these feathered visitors have come to announce spring we might say to them that ninety-nine and three-thirds per cent. of Canadians will be pleased to have the goods delivered.

—"There is only one thing I have against The Times," remarked a subscriber yesterday, "and that is that I can't get my work done in time in the mornings, as the boys look for this paper first thing." All the latest news, local and foreign, is found in the newsy columns of The Morning Times.

—Down in Kingston several merchants were summoned before the magistrate for using irons, axes and sledges in cleaning the ice and snow off the granolithic walks, and complaint is made of the harshness of the proceedings. This method has been generally adopted here in Peterborough, and we fail to see how the ice could otherwise be removed.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. W. B. Irwin, of this city, has returned from a visit to Lindsay.

—Mr. J. C. Potts, of this city, visited Lindsay on business on Wednesday.

—Mrs. John Dixon, of Maple Creek, Assa., is visiting at the home of her brother-in-law, Mr. A. E. Dixon.

—Mr. Leo Clancy, of Hunter street, who has been seriously ill for the past two weeks, is now convalescent.

—Mrs. Edward Crossley, of Oxbow, N.W.T., is visiting with Mrs. Jos. Armstrong, King street.

—Mrs. A. L. Davis will not be at home today. In future Mrs. Davis will receive on the last Friday of each month.

—The marriage of Miss Bertha May, daughter of Mrs. W. J. Kennedy, of Peterborough, to Mr Chas. G. Graham, is announced to take place on Tuesday next.

—Mr. Launt Thompson, of Chicago, who has been spending a few days in town in the interests of the Tempest Apex Mining and Milling Company, left for his home in Chicago yesterday.

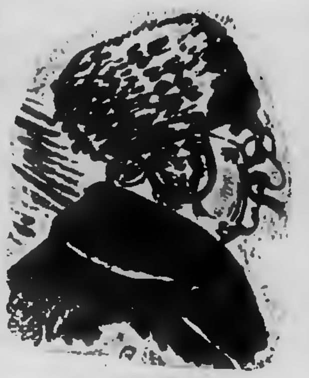
—Miss Wright, now in charge of Messrs. Richard Hall & Sons Millinery department, has returned from New York and other millinery centres where she has been selecting the latest novelties in millinery for Peterborough's modern store.

—Miss Ross, of Messrs Richard Hall & Sons millinery department, has returned from Toronto where she has been for the last month, looking up the latest ideas in millinery for Peterborough's modern store.

THINGS GENERALLY

BY AL JONES

They say as mi ole friend Billie Croft is lookin' fer truble in the curlin' line o' bizness. Fact he's issude a challinge I b'leve. I recklect one hot game me an' Billy was in in mi younger days, when I cood curl a little miself. I was last ter shoot an' Billy was expectin' me ter do my best. "Bring it rite roun' and strike the busom of this stone," said he, pointin' ter the one he ment. I didnt strike the busom. Fact I never struck near the busom an' I, of coarse got called down then an thar.



MR. WM. CROFT,
The Veteran Peterborough Curler.

I don't hear mutch about this here race between Harry the Brun and George Graham whitch was ter hev cum off ter-morrer. Hez it been postponded er hez the parties not hed time ter pracktis owin' ter the rain an' wind.

COMPLIMENTARY SUPPER

Mr. Thos. Barrie Entertained His Employes Last Night

McCallum's restaurant was the scene of an unusually happy gathering last evening, when Mr. Thos. Barrie entertained at dinner about 35 of his employes. The spread was of the daintiest viands and the table decorations were tasty and unique. Everything was in harmony with the merry guests, whose harmonious songs and witty sayings resulted in everything passing off as merry as a wedding bell.

The chair was occupied by Mr. Thos. Barrie and Mr. Ed. Hyland performed the duties of vice-chairman. At the conclusion of the supper, the usual loyal toasts were proposed and the health of Mr. Barrie drank. The latter called for three prolonged cheers and applause, showing such good feeling existing between the employer and those under him, as is worthy of the greatest emulation. At intervals between the various toasts songs and choruses were sung by Messrs. W. McCormick and J. Carey, the latter making everybody laugh with his "Bedelia Hockey Club," a song of his own composition.

Short speeches were made by Messrs. T. Barrie, E. Hyland, A. Brandrette, and others, and all present complimented Mr. Barrie on the most enjoyable evening. Not often do we find an employer so thoroughly in touch with his men as is Mr. Barrie, and 'twere well if his example were more widely followed.

LOUD TALKING ON THE MARKET

Farmer Got Drunk and Talked Too Much—Fined $6

Only one case was heard at yesterday morning's police court. A Peterborough farmer indulged too freely the other day, and imagined himself, then, of too great importance. He had brought in a load of hay, and refused to pay his toll. When market clerk, Warren Hall, remonstrated the said farmer delivered an oration that would look better out of print. His eloquence led to athletic performances and the police dropped in to investigate. He pleaded not guilty yesterday morning, but His Worship thought his performance worth $2 and costs, $6.15 altogether, and the transgressor straightway decided that the life of the "spieler" is a hard one.

The Magistrate, in giving judgment remarked that the market was open to all farmers, but a small fee had to be paid for its maintenance, and the market clerk was only doing his duty and should not be harshly treated.

NICHOLS HOSPITAL REPORT

72 Patients Treated During the Month of February

The following is a report of Nichols Hospital for the month ending Feb. 29, 1904:—

Number of Patients in Hospital Feb. 1	37
Number of patients treated during the month	72
Paid patients	57
Free	15
Patients from town	36
Patients from out of town	33
Discharged as cured	32
Improved	9
Unimproved	0
Died	2
Operations	20
Average Number of Patients per day	37

Dr. T. P. McCullough was the attending physician during the month, and the following doctors attended private patients; J. T. S. Halliday, Boucher, H. Pigeon, W. Caldwell, T. N. Greer, D. Carmichael, W. D. Scott, J. H. Eastwood, W. E. Brown, T. H. Young, F. J. Bradd and M. McClelland.

LOVE
Often leads to poverty. No real woman ever sold her heart for the luxuries of life. But many a woman who has gladly faced poverty for the man she loved, may well doubt her wisdom when pain becomes the mate of poverty. If she were rich, she thinks, she could find a way of cure.
$500 REWARD! FOR WOMEN WHO CANNOT BE CURED.
The proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb, which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.
"You have my heartfelt thanks for your kind advice to me," writes Mrs Geo. Fletcher, of 1ed Victoria Avenue, Galt, Ontario. "Was troubled with catarrh of uterus for over a year. The doctors said I would have to go through an operation, but I commenced to use Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' also his 'Lotion Tablets' and 'Antiseptic and Healing Suppositories.' Now I am completely cured, after using six bottles of Dr. Pierce's medicines. I am glad to say his medicine has made me a new woman."
Weak and sick women are invited to consult Dr. R. V. Pierce, Buffalo, N. Y., by letter, *free*.
Dr. Pierce's Pleasant Pellets are easy and pleasant to take. A most effective laxative.

ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

Are You Looking FOR A Good Investment?
If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.
If this is True, ARE YOU INTERESTED?
We Stand Ready to Prove the Following Statements:
We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men
We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.
We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.
We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.
We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.
We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at
30c. per share, par value $1.00
Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

USSIA IS ALARMED OVER THE RECENT PLANS OF JAPANESE

Would be a Terribe Blow For Russia to be Forced to Evacuate Port Arthur

al to The Times.

m, March 4—the correspondent The Times at Paris says; A St. eraburg despatch quotes a Rus- staff officer as follows in re- ence to the possible evacuation Porte Arthur.

tl" exclaimed the officer, "evac- e Port Arthur! What worse ster could befall the Russian y? It would imply the cap- e or destruction of our squad- , and one end of our railway ld be 'Dans la guele du Japon-' with the prospect of his awa- ing a larger piece. It would a terrible blow to Russia, from ch she would recover with dif- lty. Our army might continue fight while receding into Man- ria, and might conquer, but it ld be retreating, and no ad- ce would be possible before Port hur was recaptured. Therefore s not to be evacuated. That is operation which was never fore- n nor studied by the Russian ff, and we do not believe the Ja- se can take the place by main n."

RUSSIA NERVOUS.

respondent of the Times at Mos- says; The feeling at St. Pe- sburg is growing more tense rapidity of the Japanese mili- y movements and the compre- siveness of Japan's plans have le no less a sensation than her al vigor and initiative.

ussian military authorities have doubt that Japanese troops have ded at Gensan and Song-Ching well as west of these places, but y are sceptical of the reported nber, namely, four divisions of 00 men each. Moreover, they do believe that the Gensan contin- t are moving southward to- d Kirin, owing to the moun ous nature of the country. They convinced that the troops land- at Gensan will march on Ping g, as will also the troops t landed to the westward.

ng can be learned of the Rus- movements, but the officials test that Russia will not act at ent except on the defensive.

ort from Chefoo is printed of an agement Thursday near the u River. Small parties of ts are said to have exchanged ots. Both retired, apparently hout loss.

ese forces are slated to be with- three days' march of the Rus- encampment. The Russians retiring to await reinforce- nts. Heavy weather renders itary movements difficult.

Japanese cruisers, escorting ten nsports, have been sighted off efoo, steaming towards the -Tung Gulf. This movement is nected with the reported Japan- intention to land in North Kad- Bay.

Governor of Amur issued an cial proclamation on Feb. 5th, ling Japan as a paltry nation declaring that it was Russia's ven-sent duty to crush the re- entatives of the yellow peril, reby rendering a service to hu- nity.

kio despatch says; A telegram m Pingyang states that the sian forces at Anju and in the ghborhood number about 5,000. parently the force is mainly for ervation of the Japanese move- nts.

main force of the Russian army apparently gathering near Liao- ng, Manchuria. Small bodies in neighborhood of the Yalu and the neighborhood of the Yalu d in Northern Corea continue to tch the Japanese movements ey are making large use of na- alized Corea.

THE JAPANESE PLANS.

nt Burleigh, the Daily Tele- ph's special correspondent, who now at Chefoo, telegraphs that Japanese seem to have decid- to advance along the Pekin road from Seoul, which place they have already left. When they secure the Yalu River they will threaten Kirin, cutting the railroad and menacing Vladivostock, while another force deals with the Liao-Tung peninsula. The first big Japanese victory, which is more than likely if they keep their troops in the rough country, where the Cossacks cavalry will be of little value will mean an unauthorized rising of the Chinese, who will lend a great helping hand to the Japanese. Their Manchurian horsemen are bigger and better and braver riders and fighters than the Cossacks.

Other correspondents confirm the report of Japanese landings at Chinampho and Song-Chin. Their numbers are variously stated. It is obvious that there can be no trustworthy information on this point. There are many suggestions and conjectures concerning coming movements, but the Japanese are enforcing as rigid a censorship in Korea as in their own country, and no news of their movements can get out.

It is stated that the Russians have built a number of forts on both sides of the Yalu River, including extensive earthworks at An-Tung.

The Daily Telegraph's correspondent states that although Japan has lost a small cruiser, and had two battleships' machinery disabled and another vessel damaged, she has command of the sea, and will eventually blockade and isolate Port Arthur and the territory near Dalny.

The Morning Post claims to have good authority for stating that if Japan is successful in Manchuria measures will be taken with the view to preventing Russia from reassuming a dominant attitude there.

A NEW MINISTRY

Liberals in Great Britain Name Earl Spencer as Premier

London, March 3—So confident is the opinion held in innermost circles in the Liberal Opposition that dissolution may be precipitated within the next five or six weeks that already it is being assumed that the King Will sent for Earl Spencer to form a new Administration and that Lord Spencer's first step will be to offer the Foreign Secretaryship to Lord Rosebery, with the alternative of Sir Edward Grey if Lord Rosebery is found to adhere to his present determination of not taking office. Mr. Asquith is slated for the Chancellorship of the Exchequer, and Robert Reid for the Woolsack. These arrangement are being definitely talked of in the highest quarters of political life but on the other hand, I am informed that the Ministers have no intention of dissolving Parliament within any such brief peace as the Liberals are speculating on.

WHALES IN OUR WATERS

Legislation Regarding Them to be Introduced

Ottawa, March 3—The Marine and Fisheries Department has had more than a dozen applications from the Maritime Provinces for the exclusive privilege of taking whales in those waters. Legislation will probably be adopted next session to relugate this industry, from which Americans are now reaping a handsome profit. Even the coast waters between St. John and the main border are frequented by monsters of the fin-back tribe, often more than a hundred feet in length. It is too hazardous an occupation to attempt to take these leviathans by the harpoon, and so Parliament will be asked to sanction the adoption of measures such as will enable our own people to make a little money out of this industry and yet save the species from extermination.

Local Sports

CHALLENGE.

Mr. A. J. Burns hereby challenges Mr. D. Belland to a race of 5 miles, the course being from the Oriental Hotel to Downer's Corners and return.

The "Pig Iron Tigers" defeated the Martin—Stanley Piano Company's team at the Brock street rink Thursday night, the score being 7 to 2. The former are thereby entitled to the "Stanley Cup."

The Fifth Ward Juniors and the Intermediate team of the Y.M.C.A. will play a friendly game of hockey in the Brock street rink between 10 and 11 o'clock to-night. The following will represent the Fifth Ward

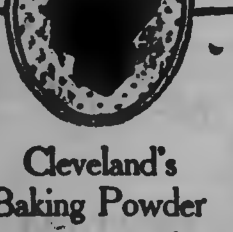
Goal—Sandbag Guerin.
Point—Newsboy Coughlin.
Cover-point—Broomstick Kylie.
Centre—Sir David Quinlan.
Rover—Rubber boots Seymour.
Right wing—Milkman Cox.
Left wing—Pillpounder Brady.

CURLING.

One game in the Kendry Cup series was played on Thursday night between R. Waddell and O. Rutherford. Waddell won, the score being 13 to 8. The rinks were;—

Moore	Winch
Hall	Lloyd
Medd	Brightman
Waddell, sk 13	O. Rutherford, sk 8

The remaining games in the Kendry Cup series may come off today or this evening.



Cleveland's Baking Powder is a pure, cream of tartar powder,—no alum. It does perfect work every time,—no failures. The housewife who uses Cleveland's Baking Powder knows the pleasure of serving the finest hot-breads, cake and pastry.

RUSSIA'S FIRST STAND

London, March 5th—There were no official reports of importance from the Far East this morning. The Russians are preparing to dispute the passage of the Yalu River and are heavily fortifying Antung, the Manchurian frontier town on the north side of the river opposite Wiju. As this news comes from Seoul, the present Japanese base, where cenorship is no doubt strict, it may be depended upon as a correct statement, and an indication of the scene of the first stand of the Russian army against the tide of war rolling northward day by day. The 2,500 Japanese who have landed on the northeastern coast of Corea, with the object of outflanking the Russians now gathered along the Yalu, have, according to Russian officers, gone on a wild goose chase, because the country is too mountainous to be penetrated. That should hardly be sufficient reason for forgetting the little band that has disappeared in the mountains. They will probably form a Cave of Adullam for all the discontented of the region. They no doubt carry rifles and ammunition for Japan's allies, the brigands, who have carried on guerilla operations in Manchuria ever since 1900, and who smash the railways whenever the Cossack guards give opportunity. It only requires the sight of the Japanese uniform in the interior of Manchuria to draw thousands of these guerillas into a concerted movement, and the 2,500 adventurers who are toiling through the passes of the White Mountains may emerge on the plains with ten times their present number of reckless fighters.

The prevailing military view in St. Petersburg is that no greater disaster to Russian prestige could be imagined. That is wrong. Sore as the blow would be, a much more serious one would be the sight of the garrison of Pt. Arthur leaving for Japan as prisoners of war. The panic at Vladivostok seems to be repeated at the Port of Neuchwang. The Liao River enters the gulf here, and everybody anticipates the arrival of a Japanese fleet when the ice leaves the river, which will be in two weeks' time. The ground is still frozen hard, and the Russians cannot throw up forts or entrenchments. The Japanese can, of course, isolate Port Arthur by cutting the railway at Yinkow, which is 150 miles northeast of Port Arthur. The Russians at Neuchwang have made preparations to retire northward toward Mukden, which will be Kuropatkin's headquarters. If a landing in force is made at Yinkow, the Russians will be menaced along a front of almost six hundred miles, extending from the Liaotung gulf on the west to a point near Vladivostok on the east. Japan can land men by water on over four hundred miles of this front, and Russia can move her forces to meet these attacks only by long and toilsome marches overland. It is a case of the light and handy boxer tiring out his ponderous antagonist by moving around the ring.

INTENSE INTEREST TAKEN IN WAR

The People All For Japan Says a Visitor

THE SITUATION IN POLITICS

No Real Test Has Yet Taken Place Regarding Mr. Chamberlain's Policy

Montreal, March 5.—"You would be surprised to see the intense interest that is being taken in the war between Russia and Japan in all classes of society in Great Britain. When I left London some few days ago, the sole topic of conversation on the streets, in the hotels and railway carriages, was the progress of the war. Neutrality is all very well, but if every country at war had the sympathy of another that sympathy, and I might say, moral support, is being extended to Japan by England today."

These are the words of Mr. Arthur Birchall, of London, to a Times representative in the rotunda of the Windsor today. Mr. Birchall is on his way to the West, where he has extensive land interests.

In reply to a question as to what effect a change of government would have on the present situation of strict neutrality in the event of the Balfour administration going to the country and meeting with defeat, Mr. Birchall said that there was very little chance of any change taking place in the present foreign policy no matter what party was in the ascendant in Great Britain. The complete neutrality of England in the present war was essential to the peace of Europe. One very suggestive feature of the feeling of the English people was to be seen in the fact that there had not been a single murmur when the naval estimates were brought down recently to the House of Commons. These estimates called for millinos of pounds sterling to increase and strengthen the navy and in spite of the fact that the recent South African war had left its mark on the pockets of the taxpayers the enormous expenditure proposed for the navy, was accepted with a grim resolve that the naval supremacy of Old England over all comers should be placed beyond the shadow of a doubt.

Speaking of a change of Government, Mr Birchall thought it very improbable that any change would take place at all events, in the near future. "Possession is nine points of the law that governs office," said Mr. Birchall with a smile, "and if the disjointed Liberal party, leaderless and divided, can put out the present administration under the present circumstances the chance is open."

RECENT BY-ELECTIONS

Alluding to the matter of the recent by-elections, particularly in Hertfordshire and the Normanton division of Yorkshire, where Liberal victories had been gained, Mr. Birchall said that they were no criterion as to the state of the feelings of the people. "From time immemorial by-elections in Great Britain have had a tendency to go against the reigning administration," he added. "The history of politics will prove that assertion. By-elections are generally fought out on local issues and it is only natural that the victorious side should attribute its success to the public condemnation or endorsement of a measure or policy that merely took a secondary position in the campaign. One cannot say that Mr Chamberlain's policy is being defeated at the polls. I think I can safely say that no real test of strength between the two opposing parties in the fiscal battle has yet taken place."

"What with Chamberlain and Japan, the British reader has his hands full just now," said Mr. Birchall laughingly. "Take those two subjects out of the daily papers and you have nothing left. We are not uneasy as to the outcome of the war. We may be standing in Japan's corner but there is no intention of taking a hand in the fight."

HOCKEY.

Arrangements have been made to have the Napanee team here on Monday night, but after being disappointed so often of late, we cannot expect them until the weather man grants permission.

FORESTERS' CARNIVAL LAST NIGHT

Was a Great Success, Both Financially and Otherwise

ABOUT 12,000 PRESENT.

Very Handsome Costumes—A List of the Prize Winners

The Fancy Dress Carnival held last night at the Brock street rink under the auspices of Court Peterborough, No. 29, Canadian Order of Foresters, was one of the most successful in the history of the rink. Over 1000 persons were present and nearly 150 were in costume.

The decorations were most elaborate, and hundreds of flags of all sizes produced a most beautiful effect. To attempt a description of all the beautiful costumes would be folly, as it was hard to judge, among so many prettily dressed ladies and gentlemen.

However we shall choose at random a few of the many beautiful and tasty costumes. The "Millionaire Tramp" was there full force, and when the disguise was removed we found our young citizen, Mr. R. J. Duncan. Mr H. Dunsford as an "Oregon 12th Knight," was conspicuous and W. J. Thurston's "Lord Nelson" was much admired. "Punch" and "The Indian Girl," were on intimate terms and the "Two little girls in Blue" were prettily dressed. Miss Alberta Gooding, as "Night" was beautifully attired, and Jessie Spence as "Quaker Oats," was most suggestive of cereals, and Mr. J. W. VanNorman, as a Dutch Cavalier certainly looked the part.

The following is a list of a few of the prettily costumed skaters.—Reg. Winch as "Queen of the Prairie," Hammond Lee, "French Cavalier"; Miss Gertie Armitage "Canada;" Miss Anna Brooks, "Cigarette," from the story "Under Two Flags," Miss M. Hay, "Dame Durden," M. H. Snyder, "Princess of Kensington"; Mae Kennealley, "Spanish Lady;" Effie McWhinnie, "Miss Buttercup," Edith Vinette, "Summer Girl," and others too numerous to mention.

There were "Queens of Hearts" and "Queens of Roses" "Days and Nights" without end, and even "Rags, Bones and Bottles," found a place in the lengthy list of prize seekers. There were "Dutchmen," "Irishmen," "Cowboys" and "Indians," All were on friendly terms last night.

The prize winners were as follows—

Best dressed lady in fancy costume—1st, Mrs. Snyder; 2nd. Miss Hay.

Best dressed gentleman in fancy costume—Mr. Mellish

Best dressed girl in fancy costume—Miss Brightman.

Best dressed boy in fancy costume—W. Martin

Best dressed lady in comic costume—1st, Miss Effie McWhinnie; 2d Miss Olive Chambleau.

Best dressed gentleman in comic costume—Geo. A. Wesley.

Best dressed girl in comic costume—Miss Jessie Spence.

Best dressed boy in comic costume—F. and C. Halpany, representing "It was the Dutch."

Master Earl Frenedburg received the special prize for the best representation of "Canada." The judges were Mr. and Mrs. P. Campbell and Mr. Hughes-Charles.

The Foresters are to be complimented on their great success, and the support they have received from the citizens of Peterborough will encourage them to again treat the public to an affair of this kind. The "Gent's Fancy" and the "Boys Fancy" and the special "Canada" costumes were designated by Mr. Reg Turner of J. J. Turner & Sons, who supplied the beautiful decorations.

Eyes Tested Free

Prof. J. H. DeSilberg, the eminent optical specialist from Germany, will be in Campbellford from Monday, Feb. 29, to Wednesday, March 2, and may be consulted at the St. Lawrence Hall Parlors; in Hastings, Saturday, March 5th, only at the Coughlan House Parlors; in Norwood from Monday, March 7th, to Wednesday, March 9th, at Dr. Moffat's Drug Store; in Keene, Thursday, March 10th, to Saturday, March 12th, at Dr. Harrison's Office; in Lakefield, Monday, March 14th, at Dr. Burgess' Drug Store. He will have a complete assortment of spectacles and eye glasses for young and old persons.

WAR CLOUD IN PARIS OMINOUS

Very Anxious Days For The Nervous in the French Capital

FRANCE NOT WITH RUSSIA

Reserves Called to be in Readiness in an Instant, Germany for the Muscovite

Paris, March 5—These are anxious days and sleepless nights for over-nervous French wives and mothers. Even the absinthe-drinking boulevardiers look serious as they discuss the possibilities of the war.

Reports are current today that the reserves have been called to be in readiness to move on twenty-four hours' notice. The fact is that they have been told not to go away for the present, but to remain ready to report in case of an emergency call.

There has been a revision of the young conscripts, who drew numbers at the beginning of the year to determine the length of their service, which should begin in April, but has been expedited. The conscripts have reported for examination March 1. This is regarded as significant.

The Times' correspondent has verified the report that all the officers of the merchant navy have been ordered to hold themselves in readiness to report to the fleet after March 6. The prefects in seaboard localities are also ordered to hasten the examination of candidates for the naval service.

A Lukewarm Ally

Deputy Jaure's utterances and the attitude of the conservative French press are making it clear to Russia that France is a lukewarm ally. Germany has accurately guaged the situation and is doing her utmost to win Russia's good will, proferring sympathy and manifest interest, hoping to break up the Franco-Russian alliance.

Russia is lending a willing ear, knowing that this course is sure to startle France into a realization of her existing treaty obligations. In order to stem the tide the French ministry is about to make a show of preparedness in case Russia calls upon her. Hence the order to the reserves and the hurried revision of the conscripts, although France has no real idea of fighting unless some overt act against Russia, committed by some other power, compels her to aid her ally or forever relinquish hope of alliance with any other nation.

APSLEY.

A local clergyman of this district, who lately returned from a visit to one of the Rathbun co.'s camps, relates an enjoyable and interesting trip. The camp, which is some 90 eet long, is both spacious and comfortable, equipped with the best of modern improvements, including sewerage, a well arranged ventilator and a sufficient number of spitoons and the interests of health are carefully provided for, especially in the sleeping apartment, which is separate from the wash room, as also is he office and dining portion of the camp.

The sixty men who are quartered here appear not only orderly but gentlemanly, which makes this camp as the "Camp of camps" in the new center model, and the foreman, Mr Simpson, of Lakefield, is certainly modelling after an ideal far in advance of the old time shanty business.

Among the novelties of this advanced system is the filling of the "watering tank," which holds some 50 bbls, by means of the horse and line, and which keeps the road in a most perfect condition, and also the loading by means of the pulley. This model is far beyond the one time use of the handspike, and certainly a valuable relief to the best use of the canthook.

And in the case where Mr. Jno Lean was successful in landing 73 pieces at the depot with one load, is sufficient to show how the lumber industry is thriving in our locality. Mr. Simpson will have completed his contract in a few weeks, in which we wish him good fortune throughout the season.

A DECISIVE MOVE IS ANTICIPATED ON PART OF RUSSIA.

Japanese Move Northward--Landing Troops at Chinampho, a Port in Korea.

Special to The Times.

Paris, March 4—Information received here from official sources in Corea confirms previous reports to the effect that Chinampho is free from ice, that the Japanese have ceased debarking troops at Chemulpo, and that they have taken advantage of the opening of Chinampho, to land troops there, thus expediting the forward movement.

Official advices from St. Petersburg confirm the reports that a decisive move is anticipated on the part of the present Port Arthur squadron, now that Admiral Makharoff has arrived there, that torpedo boats especially will be brought into play, and that, in spite of reports to the contrary, Russia is understood to have an ample supply of torpedoes for these craft

A PLEASANT EVENING SPENT

Young Mens Guild of Charlotte Street Church Entertainment

A large and appreciative audience listened attentively to an excellent programme furnished by the young men of Charlotte street church last evening. The various musical and literary selections were well received, and, judging from the applause accorded the performers by the ladies showed conslusively how high in their estimation the young men must stand.

The programme read as follows—

Chairman's Address	
Recitation	J. T. Anderson
Quartette, "Pale in the Ambes West"	Charlotte st. Male Quartette
Reading	Mr. Lattimer
Solo	Mr. W. Stocker
Reading	Mr. Robinson
Duet	E. A. Froude and N. Jolliffe
Reading	Mr. W. Campbell
Flute solo	Mr. Gowie
Reading	Mr. Treemer
Solo	Mr. E. A. Froude

The entertainment was concluded by singing the National Anthem, and all left feeling the better for a most pleasant evening.

MR. JOHN JENKINS DEAD

Well known Resident of this County Gone to Rest

Death has again visited our county and carried of one of its most highly respected citizen, in the person of Mr. John Jenkins, of Lakehurst.

The late Mr. Jenkins was born in England, and came to this country with his family some years ago. Since hat time he has lived at Peterborough, and at Lakehurst, and has become one of our most respected citizens. He leaves two daughters, Mrs. Warne, of Peterborough, and Mrs. Earl, of Lakehurst, and one son, Mr. Samuel Jenkins, to mourn his loss. His wife died some two years ago.

Mr. Jenkins was a member and a strong supporter of the English church here, and will indeed be greatly missed by both young and old.

The funeral took place on Saturday at two o'clock, to the Lakehurst cemetery, and was largely attended by his sorrowing friends and neighbors. The services at the house and at the grave was conducted by Mr. G. W. Rowan, the Presbyterian student at Lakehurst. The pall-bearers were Mr. Adams, Mr. Smith, Mr Coons, Mr. Tedford, Mr. Thompson and Mr. Northey.

DESPERADO SHOT

Held Up by Sheriff Who Afterward Organized a Posse

Mosse Jaw, MMarch 3— The final shooting of outlaw Jones is very satisfactory to residents along the big Muddy River. He was looked upon as one of the worst characters in that section, and had been a regular terror to everyone.

It is reported by Indians who have returned from this section that a sheriff called on Jones to arrest a man who was working for him for some offence. The sheriff started off with his prisoner, and several miles out he was overtaken by the outlaw Jones, who had pursued them. Jones got the drop on the sheriff, ordering him to hold up his hands. He did so and Jones then took the sheriff's horse, and disarming him, sent him home on foot, Jones returning to his cabin with the man who had been arrested.

The sheriff returned with a posse of 25 men, and started searching for Jones. It was sometime before he was located. He was taken by surprise and ordered to surrender. He immediately reached for his gun, but was fired on and shot through hthe body and head, instantly dying. His cabin contained all kinds of goods, which it is thought had been stolen.

HAD RELATIVES HERE

Late Hannah Cottingham was Neice of Mrs Rehill, Peterborough

A very large circle of Lindsay friends experienced deep regret Friday last when they heard of the death of Hannah Cottingham, daughter of the late Anthony and Hannah Cottingham, of this town, and only sister of Messrs. Wm., Walter and Albert Cottingham, respected citizens.

Deceased had been ill for some three or four months with lung trouble and rheumatism. The death of her mother a few weeks ago proved a great shock to her and seemed to deprive her of the desire to live. Despite the best medical aid and the loving services of devoted friends, she slowly sank, and on Friday her spirit passed to the eternal home of joy and peace.

Being a consistent member of Cambridge st Methodist church, the pastor, Rev. G. W. Henderson, visited deceased frequently during her illness, and on Sunday held an impressive funeral service at the residence before interment at Riverside.

Mrs. Rehill, of Peterborough, and Mrs. T. J. Parsons, of Omemee, aunts of deceased, were in attendance at her bedside since the death of her mother four weeks ago. Among other relatives and friends from a distance present at the funeral were David and Sarah Rea, Reaboro; Mr. T. J. Parsons, Omemee; and Mrs. Harding, Peterborough—Post.

SOLD WHISKY AT POST OFFICE

Jos. Hatley Fined $225 for Illegal Sale of Whiskey

Joseph Hatch is the proprietor of a store, and also has charge of the post office in the township of Anstruther. Joe also dished out intoxicating liquors as a sideline, and in consequence he was called upon to appear before County Police Magistrate Edmison, yesterday morning. Hatley it appears, had faced the charge before, and was let off with a warning, but this time, on the advice of his lawyer, he pleaded guilty, and was $225, including costs.

This was one of the heaviest sentences for a breach of the liquor act, ever imposed in Peterborough county. Six witnesses, who came from long distances, were present, thereby greatly increasing the costs. Two charges in all were entered, one for selling between Dec. 13th, 1903, and January 15th, 1904, and the other between Jan. 23rd, and Feb. 22nd of the present year.

In the first case the fine imposed was $50 and costs, in all $80.15, and in the second case $100 and costs, in all $144.53. This made a total fine of $224.68, and it is not likely Joe will sell any more whiskey

County Crown Attorney, R. E. Wood had charge of the prosecution, while the information was laid and the documents served by J. J. Crowe, the License Commissioner for East Peterborough.

THE FEDERAL LIFE

Annual Meeting—Decided Increase in Business During Past Year

One of the most successful insurance companies in America, the Federal Life, held its twenty-second annual meeting at the Company's Head Office in Hamilton, on Tuesday, March 1st. That the company is most progressive and reliable, is readily seen by the increase in business during the year, of one thousand nine hundred and fifty-seven applications for insurance, aggregating $2,841,250. Of these nineteen hundred and sixteen applications for $2,748,112.50 were adopted.

The increase in the income of the Company is most gratifying, and the assets have been increased by $251,572.89, and they have now reached $1,883,960.70, exclusive of guarantee capital. Including cash dividends and dividends applied to the reduction of premiums, $41,770.79 with annuities, the total payments to policy holders amounted to $204,018.49 Careful attention has been given to the investment of the Company's funds, in first class bonds, mortgage securities, and loans on the Company's policies amply secured by reserves, and the investments have yielded a very satisfactory rate of interest.

The total assurance now carried uy the Company totals $14,945,249.56, upon which reserves, to the full amount required by law, are held, and in addition thereto a considerable surplus On the whole the results of the year show marked prosperity, and there is every likelihood of the increase being even greater during the ensuing year.

Mr. George Pope, the popular local representative of the Federal Life, and who has under his charge the Counties of Peterborough, Victoria, and Haliburton, reports an excellent increase in business during the past year. His new and attractive office on George street, just recently occupied, should tend to assist in increasing the business done next year.

WEDDING BELLS

Miss Charlotte Nicholls and Mr. A. E. Miller United

A very pleasing event took place on Wednesday last at the residence of Mrs. Thomas Nicholls, 199 Reid st., when her daughter, Miss Charlotte Nicholls, and Mr. Albert E. Miller were united in marriage. It was a quiet though very pretty wedding, and at the reception and dinner, which succeeded it, the newly-married couple received many appropriate favors from their friends in attendance. Rev. J. Bastow, pastor of Murray street church, officiated. Mr. and Mrs. Miller will reside in town.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

RUMORS

When the Greeks wished to depict Rumor they painted her full of tongues. It was recognized then as now that the vague, elusive report, coming no one knows whence, is the result usually of a word dropped and picked up and repeated until it assumes shape and form.

It is safe to say that there are relatively few deliberately false rumors save those set afloat by stock jobbers to influence prices or by military commanders to deceive the enemy. To these must nowadays be added the manufactured reports of disreputable journalism, in the absence of authentic news, misleads its readers. The average rumor, however, is not the product of falsehood, but of misunderstanding, excitement haste.

The war in the Orient has kept the rumor mongers busy and the remoteness of the scene of operations has rendered the field a particularly fruitful one. A chance remark caught up by a correspondent at Tokio becomes an "unconfirmed rumor" at Shanghai, and "an apparently well-founded report" by the time it gets to Berlin or London. Nobody is deliberately misrepresenting. It is only the story of "The Three Black Crows" over again.

The Anglo-American Club at Hong Kong, which acquired the sobriquet of the Liars' Club through its dissemination of unverified intelligence during the struggle in the Philippines, is declared by a member of it to be entirely undeserving of the unflattering designation. This gentleman maintains that there was no intentional misrepresentation and that the trouble was due to the repetition of stories by one member to another until all trace of the original report was lost. The governors of the club have taken the nickname to heart, at any rate, and members have been warned to exercise care in making the organization responsible for war news during the Russo-Japanese struggle.

The warning probably will have the effect of cutting off a considerable quantity of interesting, if not entirely reliable, information from the seat of war, but there will be plenty from other sources. So long as men meet and inquire of each other, "Have you heard?" or "Is it true?" so long shall we have rumors of battles and defeats and victories which may or may not prove to be true.

In the meantime it will be interesting to see how long the Anglo-American Club can stand enforced silence without exploding. The regimen is a hard one for a social organization.

Your Children Are Run Down

They Are Liable to Get Fever or Pneumonia. Keep Your Little Ones Strong and Healthy with Ferrozone

Parents can't afford to neglect the health of their children, for if disease fastens itself on the child of tender years it may be the beginning of a long train of serious sickness. Ferrozone is a remedy that mothers can rely on, and every child will be benefitted by using it. Mrs. Henrietta Laflame of Quebec, writes; "Last year my daughter, aged sixteen, was run down and looked very poorly She was worrying about her exams, and she didn't feel strong enough to study very hard. I got some Ferrozone and it made a wonderful change in Marie. Ferrozone gave her strength and toned her up splendidly. I am very grateful to Ferrozone and know that children would be much stronger if treated with Ferrozone."

CHILDREN GROW STRONG ON FERROZONE

Mrs. James E Devine of Frankford, says Ferrozone has no equal for strengthening children, and writes; "When my little daughter was weak and miserable I gave her one Ferrozone tablet at meals. She improved at once, and before taking Ferrozone a week gained in strength, and enjoyed a splendid appetite. I never used any tonic that gave such quick and permanent results as Ferrozone."

Every child can be made stronger by Ferrozone which acts on the blood and strengthens the entire system. Ferrozone is the sort of tonic that builds up strong healthy frames; it gives a child energy and spirit, and drives away weakness. Every mother should give her children Ferrozone, and give up all obsolete treatments like bitters and cod liver oil, which are hard on a child's stomach. Just one Ferrozone tablet at meals, easy and pleasant to take. Results are sure when you use Ferrozone. Refuse any substitute and insist on having Ferrozone which alone can build up and cure quickly. Price 50c. per box or six boxes for $2.50, at all druggists or by mail from N. C. Polson & Co., Kingston. Ont., and Hartford, Conn., U S A.

APSLEY.

A local clergyman of this district, who lately returned from a visit to one of the Rathbun co.'s camps, relates an enjoyable and interesting trip. The camp, which is some 90 feet long, is both spacious and comfortable, equipped with the best of modern improvements, including sewerage, a well arranged ventilator and a sufficient number of spitoons and the interests of health are carefully provided for, especially in the sleeping apartment, which is separate from the wash room, as also is the office and dining portion of the camp.

The sixty men who are quartered here appear not only orderly but gentlemanly, which makes this camp as the "Camp of camps" in the new center model, and the foreman, Mr Simpson, of Lakefield, is certainly modelling after an ideal far in advance of the old time shanty business.

Among the novelties of this advanced system is the filling of the "watering tank," which holds some 50 bbls, by means of the horse and line, and which keeps the road in a most perfect condition, and also the loading by means of the pulley. This model is far beyond the one time use of the handspike, and certainly a valuable relief to the best use of the cantbook.

And in the case where Mr. Jno. Lean was successful in landing 73 pieces at the depot with one load, is sufficient to show how the lumber industry is thriving in our locality. Mr. Simpson will have completed his contract in a few weeks, in which we wish him good fortune throughout the season.

THE FEDERAL LIFE ASSURANCE COMPANY OF CANADA

TWENTY-SECOND ANNUAL STATEME N

The Twenty-second Annual Meeting of the Shareholders of the Federal Life Assurance Company of Canada was held at the Head Office of the Company in Hamilton on Tuesday, March 1, 1904. The President, Mr. David Dexter, in the chair. The following reports and Financial Statement were submitted;

DIRECTORS' REPORT

Your Directors have the honor to present the Report and Financial Statement of the Company for the year which closed on the 31st December, 1903, duly vouched for by the Auditors.

The new business of the year consisted of one thousand nine hundred and fifty-seven applications fo insurance, aggregating $2,841,250, of which nineteen hundred and sixteen applications for $2,748,172.50 were accepted.

As in previous years, the income of the Company shows a gratifying increase, and the assets of the Company have been increased by $251,572.89, and have now reached $1,893,960.70, exclusive of guarantee capital.

The security for Policy-holders, including guarantee capital, amounted at the close of the year to $2,763,960.70, and the liabilities for reserves and all outstanding claims, $1,711,200.00, showing a surplus of $1,052,760.70. Exclusive of uncalled guarantee-capital, the surplus to Policy-holders was $182,760.70.

Policies on seventy lives became claims, through death, to the amount of $130,234.62, of which $2,000 was reinsured in other companies.

Including cash dividends and dividends applied to the reduction of premiums, $41,770.78, with annuities, the total payments to Policy-holders amounted to $204,018.49.

Careful attention has been given to the investment of the Company's funds, in first-class bonds, mortgage securities, and loans on the Company's policies amply secured by reserves. Our investments have yielded a very satisfactory rate of interest.

Expenses have been confined to a reasonable limit, consistent with due efforts for new business.

The results of the year indicate a most gratifying progress. Compared with the preceding year, the figures submitted by the Directors for your approval show an advance of fifteen per cent. in assets.

The assurances carried by the Company now amount to $14,945,219.56 upon which the Company holds reserves to the full amount required by law, and, in addition thereto, a considerable surplus.

The field officers and agents of the Company are intelligent and loyal, and are entitled to much credit for their able representation of the Company's interests. The members of the office staff have also proved faithful in the Company's services.

Your Directors regret to report the death of Mr. T H. Macpherson, the 2nd Vice-President of the Company, and a valued member of the Executive Committee. The vacancy thus caused was filled by the election of the Rev. Dr. Potts.

DAVID DEXTER,
President and Managing Director

AUDITORS' REPORT

To the President and Directors of the Federal Life Assurance Company;

Gentlemen,—We have carefully audited the books and records of your Company for the year ending 31st December last, and have certified to their accuracy.

The cash and journal vouchers have been closely examined and agree with the entries recorded.

The debentures, bonds, etc., in the possession of the Company have been inspected, whilst those deposited with the Government or banks have been verified by certificate, the total agreeing with the amount as shown in the statement of assets.

The accompanying Statements, viz., Revenue and Assets and Liabilities, show the result of the year's operations, and also the financial position of the Company.

Respectfully submitted.

H. S. STEPHENS,
CHARLES STIFF,
Auditors.

Hamilton, 1st March, 1904.

FINANCIAL STATEMENT FOR 1903

Premium and Annuity Income	$497,931 77	
Interest and Rents	76,264 63	
		$ 574,196 40

High Class Investment
T I OREGON MINING AND SMELTING COMPANY
Offer to Canadian investors a limited amount of stock of the above compan
The property owned by the Company consists at the present time of abou
500 acres, which are located in the Tarryall District and Park County, Colo
rado. This whole district has been known for years on account of its ric
placer ground, and is now prominently before the public owing to the num
ber of very good properties which have been opened up recently producing
principally, gold, and lately some that are producing Platinum. On th
Oregon property there are a number of well known veins of low grade or
that will yield a profit by being treated on the ground of the company. Th
company have recently opened up a fine vein in the Hawkeye group an
this vein shows not only good values but an immense amount of ore whic
alone would make the property very valuable. Assays from ore taken fro
various parts of this property range from a few dollars to $373 per ton i
gold. We have very little silver, lead or copper in the district. The com
pany have a shaft 240 feet deep, with a good shaft house thoroughly we
equipped with all modern machinery to develop same. They are now driv
ing a tunnel which is in about 700 feet and which will cut the Hawke
vein about 300 feet deeper than where it is opened at present. There
enough ore exposed on the property of this company to keep them busy f
a number of years and the reason for selling stock at the present time is t
secure funds to build a mill. The company will probably join with the A
maden Company in building this mill. There is water enough to furni
water power and over 100 acres of fine spruce and pine timber. The affai
of the company have always been managed in a business like economic
manner and there are no officers' salaries. The monies received from th
sale of stock go direct into the property.
I can heartily recommend this stock as safe, as well as an unusual
good investment, because of the immense amount of ore which the compan
have already opened up. It is not a mere prospect, but the property h
been developed by expense of a considerable amount of money and tim
The company is splendidly officered by men of integrity and hi
standing. The company has not pushed the sale of stock the last ye
owing to a delay in getting title to the ground from the Government, b
now that has been satisfactorily adjusted and work will be pushed to a fini
The number of exceedingly rich strikes which have been made dur
the last few weeks in the various camps in the State of Colorado is the b
evidence of the prosperity of the mining business. Almost every camp
the state has opened up rich bodies of ore, and Park County is well in t
lead in that line.
There are only $25,000 of stock for sale, at $1.00 per share. T
company is capitalized at $200,000, and the advantage to the investor
selling the stock at par, is that every share is fully paid up and non-asse
able.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 20th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 7-28-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

RUSSIANS ANXIOUS OVER THE DISAPPEARANCE OF THE JAP'S FLEET FROM PORT ARTHUR

Heavy Reserves Are Being Sent to the Yalu to Check The Japanese Forces---The Railway Kept Open

SMALLPOX SCOURGE

Already Sixty Victims in the North West Territories

Winnipeg, March 4.—A scourge of smallpox has nearly wiped out the Indians of the Isle of Lacrosse district, sixty victims being numbered within a few weeks. The epidemic is still in active operation, according to last reports, and has extended to Portage La Roche, and the frenzied natives, fleeing from the danger, are spreading the disease. The Catholic mission at Lacrosse, under Father Simeon, is making heroic efforts to cope with the dread situation. An expedition, provided with medical comforts, and escorted by a body of North-West Mounted Police, had been despatched to the scene. Dr McCullough, of Battleford, is in Chicago for the medical equipment, and has orders to vaccinate every person he encounters in the affected district.

May Sink Ships and Abandon Port Arthur—Chinese Asked to Betray Japanese Spies.

New York, March 3 —Ominous rumors, says a cable from St. Petersburg to the Herald, have spread through business circles that Port Arthur will be abandoned to the enemy, after sinking the ships, as was done in the Crimean war.

SEARCH FOR SPIES

Vladivostock, March 3—The police have placarded the city with notices in Chinese and Russian, calling on the Chinese to betray Japanese spies masquerading in Chinese clothing.

IN TIME OF PEACE PREPARE FOR WAR

This is What Canadian Authorities are Now Doing

Ottawa, March 4.—Enquiries are being made by military experts as to the troops that could be mobilized and placed in the field for the defence of Canada in case of a grave contingency, also to the supplies of ammunition. The Dominion arsenal at Quebec is capable of turning out sufficient ammunition to meet present needs, but the idea is to increase the quantity to an extent that would meet a serious emergency. Hence it is likely that a surplus will be accumulated, and supplies stored at convenient strategical points in the country. The location of these magazines will be kept secret, and known only to military officials whose discretion can be depended upon.

Special to The Times.

St. Petersburg March 3—Since the disappearance of the Japanese fleet from before Port Arthur, the Russian authorities have been waiting anxiously for the next move of the Japanese on the sea. There is an inclination here to believe that the Japanese have been discouraged by the failure of their attacks, and perhaps by losses they have not announced.

It is evident, even from the meagre information regarding Russia's dispositions in Northern Corea, that the plan for checking the Japanese land advance is perfected, and that heavy reserves are being brought up to the Yalu River.

Every energy of the authorities is now directed to prevent a blockade on the Siberian railroad. Twenty new sidings, each of 2,200 feet, are being erected. Owing to the heavy movement of rolling stock carrying reinforcements, war munitions and commissary stores eastward, there is a great danger that in bringing back the empty cars the whole line may be stopped. With the sidings now building, the authorities hope to be able to keep the line clear, and to send eleven trains in each direction daily.

FRANCE STRICTLY NEUTRAL

Paris, March 3—Credence is not given by the Foreign Office to the reports that China is on the eve of joining Japan in the war. All the advices received here indicate that China proposes to observe her declaration of neutrality, and that the Chinese troops sent north have instructions to enforce her neutrality. It is understood that China disavowed any collusion between her troops and the Chinese outlaws, explaining that those who have joined the latter are deserters, and that in the undisciplined state of the army it is impossible to prevent them from leaving.

OLD MESA GOLD CO.
—OF—
ARIZONA.

Company owns six mining claims in Big Bug Mining District, fifteen miles southeast of Prescott.

$40,000.00 IN FREE GOLD

has been mined from near the surface. Value of ore, $20 to $125 per ton in free gold. A long tunnel is being driven to intersect this rich ledge at great depth. The tunnel is now into the mountain 550 feet, and the work is being prosecuted night and day.
Capital stock $1,000,000 00, par value $1 00 per share.
Treasury stock selling at TWENTY-FIVE CENTS PER SHARE for development purposes only.
The property is managed by business men and mining men of Prescott, Ariz.

P. S.—Wanted a few responsible Agents to sell stock. Only those who can furnish references.

ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for. and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amout of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

PRESS PRAISES HARCOURT

AND REGRETS THAT THE GREAT ENGLISH PARLIAMENTARIAN IS TO RETIRE

Financial News Expresses an Expert Opinion on the G. T. P. Scheme

London, March 2—The press of the whole country expresses regret at the announcement of the approaching retirement of Sir William Vernon Harcourt. The Times laments the disappearance of a picturesque personality from the House of Commons where he stood as the representative of larger days.

The London Daily Mail says nothing could be simpler than the unostentatious announcement of the 'old Reservist' to withdraw from politics—a man who has sacrificed great ambitions and a great fortune for Liberalism and the state.

The Daily Graphic pays a high tribute to Sir William's courage, and says he has maintained more than any man among his colleagues, the doctrine that the Opposition exists to oppose.

The Telegraph calls Sir William "the last of the great Parliamentarians," and says he played the part in British politics that Mirabeau played in the early days of the French Revolution.

GREATER THAN C.P.R.

Such is a British Estimate of the Grand Trunk Pacific.

London, March 2— The Financial News says the Grand Trunk Pacific scheme exceeds in magnificence even that which excited admiration and scepticism when the C. P. R. was broached. The Grand Trunk should now be called "the Little Trunk." There is every reason to believe that the shareholders on Tuesday will heartily support the G. T. P. scheme for the advantages to the G. T. R. far exceed the risks.

A MOCKERY OF IMPERIALISM

Mr. Redmond Thus Designates Colonial Contribution to British Navy.

London March 2—Lady Lugard (formerly Miss Florence Shaw,) of London Times and Klondike fame, in a lecture yesterday, declared it was a possibility that Nigeria would produce the greater part of the raw material required by British cotton manufacturers.

Mr. Redmond, speaking in the House of Commons in the navy debate said the small contribution of the colonies to the expenses of the navy was a mockery of Imperialism. Ireland's contribution should be the same as Australia, as she had no over-sea trade.

Lord Cecil, addressing a free trade meeting at Wilmslow, said the speaking out of the Unionists implied no disloyalty to the Government, for the Government was still hesitating about protection. When protection was defeated retaliation would receive a respectful hearing. A colonial preference was not needed, since there was no colonial disloyalty, and the empire was immeasurably more united than fifty years ago.

In Interest of Immigration

Ottawa, March 4.—The Department of Immigration has arranged for a number of personally conducted parties from Liverpool to Winnipeg this spring. The first party left on the steamer Manitoba yesterday under the direction of Mr. R. J. Masters.

EVERYBODY READS THE TIMES.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $3.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Hule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed. and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $106,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent. which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

RUSSIAN RAILWAYS ARE BUSY CONVEYING TROOPS

Every Railway in Russia in the Country now Working Overtime

St. Petersburg, March 4 — Every railway in Russia is carrying soldiers to junction points that connect with the Trans-Siberian Line. Troop trains are followed by processions of cars loaded with ammunition, guns, two-wheeled carts, provisions, army kitchen utensils, and hospital supplies. The soldiers are generally between twenty-one and twenty-seven years of age, beardless and full of vigor. They wear bulky fur caps and heavy felt boots. Their uniforms are plain almost to the point of meanness. Each man has two sets of underclothing, a long thick overcoat, and a short sheepskin jacket.

When the troops reach the military storehouses east of Lake Baikal they will be provided with long sheepskin overcoats and double jackets of deerskin or goatskin. Each company, under the direction of its captain supervises its own kitchen and nominates its cook and provision master. All matters pertaining to the company are managed with great efficiency, as the majority of the soldiers are peasants, accustomed to a highly developed communal life.

There is a serious scarcity of provisions, and the troops en route to the Far East are living principally on thick, sour soup, with cabbage. Meat rations are sparingly distributed in view of delays by the way. Tea is not provided by the authorities, but nearly every company supplies itself, though the men receive only seven roubles ($3.60) a year. The captains say that tea keeps the rank and file in humour to bear hardship, and face danger.

General Kuropatkin is daily inspecting the contingents bound for the front, and declares that they will astonish the world by their willingness and capacity to meet the exigencies of the campaign.

Dinners are being given regiments in their native towns and cities before they leave for the front. These functions are attended by civil and military officials in uniform and decorations. The dinners are served by women. In these scenes of animation the soldiers behave with a civil dignity that impresses even hostile critics with a sense of their fitness for trying work. The majority of them are fresh from lives of extreme frugality and even privation. Their eyes are bright, their flesh firm, and their frames well-knit and muscular.

ARE AFRAID OF THE FOREIGNER

British Manufacturers Fear Retaliation

OPINION IS DIVIDED ON IT

For Others Believe That Colonial Trade Will Continue to Increase with Preference

London, March 4.—The Sheffield council of the Chamber of Commerce has issued a report containing the summary questions recently submitted to the members respecting their views of the fiscal policy. On the question whether the power to levy retaliatory tariffs would lead to the amelioration of foreign tariffs, a majority approximating three to one were of the opinion that such power would. Those who are of the opinion that the Colonial tariffs have not had injurious effects upon their trade are in a slight majority, but others point out that the risk lest the Colonial markets should become protected markets and be closed to the British manufacturer. Others stat that the colonial trade is largely increased by reason of the existing preferences to the extent of 10 to 300 per cent., and the Canadian preferences have stimulated trade with the Mother Country considerably.

IMMIGRANTS COMING.

The Lake Manitoba yesterday sailed for Canada with over one thousand steerage passengers, 700 of whom are continental emigrants, including Italians, Austrians, Hungarians, Russians and Galatians. The balance include one hundred young men emigrating under the auspices of the Canadian Farmers' Help Society.

CHICAGO NOW IN A UNION LABOR WAR

A Campaign Against Unionism in Every Form

CITY TIRES OF STRIKES

Organized Work men are Accused of Tyranny, Assault and Inciting Riot

Chicago, Ill., March 4 — On the ground that "to have the strength of a giant is excellent, but to use it like a giant is tyrannous," grand jurors, courts and the Employers' Association have been invoked to wipe out the outrages that have been inspired or winked at by labor unions of Chicago. Already half a hundred men have been indicted by the December and January grand juries for assault, intimidation, conspiracy and inciting riot. One man has been convicted, and the chances are that a score or more of others will feel the weight of the law before the snows of winter are gone.

Chicago is aroused as it never was before against what it calls the tyranny of union labor. The city has suffered untold loss by reason of strikes, riots and lockouts during the last year. The teamsters' strike, nearly a year ago; the restaurant and hotel tie-up, the strike of the Chicago City Railway Company, on the Kellogg Company, on the Illinois Steel Company, on the printing trades —these are a small portion of the disturbances which have been featured with violence.
property has been destroyed, lives have been sacrificed, persons maimed for life and common rights trampled upon until the limit of endurance has been reached, according to the expressed views of property owners employers and manufacturers.

A Fine Proposition

We call the attention of investors to the advertisement of the Old Mesa Gold Company, which appears on the 6th page of today's issue. This proposition is one that should prove attractive to Canadian investors. A lengthy write-up of the property will appear in a few days.

THE SOO WORKS

Reorganization All but Complete of Lake Superior Company

Toronto, March 4.—It is announced that within six days the plan for the reorganization of the Consolidated Lake Superior Company will be declared operative, all obstacles having been finally swept aside. The reorganization committee probably will enter upon possession of the properties next week. A new company will be incorporated immediately thereafter with a capital of one class only of $40,000,000. First mortgage 40 year 5 per cent. gold bonds, to the amount of $10,000,000, will be issued, together with five per cent. gold income bonds, bringing the total bonds and stock of the new company up to $53,000,000. The new bonds will be offered to the old stockholders at 70 per cent. of their face value. In the meantime the works will be operated as at present, and with the opening of navigation the steel plant will be started. It is expected that Cornelius Shields will be selected as general manager of the new company.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble on my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can see my name if you wish.

Yours truly,
MR. JOHN WOOD,
Parker Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P.E.I., writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

An Engagement Extraordinary.

According to the Paris correspondent of the London "Telegraph," a determined suitor recently found a new way of using the motor-car for matrimonial purposes. The object of his affection was willing to wed him, but her parents were obdurate. He pretended to give up hope, and to be reconciled to the idea of being merely a friend of the family, and he took out the girl and her father for an automobile drive to Havre. At a dangerous part of the road he suddenly put on full speed, and the car sprang away at a terrific rate. The girl sat still and showed no fear, but her terrified father shouted to the man who wanted to be his son-in-law to stop. "Consent to my marriage with your daughter" was all the motorist replied. Still the car tore along, and if any obstacle had appeared in the road at least three fatalities would have occurred. "Stop! We shall all be killed!" the girl's father continued to cry. "Most certainly we shall," said the determined young man grimly; if you don't consent at once I am going to send the machine into the ditch, and at this rate that means quick death." As he spoke he imparted violent lurches from side to side to the car. "I consent!" gasped the now vanquished parent. Immediately the car slowed down, and the rest of the journey was done at a steady touring pace. But during the motor's previous mad career a policeman had jotted down its number. When the girl's father, to whom the machine belongs, appeared in court to answer to the summons, his future son-in-law accompanied him, and looked exceedingly pleased with himself. When a fine of sixteen francs was imposed the younger man said he would pay it himself with pleasure. He confided to the magistrate that the day has been named.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLE EAUME,
A. J. SANBORN, ALEX. J. CHAPTO
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever nonassessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a pick or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material,

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—*Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.*

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M E,, formerly of Middletown, Conn,, who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A VALUABLE PAPER.

Legislative Proceedings of the First Session of Upper Canada.

In a recent report to the Legislature, Mr. Pardee, the Legislative Librarian, stated that he believed copies of parts at least of the missing journals of the early years of the Upper Canada Assembly and Council might be found among the papers of some of the older families. The suggestion has produced excellent fruit. The other day Mr. Christopher Robinson, K.C., delivered to the Librarian a manuscript of the first session of the first Parliament in Upper Canada in 1792, in the handwriting of Angus McDonell, Clerk of the House. The manuscript was accompanied by a letter from Hon. Alex. McDonell, ex-Speaker of the Legislature, to Chief Justice Powell, dated in 1821, committing the document to the care of the Chief Justice and showing by its terms that even at the early date the absence of printed records was already beginning to be felt. Hon. A. McDonell was Speaker from 1805 to 1812, and C. J. Powell held his office from 1816 to 1825. This manuscript seems to have passed with his papers to his successor, Mr. Campbell, and from the latter to the next incumbent of this office, Hon. John Beverley Robinson, afterwards Sir J. B. Robinson, Bart., father of Christopher Robinson, K.C., the donor.

The document is a most interesting and valuable one. Mr. Pardee says that from a rapid inspection he is convinced that the M.S.S. is fully entitled to be called the original journal, so far as there was (or is) anything that can be called the original journal. Except this MSS. there is no other record of the proceedings of the House save the copy which had to be sent to the Colonial Office in London, and has heretofore been supposed to be the only record extant. A hasty comparison of the two gives reasonable grounds for believing that the Colonial Office copy was copied from Mr. McDonell's MSS., as the former is somewhat condensed here and there.

It is known from some entries in the accounts that a short time after 1792 the House began printing its journals from day to day, much in the same way as is done at present and a few of the daily numbers have come down, but previous to 1825-26 there was no yearly volume, and even the Colonial Office copy of the MSS. for some years has disappeared. It is supposed that the vessels carrying them were captured by French or American cruisers.

Mr. Christopher Robinson also presented to the library the following interesting papers:

A table of precedence in Upper Canada, taken from a rough copy, corrected by Hon. John Elmsley, Chief Justice, in 1797.

A statement showing expense of administration of justice for 1820; the original document as laid before the House.

A British-Canadian Extra of 7th August, 1845, being a map of Canada West, showing the route of the proposed railway from Toronto to Sarnia.

Following is the letter from Alex. McDonell referred to above.

"York, March 21, 1821.

"My dear sir: You will probably smile at my transmitting to you the accompanying document. The only importance, if any, that can attach to it is that it is the first journal of the first Parliament of Upper Canada, of which neither the original nor any other copy is now in existence. The whole is in the handwriting of my deceased brother, Angus. Some years hence the perusal of it cannot fail of being interesting, and to your charge I feel a gratification in committing it—mum, as to the clerk and chaplain. Believe me, my dear sir, ever yours, with great respect and affection.

"Alex. McDonell,

"The Hon. the Chief Justice.

Late for the Party.

Mr. Harry Gummer, well known among the newspaper fraternity of Canada as proprietor of The Guelph Herald and all-round good fellow, held a card party the other evening at his residence, Waterloo avenue, Guelph. Among the guests was a well known Brantford physician—Dr. Blank, for convenience.

The evening was a merry one, and the hours slipped by quickly, says The Toronto Star. The train that Dr. Blank was to arrive on was due in Guelph at 5 50, and when 8.30 came, and the resident from the Telephone City did not arrive, it was feared he had missed the train or been delayed by the storm.

Two-thirty found Mr. Gummer turning down the gas and preparing to retire, and "When the lights had fled, the garlands dead, and all but he departed," there was a loud ringing of the door-bell.

Mr. Gummer put his head out the window above.

"Hello!"

"Hello, yourself!"

"Well."

"It's me."

"Who's me?"

"Dr. Blank."

In a moment the door was open and Dr. Blank was inside. It took him nearly 24 hours to thaw out, as he had left the train five miles out of Guelph and walked in over the snow-drifts.

Wide Range of the Moose.

The range of the moose in North America is of enormous extent, from Nova Scotia in the extreme east, throughout Canada and certain of the northern United States to the limits of tree growth in the west and north of Alaska. Throughout this vast extent of territory but two species are recognized—the common moose, Alces americanus, and the Alaskan moose, Alces gigas, of the Kenai peninsula—but it is probable that further exploration will bring to light another species near the head waters of the Laird River and the Sassiar Mountains of British Columbia and still another farther north in the neighborhood of the Colville river.—Field and Stream.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

AND

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

Powerful Healing Effective Cure

FOR COLDS, COUGHS, CATARRH BRONCHITIS AND ASTHMA

Simply Inhale Catarrhozone; it Cures Because it Goes where the Disease Actually Is.

These diseases cannot be cured by stomach medicines; they must be treated locally. Catarrhozone is inhaled to the very source of the trouble, and gives the diseased membranes local treatment with the strongest, most-healing antiseptics known.

After one trial of Catarrhozone you will wonder how you ever lived without it. Nasty colds in the head it cures in an hour, coughs are stopped in two hours, and catarrh and bronchitis are relieved at once. Nothing could be simpler or more pleasant than to inhale the fragrant vapor of Catarrhozone. Nothing is half so certain to cure your trouble permanently.

Nor is proof of Catarrozone's merit lacking, for it is endorsed more strongly by the medical profession than any other remedy. Its superiority to-day is unquestioned, and its sale by far exceeds that of any other two remedies on the market. Why? Because it does what is claimed for it—cures permanently those who use it for any disease of the breathing organs.

Mr. S. E. MacAuley, the well-known attorney of Portland, endorses Catarrhozone in the following letter. "I am anxious to make known that after three years' suffering from weak throat and catarrh, I have been cured by Catarrhozone. I was treated by many doctors of wide reputation. I have used scores of different remedies. I have suffered everything catarrh entails and I am convinced that no medicine is so sure to cure as Catarrhozone, which did me untold good and completely eradicated this awful disease from my system."

Complete outfit, guaranteed to cure, costs $1, sample size 25c. At all druggists or N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A. Beware of substitutes and insist on getting Catarrhozone when you ask for it.

Six handsleighs at 25 cents will be sold for 18 cents; four 40 cent sleighs for 27 cents; two 75 cent sleighs for 45 cents, and two, high beam, steel runners and beams, regular $2.50 sleigh, for $1.50. Times Bookstore, Market Block.

Increase in Custom Returns

The returns of the Custom House for the past month are most satisfactory. The total receipts for the month of February were $15,388.79, as compared with $13,898.93 for the same month last year. The increase is, therefore, $1,498.86, which shows a very healthy state of affairs.

"A Trip Through Paris."

At the meeting of the George street Young Men's Guild to be held on Tuesday night, Mr. J. Jeffries will by special request give his lecture on "A Trip through Paris." This announcement will doubtless result in bringing out a large number of young men. A musical programme will also be presented.

A Snap

Very best ping pong sets will be sold today and while they last next week for only 45 cents per set. The size and quality of this set has positively never been sold before for less than 85 cents. Parties ordering by mail may have set reserved, or we will send by express prepaid for 10 cents extra. Times Bookstore, Market Block.

Y.M.C.A.

The regular monthly Strangers' Tea will be held at the Y.M.C.A. tomorrow evening at 5.30 o'clock. Reception Committee will receive in the parlors at 5 o'clock. The subject of the afternoon meeting will be "Sports that Kill," and will be dealt with by Mr. S. S. Aplin, the Physical Director of the Association. A duet by Messrs. J. Browne and N. Jolliffe will also be sung.

The attendance a

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over [illegible] of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

Wm. PRINGLE,

Three Peterborough Bugs

Three babes came into this world of trouble in Peterborough County on the 29th of February. The parents are, Mr. and Mrs. Jas. Middleton, Warsaw, a daughter, Mr. and Mrs. Patrick Coursey, and Mr. and Mrs. D. Forsyth, of Peterborough, both sons. They will each receive the silver mug promised by a Toronto paper.

Trouble in This Family

The case of non-support which was enlarged last week, was aired in yesterday morning's police court. A woman named Green, who had spent a couple of terms in Mimico Provincial Asylum for the Insane, desired to obtain from her husband some means of supporting herself. It was arranged that she remain with her father and the young husband will pay $2.50 per week for her maintenance.

Park Street Church

Tomorrow, being the Centenary of the British and Foreign Bible Society special services will be held in Park Street Baptist church. In the morning, the pastor Rev. A. H. Brace will speak on the subject, "The Book and its Message," and in the evening the topic will be "The March Lion; What's the Amen for 1904?" Good hearty congregational singing. All seats free. Strangers are always made welcome and hymn books provided.

Indian Reserves

In the issue of the annual report of Indian affairs, mention is made of the Mud Lake and Rice Lake Bands. The former reserve is located on the shore of Mud Lake, in the township of Smith, county of Peterborough. It contains about two thousand acres, of which about three hundred are cleared. The Rice Lake reserve is located on the north shore of Rice Lake, in the township of Otonabee, county of Peterborough. It contains about seventeen hundred and fifty acres of land, of which about seven hundred and seventy-five acres are cleared; about three hundred acres of this are under lease to white tenants, while the locatees cultivate the remainder of the said cleared land.

OCTOGENARIAN PASSES AWAY

Mr. John Brown Died at Springville Yesterday—Aged 82

Special to The Times.

Springville, March 5—Mr. John Brown, one of the oldest inhabitants of the district, passed quietly away at his residence here, about 1 o'clock yesterday. Deceased was widely and favorably known, and was never married. He was 82 years of age and had been healthy nearly all his life. Mr. Thos. Brown, of Springville, and Mr. Jas. Brown, of Peterborough, are the deceased's nephews.

THE ENGINE "RAN AWAY."

Narrow Escape of Employees at Saw Mill Near White Lake

An accident which might have resulted in serious injury to the workmen occurred on Friday afternoon last at Mr. H. G. Buck's saw mill at the head of White Lake in the Township of Dummer. The accident was caused by the engine "running away" in consequence of the "governors" refusing to work. The iron horse, driven by a full head of steam, attained such rapid motion that the big metal fly wheel burst and pieces went flying in all directions, some going up through the roof of the building as if it were a tent. Fortunately, although there were a number of hands employed about the mill, no person was injured. The accident, however, caused about $100 worth of damage. In addition to the bursting of the wheel a considerable portion of the driving belt was destroyed.—Norwood Register.

What Expansion Means to Science and Sport

(Dr. Barton Warren Everman in March Outing.)

Expansion has brought new problems, new duties and greater opportunities to the naturalists and sportsmen of America as well as to legislative and executive branches of our government. "Now that you have bought quite a large farm," said Meriwether Lewis to President Jefferson in 1803, "don't you think you better send me and my friend William Clark out to see what it is like?" And the result was the "Lewis and Clark Expedition," one of the most marvelously interesting and successful in history, which gave the world such an amount of information regarding the geography, geology, and natural history of that hitherto little known region. Following the Mexican War and acquisition of the Territory from Texas to California, came the various Pacific Railroad surveys, each with its corps of trained naturalists, whose observations and collections added enormously to our knowledge of the animals and plants of that great region.

To the zoologist, botanist and sportsman the Philippines are to-day a veritable terra incognita, teeming with treasures in whatever line one may care to undertake investigations. The insects, fishes and other aquatic animals of that great group of islands are practically unknown, and only a small proportion of the species of mammals, birds and plants have been collected or are represented in any museum. But it will not long remain so. Already the Bureau of Forestry and other governmental bureaus are beginning to study and make known the natural resources of those islands. An intelligent resident of Porto Rico recently said to the writer, "The United States has learned more about the animals and plants of Porto Rico in one month than Spain found out in four hundred years."

—Mr. Whiten, the popular Hunter street photographer, held a reception for his customers last evening, and will throw his beautiful reception rooms open to the public this evening.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Jean Allen, of Toronto, is visiting at Miss Garlick's Water st.

—Miss Mary Clarke, of this city, is spending a pleasant time with Colborne friends.

—Miss Emma Hutchinson, of Buffalo, is visiting her friend, Miss Jennie Thompson, Aylmer street.

—Mrs. J. Dodds, of New York, is in town, the guest of her sister, Mrs. L. D. Magee, King street.

—Misses Gertrude and Annie Balsdon, of Calgary, N.W.T., are the guests of Mrs. A. Campbell.

Have You Seen Whiten's Opening? If Not, Go To-night.

—Mayor Roger visited Toronto on Thursday, and while there delivered an address on the Peterborough Bill before the Private Bills Committee.

—Mrs. J. R. Stratton will receive at the Parliament Buildings on Tuesday afternoon from 4.30 to 6.30.—Mail and Empire.

—Mr. W. D. Hay, the energetic assistant superintendent of the progressive and popular Federal Life Assurance Company, visited Peterborough yesterday, and leaves for other points today.

"Go West,

Ranch it and rough it and you'll soon get rid of that weak chest and that hacking cough." That is what the doctor said to a young married man with a wife and child to care for and a modest salary to support them on. He *couldn't* go West. Love and duty tied him to his desk in the city.

People don't have to travel to cure coughs or strengthen weak lungs. Dr. Pierce's Golden Medical Discovery cures obstinate, deep-seated coughs, bronchitis, bleeding of the lungs, weakness, emaciation and other forms of disease which if neglected or unskillfully treated terminate fatally in consumption.

"I will write you what Dr. Pierce's Golden Medical Discovery has done for me," says George H. Belcher, Esq., of Dorton, Pike County, Ky. "Thirteen years ago I was wounded by a ball passing through my lung. I have had a bad cough almost ever since, with shortness of breath, and it was very easy to take cold; the slightest change of weather would cause the cough to be so bad I would have to sit up in bed all night. Could not eat or sleep at times; was all run down; could not work at all. A few months ago I began using Dr. Pierce's Golden Medical Discovery. Have not used more than two bottles and now can eat, sleep, and work, and I feel like a new man. I cannot find words to sufficiently recommend Dr. Pierce's Golden Medical Discovery, or tell the good it has done me."

Dr. Pierce's Common Sense Medical Adviser in paper covers is sent *free* on receipt of 31 one-cent stamps to pay expense of mailing *only*. The book has 1008 pages and over 700 illustrations. Address Dr. R. V. Pierce, Buffalo, N. Y.

The Grip Leaves Thousands in its Path Weak, Nervous, Dyspeptic, Catarrh Wrecks.

THE GRIP LEAVES THOUSANDS IN ITS PATH WEAK. NERVOUS. DYSPEPTIC. CATARRH WRECKS

From New York Journal.
"During the recent Grip epidemic claiming a million victims or more, the efficiency of Peruna in quickly relieving this malady and its after-effects has been the talk of the continent."

LIKE A DEMON grip has crossed our country, leaving behind scores of physical wrecks.

Victims of catarrh of the head, catarrh of the throat, catarrh of the lungs, catarrh of the stomach, catarrh of the kidneys, catarrh of the pelvic organs, are to be counted by hundreds of thousands. Grip is epidemic catarrh, and sows the seed of chronic catarrh within the system.

This is so true that few grip sufferers are able to make a complete recovery until they have used Peruna.

Never in the history of medicine has a remedy received such unqualified and universal eulogies as Peruna.

A New York Alderman's Experience.

Hon. Joseph A. Flinn, alderman Fifth District, writes from 104 Christopher street, New York City, as follows:

"When a pestilence overtakes our people we take precaution as a nation to preserve the citizens against the dread disease.

"La grippe has entered thousands of our homes this fall, and I noticed that the people who used Peruna were quickly restored, while those who depended on doctor's prescriptions, spent weeks in recovering, leaving them weak and emaciated.

"I had a slight attack of la grippe and at once took Peruna, which drove the disease out of my system in a few days and did not hinder me from pursuing my daily work.

"I should like to see our Board of Health give it official recognition and have it used generally among our poor sick people in Greater New York."—Joseph A. Flinn.

D. L. Wallace, a charter member of the International Barber's Union, writes from 15 Western avenue, Minneapolis, Minn.:

"Following a severe attack of la grippe I seemed to be affected badly all over. I suffered with a severe backache, indigestion and numerous ills, so I could neither eat nor sleep, and I thought I would give up my work, which I could not afford to do.

"One of my customers who was greatly helped by Peruna advised me to try it, and I procured a bottle the same day. I used it faithfully and felt a marked improvement. During the next two months I took five bottles, and then felt splendid. Now my head is clear, my nerves steady, I enjoy food, and rest well. Peruna has been worth a dollar a dose to me."—D. L. Wallace.

Mr. O. H. Perry, Atchison, Kansas, writes:

"Again, after repeated trials of your medicines, Peruna and Manalin, I give this as my expression of the wonderful results of your very valuable medicine in its effects in my case after repeated trials.

"First, it cured me of chronic bronchitis of fifteen years' standing by using two bottles of Peruna in January, 1894, and no return of it.

"After I was cured of bronchitis I had la grippe every winter for several winters. But, through the use of Peruna, it got gradually weaker in its severity, until it dwindled down to a mere stupor for two or three days. Now the stupor does not trouble me any more."—O. H. Perry.

A Congressman's Experience.

House of Representatives,
Washington, D. C.

Peruna Medicine Co., Columbus, Ohio.

Gentlemen—"I am more than satisfied with Peruna, and find it to be an excellent remedy for the grip and catarrh. I have used it in my family and they all join me in recommending it as an excellent remedy."

Very respectfully,
George H. White.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

THE TURKISH AND BULGARIAN WAR CLOUD THICKENS

Bulgarians are Called To Arms and A Big War is Likely to Take Place in the Near Future

Sofia, March 6.—The Bulgarian Government has issued a call to arms that only means one thing—a war to the end with Turkey. It is also known here that Turkey is massing troops along the Bulgarian frontier.

London, March 6, 2 a.m.—The Post's special says; The crisis which has suddenly confronted the world in the Asiatic Orient will almost be certain to precipitate the long-expected climax of maladies on the eastern shores of the Mediterranean. The powder magazine in the Balkans is no less dangerous than was that of Manchuria and Japan.

ALBANIANS AGAIN IN REVOLT.

Already the sparks are among the gunpowder barrels. The Albanians are again in revolt against the Turkish regular military forces, though they contribute to the Sultan some of his best and most loyal regiments. Their rising against government taxation and the introduction of reforms is, however, a movement entirely independent of the Bulgarian agitation, which once more has broken out. The Macedonian Revolutionary committee has proclaimed through its agents a fresh revolt for March 28. On the Bulgarian frontier Bulgarian bands have already made raids into Macedonia and fought skirmishes with the Turkish patrols.

Recriminations between the Bulgarian government and the suzerain Porte have scarcely ceased since last September, when the two were on the very verge of actual hostilities. At Constantinople, at Sofia and at Vienna hardly any hope finds expression, except among the most optimistic diplomats, that a collision can be averted. With the melting of the snows in the Balkans, allowing the crossing of the passes, the peace of Europe is once more seriously menaced.

Such is the condition of things at this moment, when Turkey has taken a step indicating her intention to take advantage of the favorable opportunity offered by Russia's absorption in the struggle with Japan and to use her undoubted military strength to re-establish her rule in Macedonia and strike a blow at Bulgaria.

CHARGES MADE BY TURKEY.

In her note addressed to each of the powers signatory to the treaty of Berlin, Turkey charges Bulgaria with not changing its attitude of active though concealed hostility, in spite of the efforts of the Porte in carrying through the stipulated reforms. She specifies as evidence in support the transportation of guns and ammunition to eight Bulgarian frontier places, the provisioning of three frontier division depots as for imminent war, the improvement of all the military roads leading into Turkey, especially for the passage of artillery, the preparation of a vast commissariat and the fortification of strategic points, especially on the Maritza River.

Apart from these legitimate war preparations Turkey believes Bulgaria guilty of furnishing the Macedonian insurgents with dynamite and conniving at the machinations of the revolutionary committees which are allowed to plot in all the important Bulgarian cities, while active officers of the army are permitted to join the rebels.

In the caldron of Macedonia, with its heterogeneous population, its various races bitterly antagonistic to one another, with individual ambitions apart from the general religious distinction of Musselman and Christian, all the elements are brewing of an overwhelming explosion.

The Province of Macedonia stretches from the Bosporus on the east and the Adriatic on the west. It is composed of a number of vilayets, and the races which inhabit it are of such various stocks that it is hard to give it any geographical entity. In the vilayets of Sartari and Yanina, on the west, the Albanians are in an immense majority. In the east, in the vilayets of Constantinople and Adrianople, the Mussulmans and the Greeks form the bulk of the population, and between these two groups, in the three vilayets of Salonica, Monastir, and Kossoro, the inhabitants belong to the Slav race.

As to the relative proportion of these nationalities estimates vary considerably. According to one authority there are in Macedonia 500,000 Mussulmans and 650,000 Christians, of whom 424,000 are Greeks, 176,000 Bulgarians and 50,000 Graeco-Bulgarians who have adopted the Bulgarian language. Neither the Servians nor the Greeks would regard with equanimity any political rearrangement which should enable Bulgaria to extend her territory into Macedonia.

From time immemorial Macedonia has been the prey of successive masters. From the days of Philip, the father of Alexander the Great, it has been Greek, Roman, Greek again, Bulgarian and Turkish. It was definitely united to the Ottoman Empire at the end of the fourteenth century.

IS THE CHAMPION EATER

A MAN WHO ATE A QUARTER OF BEEF IN A DAY

Twenty Pounds of Mince Pie But Delicate Meat—A Noted Glutton

Dubuque, Iowa, March 5.—Iowa has furnished to the nation men who have won distinction in politics, literature, art and athletics, but it remains for Dubuque to offer a real, live gourmand in the person of Phil Melloy, the "Glutton of Sylvia Switch," who has issued a challenge to compete with any man in the United States in an eating contest, not even barring award-swallowers or any other museum freaks, and will wager $500 that he can put away more food in one hour than even the epicures of old whose feats are lauded in fable and song.

To eat a quarter of beef in twenty hours Mr. Melloy considers a very easy task, but when a man undertakes to get away with twenty pounds of mince meat pie in one hour the dyspeptic would feel like turning over on his couch to breathe his last, and the man with the ordinary appetite would call him a monster. Nevertheless, Phil Melloy has accomplished these feats and pocketed the money of skeptics who ridiculed him when he boasted of his achievements at the table and supported their skepticism with big rolls of the green that looked too tempting to Mr. Melloy to pass up. He has been an odd character about Dubuque for many years and has brought grief to many restaurateurs who agreed to fill to satiety the "Glutton of Sylvia Switch" for the paltry sum of $1. He has emerged from one restaurant after devouring enough food to keep a family of ten three days only to accept another wager that he could not duplicate his feat at the nearest restaurant. Strange as it may seem, Melloy never "falls down" unless he is tricked and on numerous occasions he has won as much as $100 on small wagers in a single night.

CORPS TO BE ENLARGED

Will Not Establish New Ones But Improve the Old

Ottawa, March 5—The proposed increase of the Canadian militia to a peace establishment of 46,043 officers and men is not to be brought about by the organization of new regiments but by strengthening those already in existence. As the country grows, there will, of course, be new corps raised both east and west. The increase in immediate contemplation and which will be under way before many months are over, according to General Lord Dundonald's scheme, is to bring all infantry regiments up to eight companies, which would mean a peace establishment of about 244 men, and a war establishment of 1,040. This increase may not be carried out in a day, but it is what the general has in mind.

NEED NOT DRILL.

Cavalry corps are to be brought up to a uniform establishment of five squadrons, and field batteries, whose establishment is now 103, will be increased to a peace strength of 118, with a war establishment of 203, about two-thirds of the privates in each regiment hereafter to be recruited for war service only. These will be furnished with free ammunition. They will not be called on for any drill in peace times, but must familiarize themselves with the use of the rifle by practive at the ranges each year.

A POST MORTEM TO BE HELD

On Remains of the Young Girl Who Suicided Last Week

A late report states that the young girl who took her own life in Belmont Township last week had several times openly threatened to take her own life. She was of a very sensitive disposition, and when irritated, at once suggested that she would end her life. The rumor of foul play have not been confirmed and it is now generally supposed that it was a case of deliberate suicide.

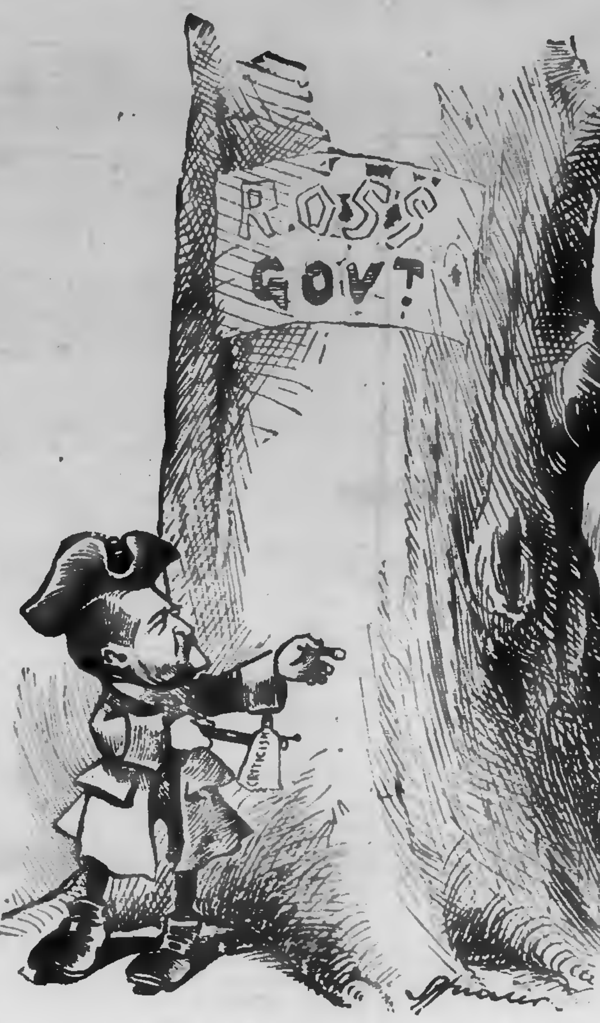
Coroner Gray went to Havelock on Friday last, to empanel a jury, and Mr. J. Sexsmith was chosen as foreman. A sitting was held, but it was postponed till this afternoon, at one o'clock in order that Dr. Crawford might have time to hold a post-mortem examination.

WILL NOT LOCATE HERE

Mr. Jas. Davidson, Who Held Option on Property Here Will Remain in States

The Chicago Record-Herald's Janesville, Wis., correspondent writes,—"At a cost of $1,000,000 the Janesville Sugar Company will commence here this month the re-erection of the mammoth beet sugar plant now located at Dresden, Canada, and owned exclusively by James Davidson, of Bay City, Mich. The 5,000 acres of beets necessary have been secured already in this vicinity. The Canadian plant is to be moved here because the Canadian farmers have failed to cultivate beets in paying quantities."

The Peterborough Sugar Company gave Mr. Davidson an option on property here, for the purpose of permitting his moving his plant to this city. This option expired a few weeks ago so it is quite evident that the proposal will not be accepted, and that Mr. Davidson has chosen Janesville instead. In the meantime the local company will proceed with the completion of the factory, and such a worthy project should receive the unanimous support of our city and the inhabitants of the surrounding country.



Will the Woodman Fell the Tree?

NEW AMBASSADOR TO CZAR'S COURT

King Approves Appointment of Hon. C. Hardinge

SIR CHAS. SCOTT RETIRES

Will Leave Russia Next Month—New Envoy was Assistant Under-Secretary

London, March 5—The King has approved the appointment of the Hon. Charles Hardings, Assistant Under-Secretary of State for Foreign Affairs, to succeed Sir Charles Scott as British Ambassador to Russia. Sir Charles will return in April. His term in the Diplomatic Service automatically expires in that month.

It is understood that he is persona grata in St. Petersburg, where, it is also believed, Mr. Hardings will be welcome. He was popular there when he was secretary of the Embassy. He is a comparatively young man, having been born in 1858 and his promotion, like that of Sir Michael Herbert to be Ambassador at Washington, is favorably commented upon as another break in the tradition of promotion by seniority. It is also remarked that he also has special fitness for the post owing to his knowledge of Persia, which touches Anglo-Russian relations.

The appointment is also favorably commented upon in Paris, where Mr. Hardings was popular while he was secretary of the Embassy there. It is believed that his appointment will tend to the preservation of friendly relations between Great Britain and Russia. Mr Eldon Gorse, jr., will succeed Mr. Hardings in the Foreign Offi

stolen from the dining room of the S.O.E. hall last Wednesday evening.

OFFICERS BELOW WHEN SHIPS MET

Investigation Into Collision which Cost 100 Lives

ASTOUNDING REVELATIONS

Boatswain in Command and Gave No Alarm to Officers

Paris, March 5—At Marseilles the court-room of the Maritime Tribunal was crowded on the occasion of the trial of the captains of the Liban and the Insulaire, the two steamers which collided outside Marseilles on June 7 last, with the result that over one hundred persons lost their lives.

The report of the Shipwreck Commission, which was read at the commencement of the proceedings, created a profound sensation. It showed that neither the captain nor any competent officer was on the bridge of the Liban at that moment, the boatswain, Santandrea, being in charge.

Before the crash took place, the Liban twice signalled to the Insulaire that she meant to pass in the starboard, but as a matter of fact she bore down on the port side. Enquiries have shown that the two vessels frequently met in the vicinity of Maire Island, and that on such occasions the Liban's captain seldom observed the rules of the road at sea.

It was also stated that Santandrea, when he saw that a collision was inevitable, did not warn his superior officers, and both the captain and the boatswain were, in the opinion of the commission, guilty of offences against the laws of [illegible]

The gravest statement made by Capt Arnand, of the Insulaire, was that if Capt Lacotte, of the Liban, had whistled to avoid a collision he could have done so.

Capt. Lacotte, in examination, said he was at lunch when he heard a whistle blow, but, thinking it was only meant to warn off some fishing smacks, he did not leave the table.

TRIED TO KILL COREAN MINISTER

Opposed His Signing Protocol With Japan

THREW BOMB IN HIS HOUSE

Affair Supposed to be the Work of the Peddlers' Guide

Seoul, Corea, March 5—The house of the Secretary of the Foreign Office was blown up last night. A similar attempt was made upon the residence of the Acting Minister of Foreign Affairs. Five men have been arrested in connection with the crime, which is supposed to have been incited by the party opposed to the Japanese-Corean protocol. The general situation is satisfactory, owing to the prompt action of M Hayashi, the Japanese Minister at Seoul

THE RUSSO-JAPANESE WAR.

Rev. J. P. Wilson Delivers an Eloquent Address on the Above Subject

At George street church last evening a large audience listened to a most interesting sermon by the pastor, Rev. J P. Wilson, who chose his text from the 144th Psalm. The subject of his able remarks was based on the Russo-Japanese war and the reverend gentleman preached one of the finest sermons, to which we have ever had the pleasure of listening. "War has a certain charm for us at times," began the speaker, "but it is attendant with pain, suffering and death."

Some people claim that we might style some classes of warfare as civilized, but this is, strictly speaking, not in accordance with facts. General Sheridan, in speaking of warfare, made use of the remark that "War is hell," but Rudyard Kipling became famous because of his song about war. When religion becomes more general, when the brute nature of man becomes eliminated, we shall have no more war. There is not a nation on earth today that Britain would invade for the sake of military honors. It is the great ambition of nations today to obtain weapons that are the most deadly, but all these nations are the followers of the Prince of Peace. The only persons on the battle field that are to be most admired are those who tend the sick and wounded,—those who have endangered their lives to alleviate the sufferings of their fellow men,—the red cross nurses. We as Christian men ought to deprecate the warlike spirit in the land.

War may be permissible at times to prevent a greater evil, but it should be regarded as a last resort. The present war seems to be one of those that are inevitable. The Japanese are fighting for their national existence, and, if necessary, Japan ought to spend every dollar and every man in order to save that national existence. The United States and England sympathize with Japan, because they are in favor of the "Open Door Policy," and this will never be gained unless Japan wins.

England found India in a miserable condition, and resulted in making her the prosperous nation she is to-day. It is claimed that the Russians are Christians and the Japanese Pagans, but the latter have acted more like Christians than the former. If Japan wins in this war, the redemption of the world is at hand, and if they do win, they should be given charge of 500,000,000 yellow men, in order to lead them into civilization. Of course Japan should be assisted by other nations.

The speaker then went on to say how the greatest war raging today was the struggle for existence, the great battle for bread among the working classes.

Local Sports

CURLING.

The following skips will likely play the Orillia rinks to-morrow,— Neill, Rutherford and Whiten. Messrs Ray Connal, Knapman and Ferguson will likely skip the Peterborough rinks that will play at Orillia.

TURF.

It has been reported that Mr. Levi Bowles' one year old colt, "Montrade Senator," has been awarded second prize at the Canadian Stallion Show which is being held in Toronto.

HOCKEY.

Keene defeated the Lindsay septette at the latter's rink last week the score being 11 to 9.

It is officially announced that Napanee will go up against the T.A.S. this evening. The game will be refereed by "Chaucer" Elliott.

Mr. Truisach, Manager of the Belleville Hockey Club, was in town Thursday evening on his way to Peterboro. There promises to be something doin' before Belleville and the O.H.A. have settled their grievances.—Port Hope Guide.

The declaration of Peterborough that it has no use for professionalism is like waving a red flag in front of a bull—or, at least, Belleville.—Port Hope Guide.

On Saturday evening an exciting game of hockey was played at the Brock street rink between the Junior T.A.S. and the South End septette, which resulted in a victory for the former, the score being 5 to 0. The game was clearly T.A.S., all through although at times the boys from the "south" spruced up and showed considerable ability in handling the sticks. The score does not by any means indicate the playing, as, although the T.A.S. were rather too strong for the defeated players, the latter did some pretty work.

The following is a list of the winning team,—

Goal—Derocher
Point—Holland
Cover-point—Scotts
Forwards—Callaghan, Foley, Doris, Carson.

The game was refereed by J. Doris

A most interesting tug-of-war contest was held in the drill hall on Saturday evening, between the Quaker Oats and the Wm Hamilton Company teams. After an exciting pull the Hamiltonians were declared the winners of the first pull. Then the second was also alloted to them after a good pull. A very large and enthusiastic audience was present, and both sides had many supporters.

This is the second of the series, the following is a list of the victors.—H Elliott, J. Saunders, W Libby, N. Chambers, J. Wall, F Reynolds, Dan Harvey, C. Watt

J. E. Sharp acted as captain of the winning team, and W. Lewis was referee.

Strangers Tea

The monthly "Stranger's Tea" at the Y.M.C.A. yesterday was enjoyed by a number of recent arrivals in the city, and the Managing Committee is to be complimented on the excellent manner in which they performed their duties. Among the strangers present were Messrs. Innes, of Toronto; Anderson, of Toronto Junction; Sedgewick, of Huntsville and Sowerby, of Toronto. Everyone present thoroughly enjoyed the genial hospitality shown by the managing secretary Mr. Williamson, and the other officers who had the affair in hand.

The local Y.M.C.A. must be congratulated on the interest they manifest in new arrivals in town, and may the important work they are endeavoring to faithfully perform, long continue.

THE JAPANESE FURIOUSLY BOMBARD VLADIVOSTOCK

For Nearly an Hour, With Five Battleships and Two Cruisers.

Special to The Times.

Vladivostock, March 7—A fleet of five Japanese battleships and two cruisers appeared off this place at 1.25 o'clock this p.m and bombarded the town and shore batteries for 55 minutes. The fleet approached from the direction of Afkold Island, at the east entrance of Ussuri Bay, and about 32 miles southeast of Vladivostock.

Entering Ussuri Bay, the enemy formed in line of battle, but did not approach within closer range than 5 1-3 miles. They directed their fire against the shore batteries. No damage result

Most of the Japanese 200 lyddite shells failed to burst. The Russian batteries, commanded by Generals Verouetz and Artauonoff did not reply, awaiting a closer approach of the enemy. The Japanese fire ceased at 2.20 p.m., and the enemy retired in the direction of Afkold Island.

Simultaneously two torpedo boat destroyers appeared near Afkold Island, and two more near Cape Maydol. The Japanese ships were covered with ice. The attack resulted in no loss to the Russians, but cost the enemy 20, ruples—$100,000—in ammunition. Most of their projectiles were 6 and 12 inch shells.

The population of Vladivostock was warned this morning of the presence on her horizon of a hostile fleet and the prospect of an attack during the day, but it remained tranquil.

THROUGH THE SMOKE OF WAR

London, March 7th—Russia has a garrison of from 20,000 to 25,000 in and around Port Arthur and Dalny. The is gathering in the vicinity of Liaoyang the reinforcements coming over the Manchurian railway, and there are probably 40,000 men, including railroad guards, in this region. On the Yalu there is another considerable force, and the Russian advance guard was at Anju until Friday. The Times' correspondent reports that the Russians are falling back towards the Yalu, and this would indicate that the Japanese are at last on the move, and that the Russians are afraid of having their retreat cut off by a force landing near the mouth of the Yalu. There are 2,500 Japanese in Northeastern Corea, near Plaksin bay. There is a large body, some correspondents say 60,000 men, moving forward from Gensan, and the three divisions of probably 58,000 men landed at Chemulpo and Chinampo are on the march along the military road leading from Seoul through Pingyang, Anju and Wiju into Manchuria. The scouts of the two armies are in touch with each other near Anju, and if the Russians do not retire rapidly, at that point may occur the first serious land engagement. The report yesterday that six Japanese warships escorting the transports have gone past Port Arthur into the Lioatung Gulf seems to agree with the forecasts of the correspondents at Yinklow, who assert that a landing there is contemplated. The Russians on the Yalu and the Japanese in Northern Corea are both far from railways. The handicap to the Russians in bringing up supplies is of course much greater than that of the Japanese, who can land either men or munitions at any of the ports in Corea Bay when the ice in the harbor breaks up, as it will very soon.

What is being done behind the scene of war's theatre is still largely a matter of conjecture. Apparently Russia is doggedly waiting for the next blow, not knowing when, where, or how it will be struck. All along the line the Russians are on the defensive. The initiative appears to rest entirely with Japan, which enjoys in consequence an immense advantage. The power that is attacking may prepare its plans and make arrangements for their successful execution. The power that is defending must make ready for half a dozen different contingencies. It may be deceived by a feint, or it may be assailed from an unexpected quarter, Russia is, therefore, compelled to maintain a ceaseless watchfulness lest again it should be caught off its guard.

RUSSIANS WILL DEFEND PT. ARTHUR, 325,000 IN THE FIELD

Japs to Attack in New Quarter, Expected to Attempt Landing at New-Chang Shortly

London, Saturday, March 5—The censorship continues to prevent the transmission of news regarding the military and naval movements in the Far East, and all the available news is of minor consequence.

A Tokio correspondent says that small bodies of Russian troops are constantly crossing and recrossing the Corean frontier, but it is not believed that there is any intention of seriously opposing the Japanese before the latter are much nearer the Yalu River than they are now supposed to be.

The movement on both sides, however, are purely conjectural. Even the statements given out with an appearance of authenticity suggest an intention to mystify.

The silence regarding Port Arthur continues to be complete, while the Japanese fleet might be non-existent so far as any information concerning it is concerned.

Admiral Wirenius had been ordered to keep his squadron in the Red Sea, it is now stated from Port Said that he will sail today and that his vessels will remain in the Mediterranean until June to await the Russian Baltic squadron. The latter, however, is declared by the Viedomosti not to be destined for the Far East. Neither the vessels of this squadron nor any others are likely to be sent to reinforce the Asiatic squadron, chiefly owing to the difficulty of obtaining coal enough.

A Port Said despatch states that one of the Russian torpedo boats there is in very bad condition, and will be allowed to remain and repair. The whole squadron shows a lack of efficiency.

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

THE TRAGEDY OF THE ROMANOFFS

All human life is more or less a tragedy, but the life of kings and emperors is apt to be tragedy of the deepest dye. Especially has this been true of the royal house of Romanoffs which in 1619 came to the throne in the person of Michael Romanoff, a descendant in the female line of that Scandinavian adventurer, Rurik, who founded the Russian Empire.

The fourth of this line was that famous ruler known in history as Peter the Great. As the oldest of his Romanoff predecessors had died at fifty, and the youngest had passed away in early manhood after a reign of only six years, there came to be a superstitious belief in the prophecy of an ancient seeress that none of the house of Romanoff would live to the age of sixty-five. The prediction up to this day has held true. Peter the Great died at fifty-three, and the four sovereigns who succeeded him had a yet shorter lease of life.

Beginning with the present century we find that in 1801, the Czar Paul, a half-insane despot, was assassinated at the age of forty-seven, by a band of political conspirators. His son, Alexander I., who from a lovely German mother, had inherited an amiable disposition and rare gifts of mind and person, lived long enough to be the head of the coalition that overthrew Napoleon, and the heart and soul of the Holy Alliance, that confederation of princes, but in the midst of vast plans for Russian progress and glory, he was stricken with monomania bordering on insanity and died at forty-eight. His brother and successor, Nicholas I., a man of sterner and more despotic mould could not survive Russia's defeat in the Crimean war, and died of a broken heart at fifty-nine.

His son, Alexander II., the emancipator of the serfs and a ruler whose progressive ideas were constantly thwarted by his ministers and reactionary nobles, was assassinated at the age of sixty-three by Nihilists because he had failed to carry out expected reforms. His son, Alexander III., the father of the present czar, warned by the fate of his father, made no attempts to be a progressive sovereign and died at forty-seven, leaving to Nicholas II., the fatal legacy of so-called autocratic power in the exercise of which the czar is as powerless as the meanest subject of his empire, since a despotic bureaucracy really bears absolute sway in all the Russias.

Saddened by disillusions and disappointments, weighed down by burdens too heavy for any one man to carry, it seems likely that the ancient prophecy in regard to the house of Romanoff will be early fulfilled in the case of Nicholas II., a ruler of noble and progressive impulses which he is powerless to carry out.

EVERYBODY READS THE TIMES.

EDITORIAL COMMENT

The tactics of the Chicago labor union strikers become more and more disreputable all the time. The Putty Runners' and Glaziers union now places pickets around the homes of nonunion men with instructions to insult their wives and tease their children. This has been done in compliance with the speech of Robert G. Wall in the Chicago Federation of Labor. Can anyone think of any other organization that would do such a mean thing as this except a Chicago labor union?

Human Body Has Its Equinoxial Storms.

In Its March From the Cradle to the Grave, the Body Has Its Periods of Change Which are Associated with Alarming Disturbances.

There are two great periods in men's lives. About forty-five every man realizes that some new condition has arisen, and if this time is happily passed, about sixty the health barometer takes another dip and storms of great import cloud the horizon of life.

These storms must be met, and wise people will fortify the resisting power of the body by Ferrozone, which builds up bodily strength, renews the blood, strengthens the heart and vital organs. New tissues are formed by Ferrozone, which enables the body to resist disease and prevent the organic changes so likely to supervene at this critical time.

No matter what the age or sex of the individual, as a nerve builder, a brain strengthener, and general body invigorator, Ferrozone is the best medicine. It pushes back the feeling and appearance of old age, and puts the elasticity and vim of youth into systems that ordinary remedies fail to rebuild. This is not mere theory, but a claim that is reinforced by overwhelming evidence of the honest merit of Ferrozone.

Unlike oily emulsions, and alcholic bitters which are no longer prescribed by intelligent physicians. Ferrozone contains the latest and best strengthening elements in tablet form. Its quality therefore is uniform, its dose is small, just one tablet at meal time. You can't fail to be greatly benefited by Ferrozone, which is sold at druggists, price 50c. per box or six boxes for $2.50. Insist on having only Ferrozone. Refuse all substitutes. By mail from N. C. Polson, Kingston, Ont., and Hartford, Conn., U.S.A.

Outing for March

The war in the East, the reported death of Explorer Hubbard and the *approaching* St. Louis Exposition combine to make March Outing timely as well as notable. No less an authority than Lieut.-General Chaffee declares decisively in favor of "Athletics in the Army." His article which is the first public experience on the subject, is accompanied by an interesting illustrated description of the varied forms of athletic sports as practiced in our own army, and "The Athletic Japanese," by T. Philip Terry, shows conclusively that Japan's recent military improvement is due in large measure to the robust exercises of the modern Jap. All who have read of the tragic fate in Labrador of Leonidas Hubbard, Jr., Outing's assistant editor, will be surprised to see his name figuring in contents page of the March number. "Where Romance Lingers," a story of trails in the North, written by the explorer-editor before his fated expedition. In graphic style he pictures his life among the hardships and conditions to which he finally succumbed. Just at this time when the St. Louis Exposition is bringing the names of Lewis and Clark so prominently into the public eye, many may prefer to turn to A. C. Laut's intimate story of "The First Adventurers Up the Missouri River." "The Native Fishermen of Hawaii," is the account of similar researches in our more recently acquired territories.

An article of very different character, but decidedly picturesque and novel, is Vance Thompson's "Freeman Shod with Steel," a descriptive story of the skating season in Paris. In this number also Clifton Johnson contributes another of his studies of the Blue Grass Country, accompanied by his own *beautiful photographs*; and Robert Dunn is still confessing about the tribulations of mountain climbing on Storm-wrapped Mt. McKinley. "Uncle Sam's Foresters" treats a scientific subject in an entirely untechnical and interesting manner.

Humor is the predominant characteristic of the fiction in this number, although "The Silent Places," or "The Trail of Jingoss," by Stewart Edward White, is strong in heart interest. "The Eminently Respectable Dumb-bell," by Arthur Ruhl, "The Parachute Man," by Jack Hampton, "The Philistines in Arcady" and "The Brown Habit" are up-to-date outdoor stories.

Tolstoi, the secret of his outdoor life, is a prominent feature of the regular department of "Outdoor Men and Women." Of equal interest to sportsmen and general readers are "When the Gaywings Came," by T. S. Van Dyke; "On the Yellow Veldt of South Africa," by Douglas Story, and Dan Beard's talk on "How to Make a Winter Camp." "The Automobile of 1904" and "American Variations of the Sporting Dog" are authorative in their respective fields. Two editorial announcements are important, the that Caspar Whitney, the editor, has gone to South America for several months of travel and jungle hunting for future stories in Outing, and the other that John Burroughs will begin in April a regular natural history department in the magazine. Photographs with the outdoors in them, a little natural verse and full-page drawings by distinguished artists, complete the number.

THE DOMINION PERMANENT LOAN COMPANY.

THIRTEENTH ANNUAL REPORT

The Thirteenth Annual Meeting of the Shareholders of the Dominion Permanent Loan Company was held at their offices, 12 King street west, on March 2nd. There was a good attendance of Shareholders present.

The President, Hon. J. R. Stratton, presented the following report of Directors and statement of the affairs of the Company:—

Your Directors herewith submit the Thirteenth Annual Report of the Dominion Permanent Loan Company, together with a Statement of the accounts for the twelve months ending the 31st. December, 1903, duly certified to by the Auditors both as to the correctness of the report and the satisfactory result of their inspection of the securities of the Company.

Your Directors are pleased to be able to state that active and profitable employment has been found for the funds of the Company during the past year, the demand for satisfactory loans being sufficient to call into requisition the available funds of the Company.

The earnings of the past year have enabled the Company to declare and pay dividends amounting to $68,788,31 and to permit to the transfer of $45,000 to the Reserve Fund of the Company. After payment of such dividends and the addition to the Reserve Fund of $45,000, and the writing off of office premises and furniture there remains to be placed to the credit of Profit and Loss the sum of $18,547 42

Your Directors are pleased to be in a position to congratulate the Shareholders upon the gratifying results of the operations of the Company during the past year and have also pleasure in testifying to the generally efficient character of the services rendered by the officials, agents and staff of the Company.

All of which is respectfully submitted.

AUDITORS' CERTIFICATE

"We have audited the accounts of the Dominion Permanent Loan Company for the twelve months ending December 31st, 1903, and find the transactions of that period accurately recorded in the books of the Company, the receipts accounted for, the payments duly authorised and vouchers produced therefor. We certify to the correctness of the accompanying Statement of Assets and Liabilities and Profit and Loss Account. We have made a careful examination of the securities, checked the same with the Mortgage Register, and report everything satisfactory.

(Signed)
HARRY VIGEON, O. M. HUDSON, Chartered Accountants, Auditors.

On motion of Mr. Stratton, seconded by Mr. Karn, the above report was unanimously adopted.

The following Directors were then re-elected: Hon. J. R. Stratton, President Trusts and Guarantee Company; D. W. Karn, President of the D. W. Karn Company, Woodstock; C. Kloepfer, Manufacturer and Director Traders' Bank, Toronto; T. P. Coffee and F. M. Holland, Toronto.

At a subsequent meeting of the Directors Hon. J. R. Stratton was re-elected President, and Mr. T. P. Coffee, Vice-President.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the *Tarryall District and Park County*, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

RUSSIA IS ALARMED OVER THE RECENT PLANS OF JAPANESE

It Would be a Terribe Blow For Russia to be Forced to Evacuate Port Arthur

Special to The Times.

London, March 4—The correspondent of The Times at Paris says; A St. Petersburg despatch quotes a Russian staff officer as follows in reference to the possible evacuation of Port Arthur.

"What!" exclaimed the officer, "evacuate Port Arthur! What worse disaster could befall the Russian army! It would imply the capture or destruction of our squadron, and the end of our railway would be 'Dans la gueule du Japonais,' with the prospect of his swallowing a larger piece. It would be a terrible blow to Russia, from which she would recover with difficulty. Our army might continue to fight while receding into Manchuria, and might conquer, but it would be retreating, and no advance would be possible before Port Arthur was recaptured. Therefore it is not to be evacuated. That is an operation which was never foreseen nor studied by the Russian staff, and we do not believe the Japanese can take the place by main force."

RUSSIA NERVOUS.

A correspondent of the Times at Moscow says, The feeling at St. Petersburg is growing more tense. The rapidity of the Japanese military movements and the comprehensiveness of Japan's plans have made no less a sensation that her naval vigor and initiative.

The Russian military authorities have no doubt that Japanese troops have landed at Gensan and Song-Ching as well as west of these places, but they are sceptical of the reported number, namely, four divisions of 15,000 men each. Moreover, they do not believe that the Gensan contingent are moving southward toward Kirin, owing to the mountainous nature of the country. They are convinced that the troops landed at Gensan will march on Ping yang, as will also the troops that landed to the westward.

Nothing can be learned of the Russian movements, but the officials protest that Russia will not act at present except on the defensive.

A report from Chefoo is printed of an engagement Thursday near the Yalu River. Small parties of scouts are said to have exchanged shots. Both retired, apparently without loss.

Japanese forces are stated to be within three days' march of the Russian encampment. The Russians are retiring to await reinforcements. Heavy weather renders military movements difficult.

Six Japanese cruisers, escorting ten transports, have been sighted off Chefoo, steaming towards the Liao-Tung Gulf. This movement is connected with The reported Japanese intention to land in North Saddle Bay.

The Governor of Amur issued an official proclamation on Feb. 5th, ridiculing Japan as a paltry nation and declaring that it was Russia's heaven-sent duty to crush the representatives of the yellow peril, thereby rendering a service to humanity.

A Tokio despatch says; A telegram from Pingyang states that the Russian forces at Anju and in the neighborhood number about 5,000. Apparently the force is mainly for observation of the Japanese movements.

The main force of the Russian army is apparently gathering near Liao-Yang, Manchuria. Small bodies in the neighborhood of the Yalu and in the neighborhood of the Yalu and in Northern Corea continue to watch the Japanese movements. They are making large use of naturalized Corea.

THE JAPANESE PLANS.

Bennet Burleigh, the Daily Telegraph's special correspondent, who is now at Chefoo, telegraphs that the Japanese seem to have decided to advance along the Pekin road from Seoul, which place they have already left. When they secure the Yalu River they will threaten Kirin, cutting the railroad and menacing Vladivostock, while another force deals with the Liao-Tung peninsula. The first big Japanese victory, which is more than likely if they keep their troops in the rough country, where the Cossacks cavalry will be of little value will mean an unauthorized rising of the Chinese, who will lend a great helping hand to the Japanese Their Manchurian horsemen are bigger and better and braver riders and fighters than the Cossacks.

Other correspondents confirm the report of Japanese landings at Chinampho and Song-Chin. Their numbers are variously stated. It is obvious that there can be no trustworthy information on this point. There are many suggestions and conjectures concerning coming movements, but the Japanese are enforcing as rigid a censorship in Korea as in their own country, and no news of their movements can get out.

It is stated that the Russians have built a number of forts on both sides of the Yalu River, including extensive earthworks at An-Tung.

The Daily Telegraph's correspondent states that although Japan has lost a small cruiser, and had two battleships' machinery disabled and another vessel damaged, she has command of the sea, and will eventually blockade and isolate Port Arthur and the territory near Dalny.

The Morning Post claims to have good authority for stating that if Japan is successful in Manchuria measures will be taken with the view to preventing Russia from reassuming a dominant attitude there.

A DECISIVE MOVE IS ANTICIPATED ON PART OF RUSSIA.

Japanese Move Northward--Landing Troops at Chinampho, a Port in Korea.

Special to The Times.

Paris, March 4—Information received here from official sources in Corea confirms previous reports to the effect that Chinampho is free from ice, that the Japanese have ceased debarking troops at Chemulpo, and that they have taken advantage of the opening of Chinampho, to land troops there, thus expediting the forward movement.

Official advices from St. Petersburg confirm the reports that a decisive move is anticipated on the part of the present Port Arthur squadron, now that Admiral Makharoff has arrived there, that torpedo boats especially will be brought into play, and that, in spite of reports to the contrary, Russia is understood to have an ample supply of torpedoes for these craft

A NEW MINISTRY

Liberals in Great Britain Name Earl Spencer as Premier

London, March 3—So confident is the opinion held in innermost circles in the Liberal Opposition that dissolution may be precipitated within the next five or six weeks that already it is being assumed that the King Will sent for Earl Spencer to form a new Administration and that Lord Spencer's first step will be to offer the Foreign Secretaryship to Lord Rosebery, with the alternative of Sir Edward Grey if Lord Rosebery is found to adhere to his present determination of not taking office. Mr. Asquith is elated for the Chancellorship of the Exchequer, and Robert Reid for the Woolsack. These arrangement are being definitely talked of in the highest quarters of political life but on the other hand, I am informed that the Ministers have no intention of dissolving Parliament within any such brief space as the Liberals are speculating on.

WHALES IN OUR WATERS

Legislation Regarding Them to be Introduced

Ottawa, March 3—The Marine and Fisheries Department has had more than a dozen applications from the Maritime Provinces for the exclusive privilege of taking whales in these waters. Legislation will probably be adopted next session to relugate this industry, from which Americans are now reaping a handsome profit. Even the coast waters between St. John and the main border are frequented by monsters of the fin-back tribe, often more than a hundred feet in length. It is too hazardous an occupation to attempt to take these leviathans by the harpoon, and so Parliament will be asked to sanction the adoption of measures such as will enable our own people to make a little money out of this industry and yet save the species from extermination.

MR. JOHN JENKINS DEAD

Well Known Resident of this County Gone to Rest

Death has again visited our county and carried of one of its most highly respected citizen, in the person of Mr. John Jenkins, of Lakehurst.

The late Mr. Jenkins was born in England, and came to this country with his family some years ago. Since that time he has lived at Peterborough, and at Lakehurst, and has become one of our most respected citizens. He leaves two daughters, Mrs. Warne, of Peterborough, and Mrs. Earl, of Lakehurst, and one son, Mr. Samuel Jenkins, to mourn his loss. His wife died some two years ago.

Mr. Jenkins was a member and a strong supporter of the English church here, and will indeed be greatly missed by both young and old.

The funeral took place on Saturday at two o'clock, to the Lakehurst cemetery, and was largely attended by his sorrowing friends and neighbors. The services at the house and at the grave was conducted by Mr. G. W Rowan, the Presbyterian student at Lakehurst. The pall-bearers were Mr. Adams, Mr. Smith, Mr Coons, Mr. Tedford, Mr Thompson and Mr. Northey.

DESPERADO SHOT

Help by Sheriff Who Afterward Organized a Posse

Mosse Jaw, MMarch 3— The final shooting of outlaw Jones is very satisfactory to residents along the big Muddy River. He was looked upon as one of the worst characters in that section, and had been a regular terror to everyone.

It is reported by Indians who have returned from this section that a sheriff called on Jones to arrest a man who was working for him for some offence. The sheriff started out with his prisoner, and several miles out he was overtaken by the outlaw Jones, who had pursued them. Jones got the drop on the sheriff, ordering him to hold up his hands. He did so and Jones then took the sheriff's horse, and disarming him, sent him home on foot, Jones returning to his cabin with the man who had been arrested.

The sheriff returned with a posse of 25 men, and started searching for Jones. It was sometime before he was located. He was taken by surprise and ordered to surrender. He immediately reached for his gun, but was fired on and shot through hthe body and head, instantly dying. His cabin contained all kinds of goods, which it is thought had been stolen

INTENSE INTEREST TAKEN IN WAR

The People All For Japan Says a Visitor

THE SITUATION IN POLITICS

No Real Test Has Yet Taken Place Regarding Mr. Chamberlain's Po icy

Montreal, March 5.—"You would be surprised to see the intense interest that is being taken in the war between Russia and Japan in all classes of society in Great Britain When I left London some few days ago, the sole topic of conversation on the streets, in the hotels and railway carriages, was the progress of the war. Neutrality is all very well, but if every country at war had the sympathy of another that sympathy, and I might say, moral support, is being extended to Japan by England today."

These are the words of Mr. Arthur Birchall, of London, to a Times representative in the rotunda of the Windsor today. Mr. Birchall is on his way to the West, where he has extensive land interests.

In reply to a question as to what effect a change of government would have on the present situation of strict neutrality in the event of the Balfour administration going to the country and meeting with defeat, Mr. Birchall said that there was very little chance of any change taking place in the present foreign policy no matter what party was in the ascendant in Great Britain. The complete neutrality of England in the present war was essential to the peace of Europe. One very suggestive feature of the feeling of the English people was to be seen in the fact that there had not been a single murmur when the naval estimates were brought down recently to the House of Commons. These estimates called for millinos of pounds sterling to increase and strengthen the navy and in spite of the fact that the recent South African war had left its mark on the pockets of the taxpayers the enormous expenditure proposed for the navy, was accepted with a grim resolve that the naval supremacy of Old England over all comers should be placed beyond the shadow of a doubt.

Speaking of a change of Government, Mr Birchall thought it very improbable that any change would take place, at all events, in the near future. "Possession is nine points of the law that governs office," said Mr. Birchall with a smile, "and if the disjointed Liberal party, leaderless and divided, can put out the present administration under the present circumstances the chance is open."

RECENT BY-ELECTIONS.

Alluding to the matter of the recent by-elections, particularly in Hertfordshire and the Normanton division of Yorkshire, where Liberal victories had been gained, Mr. Birchall said that they were no criterion as to the state of the feelings of the people. "From time immemorial by-elections in Great Britain have had a tendency to go against the reigning administration," he added. "The history of politics will prove that assertion. By-elections are generally fought out on local issues and it is only natural that the victorious side should attribute its success to the public condemnation or endorsement of a measure or policy that merely took a secondary position in the campaign. One cannot say that Mr. Chamberlain's policy is being defeated at the polls. I think I can safely say that no real test of strength between the two opposing parties in the fiscal battle has yet taken place."

"What with Chamberlain and Japan, the British reader has his hands full just now," said Mr. Birchall laughingly. "Take those two subjects out of the daily papers and you have nothing left. We are not uneasy as to the outcome of the war. We may be standing in Japan's corner, but there is no intention of taking a hand in the fight."

HOCKEY.

Arrangements have been made to have the Napanee team here on Monday night, but after being disappointed so often of late, we cannot expect them until the weather man [illegible] permission.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $64.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $8.25 per ton as cost of mining and milling. One-half of all over and above this $8.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and aid p into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

WAR CLOUD IN PARIS OMINOUS

Very Anxious Days For The Nervous in the French Capital

FRANCE NOT WITH RUSSIA

Reserves Called to be in Readiness in an Instant, Germany for the Muscovite

Paris, March 5—These are anxious days and sleepless nights for over-nervous French wives and mothers. Even the absinthe-drinking boulevardiers look serious as they discuss the possibilities of the war.

Reports are current today that the reserves have been called to be in readiness to move on twenty-four hours' notice. The fact is that they have been told not to go away for the present, but to remain ready to report in case of an emergency call.

There has been a revision of the young conscripts, who drew numbers at the beginning of the year to determine the length of their service, which should begin in April, but has been expedited. The conscripts have reported for examination March 1. This is regarded as significant.

The Times' correspondent has verified the report that all the officers of the merchant navy have been ordered to hold themselves in readiness to report to the fleet after March 6. The prefects in seaboard localities are also ordered to hasten the examination of candidates for the naval service.

A Lukewarm Ally.

Deputy Jaure's utterances and the attitude of the conservative French press are making it clear to Russia that France is a lukewarm ally. Germany has accurately guaged the situation and is doing her utmost to win Russia's good will, proferring sympathy and manifest interest, hoping to break up the Franco-Russian alliance.

Russia is lending a willing ear, knowing that this course is sure to startle France into a realization of her existing treaty obligations. In order to stem the tide the French ministry is about to make a show of preparedness in case Russia calls upon her. Hence the order to the reserves and the hurried revision of the conscripts, although France has no real idea of fighting unless some overt act against Russia, committed by some other power, compels her to aid her ally or forever relinquish hope of alliance with any other nation.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble on my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

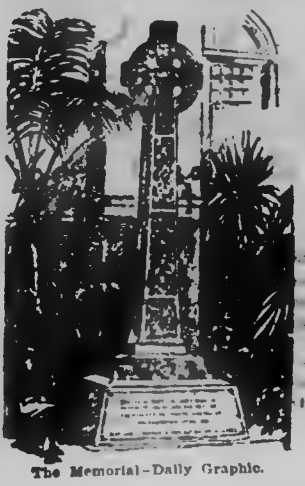
Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it w not permanently cure.

An Engagement Extraordinary.

According to the Paris correspondent of the London "Telegraph," a determined suitor recently found a new way of using the motor-car for matrimonial purposes. The object of his affection was willing to wed him, but her parents were obdurate. He pretended to give up hope, and to be reconciled to the idea of being merely a friend of the family, and he took out the girl and her father for an automobile drive to Havre. At a dangerous part of the road he suddenly put on full speed, and the car sprang away at a terrific rate. The girl sat still and showed no fear, but her terrified father shouted to the man who wanted to be his son-in-law to stop. "Consent to my marriage with your daughter" was all the motorist replied. Still the car tore along, and if any obstacle had appeared in the road at least three fatalities would have occurred. "Stop! We shall all be killed!" the girl's father continued to cry. "Most certainly we shall," said the determined young man grimly; if you don't consent at once I am going to send the machine into the ditch, and at this rate that means quick death." As he spoke he imparted violent lurches from side to side to the car. "I consent!" gasped the now vanquished parent. Immediately the car slowed down, and the rest of the journey was done at a steady touring pace. But during the motor's previous mad career a policeman had jotted down its number. When the girl's father, to whom the machine belongs, appeared in court to answer to the summons, his future son-in-law accompanied him, and looked exceedingly pleased with himself. When a fine of sixteen francs was imposed the younger man said he would pay it himself with pleasure. He confided to the magistrate that the day had been named.

Magersfontein Monument.

On Saturday, Oct. 17, a replica of the monument erected at Magersfontein to the memory of the Highland soldiers who fell in South Africa was placed in the Winter Garden of the People's Palace at Glasgow Green. The memorial is in the form of an Ionic cross, with Celtic ornamentation, and stands about 20 feet in height. It was originally intended that Mr. Chamberlain should unveil the memorial on the occasion of his recent visit to Glasgow, but, owing to the limited time at his disposal in Glasgow, he was unable to do so. The unveiling was carried out without any formal ceremony. The accompanying illustration is from The Daily Graphic of Oct. 10



The Memorial—Daily Graphic.

Inspected the Frontier.

The London Daily Chronicle says:—The tour which Lord Kitchener has just completed on the Northwest frontier of India is the most complete ever undertaken by a Commander-in-Chief. He has inspected the whole of our frontier line from Quetta to Gilgit, and examined every fort and point of natural vantage in the country, so that he is now in a position to gauge exactly the chances of a Russian invasion. It is stated that Lord Kitchener has found our forts defended as usual in large measure by the obsolete muzzle-loaders, and has given orders for their replacement by quick-firing guns. He has also discovered our telegraphic and signalling methods to be out of date. Lord Kitchener has just introduced an important and far-reaching scheme for renumbering our Indian army throughout, and he is credited with the intention of reorganizing it completely and putting it on a war footing. When two men of such energy as Lord Curzon and Lord Kitchener get together at the head of affairs, reforms are at hand, and these are now in progress in India.

To be Trained in Winter.

British papers of a recent date contain details of a scheme of winter training for the troops in the first army corps issued by Lieut.-General Sir John French, to be put into operation at once. Everything contained in the scheme is on a progressive scale, the training commencing with company, squadron and battery drill, and route marches to be carried out twice a week by the first and second divisions. These marches will not be a matter of covering so many miles of road, for outposts and other field exercises and musketry field practices will be combined with them. No man is to be exempt from the marches, all employed on garrison duty being relieved for the purpose of attending. Musketry is to form a most important feature in the winter training, the infantry being instructed to fire at least twenty rounds per month at various practices on the ranges. Bad shots and recruits are to perform two exercises per week on the miniature ranges in barracks, and judging distance practice is to be carried out fortnightly. In the very cold weather soup and fires will be provided on the ranges. The Royal Engineers will carry out practical field and defensive works. War games for the officers are to be played, staff rides, field sketching, and reconnaissance conducted periodically, and instructional practice in field dressing and stretcher work undertaken.

The Policeman's Crossing.

"What sort of vehicle gives me the most trouble?" said the policeman who acts as convoy to the shopping women at a crowded corner on Sixth avenue. "First, delivery wagons from the big stores, for they are always rushed along, and next the private carriages, drawn by prancing horses, with the coachman a-dreaming how fine he is and how fine the people are he has inside. But from horse car to truck all give trouble enough. Yet I have not had a person hurt in the two years I have had the crossing.

"My first rule is that it is always safer to cross behind a vehicle than before the horses' heads, so you don't see me doing the bridle grabbing act very often. Another thing I believe is that one-half the women, although they rush past in such a businesslike way, are only out to kill time, and with no real thought of buying anything So I don't mind holding a group of 'em back to let a wagon or a car pass, for they might as well waste five minutes here as in turning over goods at a shop counter.

"Fine days my work is always the easiest, for every one moves quickly then, and shoppers, drivers, and even the horses are good-natured. Rainy, foggy days are the worst, for the dirtier the walking the more women there are out, for some reason that I can't understand. Then they all carry umbrellas to push into my face and into each other's faces, and between opening and closing cabs for women at the car steps and keeping the wet and rain-blinded horses from walking on 'em, I have my hands full. And I'm regarded as a sort of walking directory, besides. I have to know the exact location of every store, big or little, theatres, ferries, railroad stations, and countless other things. Sometimes I think that when a shopping woman isn't shopping she is thinking up questions to ask the policemen. But women are too cute to say a word unless safe on the sidewalks which is one reason why it is easy to pilot them over the crossing."

Barmaids in London.

There is every indication that the question of the employment of barmaids is about to come to the front in London—not, of course, with the same thoroughness as it did, for instance, in Glasgow, but at any rate with sufficient assurance that the first real step forward has been taken in a big movement.

The authorities concerned in London with the employment of barmaids are the Licensing Magistrates, who control licensed premises, and the Theatres and Music Halls Committee of the London County Council.

The former body has been memorialized against the employment of barmaids by the National Union of Women Workers. The latter has been similarly approached by the British Women's Temperance Association. It is estimated that there are between 5,000 and 6,000 barmaids in London.

He—So the engagement is broken off?

She—Yes. He told her he thought she should stop reading novels and read something more substantial, something that would improve her.

He—Well?

She—Well, the idea of a man intimating to his fiancee that she could be improved in any way!—Philadelphia Press.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:
J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - Treasurer

Trustees
J. R CHAPTON, E. P. CHAPTON, CHAR[illegible]S REAUME,
A. J. SANBORN, ALEX. J. CHAP[illegible]ON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

ARTHUR S GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIS
WILLIAM GARLICK, ARTHUR S GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which mprises three claims located in the San Juan District, Hindsdale County, lorado.

Over $25,000 has been spent on this property in getting it in its pre- t condition, which is as follows:—Private wagon road from main road up mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in feet—it would be hard to find a better made tunnel in the whole state of lorado. Two good houses large enough to accommodate fifty men. ere are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from uth of tunnel, and all three are in a space of less than four feet. Mining per s claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Cop , 16.05 per cent.; Gold 6.02 ozs; Silver 92 40 ozs. Total value $90.00. lue of ore in main vein in the shaft and growing richer as depth is attained. pper, $6.40; Gold, $6 82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and nd everything as above. We have had the property surveyed, and are w working on the spur vein in the tunnel, taking out high grade ore. We ll also continue the tunnel so as to cut at depth the above immensely h vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is dy concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second o other mine in Lower Colorado. The first class ore having a value of 0.00 per ton, as it was assorted and sold. We believe a little money iciently expended upon the property will prove it to be as valuable as it ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San n District to-day (and most valuable mines) were abandoned about the e time work was discontinued upon this property and that they remain- so for years Notably the old "Hotchkiss" and the "Camp Bird" owned Thos. Walsh, recently sold for $5 500,000 (now claimed to be worth ,000,000). About six years have elapsed since he purchased it The "Hotchkiss" now the "Golden Fleece," while not as valuable, has been of the great producing mines of Colorado New men are taking hold of the old mines and meeting with great success and with a smaller outlay they avail themselves of the benefit of the money already expended. We not know of anything in the shape of a promising property in the whole e of Colorado where the same thing can be done to as good an advantage in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M E., formerly of Middletown, Conn., who was original discoverer of the Calumet and Hecla mine of Lake Superior, de a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that will co-operate with us in developing same, in the way of producing a dend-paying mine in the near future.

IGH CLASS INVESTMENT

ZACUALPA RUBBER PLANTATION COMPANY

rporated Under the Laws of the State of California.

alualpa Rubber Plantation is sit- in the best location in Mexico for ltivation of rubber. It has been for a great many years as a ship of rubber land and subse experience has shown that it is to all that has been claimed for affairs of the company are in de of men of undoubted integrity gh reputation as successful men ness. To those seeking a safe in- t which will secure a good in- or life, this proposition offers a ble opportunity

es in La Zacualpa Rubber Planta- re not capital stock of a corpora- that carry none of the responsi- s and obligations, or liability to ment of capital stock; but repre- n undivided interest in the planta- itself.

twelve thousand acres comprising antation are divided into twelve nd shares, each share represent- ne acre of land, and the holders ares in La Zacualpa Rubber Plan- re the actual owners of one un d acre of land, for each share held, a guarantee expressed upon the ate by La Zacualpa Rubber Plan- Company, under its official seal, nt two hundred or more rubber per acre for each share sold, and e for same for a period of five and at the expiration of that time ther the first harvest and deliver et proceeds thereof to the share- hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to a shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

other words, La Zacualpa Rubber ation Company sells to each share- one undivided acre of land in La lpa Rubber Plantation, with two

AS THE FIORDS OF NORWAY.

Newfoundland's Picturesque Coast Line Described by an Enthusiast—May Be in Canada Some Day.

Newfoundland has a unique, important and commanding position. It is at no great distance from the North American continent, and practically stretches across the Gulf of St. Lawrence. In shape it is quite roughly triangular, and its longest distance across in any direction is only about 216 miles In approaching the island one is impressed with the thought that it is pretty completely 'rock bound,' which to a great extent proves to be a stubborn fact, but so varied in character as to render it exceedingly picturesque and interesting, says W. H. Yeamans in Country Gentleman.

The entire coast is indented with bays of various shapes and sizes—in some instances these extend so far into land as to almost meet from different directions, leaving only a very narrow isthmus for the connection of the land. In the larger of the bays there are many islands, giving in some instances as great variety and equal beauty as is found in the Thousand Islands of the St. Lawrence River. The general surface is as varied as the coast line, and presents almost every imaginable condition of land surface, mountains, hills and valleys abound, gorges, gulches and ravines, through which rush streams of water; lakes and rivers are numerous, and add to the beauty of the general landscape. If there is enjoyment in traversing and exploring the fiords of Norway, it can be duplicated in sailing in and about the bays and coast indentations of Newfoundland.

If the coast is rough and rugged, it is also picturesque and grand almost beyond description in some instances, nor is there uniformity in any line; in one case the cliffs and mountains will present a surface of bare rough rock; in another there will be sufficient soil upon the rock to sustain a growth of forest that presents a beautiful appearance in the various shades of the foliage; in still another case the hills will be rounded in form, well covered with soil, that has an abundance of herbage for cows or goats.

Within a few years there has been established various lines for steamboat travel, taking in all the principal bays, along a greater part of the coast of the island to Nova Scotia and to Labrador. The trips on and about the bays can be taken upon good steamers in a leisurely manner with stops between if desired.

Not a great time back in the past, settlements were confined almost exclusively to the seacoast, where the chief industry, fishing, was carried on, and is to a great extent at the present day; but quite recently little villages have sprung up in the interior on the line of the railway, induced by the establishment of the industries of lumbering and mining, the latter of which is assuming great importance.

Because of the interesting natural features of Newfoundland, taken in connection with the fishing and mining industries, that are an interesting study, and considering the delightful climate that the summer months afford, makes it a delightful resort for the weeks or months when the extreme heat of New England or middle states cities becomes almost unbearable. It is then that a trip upon one of the bays calls into use medium weight clothing and wraps, as experience has proved.

A. W. Wright Reminiscent.

Mr. A. W. Wright, Conservative organizer, who was a resident of Dufferin in 1854, half a century ago, was present at the recent annual gathering of Dufferin Old Boys in Toronto. President Kyles called upon Mr. Wright for a speech, and he regaled the audience with reminiscences of those early days, when the pioneers were hewing out homes for themselves in the woods. He remembered distinctly when the long-drawn howl of the wolf was a common sound in Dufferin county. The settlers of Dufferin were a sturdy rugged race, and no wonder was it that their sons had achieved success and fame in the various walks of life. Mr. Wright referred to his old school teacher, Dr Frame, of Mono Centre, who had died at the age of 100 years. A kindly man he was, and only once was known to thrash a boy. He had not a first-class nor yet a second-class certificate, but he was second to none of the teachers of the present day, although there was no James L. Hughes to look over them at that time

Death of Abbe Casgrain.

Rev. Abbe H. Raymond Casgrain, the well known author of valuable literary and historical works, and formerly president of the Royal Society of Canada, died at Quebec recently, aged 75. He was, according to Morgan, a son of the late Hon. Charles E. Casgrain, and brother of Senator Hon. Charles E. Casgrain. Born at River Ouelle, December 16, 1831, he was educated at Ste. Anne's College, Quebec, and at the Quebec Seminary. He was for a time priest at the Basilica, Quebec, visited Europe in 1858, 1867 and 1873 in quest of historical material, and found many valuable manuscripts relating to early Canadian history, among them the journals and papers of Marechal de Levis, and some personal papers of Montcalm. In 1874 he was compelled, owing to a serious affection of his eyes, to give up ministerial work. In 1877 he received the degree of LL.D. from Laval, and in 1889 was President of the Royal Society of Canada.

Tree Within a Tree.

At Moulton, South Lincolnshire, England, there is a willow tree which in consequence of having been beheaded and having reached an old age has become hollow and rotten. From a seed which has dropped into the hollow a healthy sycamore tree has grown to a height of ten feet.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 200 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

Deadly "La Grippe"

Or Epidemic Influenza is Caused by an Air Germ. The Most Scientific Remedy is Catarrhozone

Two years ago, the medical journals commented widely on the marvellous success of Catarrhozone, which assisted very largely in stamping out the epidemic raging at that time. Cases that had resisted all other treatment were at once relieved and through the great healing powers of Catarrhozone further progress of the malady was arrested.

It is doubtful whether in the whole range of medicine a more lasting cure can be found. If a patient has any warning of the approach of La Grippe he has only to inhale the germ killing vapor of Catarrhozone a few times daily and escape entirely.

Even as a preventive of colds and catarrh it is a wise precaution to always carry a Catarrhozone Inhaler in your pocket. At the first shiver or sneeze you can ward off an impending attack by merely inhaling a few breaths of Catarrhozone. Fatal consequences can often be avoided in this way. The Inhaler is beautifully finished and made entirely of hard rubber. It can be conveniently carried in the vest pocket ready for use in church, at work, in the theatre, street car, anywhere, at any time. The complete Catarrhozone outfit contains a large bottle of inhalant, sufficient to keep recharging the inhaler for two months. It costs $1.00 and is guaranteed to cure. Sold by all druggists or sent direct to your home by mail if the price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford, Conn. U.S.A.

Watch Lost

Lost, on Saturday last, a lady's silver watch. The finder will be suitably rewarded by leaving it at Times Bookstore.

Lady's Wristbag Found

On Saturday night, on George st., a lady's wristbag, containing a small sum of money. Loser can have it by calling at Times Bookstore.

C. O. H. C.

Doctor Young will leave for Toronto this week to represent the local Canadian Order of Home Circles, at the annual meeting of the Supreme Circle to be held in that city.

Lost

A ladies' hunting case gold watch with initials, "I M." Lost at the carnival or between the rink and the Munroe House. Finder will be rewarded by leaving the same at the Munroe House. 553t

Must Go

Six handsleighs at 25 cents will be sold for 18 cents; four 40 cent sleighs for 27 cents; two 75 cent sleighs for 45 cents, and two, high beam, steel runners and beams, regular $2.50 sleigh, for $1.50. Times Bookstore, Market Block.

Accident in Otonabee

On Friday afternoon last, while walking along the icy road, near his father's residence, Miss Throop, daughter of Mr. John Throop, of Otonabee, suddenly slipped and fell, sustaining a compound fracture of the leg below the knee.

Barnardo Girl's Death

On Friday afternoon last a Barnado Home girl, Dorothy Tate, aged thirteen years, died in the Hospital from Bright's disease. The funeral took place from the Home at four o'clock on Saturday afternoon to the Little Lake Cemetery.

Potatoes $160 Each

A despatch to Saturday morning's World reads as follows;—

London, March 4—There was considerable excitement in Peterboro market over the sale of a specimen of the famous Eldorado potato.

The tuber weighed a little under half a pound and was disposed of at the record price of £80 .

There certainly would be excitement in Peterborough market if potatoes rose to such a price.

—The St. Peter's Total Abstinence Society intend holding a concert on St. Patrick's Day.

The attendance at the
Peterboro' Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—The Board of Education will meet this evening.

—There was no police court again on Saturday morning.

—The regular meeting of the Town Council will be held this evening.

—There will be a special Board meeting of the Y.W.C.A. this afternoon at 3 o'clock.

—An open meeting of the Royal Templars will be held tomorrow evening, commencing at 8 o'clock.

—The T.A.S. Literary Society will give another of their popular 17th of March concerts which will be looked forward to by many.

—The regular monthly meeting of the Ministerial Association will be held in the Y.M.C.A. Parlors at ten o'clock this morning.

—A silver watch, picked up on the street the other day, has been left with the Chief of Police, until it is claimed.

—At a meeting of the Young Men's Guild of George street church, tomorrow evening, Mr. J. Jeffries will deliver his lecture, "A Trip Through Paris."

—A crow has been seen near Lakefield and someone has suggested that this is a sure forerunner of spring. The crow certainly must have received an excellent start.

—Easter Sunday is fixed as the first Sunday after the first full moon after the vernal equinox. Lent contains 40 fast days, and six Sundays, which are not fast days, making in all 46 days.

—A public meeting of the British and Foreign Bible Society will be held in Murray street Baptist church this evening, at which the following speakers will deliver addresses—Revs. Potter, Jolliffe, Davidson and Brace.

—Col. P. J. Clunan is the newly elected president of the Peterborough Turf Club. If he was only on this side of Lake Ontario we might elect him President of the United States. He's a loyal gentleman from tip to tip—Horse World.

—Mr. Williamson of the Y.M.C.A., spent a portion of last week in the Queen City, where he delivered several addresses on Educational Work at the Provincial Y.M.C.A. School of Instruction for Physical Directors and General Secretaries. This is the second year of the school, and Messrs. Maguire and Mann of Peterborough, are in attendance.

—That one of the farmers, at least, has tried to take advantage of fuel in order to fatten his own pocket, was exemplified on Saturday's market. He had brought in a load of cordwood and albellied it 130 feet. The market clerk, on measuring it, found the contents to be only 124 cubic feet. The farmer asked $8 for the load, and he didn't even feel ashamed.

—In a certain town in Eastern Ontario a young man, who holds a position as beginner in a printing office, developed a fondness for a clergyman's daughter, and was rather persistent in his attentions to her. To help himself in her father's estimation, the lover attended the church to hear the father of his dearest preach. The text was, "My daughter is grievously tormented with a devil." Somehow, the young man thought the text had a very personal reference and ceased his visits.

Yesterday afternoon at the Y.M.C.A. Hall, Mr. S. Aptin delivered a most interesting lecture on the subject, "Sports that Kill." The genial physical instructor pointed out the great necessity of gymnastic exercise, and in an able manner condemned the common evil practices of many of our young men, and emphasized the fact that mental proficiency would of a necessity follow physical development.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Eileen Fair is visiting Millbrook friends.

—Mr. E. S. Clarry, spent Sunday with Hastings friends.

—Miss E. Rutherford, of this city, visited Lakefield friends last week.

—Miss C. Noyes, of Peterborough, spent last week among Lakefield friends.

—Rev. Dr. Torrance conducted a preparatory service in Campbellford on Friday last.

—Miss W. Miller, of Keene, is spending a few days with her sister, Miss Florence, of this city.

—Miss Ruby Williams has returned home after a visit of four months with friends in Pontypool.

—Mr. J. J. Lundy, of this city, spent a few days in St. Catharines last week.

—Mr. and Mrs. Doherty, of Hastings, spent Sunday in town, the guests of Mr. Jas. Butler, of the Fifth Ward.

—Mr. Wm. Fleming is visiting his Peterborough friends. Mr. Fleming is an aeronaut of some repute, and will give an exhibition here next summer—if we have any summer.

—Miss Edith Billings, who has been visiting her aunt, Mrs. James Jackson, of 91 Smith street, left for her home in the Queen City on Saturday evening.

—The date announced for the marriage of Rev. Derwin Owen, curate of St. James' Cathedral, and Miss Norah Jellett is the twenty-seventh of next month—Saturday Night.

—Hon. J. R. Stratton gave a dinner last evening in the Speaker's chambers, in honor of Hon. Mr. Brodeur, Minister of Inland Revenue.—Toronto World.

—Rev. Father Galvin, of St. Peter's Cathedral, Peterborough was the guest of Rev. Father O'Sullivan at St. Mary's presbytery, Lindsay, for a few days last week.

—Dr. R. S. Viaundierbourg, a recent arrival from Germany, visited his sister, Mrs. S. Ray, of this city, last week, and left on Saturday morning for New York, from which point he purposes sailing for England on the 18th.

—Messrs. R. R. Hall and R. B. Rogers of Peterborough, visited Ottawa on Friday last, in order to wait upon the Department of Railways and Canals, in regard to the terms upon which the dams of the Trent River could be transferred to the Dominion Government.

SUCCESSFUL YEAR'S BUSINESS.

The Dominion Permanent Loan Company's Annual Meeting

One of the most progressive and prosperous loan companies in Canada, the Dominion Permanent Loan Company, held its thirteenth annual meeting at their head offices, 12 King street west, Toronto, on Wednesday, March 2nd. The directors' report was a revelation of a most gratifying outcome of the operations of the company during the past year, and everything points to a continuation of this success, during the present year. A large number of shareholders was present, and the energetic President, Hon. J. R. Stratton, presided, in his usual excellent manner.

"The indefatigable president has spared no pains to insure the prosperity and progress of this popular financial corporation, and, that his efforts have been most successful, is readily seen from the flourishing condition of the company, as shown by this satisfactory annual report. This yearly statement showed that profitable employment had been found for all the available funds of the company, with the result that the earnings for the year permitted the payment of dividends amounting to $68,778.21, and the transfer of $45,000 to the reserve fund, which now stands at $115,000. The amount placed at the credit of this fund is $15,000 in excess of the corresponding amount for the previous year. The total surplus of assets over liabilities amounted to $1,429,432.59 on December 31st, 1903.

According to the remarks of the President, the future of the company is unusually bright. Its organization for its special work in the more important Provinces of the Dominion, and the rapid advance of settlement in Newer Ontario and the North-West, with the attendant development of the great national resources, promises a continuously expanding field for the profitable operations of the company.

The following officers were elected for the ensuing year; President, Hon. J. R. Stratton; Vice-President, T. P. Coffee; Directors, Messrs. D. W. Karn, C. Kloepfer and F. M. Hyland.

Audit Completed

Messrs. Wm. O'Brien and Capt. Geo. Bennett, have completed their audit of the accounts of the County Council, and have found everything most satisfactory. The work of auditing the County books is a most tedious one, and the above gentlemen are to be complimented on performing their duties in such a short time.

A Snap

Very best ping pong sets will be sold while they last for 45c. a set. The size and quality of this set has positively never been sold before for less than 85 cents. Parties ordering by mail may have set reserved, or we will send by express prepaid for 10 cents extra. Times Bookstore, Market Block.

All Accounts Met

In spite of a generally expressed opinion that the fourth of March would find many bills maturing unpaid in Peterborough, inquiry at the local banks gives the information that the paper has all been well met. In fact, the promptness with which the merchants have met their payments has been a matter of some surprise to local financiers. It was feared that the weather of the last two months had affected business to such an extent that the merchants would find some difficulty in making their payments, but while the months of January and February are considerably behind the corresponding months in 1903, the fall and Christmas trade was so satisfactory and so much larger than any previous year that the dullness of the last two months has not been seriously felt. With the opening of spring, business will improve very materially, and business men look for an unusually good summer's trade.

SATURDAY'S MARKET

Small Attendance and High Prices—Eggs Take a Drop

Saturday's market was again small but few farmers offering produce for sale. Prices in most lines still ran high, although eggs and butter were somewhat lower, the former selling for 25 to 27 cents per dozen, and the latter bringing 25 cents to 30 cents per lb. Fowl was still above the ordinary price and half-starved looking chickens brought from 75 cents to $1; turkeys were worth $1.50 and 1.75 although a few sold as high as $2. There were few geese on the tables, and they sold from $1 up. Beef was worth 5 and 6 1-2 cents per lb, pork 8 and 9 cents, and mutton brought 7 cents.

—The Centenary celebration of the British and Foreign Bible Society was observed in all the Protestant churches throughout Canada yesterday.

"I thank Dr. Pierce for the kind advice he gave when I wrote to him."

"I am thankful to the friend who first recommended your medicine," writes Mrs. Annie M. Brook, of Smithfield, Fayette Co., Pa. "We have a twelve pound baby, three weeks old. I took three bottles of 'Favorite Prescription' before baby came, and the time was only one hour and a half. Have had five children, and before this always had a severe time, lasting two or three days, and never was able to do any work for about two months afterward. Now I am doing all the work for four children. My friends say I look better now than ever before. We told one of my sisters to take 'Favorite Prescription,' which she did, and when her child was born the time of suffering was very short. She has better health now than since her marriage, some years ago. We cannot praise Dr. Pierce's medicines enough. I thank Dr. Pierce for the kind advice he gave when I wrote to him. Whenever I see other women suffering I tell them about your wonderful medicines."

The benefits resulting from a consultation by letter with Dr. Pierce are testified to by thousands of grateful women who have been made new women by his medical advice and fatherly counsel given absolutely without cost or fee.

Sick and ailing women, especially those suffering from chronic diseases, are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Favorite Prescription is the best medicine for the cure of womanly ills. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness. It is the best preparative for maternity, giving the mother strength to give her child, and making the baby's advent practically painless.

Dr. Pierce's Favorite Prescription contains no alcohol and is entirely free from opium, cocaine and all other narcotics.

The Common Sense Medical Adviser, 1008 large pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.
